(c) *Additional recommendations.* The Government will advance the full 50 percent up to $40 per acre at the time the bulldozing or other heavy clearing operation is completed. The practice is considered substantially completed at this time. The farmer actually earns this payment when he also completes the breaking operation and the land is ready for tillage. Farmers should contact the Bureau of Land Management Fire Control people before they burn. They should leave adequate firebreaks when clearing and generally clear with the ultimate burning in mind.

(d) *Technical responsibility.* Soil Conservation Service.

(e) *Reference.* ACP Practice Guide Sheet for Land Clearing.

Maximum Federal cost-share. 50 percent of the cost, but not in excess of $40 per acre.

§ 1104.846 *Practice 6: Installation of facilities for sprinkler irrigation to provide vegetative cover for soil protection on rolling land*—(a) *Purpose.* This practice is applicable where primary use is for permanent grassland on rolling land.

(b) *Requirements.* The installation must be in accordance with written plans approved by the Soil Conservation Service technician and the county committee. The power unit must be of capacity adequate to supply uniform distribution. Nozzle openings shall be of a size to hold application rate within intake capacity of soils to be irrigated.

(c) *Additional recommendations.* None.

(d) *Technical responsibility.* Soil Conservation Service.

(e) *Reference.* ACP Practice Guide Sheet for Sprinkler Irrigation.

Maximum Federal cost-share. 50 percent of the cost of pipe and fittings.

§ 1104.847 *Practice 7: Constructing or deepening wells for livestock water*—(a) *Purpose.* This practice is to help provide soil protection through the adoption or maintenance of livestock farming systems and increased acreages of permanent vegetative cover.

(b) *Requirements.* Homesteaders are eligible only after they have completed their homestead cultivation requirements. The farmer must show that the well will lead to the establishment or continuance of livestock on the farm. Standards and requirements shall be established by the county committee. Even though the well may be constructed at the headquarters to prevent freezing during the winter months, it is not to be used primarily for household utility. The well and pumping equipment must be large enough to provide the minimum amount of water for the particular livestock enterprise. Adequate storage facilities must be provided and pumping equipment installed except for artesian wells.

(c) *Additional recommendations.* None.

(d) *Technical responsibility.* County ASC Committee.

(e) *Reference.* None.

Maximum Federal cost-share. 50 percent of the cost of drilling or deepening the well, and casing, including installation of the casing.

§ 1104.848 *Practice 8: Seeding, planting, or interplanting forest trees or shrubs or improvement of a stand of forest trees on farmland for purposes other than the prevention of wind or water erosion*—(a) *Purpose.* This practice includes (1) thinning, (2) pruning crop trees, (3) removing or killing competing or undesirable vegetation, and (4) seeding, planting, or interplanting desirable trees or shrubs.

(b) *Requirements.* Technical assistance shall be utilized as available. The area must be protected from fire. Seedlings must be protected from grazing and should be protected from browsing.

(c) *Technical responsibility.* Forest Service.

(d) *Additional recommendations.* None.

Maximum Federal cost-share. 50 percent of the cost, including land preparation.

§ 1104.849 *Practice 9: Planting or interplanting forest trees or shrubs on farmland to prevent wind or water erosion*—(a) *Purpose.* This practice includes the planting or interplanting of desirable trees or shrubs for the prevention of wind or water erosion (1) in windbreaks, (2) in shelterbelts, (3) along gullies, and (4) along streambanks.

(b) *Requirements.* Technical assistance shall be utilized as available. The area must be protected from fire. Seedlings must be protected from grazing and should be protected from browsing.

(c) *Technical responsibility.* Soil Conservation Service.

(d) *Additional recommendations.* None.

Maximum Federal cost-share. 50 percent of the cost, including land preparation.

§ 1104.850 *Practice 10: Developing springs or seeps for livestock and/or grassland irrigation water to encourage better grassland management*—(a) *Purpose.* This practice is to encourage better grassland management through providing water supplies for livestock and/or grassland irrigation.

(b) *Requirements.* Site selection must be approved by a qualified technician and plans must be approved by the Soil Conservation Service. The spring or developed seep must be protected from livestock. Cutoff walls must be of impervious material. Water developed must be piped to a suitable utilization or storage structure. Appreciable use of this water for other than livestock and/or grassland irrigation shall be considered as defeating the purpose of this practice.

(c) *Additional recommendations.* None.

(d) *Technical responsibility.* Soil Conservation Service.

(e) *Reference.* ACP Practice Guide Sheet for Developing Springs and Seeps.

Maximum Federal cost-share. (1) 50 percent of the cost of excavating earth, rock, and gravel.

(2) 50 percent of the cost of materials used in the permanent structure, excluding forms.

§ 1104.851 *Practice 11: Constructing or sealing dams, pits, or ponds for livestock and/or grassland irrigation water*—(a) *Purpose.* These dams, pits, or ponds are to store water to encourage better grassland management by (1) providing water for livestock, and/or (2) providing water for grassland irrigation (see practice 6 (§ 1104.846)).

(b) *Requirements.* Design and construction must conform to Soil Conservation Service specifications and be supervised by a qualified technician. Earth fills must be thoroughly compacted and core walls extended to nearly impervious material. Downstream slopes shall be not less than 3 feet horizontal to 1 foot vertical. Upstream slopes shall not be less than 4 feet horizontal to 1 foot vertical. Necessary fencing and seeding or sodding to protect the dam and pond must be accomplished. Dams shall have a spillway capacity adequate to carry off surplus water. The spillway must be designed by a qualified engineer. If used for livestock water, a suitable water trough must be installed with pipe from pond to trough. Appreciable use of this water source for other than livestock or grassland irrigation shall be considered as defeating the purpose of this practice.

(c) *Additional recommendations.* None.

(d) *Technical responsibility.* Soil Conservation Service.

(e) *Reference.* ACP Practice Guide Sheet for Dams and Ponds.

Maximum Federal cost-share. (1) 50 percent of the cost of earth moving.

(2) 50 percent of the cost of materials in the permanent structure, excluding forms.

§ 1104.852 *Practice 12: Streambank protection, channel clearance, enlargement or realinement, or construction of levees or dikes, to prevent erosion or flood damage to farmland*—(a) *Purpose.* This practice is to prevent streambank erosion and flood damage to farmland.

(b) *Requirements.* Plans for each installation must be designed by a qualified technician and approved by the Soil Con-

servation Service and county committee. The Soil Conservation Service is responsible for laying out and supervising the installation. This practice shall not be approved in cases where there is a likelihood that it will create an erosion or flood hazard to other adjacent land.

(c) *Additional recommendations.* None.

(d) *Technical responsibility.* Soil Conservation Service.

(e) *Reference.* ACP Practice Guide Sheet for Streambank Protection.

Maximum Federal cost-share. 50 percent of the cost.

Done at Washington, D. C., this 8th day of August 1958.

[SEAL] E. L. PETERSON,
Assistant Secretary.

[F. R. Doc. 58-6539; Filed, Aug. 13, 1958; 8:53 a. m.]

TITLE 18—CONSERVATION OF POWER

Chapter I—Federal Power Commission

Subchapter D—Approved Forms, Federal Power Act

[Docket No. R-164; Order 207]

PART 141—STATEMENTS AND REPORTS (SCHEDULES)

ANNUAL REPORT FOR ELECTRIC UTILITIES AND LICENSEES

AUGUST 7, 1958.

In the matter of amendment of rules prescribing the form and filing of Annual Report, FPC Form No. 1 for Electric Utilities and Licensees, Classes A and B.

The Commission has under consideration herein the amendment of § 141.1 of the Commission's regulations under the Federal Power Act, "Annual Report, Form No. 1, Electric Utilities and Licensees (Classes A and B)" (set forth in Part 141—Statements and Reports, Subchapter D—Approved Forms, Federal Power Act, Chapter I of Title 18, Code of Federal Regulations) so as (1) to prescribe as a part of that section three new subsections and (2) to prescribe a number of new and revised schedules as a part of that Annual Report as presently constituted.

The schedules affected are as follows:

FPC Form No. 1, Schedule Heading	*FPC Form No. 1, Page No.*
General Instructions.[1]	
Notes to Statement of Income	20 (New)
Electric Plant in Service	60, 62
Construction Work in Progress—Electric	64
Reserve for Depreciation of Electric Plant	68
Miscellaneous Electric Revenues	76 (New)
Interchange Power	86
Electric Energy Account	91
Steam Generating Stations	96-97
Transmission Lines Added During Year	104

[1] The proposed revision in the General Instructions was published inadvertently as a part of the forms attached to the notice of proposed rule making in Docket No. R-163 which was published in the FEDERAL REGISTER on February 8, 1958 (23 F. R. 854-5). See footnote 1 appearing in Order No. 199 issued on March 17, 1958, in Docket No. R-163 (23 F. R. 1888 at 1889, 19 FPC 341 at 343).

General public notice of this proposed rulemaking was given by the publication of notice in the FEDERAL REGISTER on February 12, 1958 (23 F. R. 912), and the mailing of notices to interested parties including State and Federal regulatory agencies.

New paragraphs (a), (b), and (c) to § 141.1, hereinafter adopted, would specifically prescribe, in textual form, FPC Form No. 1 as the Annual Report for Classes A and B electric utilities and licensees, and others, and the requirement for filing that report; thereby codifying and restating the reporting and filing requirements presently promulgated and making that section of the Regulations parallel in form to §§ 141.2, 141.3, and 141.4 of the regulations covering other classes of respondents.

The exact nature of each of the revisions to the general instructions and the schedules hereinafter adopted is fully set forth on the accompanying forms. Generally, however, they will result in the reporting of data not heretofore reported. This action of the Commission complements the action taken in Order No. 199, issued March 17, 1958, in Docket No. R-163 (23 F. R. 1888) wherein certain other schedules of the same Form No. 1 were revised so as to reduce existing reporting requirements.

In response to the notice above referred to comments or suggestions have been received from nine utility companies. The limited comments received indicate a general acceptance of the proposed changes. One expressed satisfaction with the proposed changes without further comment. Five utilities protested the proposed changes in the schedule, Transmission Line Statistics, pp. 102-3.[2] The objections are based on cited difficulties to compliance. Accordingly, the revision proposed in the notice has not been adopted. Others made suggestions for clarifying changes which, for the most part, have been adopted.

The proposed revisions as originally set forth in the notice of proposed rulemaking, herein, were coordinated with the industry representatives of the Advisory Council on Federal Reports and with the Committee on Accounts and Statistics of the National Association of Railroad and Utility Commissioners. Since the revisions herein adopted do not involve any significant modifications of those originally proposed, no further coordination with those groups appears necessary.

The Commission has given careful consideration to all of the data, views, comments, and suggestions submitted with respect to the proposed amendment of § 141.1, and the revisions to Annual Report Form No. 1, and to the extent provided in the order has reflected such suggestions, and to the extent not reflected in the order the suggestions and comments are rejected.

[2] Transferred from Docket No. R-163 for consideration herein. See ordering clause (B) of Order No. 199 cited, supra fn. 1.

The Commission finds: Upon consideration of the proposed amendments, comments, and suggestions, adoption and promulgation of the proposed amendments, modified as hereinafter ordered, are necessary and appropriate for the purposes of administration of the Federal Power Act.

The Commission, acting pursuant to the authority granted by the Federal Power Act, particularly sections 3 (15), 4 (a) through (c), 301 (a), 302 (a), (b), 304, 309, and 311 thereof (49 Stat. 838, 839, 854, 855, 858, 859; 16 U. S. C. 796 (13), 797 (a) through (c), 825a, 825c, 825h, and 825j), orders:

(A) Section 141.1 *Annual report, Form No. 1, electric utilities and licensees (Classes A and B)* of Part 141—Statements and Reports (Schedules), Subchapter D—Approved Forms, Federal Power Act, Chapter I of Title 18, Code of Federal Regulations, is amended by deleting the words "List of schedules in report form" and inserting in lieu thereof the following paragraphs:

§ 141.1 *Annual report, Form No. 1, electric utilities and licensees (Classes A and B).* (a) The form of Annual Report for Classes A and B, electric utilities and licensees and others, designated as FPC Form No. 1 in the Commission's Regulations under the Federal Power Act is prescribed for the calendar year 1958 and thereafter.

(b) Each Class A utility and licensee (as defined in the Uniform System of Accounts) and each private, municipal, or public corporation engaged in the generation, transmission, distribution, or sale of electric energy, however produced, throughout the United States and its possessions, having annual electric operating revenues of $750,000 or more, or electric plant the original cost of which is in the amount of $4,000,000 or more, whether or not the jurisdiction of the Commission is otherwise involved, shall prepare and file with the Commission annually for each year beginning January 1, 1958, or subsequently during the calendar year 1958 if its established fiscal year is other than a calendar year, on or before the last day of the third month following the close of the calendar or other established fiscal year, an original and such number of conformed copies of the above-designated FPC Form No. 1 as are indicated in the General Instructions set out in that form, all properly filled out and verified: *Provided,* That with the exception of the following schedules, viz, Important Changes During the Year, Comparative Balance Sheet, Notes to Balance Sheet, Summary of Utility Plant and Reserves, Statement of Income for the Year, Notes to Statement of Income, Statement of Earned Surplus, and Electric Operating Revenues, the filing of the complete report, which shall include the above excepted schedules originally filed, may be postponed for 30 days beyond the established filing date without further authorization from the Commission. One copy of said report should be retained by the correspondent in its files. The conformed copies may be carbon copies, if legible.

(c) Each Class B utility and licensee (as defined in the Uniform System of Accounts) and each private, municipal, or public corporation engaged in the generation, transmission, distribution, or sale of electric energy, however produced, throughout the United States and its possessions, having annual electric operating revenues of more than $250,000, but less than $750,000, and electric plant the original cost of which is in an amount less than $4,000,000, whether or not the jurisdiction of the Commission is otherwise involved, shall prepare and file with the Commission annually for each year beginning January 1, 1958, or subsequently during the calendar year 1958 if the established fiscal year is other than a calendar year, on or before the last day of the third month following the close of the calendar or other established fiscal year, an original and such number of conformed copies of the above-designated FPC Form No. 1 as are indicated in the General Instructions set out in that form, all properly filled out and verified: *Provided,* That with the exception of the following schedules, viz, Important Changes During the Year, Comparative Balance Sheet, Notes to Balance Sheet, Summary of Utility Plant and Reserves, Statement of Income for the Year, Notes to Statement of Income, Statement of Earned Surplus, and Electric Operating Revenues, the filing of the complete report, which shall include the above excepted schedules originally filed, may be postponed for 30 days beyond the established filing date without further authorization from the Commission. One copy of said report should be retained by the correspondent in its files. The conformed copies may be carbon copies, if legible.

(d) This annual report contains the following list of schedules:

* * * * *

(B) The revisions (including the new schedules) of the Annual Report, FPC Form No. 1, for Classes A and B electric utilities and licensees, for the schedules listed above, and as shown by the typewritten or hand-script changes on the accompanying pages of the presently effective form,[1] are approved and adopted and new or revised schedules reflecting those revisions are hereby prescribed and promulgated as a part of the Annual Report, Form No. 1, to be prepared and filed annually with the Commission, effective with the reporting for the calendar year beginning January 1, 1958, or subsequently during the calendar year 1958 if the established fiscal year is other than the calendar year.

(C) This order shall become effective upon the issuance thereof.

(D) The Secretary of the Commission shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

(Sec. 309, 49 Stat. 858; 16 U. S. C. 825h)

By the Commission.

[SEAL] JOSEPH H. GUTRIDE,
Secretary.

Subchapter G—Approved Forms, Natural Gas Act

[Docket No. R-166; Order No. 208]

PART 260—STATEMENTS AND REPORTS (SCHEDULES)

ANNUAL REPORTS FOR NATURAL GAS COMPANIES, CLASSES A AND B

AUGUST 7, 1958.

In the matter of amendment of rules prescribing the form and filing of Annual Reports, FPC Form No. 2, for Natural Gas Companies Classes A and B.

The Commission has under consideration herein the amendment of § 260.1 of the Commission's Regulations under the Natural Gas Act, for "Form No. 2, Annual Report for Natural Gas Companies (Class A and Class B)" (set forth in Part 260—Statements and Reports, Subchapter G—Approved Forms, Natural Gas Act, Chapter I of Title 18, Code of Federal Regulations) so as to prescribe a number of new and revised schedules as a part of that Annual Report as presently constituted.

The schedules affected are as follows:

FPC Form No. 2 Schedule Heading	*FPC Form No. 2 Page No.*
General Instructions.	
Notes to Statement of Income	20 (New)
Gas Plant in Service	60
Gas Plant in Service	63
Construction Work in Progress—Gas	65
Reserve for Depreciation of Gas Plant	69
Sales to Other Gas Utilities—Natural Gas	79
Natural Gas Exchanges—Summary of Transactions	82
Natural Gas Exchanges (Continued)—Explanations and Accounting Adjustments	82a (New)
Gas Purchased[1]	94
Contracted Natural Gas Supply	107
Underground Gas Storage	116
Transmission System Peak Deliveries	119
System Map	123

[1] Transferred from Docket No. R-165 for consideration herein. See ordering clause (C) of Order No. 200, issued March 17, 1958 (19 FPC 345 at 349, 23 F. R. 1890 at 1891).

General public notice of this proposed rule making was given by the publication of notice in the FEDERAL REGISTER on February 12, 1958 (23 F. R. 913), and the mailing of notices to interested parties including State and Federal regulatory agencies.

The exact nature of each of the revisions to the general instructions and the schedules hereinafter adopted is fully set forth on the accompanying forms. Generally, however, they will result in the reporting of data not heretofore reported. This action of the Commission complements the action taken in Order No. 200, issued March 17, 1958, in Docket No. R-165 (19 FPC 345, 23 F. R. 1890) wherein certain other schedules of the same Form No. 2 were revised so as to reduce existing reporting requirements.

A total of 12 letters from 8 companies were received in response to the above-mentioned notice. Of these, 6 are responses relating to the schedule, Gas Purchased, page 94, deferred from consideration in Docket No. R-165 because of objections to certain aspects of the proposed revisions in that schedule. The limited number of comments received indicate a general acceptance of the proposed changes. Although several protests were strongly urged, we find them to be without substantial merit. Most of the comments suggested only clarifying modifications and the staff of the Commission, in addition, has suggested some modifications made in response to suggestions submitted in the proceeding (R-164) to revise the reporting requirements with respect to Annual Report, Form No. 1, submitted by the members of the electric industry.

The proposed revisions as originally set forth in the notice of proposed rule making, herein, were coordinated with the industry representatives of the Advisory Council on Federal Reports and with the Accounting and Engineering Committee of the National Association of Railroad and Utility Commissioners. Since the revisions herein adopted do not involve any significant modifications of those originally proposed, no further coordination with those groups appears necessary.

The Commission has given careful consideration to all of the data, views, comments, and suggestions submitted with respect to the proposed revisions to Annual Report Form No. 2 and to the extent provided in the order has reflected such suggestions, and to the extent not reflected in the order the suggestions and comments are rejected.

The Commission finds:

Upon consideration of the proposed amendments, comments, and suggestions, adoption and promulgation of the proposed amendments, modified as hereinafter ordered, are necessary and appropriate for the purposes of administration of the Natural Gas Act.

The Commission, acting pursuant to the authority granted by the Natural Gas Act, particularly sections 8, 9 (b), 10, and 16 of that Act (52 Stat. 821, 825, 826, and 830; 15 U. S. C. 717g, 717h (b), 717i, and 717o), orders:

(A) The revisions (including new schedules) of the Annual Report, FPC Form No. 2, for Classes A and B Natural Gas Companies, for the schedules listed above, and as shown by the typewritten or handscript changes on the accompanying pages of the presently effective form,[1] are approved and adopted and new or revised schedules reflecting those revisions are hereby prescribed and promulgated as a part of the Annual Report, FPC Form No. 2, to be prepared and filed annually with the Commission, effective with the reporting for the calendar year beginning January 1, 1958, or subsequently during the calendar year 1958 if the established fiscal year is other than the calendar year.

(B) This order shall become effective upon the issuance thereof.

(C) The Secretary of the Commission shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

(Sec. 16, 52 Stat. 830; 15 U. S. C. 717o)

By the Commission.

[SEAL] JOSEPH H. GUTRIDE,
Secretary.

[F. R. Doc. 58-6531; Filed, Aug. 13, 1958; 8:51 a. m.]

TITLE 29—LABOR

Subtitle A—Office of the Secretary of Labor

PART 4—CHILD LABOR REGULATIONS, ORDERS, AND STATEMENTS OF INTERPRETATION

SUBPART E—OCCUPATIONS PARTICULARLY HAZARDOUS FOR THE EMPLOYMENT OF MINORS BETWEEN 16 AND 18 YEARS OF AGE OR DETRIMENTAL TO THEIR HEALTH OR WELL-BEING

SUBPART G—GENERAL STATEMENTS OF INTERPRETATION OF THE CHILD LABOR PROVISIONS OF THE FAIR LABOR STANDARDS ACT OF 1938, AS AMENDED

MISCELLANEOUS AMENDMENTS

Pursuant to authority under the Fair Labor Standards Act of 1938, as amended (52 Stat. 1060, 29 U. S. C. 201 et seq.), and Reorganization Plan No. 2 of 1946 (3 CFR, 1943–1948 Comp., p. 1064), and in accordance with the requirements of section 4 of the Administrative Procedure Act (60 Stat. 238, 5 U. S. C. 1003), §§ 4.56 (d), 4.57, 4.64, and 4.111, are hereby amended in the manner indicated below.

1. Section 4.56 (d) is amended by inserting the word "Chambersburg" in lieu of the word "Philadelphia" in the last sentence thereof.

This amendment reflects a recent change in the location of the regional office of the Wage and Hour and Public Contracts Divisions for Region III.

2. Section 4.57 is amended by inserting an additional paragraph (c) which will read as follows:

(c) *Higher standards.* This section shall not justify noncompliance with any Federal or State law or municipal ordinance establishing a higher standard than the standard established in this section.

The amendment incorporates into this section a restatement of the child labor provisions contained in section 18 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1069, 29 U. S. C. 218).

3. The blanket citation immediately preceding §§ 4.51 to 4.64 is amended by adding thereto the following: "Interpret or apply sec. 18, 52 Stat. 1069, 29 U. S. C. 218."

This change notes the interpretation and application of section 18 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1069, 29 U. S. C. 218), in each of the Hazardous Occupations Orders published in Subpart E of Part 4.

4. Section 4.64 is amended by adding in parentheses to the section headnote "Occupations involved in the manufacture of brick, tile, and kindred products," the words "Order 13".

The amendment will further identify this Hazardous Occupations Order by indicating its numerical designation in the list of Hazardous Occupations Orders heretofore promulgated by this Department.

5. Section 4.111 is amended by deleting the reference to § 4.125 in the last sentence of the first paragraph in Footnote 21 and substituting therefor a reference to § 4.128.

The purpose of the amendment is to provide the proper reference for the matters discussed in Footnote 21.

The changes made in §§ 4.56 (d), 4.64, and 4.111, are matters of agency organization, practice, or interpretative rules, and are not substantive in nature. Therefore, the notice and effective date requirements of section 4 of the Administrative Procedure Act (60 Stat. 238, 5 U. S. C. 1003) do not apply to them.

In addition, the notice requirement of section 4 of that Act is not applicable to the change in § 4.57 for good cause. Such notice is hereby found unnecessary. The amendment to this section, as indicated above, merely adds to the regulation a restatement of the child labor provisions of section 18 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1069, 29 U. S. C. 218).

Also, no delay in the effective date of the amendment to § 4.57 is made for good cause. Since the substance of the change is already in effect by force of statute, it is hereby found that no time lag is necessary to afford interested persons an opportunity to comply with its provisions.

All amendments herein made will become effective immediately upon publication in the FEDERAL REGISTER.

(Sec. 3, 52 Stat. 1060, as amended; 29 U. S. C. 203. Interpret or apply sec. 18, 52 Stat. 1069; 29 U. S. C. 218)

Signed at Washington, D. C., this 11th day of August 1958.

JAMES P. MITCHELL,
Secretary of Labor.

[F. R. Doc. 58-6536; Filed, Aug. 13, 1958; 8:52 a. m.]

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

Subchapter B—Food and Food Products

PART 120—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

TOLERANCE FOR RESIDUES OF SCHRADAN

A petition was filed by Pennsalt Chemicals Corporation, 2901 Taylor Way, Tacoma 2, Washington, requesting the establishment of a tolerance for residues of schradan (octamethylpyrophosphoramide) in or on walnuts.

The Secretary of Agriculture has certified that this pesticide chemical is useful for the purposes for which a tolerance is being established.

After consideration of the data submitted in the petition and other relevant material which show that the tolerance established in this order will protect the public health, and by virtue of the authority vested in the Secretary of Health, Education, and Welfare by the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (2), 68 Stat. 512; 21 U. S. C. 346a (d) (2)) and delegated to the Commissioner of Food and Drugs by the Secretary (21 CFR 120.7 (g)), the regulations for tolerances for pesticide chemicals in or on raw agricultural commodities (21 CFR Part 120; 21 CFR, 1957 Supp., 120.3 (23 F. R. 3595)) are amended as indicated below:

1. In § 120.3 *Tolerances for related pesticide chemicals*, paragraph (e) (3) is amended by inserting after the item "Parathion" the item "Schradan (octamethylpyrophosphoramide)."

2. Part 120 is amended by adding the following new section:

§ 120.166 *Tolerance for residues of schradan.* A tolerance of 0.75 part per million is established for residues of schradan (octamethylpyrophosphoramide) in or on English walnuts.

Any person who will be adversely affected by the foregoing order may, at any time prior to the thirtieth day from the effective date thereof, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington 25, D. C., written objections thereto. Objections shall show wherein the person filing will be adversely affected by this order, specify with particularity the provisions of the order deemed objectionable and reasonable grounds for the objections, and request a public hearing upon the objections. Objections may be accompanied by a memorandum or brief in support thereof. All documents shall be filed in quintuplicate.

Effective date. This order shall be effective upon publication in the FEDERAL REGISTER.

(Sec. 701, 52 Stat. 1055, as amended; 21 U. S. C. 371. Interpret or apply sec. 408, 68 Stat. 511; 21 U. S. C. 346a)

Dated: August 7, 1958.

[SEAL] GEO. P. LARRICK,
Commissioner of Food and Drugs.

[F. R. Doc. 58-6510; Filed, Aug. 13, 1958; 8:46 a. m.]

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 1697]

[Fairbanks 013619]

ALASKA

WITHDRAWING PUBLIC LANDS FOR USE OF DEPARTMENT OF AIR FORCE FOR MILITARY PURPOSES

Correction

In Federal Register Document 58-5903, published on page 5877 in the issue for Saturday, August 2, 1958, the land description should read as follows:

FAIRBANKS MERIDIAN

T. 2 N., R. 1 E.,
Sec. 2, N½NE¼SW¼NW¼, and
All that part of lot 4 as described by the following aliquot parts: SE¼NW¼NW¼, S½NE¼NW¼NW¼, and E½SW¼NW¼NW¼.

TITLE 46—SHIPPING

[Gen. Order 24, Rev. (WSA Function Series) Supp. 2, Amdt. 3]

PART 310—MERCHANT MARINE TRAINING

SUBPART C—APPOINTMENT AND TRAINING OF CADETS IN THE UNITED STATES MERCHANT MARINE CADET CORPS

PAY

Effective August 1, 1958, § 310.61 *Pay* is hereby revised to read as follows:

§ 310.61 *Pay.* (a) Cadets will receive pay, while attached to merchant vessels, at the rate of $111.15 per month from their steamship company employers. In addition the steamship company employers shall pay the Cadets such subsistence and room allowances in port, transportation allowances, and other bonuses or allowances as are paid to the licensed officers of the vessels to which the Cadets are attached.

(b) Cadets shall not be given overtime work or granted overtime pay.

(Sec. 4, 55 Stat. 607; 34 U. S. C. App. 1123d. Interprets or applies sec. 216, 52 Stat. 965, as amended; 46 U. S. C. 1126)

Dated: August 8, 1958.

[SEAL] CLARENCE G. MORSE,
Maritime Administrator.

[F. R. Doc. 58-6528; Filed, Aug. 13, 1958; 8:50 a. m.]

TITLE 50—WILDLIFE

Chapter I—Fish and Wildlife Service, Department of the Interior

Subchapter B—Hunting and Possession of Wildlife

PART 6—MIGRATORY BIRDS

MISCELLANEOUS AMENDMENTS

Basis and purpose. By notice of proposed rule making published on May 14, 1958 (23 F. R. 3275), the public was notified that the Director, Bureau of Sport Fisheries and Wildlife, proposed to recommend the adoption by the Secretary of the Interior certain changes in Part 6, Title 50, Code of Federal Regulations, which would specify open seasons, certain closed seasons, hunting methods, hunting hours, and bag limits for migratory game birds. In this connection the public was notified of certain specific changes to Part 6 that were under immediate consideration. The sections of Part 6 to be changed and the reasons for such changes were set forth in detail. After due consideration, it is now determined that of the sections enumerated in the notice only the following shall be recommended for change: Sections 6.3 (b) (9), 6.7 (b), 6.9, and 6.11.

Interested persons were invited to submit their views, data, or arguments in writing with respect to the proposed changes to the Director, Bureau of Sport Fisheries and Wildlife, Washington 25, D. C., on or before June 20, 1958. Consideration having been given to all relevant matters presented, it has been determined that the proposed changes to the sections enumerated above shall be adopted. Accordingly, Part 6 of the regulations is amended in pertinent part as follows:

1. Subparagraph (9) of § 6.3 (b) is amended to read as follows:

(9) By the aid of baiting, or on or over any baited area. As used in this subparagraph, "baiting" shall mean the placing, exposing, depositing, distributing or scattering of shelled, shucked, or unshucked corn, wheat or other grain, salt or other feed so as to constitute for such birds a lure, attraction or enticement to, on or over any area where hunters are attempting to take them; and "baited area" means any area where shelled, shucked, or unshucked corn, wheat or other grain, salt or any other feed whatsoever capable of attracting such birds is directly or indirectly placed, exposed, deposited, distributed or scattered. Nothing in this subparagraph shall prohibit the taking of such birds over standing crops, flooded standing crops (including aquatics), flooded harvested crop lands, grain crops properly shocked on the field where grown, or grains found scattered solely as the result of normal agricultural harvesting.

2. Paragraph (b) of § 6.7 is amended to read as follows:

(b) Migratory game birds may be imported from Canada with or without heads and feet attached, but shipments of such birds must be accompanied by tags or permits if required by Dominion or Provincial law.

3. Section 6.9 is amended to read as follows:

§ 6.9 *Possession for purposes of processing, transportation, or storage.* No person, other than the person who has lawfully taken such birds, shall receive, possess, or have in custody migratory game birds for picking, cleaning, processing, shipment, transportation, or storage (including temporary storage at hunting clubs) unless such birds have a tag attached signed by the hunter stating his address, the total number and kinds of birds and the date killed. Any commercial picking establishment, cold-storage or locker plant receiving, possessing, or having in custody migratory game birds shall maintain accurate records showing the numbers and kinds of such birds, the dates received and disposed of, and the names and addresses of the persons from whom such birds are received, and to whom such birds are delivered. Such records shall be produced at any reasonable time for inspection by any officer authorized to enforce this part. The records so required to be maintained shall be retained by the person or persons responsible for their preparation and maintenance for a period of one year following the close of the open season on migratory game birds prescribed for the State in which such picking establishment, cold-storage or locker plant is located.

4. Section 6.11 is amended to read as follows:

§ 6.11 *Possession of live migratory waterfowl.* No person, without a permit, shall possess or transport any live migratory game birds acquired after October 1, 1958.

5. Paragraph (h) of § 6.15 is amended to read as follows:

(h) *Applications for permits.* Applications for permits on forms prescribed for such purposes shall be addressed to the Regional Director of the Bureau of Sport Fisheries and Wildlife in whose region the applicant resides, as follows:

Region 1—P. O. Box 3737, Portland 8, Oreg. (California, Idaho, Montana, Nevada, Oregon, Washington);

Region 2—P. O. Box 1306, Albuquerque, N. Mex. (Arizona, Colorado, Kansas, New Mexico, Oklahoma, Texas, Utah, Wyoming);

Region 3—1006 West Lake Street, Minneapolis 8, Minn. (Illinois, Indiana, Iowa, Michigan, Minnesota, Ohio, Missouri, Nebraska, North Dakota, South Dakota, Wisconsin);

Region 4—Peachtree-Seventh Building, Atlanta 23, Ga. (Mississippi, North Carolina, South Carolina, Tennessee, Virginia, Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland);

Region 5—1105 Blake Building, Boston 11, Mass. (Connecticut, Delaware, Maine, Massachusetts, Vermont, Pennsylvania, New Hampshire, New Jersey, New York, Rhode Island, West Virginia); and

Region 6—P. O. Box 2021, Juneau, Alaska (Alaska).

In accordance with the provisions of section 4 (c) of the Administrative Procedure Act of June 11, 1946, 60 Stat. 238; 5 U. S. C. 1003 (c), the foregoing amendments shall become effective 30 days following the date of publication in the FEDERAL REGISTER.

(Sec. 3, 40 Stat. 755, as amended; 16 U. S. C. 704)

Issued at Washington, D. C., and dated August 8, 1958.

HATFIELD CHILSON,
Acting Secretary of the Interior.

[F. R. Doc. 58-6511; Filed, Aug. 13, 1958; 8:47 a. m.]

PROPOSED RULE MAKING

INTERSTATE COMMERCE COMMISSION

[49 CFR Parts 71–78]

[Docket No. 3666; Notice 36]

TRANSPORTATION OF EXPLOSIVES AND OTHER DANGEROUS ARTICLES

NOTICE OF PROPOSED RULE MAKING

JULY 25, 1958.

The Commission is in receipt of applications for early amendment of the above-entitled regulations insofar as they apply to shippers in the preparation of articles for transportation, and to all carriers by rail and highway. The proposed amendments are set forth in Appendix A hereto and the reasons therefor are listed in Appendix B.

Application for these amendments ordinarily would be considered at our next hearing in this docket. It appears, however, that the proposed amendments have been the subject of exchanges and study by interested parties, in which substantial agreement has been reached. In view thereof no oral hearing is contemplated at this time.

Any party desiring to make representations in favor of or against the proposed amendments may do so through the submission of written data, views, or arguments. The original and five copies of such submission may be filed with the Commission on or before August 27, 1958. The proposed amendments are subject to change or changes that may be made as a result of such submissions.

Notice to the general public will be given by depositing a copy of this notice in the Office of the Secretary of the Commission for public inspection, and by filing a copy of the notice with the Director, Federal Register Division.

By the Commission, Division 3.

[SEAL] HAROLD D. MCCOY, *Secretary.*

APPENDIX A

PART 72—COMMODITY LIST OF EXPLOSIVES AND OTHER DANGEROUS ARTICLES CONTAINING THE SHIPPING NAME OR DESCRIPTION OF ALL ARTICLES SUBJECT TO PARTS 71–78 OF THIS CHAPTER

Amend § 72.5 Commodity List (15 F. R. 8264, 8267, 8270, 8271, 8272, Dec. 2, 1950) (17 F. R. 7279, Aug. 9, 1952) (21 F. R. 7597, Oct. 4, 1956) (22 F. R. 11030, Dec. 31, 1957) as follows:

§ 72.5 *List of explosives and other dangerous articles.* (a) • • •

Article	Classed as	Exemptions and packing (see sec.)	Label required if not exempt	Maximum quantity in outside container by rail express
(Change)				
Boron trifluoride	Nonf. G	73.302, 73.307	Green	300 pounds.
Grenades, hand or rifle, with gas, smoke or incendiary material but without bursting charges.	See §§ 73.88(d), 73.108, 73.330, 73.350.			
Igniters, jet thrust (*jato*), class B explosives	Expl. B	No exemption, 73.92	Red[1]	550 pounds.
Jet thrust unit (*jato*), class B explosives	Expl. B	No exemption, 73.92	Red[1]	550 pounds.
Peroxides, organic, liquids or solutions, n. o. s.	F. L.	No exemption, 73.119 (m).	Red	1 quart.
Rifle powder. See Propellant explosives, class A, Propellant explosives, class B, or Black powder.				
Starter cartridges, jet engine, class B explosives.	Expl. B	No exemption, 73.92	Red[1]	200 pounds.
(Add)				
Bombs, practice, with electric primers or electric squibs.	See § 73.55			
Explosive power device	Expl. C	No exemption, 73.102		100 pounds.
Rocket bodies, with electric primers or electric squibs.	See § 73.55			
Smoke grenades	Expl. C	No exemption, 73.108		200 pounds.

PART 73—SHIPPERS

SUBPART A—PREPARATION OF ARTICLES FOR TRANSPORTATION BY CARRIERS BY RAIL FREIGHT, RAIL EXPRESS, HIGHWAY, OR WATER

1. In § 73.28 amend paragraph (h) (15 F. R. 8277, Dec. 2, 1950) to read as follows:

§ 73.28 *Reused containers.* • • •

(h) Single-trip containers made under specifications prescribed in Part 78 of this chapter from which contents have once been removed following use for shipment of any article, must not be again used as shipping containers for explosives, flammable liquids, flammable solids, oxidizing materials, corrosive liquids, or poisons, class B or C, as defined in this part: *Provided*, That during the present emergency and until further order of the Commission, single-trip containers may be reused if retested before each refilling and approved for service by the Bureau of Explosives. Applications for permission for reuse should be made to the Bureau of Explosives, 30 Vesey Street, New York 7, N. Y.

• • • • • •

2. In § 73.31 amend paragraph (g) (9) Table 1; amend paragraph (g) (10) (22 F. R. 4789, July 9, 1957) (23 F. R. 2322, April 10, 1958) to read as follows:

§ 73.31 *Qualification, maintenance, and use of tank cars.* • • •

(g) • • •

(9) • • •

TABLE 1—RETEST PERIODS AND PRESSURES

Classification	See footnote	Tank retests				Safety valve retest years	Interior heater systems retest				Tank test psi	Safety valve psi[2]	Safety valve vapor tight psi minimum	Retest holding time—minutes	Test time when lagging is not removed—minutes
		Up to 10 years	10–22 years	Over 10 years	Over 22 years		Up to 10 years	10–22 years	Over 10 years	Over 22 years					
(Change)															
ICC–109A100–A L–W		10		10		5					100	75	60	10	20
(Add)															
ICC–111A100–W–8	(6)	None	None		None	None	5	3		1	100				

• • • • • • • • • • • •

(10) All I. C. C. tanks built to one specification and authorized to be stenciled to another specification must be retested in accordance with the higher specification and the test pressure stenciled accordingly on the tank or jacket.

• • • • • •

3. In § 73.34 amend only the table in paragraph (k) Exception 12 (23 F. R. 2323, April 10, 1958) to read as follows:

§ 73.34 *Qualification, maintenance, and use of cylinders.* • • •

(k) • • •

(12) • • •

Cylinders made in compliance with—	Used exclusively for—
ICC–3AA480, ICC–3AA480, ICC–3AA480X, ICC–4B, ICC–4BA, ICC–26–240,[1] or ICC–26–300.[1]	Liquefied petroleum gas which is commercially free from corroding components.
ICC–4, ICC–3AA480, ICC–3AA480, ICC–3A480X, ICC–4A480, or ICC–4AA480.	Anhydrous ammonia of at least 99.95% purity.

[1] Use of existing cylinders authorized, but new construction not authorized.

SUBPART B—EXPLOSIVES; DEFINITIONS AND PREPARATION

1. In § 73.51 amend paragraph (q) (18 F. R. 6777, Oct. 27, 1953) to read as follows:

§ 73.51 *Forbidden explosives.* • • •

(q) New explosives except samples for laboratory examination (see § 73.86) and military explosives approved by the Chief of Ordnance, Department of the Army; Chief, Bureau of Ordnance, Department of the Navy; or Air Material Command, Wright-Patterson Air Force Base, Ohio. All other new explosives must be approved for transportation by the Bureau of Explosives.

• • • • • •

In § 73.53 amend paragraph (l) (15 F. R. 8286, Dec. 2, 1950) to read as follows:

§ 73.53 *Definition of class A explosives.* • • •

(l) *Grenades.* Grenades, hand or rifle, are small metal or other containers designed to be thrown by hand or projected from a rifle. They are filled with an explosive or a liquid, gas, or solid material such as a toxic or tear gas or an incendiary or smoke producing material and a bursting charge. When shipped without explosives or bursting charges, see §§ 73.100 (y), 73.330, 73.350, and 73.385.

2. In § 73.55 amend paragraph (a) (19 F. R. 1277, Mar. 6, 1954) to read as follows:

§ 73.55 *Ammunition, nonexplosive.* (a) Nonexplosive ammunition is devices containing no explosives, or other dangerous article, such as cartridge cases, dummy or drill cartridges; empty, sand-loaded or solid projectiles with or without tracers (containing not in excess of 1 ounce or tracer composition); empty mines, empty bombs, solid projectiles, empty torpedoes, or practice bombs or rocket bodies equipped with electric primers or electric squibs. Such ammunition is exempt from Parts 71–78 of this chapter. Rotating bands should be protected against deformation by method of packing or loading.

3. In § 73.65 amend the introductory text of paragraph (f) (15 F. R. 8289, Dec. 2, 1950) to read as follows:

§ 73.65 *High explosives with no liquid explosive ingredient nor any chlorate.* • • •

(f) Amatol when cast or compressed in a block or column, in addition to the containers prescribed in paragraphs (a) (1) to (5) of this section, may be shipped in specification containers as follows:

4. In § 73.88 amend paragraph (d) (20 F. R. 8100, Oct. 28, 1955) to read as follows:

§ 73.88 *Definition of class B explosives.* • • •

(d) Special fireworks are manufactured articles designed primarily for the purpose or producing visible or audible pyrotechnic effects by combustion or explosion. (See § 73.100 (r) for common fireworks). Examples are toy torpedoes, railway torpedoes, some firecrackers and salutes, exhibition display pieces, aeroplane flares, illuminating projectiles, incendiary projectiles, incendiary bombs or incendiary grenades and smoke projectiles or smoke bombs fuzed or unfuzed and containing expelling charges but without bursting charges, flash powders in inner units not exceeding 2 ounces each, flash sheets in interior packages, flash powder or spreader cartridges containing not over 72 grains of flash powder each (see § 73.60 for shipments made as low explosives) and flash cartridges consisting of a paper cartridge shell, small-arms primer, and flash composition, not exceeding 180 grains all assembled in one piece. Fireworks must be in a finished state, exclusive of mere ornamentation, as supplied to the retail trade and must be so constructed and packed that loose pyrotechnic composition will not be present in packages in transportation.

• • • • • •

5. In § 73.92 add paragraph (d) (22 F. R. 11030, Dec. 31, 1957) to read as follows:

§ 73.92 *Jet thrust units (jato), class B, igniters, jet thrust (jato), class B, or starter cartridges, jet engine, class B.* • • •

(d) *Label.* Each outside container of igniters, jet thrust (jato), class B explosives, jet thrust units (jato), class B explosives, or starter cartridges, jet engine, class B explosives, when offered for transportation by rail express, must have securely and conspicuously attached to it a square red label as described in § 73.412.

6. In § 73.100 amend paragraphs (r) (7), (y), and (z); add paragraphs (aa) and (bb) (18 F. R. 3134, June 2, 1953) (21 F. R. 7599, Oct. 4, 1956) (21 F. R. 9355, Nov. 30, 1956) (15 F. R. 8296, Dec. 2, 1950) to read as follows:

§ 73.100 *Definitions of class C explosives.* • • •

(r) • • •

(7) Illuminating torches and colored fire in any form; total pyrotechnic composition not to exceed one hundred grams each in weight.

• • • • • •

(y) Smoke candles, smoke pots, smoke grenades, and smoke signals containing not more than 200 grams of pyrotechnic composition each, without bursting charges, hand signal devices, very signal cartridges, and highway or railway fusees are devices designed to produce visible effects for signal purposes.

(z) Explosive release devices consist of a rod or link fitted with means for mechanical attachment to other apparatus or equipment and containing a small electrically initiated explosive

charge which will break the rod or link upon functioning. These devices must be so designed that they will not function other explosive devices in the package sympathetically.

(aa) Explosive power devices are devices designed to drive generators or mechanical apparatus by means of propellant explosives, class B. The devices consist of a housing with a contained propellant charge and an electric igniter or squib and shall contain not more than 400 grams of explosive composition. The devices must be of a design approved by the Bureau of Explosives.

(bb) Detonating fuzes, class C explosives, are used in the military service to detonate high explosive bursting charges of projectiles, mines, bombs, torpedoes, and grenades. They contain a detonator and a quantity of high explosive. Detonating fuzes, class C explosives, must be made and packed so that they will not cause functioning of other fuzes, explosives or explosive devices if one of the fuzes detonates in a shipping container or in adjacent containers.

7. Amend entire § 73.102 (21 F. R. 9355, Nov. 30, 1956) to read as follows:

§ 73.102 *Explosive cable cutters, explosive power devices, or explosive release devices.* (a) Explosive cable cutters, explosive power devices, or explosive release devices must be packed in strong wooden or metal boxes.

(b) Each outside container must be plainly marked "Explosive Cable Cutters," "Explosive Power Devices," or "Explosive Release Devices" and "Handle Carefully—Keep Fire Away."

8. In § 73.108 amend the heading and introductory text of paragraph (a); amend paragraph (d) (22 F. R. 2225, April 4, 1957) (21 F. R. 7599, Oct. 4, 1956) to read as follows:

§ 73.108 *Common fireworks, signal flares, hand signal devices, railway or highway fusees, smoke signals, smoke candles, smoke grenades, smoke pots, and very signal cartridges.* (a) Common fireworks, signal flares, hand signal devices, railway or highway fusees, smoke signals, smoke candles, smoke grenades, smoke pots, and very signal cartridges, unless otherwise specifically provided for, must be securely packed in containers complying with the following specifications:

• • • • • •

(d) Each outside package must be plainly marked in letters not less than 7/16 inch in height "Common Fireworks", "Signal Flares", "Hand Signal Devices", "Railway Fusees", "Highway Fusees", "Smoke Signals", "Smoke Candles", "Smoke Pots", "Smoke Grenades", or "Very Signal Cartridges", as the case may be, and with the additional words "Handle Carefully—Keep Fire Away".

9. Amend entire § 73.113 (20 F. R. 4414, June 23, 1955) (22 F. R. 2225, April 4, 1957) to read as follows:

§ 73.113 *Detonating fuzes, class C explosives.* (a) Detonating fuzes, class C explosives, must be packed and well secured in strong tight outside wooden or metal boxes. The gross weight of the outside wooden or metal box containing detonating fuzes, class C explosives, must not exceed 190 pounds.

(b) Each outside package must be plainly marked "Detonating fuzes, Class C Explosives—Handle Carefully".

SUBPART C—FLAMMABLE LIQUIDS; DEFINITION AND PREPARATION

1. In § 73.118 amend paragraph (c) (33) (21 F. R. 3009, May 5, 1956), to read as follows:

§ 73.118 *Exemptions for flammable liquids.* • • •

(c) • • •

(33) Peroxides, organic, liquids or solutions, n. o. s.

• • • • • •

2. In § 73.119 add paragraph (a) (24); amend paragraph (k) (2) (15 F. R. 8299, Dec. 2, 1950) (21 F. R. 671, Jan. 31, 1956) to read as follows:

§ 73.119 *Flammable liquids not specifically provided for.* (a) • • •

(24) Spec. 6J (§ 78.100 of this chapter). Steel barrels or drums having inside spec. 2S (§ 78.35 of this chapter) polyethylene drum. Gross weight restriction indicated by the gross weight embossment on the steel barrel or drum shall be waived.

• • • • • •

(k) • • •

(2) Spec. 6A, 6B, or 6C (§§ 78.97, 78.98, or 78.99 of this chapter). Metal barrels or drums.

• • • • • •

SUBPART D—FLAMMABLE SOLIDS AND OXIDIZING MATERIALS; DEFINITION AND PREPARATION

1. In § 73.162 add paragraph (a) (10) (15 F. R. 8304, Dec. 2, 1950) to read as follows:

§ 73.162 *Charcoal.* (a) • • •

(10) Charcoal screenings or ground, crushed, granulated, or pulverized charcoal, from pit or kiln burned charcoal, provided the screenings or the material from which the ground charcoal is made has been exposed to the air for not less than 5 days prior to shipment or grinding (see paragraphs (j) and (k) of this section).

• • • • • •

2. In § 73.182 amend paragraph (a) (1) (21 F. R. 364, Jan. 19, 1956) to read as follows:

§ 73.182 *Nitrates.* (a) • • •

(1) Wooden or fiberboard boxes with glass, metal, or other strong inside containers; in metal or fiber drums; in kegs or barrels; or in strong metal cans. When so packed, they are exempt from specification packaging, marking other than name of contents, and labeling requirements when for transportation by rail or highway. Ammonium nitrate-carbonate mixtures, nitrocarbonitrate, and ammonium nitrate mixed fertilizers so packed are exempt from labeling requirements when for transportation by water carrier. Shipments for transportation by highway carriers are exempt also from Part 77 of this chapter, except § 77.817, and Part 197 of this chapter.

• • • • • •

3. In § 73.190 amend paragraph (b) (3) (22 F. R. 4790, July 9, 1957) to read as follows:

§ 73.190 *Phosphorus, white or yellow.* • • •

(b) • • •

(3) Spec. 103, 103–W, or 111A100–W–1 (§§ 78.265, 78.280, or 78.303 of this chapter). Tank cars without bottom outlet for discharge of lading and with approved dome fittings, external heater systems, and with insulation at least 4 inches in thickness, except that thickness of insulation may be reduced to 2 inches over external heater coils. Bottom washout nozzle of approved design may be supplied. The material must be immersed in water or be blanketed with an inert gas and be loaded at a temperature not exceeding 140° F. The water must be loaded in the dome to not more than 90 percent of the capacity of the dome. After unloading, the tank must be filled to its entire capacity with an inert gas or to its entire capacity and the dome to not more than 50 percent of its capacity with water having a temperature not exceeding 140° F. and placarded with the caution placard prescribed in § 74.555 of this chapter before the car is offered for return movement.

[No change in Note 1.]

• • • • • •

4. In § 73.225 amend paragraph (a) (1) (15 F. R. 8312, Dec. 2, 1950) to read as follows:

§ 73.225 *Phosphorus sesquisulfide.* (a) • • •

(1) Spec. 15A or 15B (§§ 78.168 or 78.169 of this chapter). Wooden boxes with metal inside containers hermetically sealed (soldered) or water-tight metal cans with screw-top closures. Other closures if approved by the Bureau of Explosives will be permitted.

• • • • • •

5. In § 73.232 amend paragraph (a) (17 F. R. 4294, May 10, 1952) to read as follows:

§ 73.232 *Tank cars containing residual phosphorus.* (a) Tank cars from which phosphorus has been unloaded and from which all residual phosphorus has not been removed by thorough cleaning must be shipped filled with water or an inert gas and must be placarded by the shipper with placards prescribed in § 74.555 of this chapter.

6. In § 73.234 amend paragraph (a) (2) (23 F. R. 4029, June 10, 1958) to read as follows:

§ 73.234 *Sodium nitrite.* (a) • • •

(2) Spec. 44C (§ 78.237 of this chapter). Multiwall paper bags constructed of at least 5 thicknesses of heavy duty shipping sack Kraft paper, or equivalent, with a minimum total basis weight of 310 pounds including a polyethylene or other suitable pliable plastic material inner sheet having a minimum basis weight of 10 pounds. All closures must be of such design as to provide a moisture-resistant package when closed for shipment. Net weight not over 100 pounds each. Authorized for carload or truckload shipments only.

• • • • • •

SUBPART E—ACIDS AND OTHER CORROSIVE LIQUIDS; DEFINITION AND PREPARATION

1. In § 73.245 amend paragraph (a) (18); add paragraph (a) (20) (22 F. R. 7834, Oct. 3, 1957) (15 F. R. 8313, Dec. 2, 1950) to read as follows:

§ 73.245 *Acids or other corrosive liquids not specifically provided for.* (a) • • •

(18) Spec. 12A (§ 78.210 of this chapter). Fiberboard boxes with inside glass bottles not over 1 gallon capacity each. Not more than 4 inside containers exceeding 5 pints capacity each shall be packed in the outside container. Shipper must have established that the completed package meets test requirements prescribed by § 78.210–10 of this chapter.

• • • • • •

(20) Spec. 16A (§ 78.185 of this chapter). Upright, wrap-around style, wire-bound wooden boxes, with inside spec. 27 (§ 78.21 of this chapter), polyethylene containers. (See § 78.185-21 of this chapter).

2. In § 73.249 amend paragraph (a) (5) (22 F. R. 4790, July 9, 1957) to read as follows:

§ 73.249 *Alkaline corrosive liquids, n. o. s., alkaline caustic liquids, n. o. s., alkaline battery fluids, and sodium aluminate, liquid.* (a) • • •

(5) Spec. 103, 103–W, 103A, 103A–W, 103B, 103B–W, 104, 104–W, 105A100, 105A100–W, 111A100–W–1, 111A100–W–2, 111A100–W–3, 111A100–W–4, or 111A100–W–5 (§§ 78.265, 78.280, 78.266, 78.281, 78.267, 78.282, 78.269, 78.284, 78.270, 78.285, 78.303, 78.304, 78.305, 78.306, or 78.309 of this chapter). Tank cars.

• • • • • •

3. In § 73.257 amend paragraphs (a) (6) and (11) (23 F. R. 2325, 2326, April 16, 1958) (22 F. R. 7836, Oct. 3, 1957) to read as follows:

§ 73.257 *Electrolyte (acid) or corrosive battery fluid.* (a) • • •

(6) Spec. 12B or 12C (§§ 78.205 or 78.206 of this chapter). Fiberboard boxes with inside containers of polyethylene or other electrolyte acid resistant nonfragile materials having secure closures capable of withstanding conditions incident to transportation without leakage and unless containers are rigid or semi-rigid in nature they must be contained in other strong inside containers; minimum thickness of polyethylene or other materials shall be not less than 0.003 inch for any film sheet for multiwall containers or not less than 0.006 inch for single-wall containers; not more than 12 such inside containers shall be packed in one outside box and the marking prescribed in § 73.401 (c) shall not be required. Inside containers shall be packed to prevent movement within the box (see § 78.205–34 of this chapter). Dry storage batteries or battery charger device may be packed in the same outside box when adequately separated from other inside containers (see § 78.205–33 of this chapter); gross weight of completed package shall not exceed 85 pounds. Complete package, closed as for shipment, with inside containers filled with liquid of same specific gravity as commodity to be shipped, must be capable of withstanding at least 2 drops from a height of 4 feet onto solid concrete without leakage from or rupture of inside containers.

• • • • • •

(11) Spec. 12A (§ 78.210 of this chapter). Fiberboard boxes with inside glass bottles not over 1 gallon capacity each. Not more than 4 inside containers exceeding 5 pints capacity each shall be packed in the outside container. Shipper must have established that the completed package meets test requirements prescribed by § 78.210–10 of this chapter.

• • • • • •

4. In § 73.258 amend paragraph (a) (2) (22 F. R. 7836, Oct. 3, 1957) to read as follows:

§ 73.258 *Electrolyte, acid, or alkalin corrosive battery fluid, packed with storage batteries.* (a) • • •

(2) Electrolyte, acid, or alkaline corrosive battery fluid included with storage batteries and filling kits may be packed in strong plywood or wooden boxes when shipments are made by, for, or to the Departments of the Army, Navy, or Air Force of the United States Government in outside containers of their specifications provided the electrolyte, acid, or alkaline corrosive battery fluid is packed in polyethylene bottles not over 32-ounce capacity each and not more than 24 bottles securely separated from storage batteries and kits may be shipped in one outside package.

• • • • • •

5. In § 73.262 amend paragraphs (a) (6) and (7) (16 F. R. 9375, Sept. 15, 1951) (22 F. R. 7836, Oct. 3, 1957) to read as follows:

§ 73.262 *Hydrobromic acid.* (a) • • •

(6) Spec. 103B, 103B–W, or 111A100–W–5 (§§ 78.267, 78.282, or 78.309 of this chapter). Tank cars.

(7) Spec. 12A (§ 78.210 of this chapter). Fiberboard boxes with inside glass bottles not over 5 pints capacity each. Not more than six 5-pint glass bottles may be packed in one outside container. Shipper must have established that the completed package meets test requirements prescribed by § 78.210–10 of this chapter.

• • • • • •

6. In § 73.263 amend paragraphs (a) (9), (16) and (d) (2) (21 F. R. 4565, June 26, 1956) (22 F. R. 7837, Oct. 3, 1957) (23 F. R. 4029, June 10, 1958) to read as follows:

§ 73.263 *Hydrochloric (muriatic) acid, hydrochloric (muriatic) acid mixtures, hydrochloric (muriatic) acid solution, inhibited, sodium chlorite solution, and cleaning compounds, liquid, containing hydrochloric (muriatic) acid.* (a) • • •

(9) Spec. 103B, 103B–W, or 111A100–W–5 (§§ 78.267, 78.282, or 78.309 of this chapter). Tank cars. Authorized for acid not over 38 percent strength by weight. Except for hydrochloric (muriatic acid) of 22° Baume strength, and other fuming acids, safety vent of approved design equipped with frangible disc having 1/8 inch breather hole in the center thereof or a safety vent of approved design equipped with carbon discs permitting continuous venting may be used.

[No change in Note 1.]

• • • • • •

(16) Spec. 12A (§ 78.210 of this chapter). Fiberboard boxes with inside glass bottles not over 5 pints capacity each. Not more than six 5-pint glass bottles may be packed in one outside container. Shipper must have established that the completed package meets test requirements prescribed by § 78.210–10 of this chapter.

• • • • • •

(d) • • •

(2) Spec. 12A (§ 78.210 of this chapter). Fiberboard boxes with inside glass bottles not over 1 gallon capacity each. Not more than 4 inside containers exceeding 5 pints capacity each shall be in the outside container. Shipper must have established that the completed package meets test requirements prescribed by § 78.210–10 of this chapter.

7. In § 73.264 amend paragraph (a) (11) (16 F. R. 9375, Sept. 15, 1951) to read as follows:

§ 73.264 *Hydrofluoric acid.* (a) • • •

(11) Spec. 103B, 103B–W, or 111A100–W–5 (§§ 78.267, 78.282, or 78.309 of this chapter). Tank cars, rubber-lined tanks. Authorized only for acid not over 40 percent strength.

• • • • • •

8. In § 73.265 amend paragraph (b) (3) (16 F. R. 9375, Sept. 15, 1951) to read as follows:

§ 73.265 *Hydrofluosilicic acid.* • • •

(b) • • •

(3) Spec. 103B, 103B–W or 111A100–W–5 (§§ 78.267, 78,282, or 78.309 of this chapter). Tank cars, rubber-lined tanks.

• • • • • •

9. In § 73.268 add paragraph (f) (5) (15 F. R. 8320, Dec. 2, 1950) to read as follows:

§ 73.268 *Nitric acid.* • • •

(f) • • •

(5) Spec. 60 (§ 78.255 of this chapter). Portable tanks, glass-lined.

• • • • • •

10. In § 73.271 add paragraph (a) (11) (15 F. R. 8321, Dec. 2, 1950) to read as follows:

§ 73.271 *Phosphorus oxychloride, phosphorus trichloride, and thiophosphoryl chloride.* (a) • • •

(11) Spec. 103A or 103A–W (§§ 78.266 or 78.281 of this chapter). Tank cars. Authorized for phosphorus trichloride only.

• • • • • •

11. In § 73.272 amend paragraphs (c) (6) and (i) (4) (22 F. R. 7837, Oct. 3, 1957) (15 F. R. 8321, Dec. 2, 1950) to read as follows:

§ 73.272 *Sulfuric acid.* • • •

(c) • • •

(6) Spec. 12A (§ 78.210 of this chapter). Fiberboard boxes with inside glass bottles not over 5 pints capacity each. Not more than six 5-pint glass bottles

may be packed in one outside container. Shipper must have established that the completed package meets test requirements prescribed by § 78.210–10 of this chapter.

• • • • • •

(i) • • •

(4) Spec. 103B, 103B–W, or 111A100–W–5 (§§ 78.267, 78.282, or 78.309 of this chapter). Tank cars.

• • • • • •

12. In § 73.276 add paragraph (a) (4) (15 F. R. 8322, Dec. 2, 1950) to read as follows:

§ 73.276 *Anhydrous hydrazine and hydrazine solution.* (a) • • •

(4) Spec. 103C–W (§ 78.283 of this chapter). Tank cars having tanks of Type 304 or 347 ELC (extra low carbon) stainless steel with molybdenum content not exceeding one-half of one percent. Vapor space in tank must be filled with nitrogen gas at atmospheric pressure.

13. In § 73.286 amend paragraph (c) (1) (23 F. R. 4030, June 10, 1958) to read as follows:

§ 73.286 *Chemical kits.* • • •

(c) • • •

(1) Spec. 12A (§ 78.210 of this chapter). Fiberboard boxes with inside glass bottles not over 32 ounces capacity each, securely cushioned and separated from other inside containers. The contents of the kit must be of such nature and so packed that there will be no possibility of the mixture of contents causing dangerous evolution of heat or gas. Shipper must have established that the completed package meets test requirements prescribed by § 78.210–10 of this chapter.

14. In § 73.287 add paragraph (a) (5) (15 F. R. 8323, Dec. 2, 1950) to read as follows:

§ 73.287 *Chromic acid solution.* (a) • • •

(5) Spec. 12B (§ 78.205 of this chapter). Fiberboard boxes with inside polyethylene containers having minimum wall thickness of not less than 0.007 inch and so designed as to maintain their configuration when standing empty and open (see § 78.205–34 of this chapter).

15. In § 73.289 amend paragraph (a) (12) (22 F. R. 7837, Oct. 3, 1957) to read as follows:

§ 73.289 *Formic acid and formic acid solutions.* (a) • • •

(12) Spec. 12A (§ 78.210 of this chapter). Fiberboard boxes with inside glass bottles not over 5 pints capacity each. Not more than six 5-pint glass bottles may be packed in one outside container. Shipper must have established that the completed package meets test requirements prescribed by § 78.210–10 of this chapter.

16. In § 73.291 amend paragraph (a) (8) (21 F. R. 4565, June 26, 1956) to read as follows:

§ 73.291 *Flame retardant compound, liquid.* (a) • • •

(8) Spec. 103B, 103B–W, or 111A100–W–5 (§§ 78.267, 78.282, or 78.309 of this chapter). Tank cars.

SUBPART F—COMPRESSED GASES; DEFINITION AND PREPARATION

In § 73.307 add Note 1 to paragraph (a) (1) (16 F. R. 9376, Sept. 15, 1951) to read as follows:

§ 73.307 *Nonliquefied gases, except gas in solution or poisonous gas.* (a) • • •

(1) • • •

NOTE 1: Authorized cylinders containing oxygen which is continuously fed to tanks containing live fish may be shipped irrespective of the provisions of § 73.24.

SUBPART G—POISONOUS ARTICLES; DEFINITION AND PREPARATION

1. In § 73.331 add paragraph (c) (15 F. R. 8333, Dec. 2, 1950) to read as follows:

§ 73.331 *Gas identification sets.* • • •

(c) Gas identification training sets containing poisonous liquids, class A, and poisonous articles, class C, when offered for transportation by carriers by rail freight, rail express, highway, or water must be packed for shipment as follows:

(1) The poisonous liquid, class A, and poisonous article, class C, in amounts not exceeding 5 cubic centimeters, if a liquid, or 20 grams, if a solid, when mixed with or absorbed in activated charcoal, silica gel, crepe rubber, or other absorbent medium, must be packed in strong glass bottles of not less than 2 fluid ounces capacity, equipped with a polyethylene liner; each bottle as herein specified must have a metal screw cap closure, equipped with a built-in compression type spring and an insert in the opening of the bottle to match so that when tightened an airtight seal is obtained. Twelve bottles, containing articles as described in this paragraph and not exceeding 100 cubic centimeters or grams, or a combination of both, shall be placed in a modified stryrene plastic carrying case, in three rows of four bottles each and fitted with a fiberboard cell or separator. The void space around the individual bottles, and around all interior sides of the carrying case, shall be filled with dry, fine sawdust or vermiculite. A sheet of sponge rubber shall be fitted to the inside of the top and bottom of the carrying case to provide additional cushioning and insure a snug fit of the bottles when the top is secured. The carrying case shall be fitted into a snug fitting fiberboard box, domestic type. The case shall then be packed in a nailed wooden box, spec. 15A or 15B (§§ 78.168 or 78.169 of this chapter), which shall be fitted with a waterproof case liner.

2. § 73.366 add paragraph (a) (3) (20 F. R. 4418, June 23, 1955) to read as follows:

§ 73.366 *Arsenic (arsenic trioxide) or arsenic acid (solid).* (a) • • •

(3) In addition to specification containers prescribed in this section, arsenic (arsenic trioxide) or arsenic acid (solid) may be shipped when packed in portable, collapsible, rubber containers, not over 70 cubic feet capacity, of a type approved by the Bureau of Explosives. Authorized for carload or truckload shipments only.

• • • • •

SUBPART H—MARKING AND LABELING EXPLOSIVES AND OTHER DANGEROUS ARTICLES

1. In § 73.400 amend paragraph (f) (17 F. R. 1562, Feb. 20, 1952) to read as follows:

§ 73.400 *Explosives.* • • •

(f) Each shipment of igniters, jet thrust (jato), class B explosives, jet thrust units (jato), class B explosives, propellant explosives, class B, or starter cartridges, jet engine, class B explosives, when offered for transportation by carriers by rail express, must bear the label prescribed by § 73.412.

• • • • • •

2. In § 73.412 amend the heading and entire paragraph (a) (17 F. R. 1563, Feb. 20, 1952) to read as follows:

§ 73.412 *Explosives, class B, label for express shipment.* (a) Label for class B explosives, except special fireworks (see § 73.410), must be square measuring 4 inches on each side and bright red in color. Printing must be in black letters inside of a black-line border measuring 3½ inches on each side and as shown in this section.

(1) Red label for Class B explosives for express shipment.

(Reduced size)
(Black printing on red)

4 inches

EXPLOSIVES
CLASS B

HANDLE CAREFULLY
KEEP FIRE AWAY
DO NOT DROP OR THROW

This package must not be loaded or stored near steam pipes or other source of heat

This is to certify that the contents of this package are properly described by name and are packed and marked and are in proper condition for transportation according to the regulations prescribed by the Interstate Commerce Commission.

(Shipper's name)

4 inches

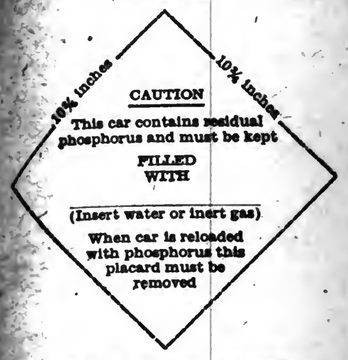
PART 74—CARRIERS BY RAIL FREIGHT

SUBPART C—PLACARDS ON CARS

1. Amend entire § 74.555 (16 F. R. 11781, Nov. 21, 1951) to read as follows:

§ 74.555 *"Caution—Residual phosphorus" placard.* (a) Tank cars previously loaded with phosphorus, when shipped filled with water or inert gas, must bear a placard reading "Caution—This car contains residual phosphorus and must be kept filled with (water) or (inert gas)". The placard must be of diamond shape measuring 10¾ inches on each side, and must bear the wording in black letters as shown in the following cut:

CAUTION PLACARD FOR RESIDUAL PHOSPHORUS
(Reduced size)



2. In § 74.594 amend paragraph (j) (15 F. R. 8357, Dec. 2, 1950) to read as follows:

§ 74.594 *Leaking tank cars.* • • •

(j) Whenever the leaking condition of a tank car requires transfer of lading or renders the tank unfit for reloading, the car must be stenciled on both sides in letters three inches in size, adjacent to the car number, "Leaky Tank. Do Not Load Until Repaired", and indicate and mark at the location of the leak with the symbol "X", and the owner must be immediately notified by wire, such notification to indicate definitely location of leak. Stenciling must not be removed until the tank is repaired.

• • • • • •

PART 78—SHIPPING CONTAINER SPECIFICATIONS

SUBPART A—SPECIFICATIONS FOR CARBOYS, JUGS IN TUBS, AND RUBBER DRUMS

1. In § 78.10–3 paragraph (a) amend only the table; amend paragraph (c) (17 F. R. 7283, Aug. 9, 1952) to read as follows:

§ 78.10 *Specification 1F; polyethylene carboys in plywood drums.*

§ 78.10–3 *Polyethylene carboys.* (a) • • •

Marked capacity (not over)	Minimum wall thickness	Minimum weight of bottles
Gallons:	*Inch*	*Pounds*
5	1/16	3
6½	1/16	4
15	1/16	8

• • • • • •

(c) Polyethylene carboys, as manufactured and filled to marked capacity with a material which remains in a liquid form, shall be capable of withstanding a 4-foot drop without leakage, after prior conditioning so that contents will be 0° Fahr. or colder, onto solid concrete on any portion of carboy.

2. In § 78.11–3 paragraph (a) amend only the table (18 F. R. 805, Feb. 7, 1953) to read as follows:

§ 78.11 *Specification 1G; polyethylene carboys in wooden or glued plywood boxes.*

§ 78.11–3 *Polyethylene carboys.* (a) • • •

Marked capacity (not over)	Minimum wall thickness	Minimum weight of polyethylene carboy
Gallons:	*Inch*	*Pounds*
5	0.0625	3
8	0.125	8
15	0.125	11½

• • • • • •

3. In § 78.13–3 amend paragraph (c) (21 F. R. 675, Jan. 31, 1956) to read as follows:

§ 78.13 *Specification 1H; polyethylene carboys in low carbon steel or other equally efficient metal crates.*

§ 78.13–3 *Polyethylene carboys.* • • •

(c) Polyethylene carboys, as manufactured and filled to marked capacity with a material which remains in a liquid form, shall be capable of withstanding a 4-foot drop without leakage, after prior conditioning so that contents will be 0° Fahr. or colder, onto solid concrete on any portion of the carboy.

SUBPART B—SPECIFICATIONS FOR INSIDE CONTAINERS, AND LININGS

1. In § 78.21–3 amend paragraph (c) (23 F. R. 2329, April 10, 1958) to read as follows:

§ 78.21 *Specification 2T; polyethylene containers.*

§ 78.21–3 *Polyethylene containers.* • • •

(c) Polyethylene containers, as manufactured and filled to marked capacity with a material which remains in a liquid form, shall be capable of withstanding a 4-foot drop without leakage, after prior conditioning so that contents will be 0° Fahr. or colder, onto solid concrete on any portion of the container.

• • • • • •

2. In § 78.35–5 add paragraph (a) (2) (21 F. R. 675, Jan. 31, 1956) to read as follows:

§ 78.35 *Specification 2S; polyethylene drums.*

§ 78.35–5 *Test.* (a) • • •

(2) Polyethylene drums, as manufactured and filled to marked capacity with a material which remains in a liquid form, shall be capable of withstanding a 4-foot drop without leakage, after prior conditioning so that contents will be 0° Fahr. or colder, onto solid concrete on any portion of the drum.

SUBPART D—SPECIFICATIONS FOR METAL BARRELS, DRUMS, KEGS, CASES, TRUNKS AND BOXES

1. In § 78.80–9 amend paragraph (b) (15 F. R. 8432, Dec. 2, 1950) to read as follows:

§ 78.80 *Specification 5; steel barrels or drums.*

§ 78.80–9 *Closures.* • • •

(b) Closing part (plug, cap, plate, etc., see Note 1) must be of metal as thick as prescribed for head of container; this not required for containers of 12 gallons or less when the opening to be closed is not over 2.7 inches in diameter. If unthreaded cap is used it must be provided with outside sealing devices which cannot be removed without destroying the cap or sealing device.

[No change in Note 1.]

• • • • • •

2. In § 78.82–9 amend paragraph (b) (15 F. R. 8434, Dec. 2, 1950) to read as follows:

§ 78.82 *Specification 5B; steel barrels or drums.*

§ 78.82–9 *Closures.* • • •

(b) Closing part (plug, cap, plate, etc., see Note 1) must be of metal as thick as prescribed for head of container; this not required for containers of 12 gallons or less when the opening to be closed is not over 2.7 inches in diameter. If unthreaded cap is used it must be provided with outside sealing devices which cannot be removed without destroying the cap or sealing device.

[No change in Note 1.]

• • • • • •

3. In § 78.115–8 amend paragraph (b) (15 F. R. 8448, Dec. 2, 1950) to read as follows:

§ 78.115 *Specification 17C; steel drums.*

§ 78.115–8 *Closures.* • • •

(b) Closing part (plug, cap, plate, etc., see Note 1) must be of metal as thick as prescribed for head of container; this not required for containers of 12 gallons or less when the opening to be closed is not over 2.7 inches in diameter. If unthreaded cap is used it must be provided with outside sealing devices which cannot be removed without destroying the cap or sealing device.

[No change in Note 1.]

• • • • • •

4. In § 78.116–8 amend paragraph (b) (20 F. R. 955, Feb. 15, 1955) to read as follows:

§ 78.116 *Specification 17E; steel drums.*

§ 78.116–8 *Closures.* • • •

(b) Closing part (plug, cap, plate, etc., see Note 1) must be of metal as thick as prescribed for head of container: *Provided,* That thinner metal closures or closures of other material are authorized for containers of 12 gallons capacity or less when opening to be closed is not over 2.7 inches in diameter and closures, except threaded metal closures, are fitted with outside sealing devices which cannot be removed without destroying the closure or sealing device (see paragraph (d) of this section).

[No change in Note 1.]

• • • • • •

5. In § 78.133–5 amend the table in paragraph (a); in § 78.133–9 amend the introductory text of paragraph (a) (23 F. R. 2330, April 10, 1958) to read as follows:

§ 78.133 *Specification 37P; steel drums with polyethylene liner.*

§ 78.133–5 *Parts and dimensions.* • • •

Marked capacity not over (gallons)	Type of container [1]	Body sheet	Bottom head sheet	Removable head sheet	Type of removable head closure
5	Straight side, single bead	26	26	24	Ring seal, bolted ring, lug cover.
6½	Straight side, single bead	24	24	24	Ring seal, bolted ring, lug cover.
15	Straight side, single bead [3]	22	22	19	Ring seal, bolted ring, lug cover.

[No change in footnotes]

• • • • • •

§ 78.133–9 *Marking.* (a) Marking on the permanent head of each container by embossing with raised marks as follows:

• • • • • •

SUBPART E—SPECIFICATIONS FOR WOODEN BARRELS, KEGS, BOXES, KITS, AND DRUMS

In § 78.185–21 cancel Note 2 to paragraph (a) table; add paragraph (c) (23 F. R. 2331, April 10, 1958) to read as follows:

§ 78.185 *Specification 16A; plywood or wooden boxes, wirebound.*

§ 78.185–21 *Special box authorized only when used in conjunction with inside specification 2T (§ 78.21 of this chapter) polyethylene container.* (a) • • •

[Note 2 canceled.]

• • • • • •

(c) Marking authorized:

(1) Marking on each box with letters and figures at least ½" high in rectangle as follows:

ICC–16A

(2) This mark shall be understood to certify that outer container complies with all construction requirements of the specification.

(3) Name of maker shall be located just above, below, or following the mark specified in paragraph (c) (1) of this section; symbol (letters) authorized if registered with the Bureau of Explosives.

SUBPART F—SPECIFICATIONS FOR FIBERBOARD BOXES, DRUMS, AND MAILING TUBES

1. Add § 78.205–34 (15 F. R. 8476, Dec. 2, 1950) to read as follows:

§ 78.205 *Specification 12B; fiberboard boxes.*

§ 78.205–34 *Special box: authorized only for polyethylene, or other suitable plastic, tight-fitting inside containers so designed as to maintain their configuration when standing empty and open.* (a) Box shall comply with this specification except that top of box shall be closed by means of slotted flaps so arranged as to provide protection for the neck of the inside container and be fitted with fill-in pieces as necessary. (See §§ 73.257 (a) (6) and 73.287 (a) (5) of this chapter.)

2. In § 78.210 amend the heading; in § 78.210–6 amend only the table in paragraph (a); in § 78.210–10 add paragraph (b); in § 78.210–12 amend paragraph (a) (1) (22 F. R. 7842, 7843, Oct. 3, 1957) to read as follows:

§ 78.210 *Specification 12A; fiberboard boxes.* Nonreuseable containers.

§ 78.210–6 *Boxes authorized.* (a) • • •

Gross weight not over (pounds)	Corrugated fiberboard strength (Mullen or Cady test) minimum	
	Double-faced	Double-wall
20	200	200
50	275	200
75	----------	275

§ 78.210–10 *Test for completed package.* • • •

(b) Tests prescribed by paragraph (a) of this section must be conducted prior to initial use of the package and shall be repeated on the change of any components of the package.

§ 78.210–12 *Marking.* (a) • • •

(1) Stars to be replaced by authorized gross weight (for example, ICC–12A75). The letters NRC, located just above or below the ICC mark, to indicate a nonreusable container. These marks shall be understood to certify that the outer container complies with all the construction requirements of the specification.

• • • • • •

SUBPART F—SPECIFICATIONS FOR BAGS, CLOTH, BURLAP OR PAPER

1. Amend entire § 78.236 (15 F. R. 8482, Dec. 2, 1950) to read as follows:

§ 78.236 *Specification 44B; multiwall paper bags.*

§ 78.236–1 *Compliance.* (a) Required in all details.

§ 78.236–2 *Paper.* (a) Shipping sack kraft paper, plain,[1] shall conform to the following average requirements:

Nominal basis weight (500 sheets, 24" x 36") [2]	Minimum average dry tearing strength		Minimum average dry tensile strength per inch width	
	M. D.[3]	Total M. D. plus C. D.[3]	C. D.[3]	Total C. D. plus M. D.[3]
Pounds:	*Grams*	*Grams*	*Pounds*	*Pounds*
40	88	188	14	41
50	110	235	19	53
60	132	282	23	64
70	154	329	27	74

[1] A tolerance of minus 10 percent of the basis weight of individual plies of plain shipping sack kraft paper will be permitted; an average tolerance of minus 5 percent will be permitted in the sum total basis weight of all plies in multiwall constructions. Variations in excess of specified basis weights will not be considered a defect or deviation. The basis weight of paper means the basis weight as produced by the paper machine, not including finish subsequently applied, such as coating or printing.

[3] M. D. means machine direction. C. D. means cross direction.

(b) Asphalt laminated or polyethylene coated shipping sack kraft paper when used shall comply with the following requirements:

Type paper	Minimum average dry tearing strength		Minimum average dry tensile strength per inch width		Heat resistance hours at 150° F. without impairing function of sack	Maximum average water-vapor permeability from both sides at 80 percent R. H. and 75° F. g/m, 2/24 hours	
	M. D.	Total M. D. plus C. D.	C. D.	Total C. D. plus M. D.		Uncreased	Creased [1]
	Grams	*Grams*	*Pounds*	*Pounds*			
Asphalt laminated [2]	110	235	19	53	5	9.0	15.0
10PE–50 1/50–10PE [4]	110	235	19	53	5	7.0	12.0
15PE–50 1/50–15PE [4]	110	235	19	53	5	4.5	7.5

[1] Creasing at 40° F.

[2] Asphalt laminated kraft paper when used as a wall in fabricated sacks, shall conform to the requirements of paragraph (b) of this section and shall consist of two sheets of kraft paper, the total basis weight of the two paper plies not less than 50 pounds per ream (500 sheets, 24" x 36"), continuously and uniformly laminated together with an average of not less than 25 pounds of asphalt per ream (500 sheets, 24" x 36"). Tolerance of minus 5 percent will be allowed on individual components. The total basis weight of the finished combination shall not exceed 100 pounds per ream (500 sheets, 24" x 36"). An asphalt laminated kraft wall meeting these requirements may be substituted for a plain kraft wall of 50 pounds basis or less, provided it meets the specification.

[4] Polyethylene-coated shipping sack kraft paper. The polyethylene-coated kraft paper when used as walls in fabricated sacks shall meet the heat resistance and water-vapor permeability requirements as specified in the table. A tolerance of minus 10 percent will be allowed for the lot sample average coating weight of polyethylene on shipping sack kraft paper. Minimum samples for testing shall comprise not less than 3 specimens 16 square inches each selected representatively from each polyethylene-coated wall of each sack in the lot sample.

(c) Laminating materials: Any laminant other than asphalt or other water-vapor barrier walls may be used provided they meet the requirements in paragraph (b) of this section.

(d) All values in paragraphs (a) and (b) of this section are for paper having a moisture content in equilibrium with an atmosphere having a relative humidity of 50 percent plus or minus 2 percent at a temperature of 73° F. plus or minus 2.5° F. following preconditioning of the test specimens to a moisture content between 2 and 5.5 percent by exposure to relatively dry air having a temperature no greater than 140° F.

(e) Conformance of sacks with paper strength requirements shall be established by comparing the sums of the test values for all the walls of the new and unused sack with the sums of the respective strength values specified in paragraphs (a) and (b) of this section for the respective papers specified for the different walls of the sack by a method acceptable to the Bureau of Explosives.

(1) Variation in cross direction dry tensile strength of not more than 2 units below the minimum requirement based on paragraphs (a) and (b) of this section will be permitted for each wall of the sack, provided the variation is compensated for by a machine direction tearing strength test value in excess of the minimum requirement obtained from the tables, in the ratio of 5 units of tearing strength for each unit of dry tensile strength test below the minimum requirement; and variation in combined dry tensile strength of not more than 4 units below the minimum requirement based on paragraphs (a) and (b) of this section will be permitted for each wall and provided the variation is compensated for by a combined tearing strength test value in excess of the minimum requirement obtained from the tables in the ratio of 5 units of combined tearing strength for each unit of dry tensile strength test below the minimum requirement. Similarly, variation in machine direction tearing strength of not more than 10 units below the minimum requirement will be permitted for each wall, provided the variation is compensated for by a cross direction dry tensile strength test value in excess of the minimum requirement obtained from the tables in the ratio of 1 unit of dry tensile strength for each 5 units of tearing strength test below the minimum requirement; and variation in combined tearing strength of not more than 20 units below the minimum requirement obtained from the tables will be permitted for each wall provided the variation is compensated for by a combined dry tensile strength test value in excess of the minimum requirement obtained from the tables in the ratio of 5 units of tearing strength for each unit of dry tensile strength below the minimum requirement.

§ 78.236–3 *Construction.* (a) Bags must be at least 4 thicknesses of paper; this must be heavy duty shipping sack kraft paper, conforming to the requirements of § 78.236–2 paragraphs (a) and (b) or equivalent, with a minimum total basis weight of 200 pounds of paper (500 sheets, 24" x 36"). Outer sheet must be of water-resistant stock and at least 60 pounds basis weight, inner sheets not less than 40 pounds basis weight. Bags to be of "satchel bottom" construction; bottoms to be reinforced with a kraft paper patch at least 30 pounds basis weight. Other bottoms of equal efficiency are authorized.

[1] Shipping sack kraft paper plain is paper that consists of all sulphate pulp and no other fibre, and which has not been treated by coloring, bleaching, creping, coating, spraying, laminating or impregnating for special qualities. Paper shall have a degree of water resistance as secured by normal rosin sizing and shall comply with the requirements in paragraph (a) of this section.

(b) Or, bags must be at least 2 thicknesses of paper; this must be heavy duty shipping sack kraft paper, or equivalent with a minimum total basis weight of 110 pounds (500 sheets, 24" x 36"), fastened together with waterproof composition reinforced with jute, sisal, cotton, or other yarn or cord imbedded in the composition and criss-crossed at intervals of not over ½", approximately, so as to give approximately the same tensile strength for both width and length. Bags to be of "satchel bottom" construction. Other bottoms of equal efficiency are authorized.

(c) Moistureproof barrier sheets of paper, if used, must meet the requirements of § 78.236–2 (b) and shall be considered as one thickness of paper and shall be counted as 50 pounds basis weight (500 sheets, 24" x 36").

§ 78.236–4 *Adhesive.* (a) Moisture resistant adhesive must be used on all seams, joints, and bottom patch, if any.

§ 78.236–5 *Closure.* (a) For 4-ply bags: Inner (fourth) ply to be diamond folded loose; the third ply to be diamond folded and silicated across all its overlapping folds; the two outer plies to be diamond folded, and cross sealed, front to back and side to side, with gummed tape extending at least 2 inches down sides of bag; sealing tape must be 4" wide, of No. 1 Kraft paper, 90 pounds basis weight (500 sheets, 24" x 36"), or equivalent, and having a Mullen or Cady test, of not less than 90 percent of basis weight. Other closures of equal efficiency are authorized.

(b) For all bags: Any closure for the top which is equal in efficiency to that of the bottom, is authorized.

§ 78.236–6 *Tests for shipment.* (a) Bags as prepared for shipment must be able to withstand four 4-foot drops, one on each end and one each on opposite sides, without sifting or rupture.

§ 78.236–7 *Marking.* (a) Marking on each bag with letters and figures at least ½ inch high in rectangle as follows:

ICC–44B

(1) This mark shall be understood to certify that bag complies with all specification requirements.

(2) Name and address of maker located just above or below the mark specified in paragraph (a) of this section; symbol (letters) authorized if registered with the Bureau of Explosives.

2. Amend entire § 78.237 (23 F. R. 2332, April 10, 1958) (15 F. R. 8482, 8483, Dec. 2, 1950) to read as follows:

§ 78.237 *Specification 44C; multiwall paper bags.*

§ 78.237–1 *Compliance.* (a) Required in all details.

§ 78.237–2 *Paper.* (a) Shipping sack kraft paper, plain,[1] shall conform to the following average requirements:

Nominal basis weight (500 sheets, 24" x 36") [2]	Minimum average dry tearing strength		Minimum average dry tensile strength per inch width	
	M. D.[3]	Total M. D. plus C. D.[3]	C. D.[3]	Total C. D. plus M. D.[3]
Pounds:	*Grams*	*Grams*	*Pounds*	*Pounds*
40	88	188	14	41
50	110	235	19	53
60	132	282	23	64
70	154	329	27	74

[1] A tolerance of minus 10 percent of the basis weight of individual plies of plain shipping sack kraft paper will be permitted; an average tolerance of minus 5 percent will be permitted in the sum total basis weight of all plies in multiwall constructions. Variations in excess of specified basis weights will not be considered a defect or deviation. The basis weight of paper means the basis weight as produced by the paper machine, not including finish subsequently applied, such as coating or printing.

[3] M. D. means machine direction. C. D. means cross direction.

(b) Asphalt laminated or polyethylene coated shipping sack kraft paper when used shall comply with the following requirements:

Type paper	Minimum average dry tearing strength		Minimum average dry tensile strength per inch width		Heat resistance hours at 150° F. without impairing function of sack	Maximum average water-vapor permeability from both sides at 80 percent R. H. and 75° F. g/m 2/24 hours	
	M. D.	Total M. D. plus C. D.	C. D.	Total C. D. plus M. D.		Uncreased	Creased [1]
	Grams	*Grams*	*Pounds*	*Pounds*			
Asphalt laminated [2]	110	235	19	53	5	9.0	15.0
10PE–50 1/50–10PE [4]	110	235	19	53	5	7.0	12.0
15PE–50 1/50–15PE [4]	110	235	19	53	5	4.5	7.5

[1] Creasing at 40° F.

[2] Asphalt laminated kraft paper when used as a wall in fabricated sacks, shall conform to the requirements of paragraph (b) of this section and shall consist of two sheets of kraft paper, the total basis weight of the two paper plies not less than 50 pounds per ream (500 sheets, 24" x 36"), continuously and uniformly laminated together with an average of not less than 25 pounds of asphalt per ream (500 sheets, 24" x 36"). Tolerance of minus 5 percent will be allowed on individual components. The total basis weight of the finished combination shall not exceed 100 pounds per ream (500 sheets, 24" x 36"). An asphalt laminated kraft wall meeting these requirements may be substituted for a plain kraft wall of 50 pounds basis or less, provided it meets the specification.

[4] Polyethylene-coated shipping sack kraft paper. The polyethylene-coated kraft paper when used as walls in fabricated sacks shall meet the heat resistance and water-vapor permeability requirements as specified in the table. A tolerance of minus 10 percent will be allowed for the lot sample average coating weight of polyethylene on shipping sack kraft paper. Minimum samples for testing shall comprise not less than 3 specimens 16 square inches each selected representatively from each polyethylene-coated wall of each sack in the lot sample.

[1] Shipping sack kraft paper plain is paper that consists of all sulphate pulp and no other fiber, and which has not been treated by coloring, bleaching, creping, coating, spraying, laminating, or impregnating for special qualities. Paper shall have a degree of water resistance as secured by normal rosin sizing and shall comply with the requirements in paragraph (a) of this section.

(c) **Laminating materials:** Any laminant other than asphalt or other water-vapor barrier walls may be used provided they meet the requirements in paragraph (b) of this section.

(d) All values in paragraphs (a) and (b) of this section are for paper having a moisture content in equilibrium with an atmosphere having a relative humidity of 50 percent plus or minus 2 percent at a temperature of 73° F. plus or minus 3.5° F. following preconditioning of the test specimens to a moisture content between 3 and 5.5 percent by exposure to relatively dry air having a temperature no greater than 140° F.

(e) Conformance of sacks with paper strength requirements shall be established by comparing the sums of the test values for all the walls of the new and unused sack with the sums of the respective strength values specified in paragraphs (a) and (b) of this section for the respective papers specified for the different walls of the sack by a method acceptable to the Bureau of Explosives.

(1) Variation in cross direction dry tensile strength of not more than 2 units below the minimum requirement based on paragraphs (a) and (b) of this section will be permitted for each wall of the sack, provided the variation is compensated for by a machine direction tearing strength test value in excess of the minimum requirement obtained from the tables, in the ratio of 5 units of tearing strength for each unit of dry tensile strength test below the minimum requirement; and variation in combined dry tensile strength of not more than 4 units below the minimum requirement based on paragraphs (a) and (b) of this section will be permitted for each wall used provided the variation is compensated for by a combined tearing strength test value in excess of the minimum requirement obtained from the tables in the ratio of 5 units of combined tearing strength for each unit of dry tensile strength test below the minimum requirement. Similarly, variation in machine direction tearing strength of not more than 10 units below the minimum requirement will be permitted for each wall, provided the variation is compensated for by a cross direction dry tensile strength test value in excess of the minimum requirement obtained from the tables in the ratio of 1 unit of dry tensile strength for each 5 units of tearing strength test below the minimum requirement; and variation in combined tearing strength of not more than 20 units below the minimum requirement obtained from the tables will be permitted for each wall provided the variation is compensated for by a combined dry tensile strength test value in excess of the minimum requirement obtained from the tables in the ratio of 5 units of tearing strength for each unit of dry tensile strength below the minimum requirement.

§ 78.237–3 *Construction.* (a) Bags must be at least 4 thicknesses of paper; this must be heavy duty shipping sack kraft paper conforming to the requirements of § 78.237–2 paragraphs (a) and (b), or equivalent, with a minimum total basis weight of 250 pounds of paper (500 sheets, 24" x 36"). Outer sheet must be of water resistant stock and at least 60 pounds basis weight, inner sheets not less than 40 pounds basis weight. Bags to be of sewn, sift-proof bottom construction. Other bottoms of equal efficiency authorized.

(b) Moistureproof barrier sheets of paper, if used, must meet the requirements of § 78.237–2 (b) and shall be considered as one thickness of paper and shall be counted as 50 pounds basis weight (500 sheets, 24" x 36").

§ 78.237–4 *Adhesive.* (a) Moisture resistant adhesive must be used on all seams, joints, and bottom patch, if any.

§ 78.237–5 *Closure.* (a) For all bags: Any closure for the top which is equal in efficiency to that of the bottom, is authorized.

§ 78.237–6 *Tests for shipment.* (a) Bags as prepared for shipment must be able to withstand four 4-foot drops, one on each end and one each on opposite sides, without sifting or rupture.

§ 78.237–7 *Marking.* (a) On each bag with letters and figures at least ½ inch high in rectangle as follows:

ICC–44C

(1) This mark shall be understood to certify that bag complies with all specification requirements.

(2) Name and address of maker located just above or below the mark specified in paragraph (a) of this section; symbol (letters) authorized if registered with the Bureau of Explosives.

3. Amend entire § 78.238 (15 F. R. 8483, Dec. 2, 1950) to read as follows:

§ 78.238 *Specification 44D; multiwall paper bags.*

§ 78.238–1 *Compliance.* (a) Required in all details.

§ 78.238–2 *Paper.* (a) Shipping sack kraft paper, plain,[1] shall conform to the following average requirements:

Nominal basis weight (500 sheets, 24" x 36") [2]	Minimum average dry tearing strength		Minimum average dry tensile strength per inch width	
	M. D.[3]	Total M. D. plus C. D.[3]	C. D.[3]	Total C. D. plus M. D.[3]
Pounds:	*Grams*	*Grams*	*Pounds*	*Pounds*
40	88	188	14	41
50	110	235	19	53
60	132	282	23	64
70	154	329	27	74

[1] A tolerance of minus 10 percent of the basis weight of individual plies of plain shipping sack kraft paper will be permitted; an average tolerance of minus 5 percent will be permitted in the sum total basis weight of all plies in multiwall constructions. Variations in excess of specified basis weights will not be considered a defect or deviation. The basis weight of paper means the basis weight as produced by the paper machine, not including finish subsequently applied, such as coating or printing.

[2] M. D. means machine direction. C. D. means cross direction.

(b) Asphalt laminated or polyethylene coated shipping sack kraft paper when used shall comply with the following requirements:

Type paper	Minimum average dry tearing strength		Minimum average dry tensile strength per inch width		Heat resistance hours at 150° F. without impairing function of sack	Maximum average water-vapor permeability from both sides at 50 percent R. H. and 73° F. g/m, 2/24 hours	
	M. D.	Total M. D. plus C. D.	C. D.	Total C. D. plus M. D.		Uncreased	Creased [1]
	Grams	*Grams*	*Pounds*	*Pounds*			
Asphalt laminated [2]	110	235	19	53	5	9.0	15.0
10PE–50 1/50–10PE [3]	110	235	19	53	5	7.0	12.0
15PE–50 1/50–15PE [3]	110	235	19	53	5	4.5	7.5

[1] Creasing at 40° F.

[2] Asphalt laminated kraft paper when used as a wall in fabricated sacks, shall conform to the requirements of paragraph (b) of this section and shall consist of two sheets of kraft paper, the total basis weight of the two paper plies not less than 50 pounds per ream (500 sheets, 24" x 36"), continuously and uniformly laminated together with an average of not less than 25 pounds of asphalt per ream (500 sheets, 24" x 36"). Tolerance of minus 5 percent will be allowed on individual components. The total basis weight of the finished combination shall not exceed 100 pounds per ream (500 sheets, 24" x 36"). An asphalt laminated kraft wall meeting these requirements may be substituted for a plain kraft wall of 50 pounds basis or less, provided it meets the specification.

[3] Polyethylene-coated shipping sack kraft paper. The polyethylene-coated kraft paper when used as walls in fabricated sacks shall meet the heat resistance and water-vapor permeability requirements as specified in the table. A tolerance of minus 10 percent will be allowed for the lot sample average coating weight of polyethylene on shipping sack kraft paper. Minimum samples for testing shall comprise not less than 3 specimens 16 square inches each selected representatively from each polyethylene-coated wall of each sack in the lot sample.

(c) Laminating materials: Any laminant other than asphalt or other water-vapor barrier walls may be used provided they meet the requirements in paragraph (b) of this section.

(d) All values in paragraphs (a) and (b) of this section are for paper having a moisture content in equilibrium with an atmosphere having a relative humidity of 50 percent plus or minus 2 percent at a temperature of 73° F. plus or minus 3.5° F. following preconditioning of the test specimens to a moisture content between 3 and 5.5 percent by exposure to relatively dry air having a temperature no greater than 140° F.

(e) Conformance of sacks with paper strength requirements shall be established by comparing the sums of the test

[1] Shipping sack kraft paper plain is paper that consists of all sulphate pulp and no other fibre, and which has not been treated by coloring, bleaching, creping, coating, spraying, laminating or impregnating for special qualities. Paper shall have a degree of water resistance as secured by normal rosin sizing and shall comply with the requirements in paragraph (a) of this section.

values for all the walls of the new and unused sack with the sums of the respective strength values specified in paragraphs (a) and (b) of this section for the respective papers specified for the different walls of the sack by a method acceptable to the Bureau of Explosives.

(1) Variation in cross direction dry tensile strength of not more than 2 units below the minimum requirements based on paragraphs (a) and (b) of this section will be permitted for each wall of the sack, provided the variation is compensated for by a machine direction tearing strength test value in excess of the minimum requirement obtained from the tables, in the ratio of 5 units of tearing strength for each unit of dry tensile strength test below the minimum requirement; and variation in combined dry tensile strength of not more than 4 units below the minimum requirement based on paragraphs (a) and (b) of this section will be permitted for each wall used provided the variation is compensated for by a combined tearing strength test value in excess of the minimum requirement obtained from the tables in the ratio of 5 units of combined tearing strength for each unit of dry tensile strength test below the minimum requirement. Similarly, variation in machine direction tearing strength of not more than 10 units below the minimum requirement will be permitted for each wall, provided the variation is compensated for by a cross direction dry tensile strength test value in excess of the minimum requirement obtained from the tables in the ratio of 1 unit of dry tensile strength for each 5 units of tearing strength test below the minimum requirement; and variation in combined tearing strength of not more than 20 units below the minimum requirement obtained from the tables will be permitted for each wall provided the variation is compensated for by a combined dry tensile strength test value in excess of the minimum requirement obtained from the tables in the ratio of 5 units of tearing strength for each unit of dry tensile strength below the minimum requirement.

§ 78.238–3 *Construction.* (a) Bags must be at least 5 thicknesses of paper; this must be heavy duty shipping sack kraft paper, conforming to the requirements of § 78.238–2 paragraphs (a) and (b), or equivalent, with a minimum total basis weight of 320 pounds of paper (500 sheets, 24" x 36"). Outer sheet must be of water resistant stock and at least 70 pounds basis weight, inner sheets not less than 50 pounds basis weight. Bags to be of sewn, sift-proof bottom construction. Other bottoms of equal efficiency authorized.

(b) Moistureproof barrier sheets of paper, if used, must meet the requirements of § 78.238–2 (b) and shall be considered as one thickness of paper and shall be counted as 50 pounds basis weight (500 sheets, 24" x 36").

§ 78.238–4 *Adhesive.* (a) Moisture resistant adhesive must be used on all seams, joints, and bottom patch, if any.

§ 78.238–5 *Closure.* (a) For all bags: Any closure for the top which is equal in efficiency to that of the bottom, is authorized.

§ 78.238–6 *Tests for shipment.* (a) Bags as prepared for shipment must be able to withstand four 4-foot drops, one on each end and one each on opposite sides, without sifting or rupture.

§ 78.238–7 *Marking.* (a) On each bag with letters and figures at least ½ inch high in rectangle as follows:

ICC–44D

(1) This mark shall be understood to certify bag complies with all specification requirements.

(2) Name and address of maker located just above or below the mark specified in paragraph (a) of this section; symbol (letters) authorized if registered with the Bureau of Explosives.

4. Amend entire § 78.239 (23 F. R. 2332, April 10, 1958) (19 F. R. 1286, Mar. 6, 1954) to reads as follows:

§ 78.239 *Specification 44E; multiwall paper bags.*

§ 78.239–1 *Compliance.* (a) Required in all details.

§ 78.239–2 *Paper.* (a) Shipping sack kraft paper, plain,[1] shall conform to the following average requirements:

Nominal basis weight (500 sheets, 24" x 36") [2]	Minimum average dry tearing strength		Minimum average dry tensile strength per inch width	
	M. D.[3]	Total M. D. plus C. D.[3]	C. D.[3]	Total C. D. plus M. D.[3]
Pounds:	*Grams*	*Grams*	*Pounds*	*Pounds*
40	88	188	14	41
50	110	235	19	53
60	132	282	23	64
70	154	329	27	74

[1] A tolerance of minus 10 percent of the basis weight of individual plies of plain shipping sack kraft paper will be permitted; an average tolerance of minus 5 percent will be permitted in the sum total basis weight of all plies in multiwall constructions. Variations in excess of specified basis weights will not be considered a defect or deviation. The basis weight of paper means the basis weight as produced by the paper machine, not including finish subsequently applied, such as coating or printing.

[2] M. D. means machine direction. C. D. means cross direction.

(b) Asphalt laminated or polyethylene coated shipping sack kraft paper when used shall comply with the following requirements:

Type paper	Minimum average dry tearing strength		Minimum average dry tensile strength per inch width		Heat resistance hours at 150° F. without impairing function of sack	Maximum average water-vapor permeability from both sides at 50 percent R. H. and 73° F. g/m, 2/24 hours	
	M. D.	Total M. D. plus C. D.	C. D.	Total C. D. plus M. D.		Uncreased	Creased [1]
	Grams	*Grams*	*Pounds*	*Pounds*			
Asphalt laminated [2]	110	235	19	53	5	9.0	15.0
10PE–50 1/50–10PE [3]	110	235	19	53	5	7.0	12.0
15PE–50 1/50–15PE [3]	110	235	19	53	5	4.5	7.5

[1] Creasing at 40° F.

[2] Asphalt laminated kraft paper when used as a wall in fabricated sacks, shall conform to the requirements of paragraph (b) of this section and shall consist of two sheets of kraft paper, the total basis weight of the two paper plies not less than 50 pounds per ream (500 sheets, 24" x 36"), continuously and uniformly laminated together with an average of not less than 25 pounds of asphalt per ream (500 sheets, 24" x 36"). Tolerance of minus 5 percent will be allowed on individual components. The total basis weight of the finished combination shall not exceed 100 pounds per ream (500 sheets, 24" x 36"). An asphalt laminated kraft wall meeting these requirements may be substituted for a plain kraft wall of 50 pounds basis or less, provided it meets the specification.

[3] Polyethylene-coated shipping sack kraft paper. The polyethylene-coated kraft paper when used as walls in fabricated sacks shall meet the heat resistance and water-vapor permeability requirements as specified in the table. A tolerance of minus 10 percent will be allowed for the lot sample average coating weight of polyethylene on shipping sack kraft paper. Minimum samples for testing shall comprise not less than 3 specimens 16 square inches each selected representatively from each polyethylene-coated wall of each sack in the lot sample.

(c) Laminating materials: Any laminant other than asphalt or other water-vapor barrier walls may be used provided they meet the requirements in paragraph (b) of this section.

(d) All values in paragraphs (a) and (b) of this section are for paper having a moisture content in equilibrium with an atmosphere having a relative humidity of 50 percent plus or minus 2 percent at a temperature of 73° F. plus or minus 3.5° F. following preconditioning of the test specimens to a moisture content between 3 and 5.5 percent by exposure to relatively dry air having a temperature no greater than 140° F.

(e) Conformance of sacks with paper strength requirements shall be established by comparing the sums of the test values for all the walls of the new and unused sack with the sums of the respective strength values specified in paragraphs (a) and (b) of this section for the respective papers specified for the different walls of the sack by a method acceptable to the Bureau of Explosives.

(1) Variation in cross direction dry tensile strength of not more than 2 units below the minimum requirement based on paragraphs (a) and (b) of this section will be permitted for each wall of the sack, provided the variation is compensated for by a machine direction tearing strength test value in excess of the minimum requirement obtained from the tables, in the ratio of 5 units of tearing strength for each unit of dry tensile strength test below the minimum requirement; and variation in combined

[1] Shipping sack kraft paper plain is paper that consists of all sulphate pulp and no other fibre, and which has not been treated by coloring, bleaching, creping, coating, spraying, laminating or impregnating for special qualities. Paper shall have a degree of water resistance as secured by normal rosin sizing and shall comply with the requirements in paragraph (a) of this section.

dry tensile strength of not more than 4 units below the minimum requirement based on paragraphs (a) and (b) of this section will be permitted for each wall used provided the variation is compensated for by a combined tearing strength test value in excess of the minimum requirement obtained from the tables in the ratio of 5 units of combined tearing strength for each unit of dry tensile strength test below the minimum requirement. Similarly, variation in machine direction tearing strength of not more than 10 units below the minimum requirement will be permitted for each wall, provided the variation is compensated for by a cross direction dry tensile strength test value in excess of the minimum requirement obtained from the tables in the ratio of 1 unit of dry tensile strength for each 5 units of tearing strength test below the minimum requirement; and variation in combined tearing strength of not more than 20 units below the minimum requirement obtained from the tables will be permitted for each wall provided the variation is compensated for by a combined dry tensile strength test value in excess of the minimum requirement obtained from the tables in the ratio of 5 units of tearing strength for each unit of dry tensile strength below the minimum requirement.

§ 78.239–3 *Construction and capacity.* (a) Bags must be at least 3 thicknesses of paper; this must be heavy duty shipping sack kraft paper conforming to the requirements of § 78.239–2 paragraphs (a) and (b), or equivalent, with a minimum total basis weight of 130 pounds of paper (500 sheets, 24" x 36"). Outer sheet must be of water-resistant stock and at least 50 pounds basis weight, inner sheets not less than 40 pounds basis weight. Bags to be of sewn and taped, cemented, taped, satchel bottom or other construction of equal efficiency to form a sift-proof and reasonably air-tight container. Authorized for not over 50 pounds net weight, except that bags having a minimum total basis weight of 160 pounds of paper (500 sheets, 24" x 36") with outer sheet of water-resistant stock and at least 60 pounds basis weight inner sheets not less than 50 pounds basis weight, are authorized for not to exceed 100 pounds net weight of contents.

(b) Moistureproof barrier sheets of paper, if used, must meet the requirements of § 78.239–2 (b) and shall be considered as one thickness of paper and shall be counted as 50 pounds basis weight (500 sheets, 24" x 36").

§ 78.239–4 *Adhesive.* (a) Moisture resistant adhesive must be used on all seams, joints, and bottom patch, if any.

§ 78.239–5 *Closure.* (a) For all bags: Any closure for the top which is equal in efficiency to that of the bottom, is authorized.

§ 78.239–6 *Tests for shipment.* (a) Bags as prepared for shipment must be able to withstand four 4-foot drops, one on each end and one each on opposite sides, without sifting or rupture.

§ 78.239–7 *Marking.* (a) On each bag with letters and figures at least ½ inch high in rectangle as follows:

ICC–44E

(1) This mark shall be understood to certify bag complies with all specification requirements.

(2) Name and address of maker located just above or below the mark specified in paragraph (a) of this section; symbol (letters) authorized if registered with the Bureau of Explosives.

SUBPART I—SPECIFICATIONS FOR TANK CARS

1. In § 78.261 amend paragraph (a) (1) (21 F. R. 4566, June 26, 1956) to read as follows:

§ 78.261 *Specification for interior heater systems.*—(a) *Heater pipes and fittings.* (1) When threaded joints are used, pipes shall not be less than two inch "extra strong" lap-welded steel, seamless steel, electric-resistance-welded steel, or wrought iron to current A. A. R. Specifications, or to ASTM Specification A–83 titled Seamless Steel Boiler Tubes, Grade A, or to ASTM Specification A–178 titled Electric-Resistance-Welded Steel and Open-Hearth Iron Boiler Tubes, Grade A. When the joints are welded, instead of threaded, to give them the same bending strength as the body of the pipes, the thickness of wall may be reduced 20 percent. Joints shall be made by threaded wrought couplings, forged unions, bolted flanges, or welding. A minimum number of connections shall be used.

* * * * *

2. In § 78.265–12 amend the heading and paragraph (a) and add paragraph (b); in § 78.265–14 amend paragraph (c) and add paragraph (d) (21 F. R. 4568, June 26, 1956) (22 F. R. 4793, July 9, 1957) to read as follows:

§ 78.265 *Specification ICC–103; riveted steel tanks to be mounted on or forming part of a car.*

§ 78.265–12 *Gauging, bottom outlet valve operating rod, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of an approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading and unloading of the contents, these devices, including valves, must be of an approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.265–14 *Safety vents.* * * *

(c) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped, must have one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.265–12 (a), made of a material not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids".

(d) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.265–12 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing the pipe connections of valves.

3. In § 78.266–12 amend the heading and paragraphs (a) and (b); in § 78.266–14 amend paragraph (b) and add paragraph (c) (21 F. R. 4570, 4571, June 26, 1956) to read as follows:

§ 78.266 *Specification ICC–103A; riveted steel tanks to be mounted on or forming part of a car.*

§ 78.266–12 *Gauging, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading or unloading of the contents, these devices, including valves, must be of an approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.266–14 *Safety vents.* * * *

(b) Each tank or compartment thereof must be equipped with one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.266–12 (a), made of metal not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding the disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement.

(c) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.266–12 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing the pipe connections of valves.

4. Amend entire § 78.267–12; in § 78.267–14 amend paragraph (b) and add paragraph (c) (21 F. R. 4573, June 26, 1956) (22 F. R. 7843, Oct. 3, 1957) to read as follows:

§ 78.267 *Specification ICC–103B; rubber lined riveted steel tanks to be mounted on or forming part of a car.*

§ 78.267–12 *Gauging, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading or unloading of the contents, these devices, including valves, must be of an approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

(c) When gauging, loading and unloading devices and their closures are made of a material affected by the lading, they must have all surfaces protected with an acid resistant approved material at least ⅛ inch in thickness.

§ 78.267–14 *Safety vents.* * * *

(b) Each tank or compartment thereof must be equipped with one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.267–12 (a), made of an approved material not subject to rapid deterioration by the lading. If made of metal, must be lined with an acid resistant approved material at least ⅛ inch in thickness, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding the disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement.

(c) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.267–12 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

5. Amend entire § 78.269–12; in § 78.269–14 amend paragraph (c) and add paragraph (d) (21 F. R. 4575, June 26, 1956) (22 F. R. 4793, July 9, 1957) to read as follows:

§ 78.269 *Specification ICC–104; lagged riveted steel tanks to be mounted on or forming part of a car.*

§ 78.269–12 *Gauging, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of an approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading or unloading of the contents, these devices, including valves, must be of an approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

* * * * *

§ 78.269–14 *Safety valves.* * * *

(c) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped, must have one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.269–12 (a), made of material not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids".

(d) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.269–12 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

6. In § 78.280–14 amend the heading and paragraph (a) and add paragraph (b); in § 78.280–16 amend paragraphs (c), (d) and add paragraph (e) (21 F. R. 4587, June 26, 1956) (22 F. R. 4794, July 9, 1957) to read as follows:

§ 78.280 *Specification ICC–103–W; fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.280–14 *Gauging, bottom outlet valve operating rod, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of an approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading and unloading of the contents, these devices, including valves, must be of an approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.280–16 *Safety valves.* * * *

(c) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped, must have one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.280–14 (a), made of a material not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids".

(d) Safety valve or safety vent flanges, if welded to tank, must be case, forged, or fabricated metal and be of good weldable quality in conjunction with the metal of the tank.

(e) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.280–14 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

7. In § 78.281–14 amend the heading and paragraphs (a) and (b); in § 78.281–16 amend paragraphs (b) and (c) and add paragraph (d) (21 F. R. 4589, 4590, June 26, 1956) to read as follows:

§ 78.281 *Specification ICC–103A–W; fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.281–14 *Gauging, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading or unloading of the contents, these devices, including valves, must be of an approved design, made of material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.281–16 *Safety vents.* • • •

(b) Each tank or compartment thereof must be equipped with one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.281–14 (a), made of metal not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding the disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement.

(c) Safety vent flanges, if welded to tank, must be cast, forged, or fabricated metal and be of good weldable quality in conjunction with the metal of the tank.

(d) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.281–14 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing the pipe connections of valves.

8. Amend entire § 78.282–13; in § 78.282–15 amend paragraphs (b) and (c) and add paragraph (d) (21 F. R. 4592, June 26, 1956) (22 F. R. 7844, Oct. 3, 1957) to read as follows:

§ 78.282 *Specification ICC–103B–W; rubber lined fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.282–13 *Gauging, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading or unloading of the contents, these devices, including valves, must be of an approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

(c) When gauging, loading and unloading devices, and their closures are made of a material affected by the lading, they must have all surfaces protected with an acid resistant approved material at least ⅛ inch in thickness.

§ 78.282–15 *Safety vents.* • • •

(b) Each tank or compartment thereof must be equipped with one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.282–13 (a), made of an approved material not subject to rapid deterioration by the lading. If made of metal, must be lined with an acid resistant approved material at least ⅛ inch in thickness, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding the disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement.

(c) Safety vent flanges, if welded to tank, must be cast, forged, or fabricated metal and be of good weldable quality in conjunction with the metal of the tank.

(d) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.282–13 (a) made of an approved material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of material not subject to rapid deterioration by the lading, and be provided with a protective housing. If these devices and their valves are made of metal, they must be lined with an acid resistant approved material at least ⅛ inch in thickness. Provision must be made for closing the pipe connections of valves.

9. In § 78.283–2 amend paragraph (b) (21 F. R. 4593, June 26, 1956) to read as follows:

§ 78.283 *Specification ICC–103C–W; fusion-welded alloy steel tanks to be mounted on or forming part of a car.*

§ 78.283–2 *Lagging.* • • •

(b) Before lagging is applied, the inside surface of the metal jacket shall be given a protective coating.

10. In § 78.284–14 amend the heading and paragraphs (a) and (b); in § 78.284–16 amend paragraphs (c) and (d) and add paragraph (e) (21 F. R. 4596, June 26, 1956) (22 F. R. 4795, July 9, 1957) to read as follows:

§ 78.284 *Specification ICC–104–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.284–14 *Gauging, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of an approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading or unloading of the contents, these devices, including valves, must be of an approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

• • • • • •

§ 78.284–16 *Safety valves.* • • •

(c) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped, must have one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.284–14 (a), made of material not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids".

(d) Safety valve or safety vent flanges, if welded to tank, must be cast, forged, or fabricated metal and be of good weldable quality in conjunction with the metal of the tank.

(e) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.284–14 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

11. In § 78.285–4 amend paragraph (b); in § 78.285–12 add paragraph (e) (22 F. R. 7844, Oct. 3, 1957) (21 F. R. 4597, 4599, June 26, 1956) to read as follows:

§ 78.285 *Specification ICC–105A100–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.285–4 *Thickness of plates.* • • •

(b) The minimum thickness of plates must be to the following design dimensions:

Inside diameter of tanks	Bottom sheets	Shell sheets	Tank heads
	Inch	Inch	Inch
87 inches or under	7/16	7/16	7/16
Over 87 to 107 inches	9/16	9/16	9/16

• • • • • •

§ 78.285–12 *Venting, loading and unloading, gauging and sampling devices and thermometer well.* • • •

(e) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

12. In § 78.286–12 add paragraph (f); in § 78.286–13 amend paragraph (b) and add paragraphs (c) and (d); in § 78.286–17 amend paragraph (a) (21 F. R. 4600, June 26, 1956) (22 F. R. 4796, July 9, 1957) to read as follows:

§ 78.286 *Specification ICC–105A300–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.286–12 *Venting, loading and unloading valves, gauging and sampling device and thermometer well.* • • •

(f) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

§ 78.286–13 *Safety valves.* • • •

(b) The safety valve must be set for a start-to-discharge pressure of 225 pounds per square inch except as provided in § 78.286–13 (c).

(c) When a safety valve is used in combination with a breaking pin device, the breaking pin device must be designed to fail at a pressure of 225 pounds per square inch. The safety valve must be set for a start-to-discharge pressure of 213 pounds per square inch.

(d) When a safety valve is used in combination with a frangible disc, the frangible disc must be designed to fail at a pressure not in excess of 225 pounds per square inch. The safety valve must be set for a start-to-discharge pressure of 225 pounds per square inch. Provision must be made to prevent any accumulation of pressure between frangible disc and safety valve.

§ 78.286–17 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The valve must start-to-discharge at the pressure prescribed in § 78.286–13 (b), (c), or (d), with a tolerance of plus or minus 3 percent, and be vapor tight at 180 pounds per square inch.

13. In § 78.287–12 add paragraph (f); in § 78.287–13 amend paragraph (b) and add paragraphs (c) and (d); in § 78.287–17 amend paragraph (a) (21 F. R. 4601, June 26, 1956) (22 F. R. 4796, July 9, 1957) to read as follows:

§ 78.287 *Specification ICC–105A400–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.287–12 *Venting, loading and unloading valves, gauging and sampling device and thermometer well.* • • •

(f) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

§ 78.287–13 *Safety valves.* • • •

(b) The safety valve must be set for a start-to-discharge pressure of 300 pounds per square inch except as provided in § 78.287–13 (c).

(c) When a safety valve is used in combination with a breaking pin device, the breaking pin device must be designed to fail at a pressure of 300 pounds per square inch. The safety valve must be set for a start-to-discharge pressure of 287 pounds per square inch.

(d) When a safety valve is used in combination with a frangible disc, the frangible disc must be designed to fail at a pressure not in excess of 300 pounds per square inch. The safety valve must be set for a start-to-discharge pressure of 300 pounds per square inch. Provision must be made to prevent any accumulation of pressure between frangible disc and safety valve.

§ 78.287–17 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The valve must start-to-discharge at the pressure prescribed in § 78.287–13 (b), (c), or (d) with a tolerance of plus or minus 3 percent, and be vapor tight at 240 pounds per square inch.

14. In § 78.288–12 add paragraph (f); in § 78.288–13 amend paragraphs (b) and (c) and add paragraphs (d) and (e); in § 78.288–17 amend paragraph (a) (21 F. R. 4603, June 26, 1956) (22 F. R. 4796, July 9, 1957) to read as follows:

§ 78.288 *Specification ICC–105A500–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.288–12 *Venting, loading and unloading valves, gauging and sampling device and thermometer well.* • • •

(f) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

§ 78.288–13 *Safety valves.* • • •

(b) The safety valve must be set for a start-to-discharge pressure of 375 pounds per square inch except as provided in § 78.288–13 (c).

(c) When a safety valve is used in combination with a breaking pin device, the breaking pin device must be designed to fail at a pressure of 375 pounds per square inch. The safety valve must be set for a start-to-discharge pressure of 360 pounds per square inch.

(d) When a safety valve is used in combination with a frangible disc, the frangible disc must be designed to fail at a pressure not in excess of 375 pounds per square inch. The safety valve must be set for a start-to-discharge pressure of 375 pounds per square inch. Provision must be made to prevent any accumulation of pressure between frangible disc and safety valve.

(e) Tanks for use in the transportation of liquefied carbon dioxide must be equipped with one safety valve of approved design set for a start-to-discharge pressure of 375 pounds per square inch, and one frangible disc device of approved design set to function at a pressure less than the test pressure of the tank. The discharge capacity of each of these safety devices must be sufficient to prevent building up pressure in tank in excess of 412.5 pounds per square inch. Tanks must also be equipped with two pressure regulating valves of approved design set for a start-to-discharge pressure of not to exceed 350 pounds per square inch. Each pressure regulating valve and safety device must have its final discharge piped to the outside of the protective housing.

§ 78.288–17 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The valve must start-to-discharge at the pressure prescribed in § 78.288–13 (b), (c), or (d) with a tolerance of plus or minus 3 percent, and be vapor tight at 300 pounds per square inch.

15. In § 78.289–12 add paragraph (f); in § 78.289–13 amend paragraphs (b) and (c) and add paragraphs (d) and (e); in § 78.289–17 amend paragraph (a) (21 F. R. 4605, June 26, 1956) (22 F. R. 4797, July 9, 1957) to read as follows:

§ 78.289 *Specification ICC–105A600–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.289–12 *Venting, loading and unloading valves, gauging and sampling device and thermometer well.* • • •

(f) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

§ 78.289–13 *Safety valves.* • • •

(b) The safety valve must be set for a start-to-discharge pressure of 450

pounds per square inch except as provided in § 78.289–13 (c).

(c) When a safety valve is used in combination with a breaking pin device, the breaking pin device must be designed to fail at a pressure of 450 pounds per square inch. The safety valve must be set for a start-to-discharge pressure of 423 pounds per square inch.

(d) When a safety valve is used in combination with a frangible disc, the frangible disc must be designed to fail at a pressure of not in excess of 450 pounds per square inch. The safety valve must be set for a start-to-discharge pressure of 450 pounds per square inch. Provision must be made to prevent any accumulation of pressure between frangible disc and safety valve.

(e) Tanks for use in the transportation of liquefied carbon dioxide must be equipped with one safety valve of approved design set for a start-to-discharge pressure of 450 pounds per square inch, and one frangible disc device of approved design set to function at a pressure less than the test pressure of the tank. The discharge pressure of each of these safety devices must be sufficient to prevent building up pressure in tank in excess of 495 pounds per square inch. Tank must also be equipped with two pressure regulating valves of approved design set for a start-to-discharge pressure of not to exceed 400 pounds per square inch. Each pressure regulating valve and safety device must have its final discharge piped to the outside of the protective housing.

§ 78.289–17 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The valve must start-to-discharge at the pressure prescribed in § 78.289–13 (b), (c), or (d) with a tolerance of plus or minus 3 percent, and be vapor tight at 360 pounds per square inch.

16. In § 78.291–4 amend paragraph (a); amend entire § 78.291–13; in § 78.291–15 amend paragraphs (c) and (d) and add paragraph (e) (22 F. R. 4797, July 9, 1957) (21 F. R. 4607, June 26, 1956) to read as follows:

§ 78.291 *Specification ICC–103AL–W; fusion-welded aluminum tanks to be mounted on or forming part of a car.*

§ 78.291–4 *Thickness of plates.* (a) The plate thickness shall not be less than that obtained by calculation using the following formula; and in no case be less than ½ inch:

$$t = \frac{Pd}{2SE}$$

where
t = thickness in inches of thinnest plate;
P = calculated bursting pressure, pounds per square inch;
d = inside diameter in inches;
S = minimum ultimate tensile strength in pounds per square inch as follows:

ASTM B–209 Alloy 996A—1060 = 9,500 psi.
ASTM B–209 Alloy 990A—1100 = 11,000 psi.
ASTM B–209 Alloy M1A—3003 = 14,000 psi.
ASTM B–209 Alloy GR20A—5052 = 25,000 psi.
ASTM B–209 Alloy GS11A—6061 = 24,000 psi.
ASTM B–209 Alloy GR40A—5154 = 30,000 psi.
ASTM B–209 Alloy GM40A—5086 = 35,000 psi.

E = efficiency of longitudinal welded joint = 90 percent.

• • • • • •

§ 78.291–13 *Gauging, bottom outlet valve operating rod, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of an approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading or unloading of the contents, these devices, including valves, must be of an approved design, made of material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.291–15 *Safety valves.* • • •

(c) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves; but if not so equipped, must have one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.291–13 (a), made of a material not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids".

(d) Safety valve or safety vent flanges, if welded to tank, must be cast, forged, or fabricated metal and be of good weldable quality in conjunction with metal of the tank.

(e) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.291–13 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

17. In § 78.292–4 amend paragraph (a); amend entire § 78.292–13; in § 78.292–15 amend paragraphs (d) and (e) and add paragraph (f) (22 F. R. 4798, July 9, 1957) (21 F. R. 4609, 4610, June 26, 1956) to read as follows:

§ 78.292 *Specification ICC–103A–AL–W; fusion-welded aluminum tanks to be mounted on or forming part of a car.*

§ 78.292–4 *Thickness of plates.* (a) The plate thickness shall not be less than that obtained by calculation using the following formula; and in no case be less than ½ inch:

$$t = \frac{Pd}{2SE}$$

where
t = thickness in inches of thinnest plate;
P = calculated bursting pressure, pounds per square inch;
d = inside diameter in inches;
S = minimum ultimate tensile strength in pounds per square inch as follows:

ASTM B–209 Alloy 996A—1060 = 9,500 psi.
ASTM B–209 Alloy 990A—1100 = 11,000 psi.
ASTM B–209 Alloy M1A—3003 = 14,000 psi.
ASTM B–209 Alloy GR20A—5052 = 25,000 psi.
ASTM B–209 Alloy GS11A—6061 = 24,000 psi.
ASTM B–209 Alloy GR40A—5154 = 30,000 psi.
ASTM B–209 Alloy GM40A—5086 = 35,000 psi.

E = efficiency of longitudinal welded joint = 90 percent.

• • • • • •

§ 78.292–13 *Gauging, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading or unloading of the contents, these devices, including valves, must be of an approved design, made of material not subject to rapid deterioration by the lading and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.292–15 *Safety devices.* • • •

(d) If tank is equipped with a safety vent it must be at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.292–13 (a), made of material not subject to rapid deterioration by the lading and be closed with a frangible disc of suitable material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids".

(d) Safety valve or safety vent flanges, if welded to tank, must be cast, forged, or fabricated metal and be of good weldable quality in conjunction with metal of the tank.

(e) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.292–13 (a) or § 78.292–15 (d), made of material not subject to rapid deterioration by the lading and be tightly closed and chained to prevent misplacement. Valves, if applied, must be of approved design, made of material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing the pipe connections of valves.

18. In § 78.294–4 amend paragraph (a); in § 78.294–12 add paragraph (e) (21 F. R. 4613, 4614, June 26, 1956) to read as follows:

§ 78.294 *Specification ICC–105A100–AL–W; lagged fusion-welded aluminum tanks to be mounted on or forming part of a car.*

§ 78.294–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula:

$$t = \frac{Pd}{2SE}$$

where
t = thickness in inches of thinnest plate;
P = calculated bursting pressure, pounds per square inch;
d = inside diameter in inches;
S = minimum ultimate tensile strength in pounds per square inch as follows:

ASTM B–209 Alloy 996A—1060 = 9,500 psi.
ASTM B–209 Alloy 990A—1100 = 11,000 psi.
ASTM B–209 Alloy M1A—3003 = 14,000 psi.
ASTM B–209 Alloy GR20A—5052 = 25,000 psi.
ASTM B–209 Alloy GS11A—6061 = 24,000 psi.
ASTM B–209 Alloy GR40A—5154 = 30,000 psi.
ASTM B–209 Alloy GM40A—5086 = 35,000 psi.

E = efficiency of longitudinal welded joint = 90 percent.

• • • • • •

§ 78.294–12 *Venting, loading and unloading, gauging and sampling devices.* • • •

(e) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

19. In § 78.297–13 amend the heading and paragraph (a) and add paragraph (b); in § 78.297–15 amend paragraphs (c) and (d) and add paragraph (e) (21 F. R. 4619, 4620, June 26, 1956) (22 F. R. 4799, July 9, 1957) to read as follows:

§ 78.297 *Specification ICC–103D–W; fusion-welded alloy steel tanks to be mounted on or forming part of a car.*

§ 78.297–13 *Gauging, bottom outlet valve operating rod, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of an approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading and unloading of the contents, these devices, including valves, must be of an approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.297–15 *Safety valves.* • • •

(c) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped, must have one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.297–13 (a), made of a material not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids".

(d) Safety valve or safety vent flanges, if welded to tank, must be cast, forged, or fabricated metal and be of good weldable quality in conjunction with the metal of the tank.

(e) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.297–13 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

20. Amend entire § 78.298–13; in § 78.298–15 amend paragraphs (c) and (d) and add paragraph (e) (21 F. R. 4622, June 26, 1956) (22 F. R. 4799, July 9, 1957) to read as follows:

§ 78.298 *Specification ICC–103E–W; fusion-welded alloy steel tanks to be mounted on or forming part of a car.*

§ 78.298–13 *Gauging, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of an approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading and unloading of the contents, these devices, including valves, must be of an approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.298–15 *Safety valves.* • • •

(c) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped, must have one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.298–13 (a), made of a material not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids".

(d) Safety valve or safety vent flanges, if welded to tank, must be cast, forged, or fabricated metal and be of good weldable quality in conjunction with the metal of the tank.

(e) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.298–13 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

21. In § 78.299–8 amend the heading and paragraph (a); amend entire § 78.299–13; in § 78.299–15 amend paragraphs (b) and (c) and add paragraph (d) (22 F. R. 11033, Dec. 31, 1957) (21 F. R. 4623, June 26, 1956) to read as follows:

§ 78.299 *Specification ICC–103A–N–W; fusion-welded nickel or nickel alloy tanks to be mounted on or forming part of a car.*

§ 78.299–8 *Manway rings, safety vent flange and bottom washout nozzle flange or other attachments.* (a) These attachments, except as provided in § 78.299–8 (b), must be fusion-welded. Fusion welding for securing these attachments in place must be of the double-welded butt joint type or double-full-fillet lap joint type.

• • • • • •

§ 78.299–13 *Gauging, loading and unloading devices, extending through dome of tank.* (a) Not specification requirements. When installed, these devices must be of an approved design which will prevent interchange with any other fixture on the tank dome, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading and unloading of the contents, these devices, including valves, must be of an approved design, made of material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.299–15 *Safety vents.* • • •

(b) Each tank or compartment thereof must be equipped with one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.299–13 (a), made of metal not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding the disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement.

(c) Safety vent flanges, if welded to tank, must be cast, forged, or fabricated metal and be of good weldable quality in conjunction with the metal of the tank.

(d) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.299–13 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing the pipe connections of valves.

22. In § 78.300–4 amend paragraph (a); in § 78.300–12 add paragraph (e) (22 F. R. 4799, July 9, 1957) (21 F. R. 4626, June 26, 1956) to read as follows:

§ 78.300 *Specification ICC–105A300–AL–W; lagged fusion-welded aluminum tanks to be mounted on or forming part of a car.*

§ 78.300–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank shall be calculated by the following formula:

$$t=\frac{Pd}{2SE}$$

where
t = thickness in inches of thinnest plate;
P = calculated bursting pressure, pounds per square inch;
d = inside diameter in inches;
S = minimum ultimate tensile strength in pounds per square inch as follows:

ASTM B–209 Alloy GR20A—5052 = 25,000 psi.
ASTM B–209 Alloy GS11A—6061 = 24,000 psi.
ASTM B–209 Alloy GR40A—5154 = 30,000 psi.
ASTM B–209 Alloy GM40A—5086 = 35,000 psi.

E = efficiency of longitudinal welded joint = 90 percent.

• • • • •

§ 78.300–12 *Venting, loading and unloading valves, gauging and sampling device and thermometer well.* • • •

(e) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

23. In § 78.301–12 add paragraph (d) (21 F. R. 4627, June 26, 1956) to read as follows:

§ 78.301 *Specification ICC–109A300–W; fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.301–12 *Venting, loading and unloading valves, gauging and sampling device, and thermometer well.* • • •

(d) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

24. In § 78.302–4 amend paragraph (a); in § 78.302–12 add paragraph (d) (22 F. R. 2236, Apr. 4, 1957) to read as follows:

§ 78.302 *Specification ICC–109A100–AL–W; fusion-welded aluminum tanks to be mounted on or forming part of a car.*

§ 78.302–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula:

$$t=\frac{Pd}{2SE}$$

where
t = thickness in inches of thinnest plate;
P = calculated bursting pressure, pounds per square inch;
d = inside diameter in inches;
S = minimum ultimate tensile strength in pounds per square inch as follows:

ASTM B–209 Alloy 996A—1060 = 9,500 psi.
ASTM B–209 Alloy 990A—1100 = 11,000 psi.
ASTM B–209 Alloy M1A—3003 = 14,000 psi.
ASTM B–209 Alloy GR20A—5052 = 25,000 psi.
ASTM B–209 Alloy GS11A—6061 = 24,000 psi.
ASTM B–209 Alloy GR40A—5154 = 30,000 psi.
ASTM B–209 Alloy GM40A—5086 = 35,000 psi.

E = efficiency of longitudinal welded joint = 90 percent.

• • • • •

§ 78.302–12 *Venting, loading and unloading, gauging and sampling devices.* • • •

(d) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

25. Amend entire § 78.303–17; in § 78.303–20 amend paragraph (c) and add paragraphs (d) and (e) (22 F. R. 4801, 4802, July 9, 1957) to read as follows:

§ 78.303 *Specification ICC–111A100–W–1; fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.303–17 *Loading and unloading devices.* (a) Not specification requirements. When installed, these devices must be of an approved design which will prevent interchange with any other fixture on the tank, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading and unloading of the contents, these devices, including valves, must be of an approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

(c) The venting device shall be an opening to permit application of pressure to tank. The loading and unloading device shall be a pipe extending down to the bottom of the tank so that, by application of pressure, the contents of the tank can be completely removed. The pipe shall be securely anchored at its lower end to prevent damage from surge of liquid.

§ 78.303–20 *Safety valves.* • • •

(c) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped must have one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.303–17 (a), made of a material not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 75 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damaged to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids".

(d) Safety valve or safety vent flanges, if welded to tank, must be cast, forged, or fabricated metal and be of good weldable quality in conjunction with the metal of the tank.

(e) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.303–17 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

26. In § 78.304–17 amend the heading and paragraph (a); in § 78.304–20 amend paragraphs (a) and (b) and add paragraph (d) (22 F. R. 4803, July 9, 1957) to read as follows:

§ 78.304 *Specification ICC–111A100–W–2; fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.304–17 *Loading and unloading devices.* (a) Not specification requirements. When installed, these devices must be of an approved design which will prevent interchange with any other fixture in the tank, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

(b) Each tank or compartment thereof must be equipped with one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.304–17 (a), made of metal not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 75 pounds per square inch. Means for holding the disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement.

• • • • •

(d) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.304–17 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing the pipe connections of valves.

27. In § 78.305–17 amend the heading and paragraph (a); in § 78.305–20 amend paragraph (c) and add paragraphs (d) and (e) (22 F. R. 4805, July 9, 1957) to read as follows:

§ 78.305 *Specification ICC–111A100–W–3; fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.305–17 *Loading and unloading devices.* (a) Not specification requirements. When installed, these devices must be of an approved design which will prevent interchange with any other fixture on the tank, made of material not subject to rapid deterioration by the lading, and be tightly closed. Unloading pipes must be securely anchored within the tank.

• • • • •

§ 78.305–20 *Safety valves.* • • •

(c) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped, must have one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 78.305–17 (a), made of a material not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 75 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids".

(d) Safety valve or safety vent flanges, if welded to tank, must be cast, forged, or fabricated metal and be of good weldable quality in conjunction with the metal of the tank.

(e) Each tank or compartment thereof may be equipped with one separate air connection of an approved design which will prevent interchange with any fixture prescribed in § 78.305–17 (a), made of material not subject to rapid deterioration by the lading, tightly closed, and chained to prevent misplacement. Valves, if applied, must be of approved design, made of a material not subject to rapid deterioration by the lading, and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

28. In § 78.306–18 add paragraph (b) (22 F. R. 4807, July 9, 1957) to read as follows:

§ 78.306 *Specification ICC–111A100–W–4; fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.306–18 *Gauging device.* • • •

(b) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

29. In § 78.307–4 amend paragraph (b); in § 78.307–12 add paragraph (e) (22 F. R. 7847, Oct. 3, 1957) (22 F. R. 4807, 4808, July 9, 1957) to read as follows:

§ 78.307 *Specification ICC–105A200–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.307–4 *Thickness of plates.* • • •

(b) The minimum thickness of plates must be to the following design dimensions:

Inside diameter of tanks	Bottom sheets	Shell sheets	Tank heads
	Inch	*Inch*	*Inch*
87 inches or under	1/4	1/4	1/4
Over 87 to 107 inches	9/16	9/16	9/16

• • • • •

§ 78.307–12 *Venting, loading and unloading, gauging, and sampling devices and thermometer well.* • • •

(e) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

30. In § 78.308–4 amend paragraph (a); in § 78.308–12 add paragraph (e) (22 F. R. 4809, 4810, July 9, 1957) to read as follows:

§ 78.308 *Specification ICC–105A200–AL–W; lagged fusion-welded aluminum tanks to be mounted on or forming part of a car.*

§ 78.308–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula:

$$t=\frac{Pd}{2SE}$$

where
t = thickness in inches of thinnest plate;
P = calculated bursting pressure, pounds per square inch;
d = inside diameter in inches;
S = minimum ultimate tensile strength in pounds per square inch as follows:

ASTM B–209 Alloy 996A—1060 = 9,500 psi.
ASTM B–209 Alloy 990A—1100 = 11,000 psi.
ASTM B–209 Alloy M1A—3003 = 14,000 psi.
ASTM B–209 Alloy GR20A—5052 = 25,000 psi.
ASTM B–209 Alloy GS11A—6061 = 24,000 psi.
ASTM B–209 Alloy GR40A—5154 = 30,000 psi.
ASTM B–209 Alloy GM40A—5086 = 35,000 psi.

E = efficiency of longitudinal welded joint = 90 percent.

• • • • •

§ 78.308–12 *Venting, loading and unloading, gauging and sampling devices.* • • •

(e) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

31. Add § 78.309 (21 F. R. 4628, June 26, 1956) to read as follows:

§ 78.309 *Specification ICC–111A100–W–5; rubber lined fusion-welded steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 Application for Approval, (a), (b), (c) and (d).

§ 78.309–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward. When the interior of the tank is divided into compartments, each compartment must have two heads designed convex outward. The tank shell, or each compartment, must be provided with manway and such other external projections as are prescribed herein.

§ 78.309–2 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be not less than 500 pounds per square inch.

§ 78.309–3 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than 7/16 inch:

$$t=\frac{Pd}{2SE}$$

where
t = thickness in inches of thinnest plate;
P = calculated bursting pressure, pounds per square inch;
d = inside diameter in inches;
S = minimum ultimate tensile strength in pounds per square inch;
E = efficiency of longitudinal welded joint = 90 percent.

(1) For tanks without an underframe, the cylindrical portion of the tank must have a thickness that will result in stress not exceeding 16,000 pounds per square inch as a result of 800,000 pounds impact and the end load ratio must not exceed 0.05.

(b) The thickness of an ellipsoidal head in which the ellipsoid of revolution has the major axis equal to the inside diameter of the shell and the minor axis is one-half the major axis, shall be determined by the following formula:

$$t=\frac{Pd}{2SE}$$

where
t = thickness of plate in inches;
P = calculated bursting pressure, pounds per square inch;
d = inside diameter in inches;
S = minimum ultimate tensile strength in pounds per square inch;
E = efficiency of welded joint, if any = 90 percent; if head is made in one piece, E = 100 percent.

(c) Tank must be lined with rubber at least 5/32 inch thick. The lining must overlap at least 1½ inches at all edges, which must be straight and be beveled to an angle of approximately 45 degrees. A rubber reinforcing pad at least 4½ feet square and at least ½ inch thick must be applied by vulcanizing to the lining on bottom of tank directly under the manway opening. The edges of pad must be beveled to an angle of approximately 45 degrees. An opening in this pad for sump is permitted. No rubber shall be under tension when applied. Interior of tank must be free from scale, oxidation, moisture and all foreign matter during the lining operation.

§ 78.309–4 *Openings in the tank.* (a) Openings for manway nozzle or other fittings must be reinforced in an approved manner.

§ 78.309–5 *Material.* (a) All plates for tank must be made of open-hearth boilerplate flange or firebox quality steel to an approved specification, the carbon content of which shall not exceed 0.31 percent.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification. Use of cast iron is prohibited.

(c) All external projections must be made of materials specified herein.

(d) Each tank or compartment thereof must be lined with acid resisting rubber vulcanized or bonded directly or otherwise attached to the metal tank to provide a non-porous laminated lining.

§ 78.309–6 *Tank heads.* (a) The tank head shape shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be one-half the major axis.

§ 78.309–7 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by the Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of the A. A. R. Welding Code, Appendix W.

§ 78.309–8 *Stress-relieving.* (a) All welding of the tank shell and of attachments welded directly thereto must be stress-relieved as a unit. (See A. A. R. Appendix W.)

§ 78.309–9 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to the tank is prohibited.

§ 78.309–10 *Tests of tanks.* (a) Each tank must be tested before rubber lining is applied by completely filling tank and nozzles with water, or other liquid of similar viscosity, having a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 100 pounds per square inch. The tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All closures except safety vents, must be in place while test is made. After tank is rubber-lined, no further tests are required.

(b) If tanks are lagged, the test of tank must be made before lagging is applied.

(c) Calking of welded joints to stop leaks developed during the foregoing tests is prohibited. Repairs in welded joints must be made as prescribed in § 78.309–7 (a).

§ 78.309–11 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification, as follows:

(1) ICC–111A100–W in letters and figures at least 3/8 inch high, stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. If the tanks are fabricated from ASTM A–212 Grade A or B steel, the specification number of this material must also be stamped in letters and figures at least 3/8 inch high into the metal near the center of both outside heads of the tank by the tank builder. ICC–111A100–W–5 must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of the tank builder and date of original test of tank, in letters and figures at least 3/8 inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in § 78.309–11 (a) (1).

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least 3/8 inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in § 78.309–11 (a) (2) by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high, immediately below the stenciled mark specified in § 78.309–11 (a) (1) by the party assembling the completed car.

(4) "Rubber-Lined Tank — Pressure Test Not Required", stenciled on tank, or jacket if lagged, instead of record of test of tank.

(5) Date on which interior heater systems were last tested, pressure to which tested, place where test was made and by whom, stenciled on the tank, or jacket if lagged.

(6) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in § 78.309–11 (a) (1).

§ 78.309–12 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to the car owner, Bureau of Explosives, and Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of, or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

(b) Before a tank car tank not originally built under this specification is lined with rubber, a report certifying that the tank and its equipment have been brought into compliance with the tank requirements of specification ICC–111A100–W–5 must be furnished by car owner to the party who is to apply the rubber lining. A copy of this report in approved form certifying that tank has been lined in compliance with all requirements of this specification, must be furnished by party lining the tank to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads.

§ 78.309–13 *Outage.* (a) Tanks built to this specification will require a minimum outage of 1 percent. This outage must be provided in the tank shell.

§ 78.309–14 *Lagging.* (a) Not a specification requirement. If applied, the tank shell must be lagged with an approved insulation material. The entire insulation must be covered with a metal jacket not less than 1/8 inch in thickness and efficiently flashed around all openings so as to be weather-tight.

(b) Before lagging is applied, the exterior tank surface and the interior surface of the metal jacket shall be given a protective coating.

§ 78.309–15 *Manway and closures.* (a) The opening for manway, before lining, must be at least 18 inches in diameter. All surfaces exposed to the lading must be rubber-covered.

(b) The manway cover must be of an approved type and designed to provide a secure closure of the manway.

(c) Manway cover must be made of a suitable metal. The top, bottom and edge of manway cover must be rubber-covered as prescribed in § 78.309–3 (c) and § 78.309–5 (d). Through bolt holes must be lined with rubber at least 3/8 inch in thickness. Cover made of metal not affected by the lading, need not be rubber-covered. All rubber surfaces on outside of tank or fitting must be protected with age resisting coating. Manway nozzle must be made of cast, forged or fabricated steel and be of good weldable quality in conjunction with the metal of the tank.

(d) All covers not hinged must be attached to outside of tank by at least a 3/8 inch chain or its equivalent.

(e) All joints between manway cover and manway and between manway cover and any appurtenances mounted thereon, must be made tight against leakage.

§ 78.309–16 *Bottom outlets.* (a) Bottom outlet is prohibited. Bottom sump is permissible. If used and welded to tank it must be of cast, fabricated or forged metal of good weldable quality in conjunction with metal of tank.

§ 78.309–17 *Venting, loading and unloading devices.* (a) Tank must be provided with a venting device and a loading and unloading device of approved design, and must be tightly closed. Protective housing not required except when the characteristics of the commodity for which car is authorized are such that the devices must be equipped with valves to provide for the loading and unloading of the contents. These devices, including the valves, must be of an approved design and provided with a protective housing. Unloading pipes must be securely anchored within the tank.

(b) When venting, loading and unloading and air inlet devices and their closures are made of material affected by the lading, they must have all surfaces covered as prescribed in § 78.309–3 (c) and § 78.309–5 (d).

(c) The venting device shall be an opening to permit application of pressure to tank. The loading and unloading device shall be a pipe extending down to the bottom of the tank so that, by application of pressure, the contents of tank can be completely removed.

§ 78.309–18 *Gauging device.* (a) Outage for these tanks must be provided in the tank shell; therefore, an outage scale visible from manway when cover is open must be provided. All surfaces of attachments exposed to the lading must be covered with rubber as prescribed in § 78.309–3 (c) and § 78.309–5 (d). Attachments made of metal not affected by the lading need not be rubber-covered.

§ 78.309–19 *Vacuum breaker.* (a) Not a specification requirement.

§ 78.309–20 *Safety vents.* (a) Safety valves are prohibited. Safety vent must be applied.

(b) Each tank, or compartment thereof, must be equipped with one safety vent of approved material and if of metal, must be lined with rubber at least 1/8 inch in thickness, having an inside diameter of at least 1¾ inches after lining, closed with a frangible disc of lead or other suitable material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement.

(c) Safety vent conection, if welded to tank, must be of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of tank.

§ 78.309–21 *Interior heater systems.* (a) Not a specification requirement. When installed, see § 78.260 and § 78.261, heater systems. If applied, the design must be approved.

32. In § 78.312–12 add paragraph (e) (22 F. R. 4811, July 9, 1957) to read as follows:

§ 78.312 *Specification ICC–112A400–W; fusion-welded steel tanks to be mounted on or forming part of a car.*

§ 78.312–12 *Venting, loading and unloading valves, gauging and sampling device and thermometer well.* • • •

(e) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

33. In § 78.313–4 amend paragraph (a); in § 78.313–12 add paragraph (d) (23 F. R. 2333, 2334, Apr. 10, 1958) to read as follows:

§ 78.313 *Specification ICC–109A200 AL–W; fusion-welded aluminum tanks to be mounted on or forming part of a car.*

§ 78.313–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula:

$$t=\frac{Pd}{2SE}$$

where
t = thickness in inches of thinnest plate;
P = calculated bursting pressure, pounds per square inch;
d = inside diameter in inches;
S = minimum ultimate tensile strength in pounds per square inch as follows:

ASTM B–209 Alloy 996A—1060	= 9,500 psi.
ASTM B–209 Alloy 990A—1100	= 11,000 psi.
ASTM B–209 Alloy M1A—3003	= 14,000 psi.
ASTM B–209 Alloy GR20A—5052	= 25,000 psi.
ASTM B–209 Alloy GS11A—6061	= 24,000 psi.
ASTM B–209 Alloy GR40A—5154	= 30,000 psi.
ASTM B–209 Alloy GM40A—5086	= 35,000 psi.

E = efficiency of longitudinal welded joint = 90 percent.

• • • • •

§ 78.313–12 *Venting, loading and unloading, gauging and sampling devices.* • • •

(d) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

34. In § 78.314–4 amend paragraph (a); in § 78.314–12 add paragraph (d) (22 F. R. 4812, 4813, July 9, 1957) to read as follows:

§ 78.314 *Specification ICC–109A300–AL–W; fusion-welded aluminum tanks to be mounted on or forming part of a car.*

§ 78.314–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula:

$$t=\frac{Pd}{2SE}$$

where
t = thickness in inches of thinnest plate;
P = calculated bursting pressure, pounds per square inch;
d = inside diameter in inches;
S = minimum ultimate tensile strength in pounds per square inch as follows:

ASTM B–209 Alloy GR20A—5052 = 25,000 psi.
ASTM B–209 Alloy GS11A—6061 = 24,000 psi.
ASTM B–209 Alloy GR40A—5154 = 30,000 psi.
ASTM B–209 Alloy GM40A—5086 = 35,000 psi.

E = efficiency of longitudinal welded joint = 90 percent.

• • • • •

§ 78.314–12 *Venting, loading and unloading, gauging and sampling devices.* • • •

(d) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

35. In § 78.323 amend the heading; in § 78.323–11 amend paragraph (a) (20 F. R. 4420, June 23, 1955) to read as follows:

§ 78.323 *Specification MC 302; cargo tanks constructed of welded aluminum alloy (ASTM B209–57T).* To be mounted on and to form part of tank motor vehicles for transportation of flammable liquids, and poisonous liquids, class B.

§ 78.323–11 *Material.* (a) All sheets for such cargo tanks shall be of aluminum alloys GR20A (5052 commercial designation), GR40A (5154 commercial designation), GM40A (5086 commercial designation), or GM31A (5454 commercial designation) conforming to American Society for Testing Materials Specification B209–57T (as revised to include 5454), and have the following minimum requirements:

Yield strength	26,000 lbs. per sq. in.
Ultimate strength	34,000 lbs. per sq. in.
Elongation, 2-inch sample.	12 percent.

NOTE: Yield strength is the stress which produces a permanent set of 0.2 percent of the initial gauge length (ASTM E8–36).

36. In § 78.326–10 amend paragraph (a) (22 F. R. 11036, Dec. 31, 1957) to read as follows:

§ 78.326 *Specification MC 305; cargo tanks constructed of aluminum alloys for high-strength welded construction.*

§ 78.326–10 *Material.* (a) All sheets for shell, heads, bulkheads, and baffles of such cargo tanks shall be of aluminum alloys GR20A (5052 commercial designation), GR40A (5154 commercial designation), GM40A (5086 commercial designation), or GM31A (5454 commercial designation) conforming to American Society for Testing Materials Specification B209–57T (as revised to include 5454).

APPENDIX B

Section, Paragraph, and Reason for Amendment

72.5 (a) Commodity List—Provides additions and changes to keep commodity list on a current basis.

73.28 (h)—Clarifies that single-trip containers must be retested before each refilling when authorized for reuse.

73.31 (g) (9) table 1—Eliminates the retest of heater systems of spec. 109A100–AL–W tank car tanks; provides retesting requirements for new spec. 111A100–W–5 tank car.

73.31 (g) (10)—Clarifies that the retest requirements of this paragraph pertain to ICC specification tank cars only.

73.34 (k) (12)—Provides for visual inspection of spec. 3A480, 3AA480, and 3A480X cylinders used exclusively in liquefied petroleum gas service.

73.51 (q)—To authorize transportation of military explosives approved as safe by the services.

73.53 (l)—Includes reference to section 73.100 (y) which defines smoke grenades.

73.55 (a)—To classify practice bombs or rocket bodies equipped with electric primers or electric squibs as nonexplosive ammunition and exempt same from the regulations.

73.65 (*f*)—The forming of amatol in a block or column by compression is included for clarification.

73.88 (d)—Removes hand or rifle grenades with ignition elements but not containing bursting charges from class B explosives category; to classify incendiary grenades as special fireworks.

73.92 (d)—Requires the labeling of certain class B explosives when offered for transportation by rail express.

73.100 (r) (7)—Eliminates reference to a subparagraph that was canceled in a previous order.

73.100 (y)—Defines smoke grenades without bursting charges.

73.100 (z)—Requires explosive release devices to be so designed that they will not function other devices in the package.

73.100 (aa)—Defines explosive power devices.

73.100 (bb)—To relocate the definition of detonating fuzes, class C explosives for consistency.

73.102 (a), (b)—Provides packaging and marking requirements for explosive power devices.

73.108 (a), (d)—Provides packaging and marking requirements for smoke grenades.

73.113 (a), (b)—Section amended account definition of detonating fuzes, class C explosives is now provided for in section 73.100 (bb).

73.118 (c) (33)—To include peroxides, organic, liquids or solutions, n. o. s. in the list of flammable liquids that are not exempt from the regulations.

73.119 (a) (24)—Provides for the use of spec. 6J steel barrel or drum having inside spec. 2S polyethylene liner for certain flammable liquids.

73.119 (k) (2)—Deletes extraneous reference to spec. 42F which is provided for in paragraph (k) (4).

73.162 (a) (10)—Clarifies the provisions exempting certain grades of charcoal from specification packaging, marking, and labeling requirements.

73.182 (a) (1)—Exempts nitrocarbonitrate from labeling requirements when offered for transportation by water carrier.

73.190 (b) (3)—Provides for the use of an inert gas in lieu of water in tank cars used for white or yellow phosphorus.

73.225 (a) (1)—To permit approved closures of different types for inside containers used for phosphorus sesquisulfide.

73.232 (a)—Provides for the use of an inert gas in lieu of water in tank cars containing residual phosphorus.

73.234 (a) (2)—Reduces the minimum total basis weight of kraft paper in spec. 44C multiwall paper bag to 310 pounds to be consistent with reduction in basis weight of polyethylene sheet.

73.245 (a) (18)—Places upon shipper responsibility of establishing suitability of completed package of spec. 12A fiberboard box with inside containers of certain acids or other corrosive liquids.

73.245 (a) (20)—Provides for the use of spec. 16A wooden box with inside spec. 2T polyethylene container for acids or other corrosive liquids, n. o. s.

73.249 (a) (5)—Provides for the use of spec. 103B, 103B–W, and 111A100–W–5 tank cars for certain alkaline corrosive liquids.

73.257 (a) (6)—Provides reference to a special box of spec. 12B type used for electrolyte (acid) or corrosive battery fluids.

73.257 (a) (11)—Reason for section 73.245 (a) (18) applies also to shipments of electrolyte (acid) or corrosive battery fluid.

73.258 (a) (2)—Authorizes an increased number of inside bottles containing electrolyte acid or alkaline corrosive battery fluid to be packed with storage batteries in one outside package.

73.262 (a) (6)—Provides for the use of spec. 111A100–W–5 tank car for hydrobromic acid.

73.262 (a) (7)—Reason for section 73.245 (a) (18) applies also to shipments of hydrobromic acid.

73.263 (a) (9)—Provides for the use of spec. 111A100–W–5 tank car for hydrochloric acid or mixtures thereof.

73.263 (a) (16), (d) (2)—Reason for section 73.245 (a) (18) applies also to shipments of hydrochloric acid and mixtures thereof.

73.264 (a) (11)—Provides for the use of spec. 111A100–W–5 tank car for hydrofluoric acid.

73.265 (b) (3)—Provides for the use of spec. 111A100–W–5 tank car for hydrofluosilicic acid.

73.268 (f) (5)—Provides for the use of spec. 60 portable tank, glasslined, for nitric acid.

73.271 (a) (11)—Provides for the use of spec. 103A or 103A–W tank cars for phosphorus trichloride.

73.272 (c) (6)—Reason for section 73.245 (a) (18) applies also to shipments of sulfuric acid.

73.272 (i) (4)—Provides for the use of spec. 111A100–W–5 tank car for sulfuric acid.

73.276 (a) (4)—Provides for the use of spec. 103C–W tank car for anhydrous hydrazine and hydrazine solution.

73.286 (c) (1)—Reason for section 73.245 (a) (18) applies also to shipments of chemical kits.

73.287 (a) (5)—Provides for the use of spec. 12B fiberboard box with inside polyethylene containers for chromic acid solution.

73.289 (a) (12)—Reason for section 73.245 (a) (18) applies also to shipments of formic acid or formic acid solutions.

73.291 (a) (8)—Provides for the use of spec. 111A100–W–5 tank car for flame retardant compound, liquid.

73.307 (a) (1) Note 1—Exempts compressed tanks containing live fish from section 73.24 which prohibits leakage of contents from containers.

73.331 (c)—Provides for the packaging of new gas identification training sets in outside spec. 15A or 15B wooden box.

73.366 (a) (3)—Provides for the use of approved portable, collapsible rubber containers for arsenic (arsenic trioxide) or arsenic acid (solid) in carload or truckload lots only.

73.400 (f)—Provides labeling requirements for igniters, jet thrust, jet thrust units, or starter cartridges, jet engine, class B explosives when offered for transportation by rail express.

73.412 (a)—Prescribes a specific label for class B explosives in rail express shipment.

74.555 (a)—Provides for the placarding of tank cars containing residual phosphorus and filled with an inert gas.

74.594 (j)—Clarifies the requirements necessitating the stenciling of tank cars lacking contents.

78.10–3 (a) table—Provides minimum weight requirement for spec. 1F polyethylene carboy not over 5 gallons capacity.

78.10–3 (c)——To provide specific tests for spec. 1F polyethylene carboys.

78.11–3 (a) table—Provides minimum weight requirement for spec. 1G polyethylene carboy not over 5 gallons capacity.

78.13–3 (c)—To provide specific test for spec. 1H polyethylene carboys.

78.21–3 (c)—To provide specific tests for spec. 2T polyethylene containers.

78.35–5 (a) (2)—To provide specific tests for spec. 2S polyethylene drums.

78.80–9 (b)—Permits larger opening in spec. 5 steel barrel or drum for attachment of clinch-on type closure.

78.82–9 (b)—Premits larger opening in spec. 5B steel barrel or drum for attachment of clinch-on type closure.

78.115–8 (b)—Permits larger opening in spec. 17C steel drum for attachment of clinch-on type closure.

78.116–8 (b)—Permits larger opening in spec. 17E steel drum for attachment of clinch-on type closure.

78.133–5 (a) table—Provides for the construction of a 6½ gallon spec. 37P steel drum.

78.133–9 (a)—Requires markings on spec. 37P steel drum to be made by embossment.

78.185–21 (a) Note 2—Exemption from gross weight marking is now contained in paragraph (c) of this section.

78.185–21 (c)—Marking requirements clarify that box manufacturer is responsible for outer container, spec. 15A plywood or wooden box, only.

78.205–34 (a)—Provides alternate method of closure for special spec. 12B fiberboard box.

78.210 Heading—To indicate that spec. 12A fiberboard box is of the nonreuseable type.

78.210–6 (a)—Provides for the construction of 200 pound test double-wall spec. 12A fiberboard box.

78.210–10 (b)—Specifies retest requirements for spec. 12A fiberboard box.

78.210–12 (a) (1)—Clarifies the gross weight marking requirement and requires marking to indicate spec. 12A fiberboard box is nonreuseable.

78.236 Entire section—To revise the requirements of spec. 44B multiwall paper bag to conform with accepted standards.

78.237 Entire section—To revise the requirements of spec. 44C multiwall paper bag to conform with accepted standards.

78.238 Entire section—To revise the requirements of spec 44D multiwall paper bag to conform with accepted standards.

78.239 Entire section—To revise the requirements of spec. 44E multiwall paper bag to conform with accepted standards.

78.261 (a) (1)—Provides for the use of additional materials for interior heater systems in tank cars.

78.265–12 (a), (b); 78.265–14 (c), (d)—To prevent the interchange of appurtenances on spec. 103 tank car.

78.266–12 (a), (b); 78.266–14 (b), (c)—To prevent the interchange of appurtenances on spec. 103A tank car.

78.267–12 (a), (b), (c); 78.267–14 (b), (c)—To prevent the interchange of appurtenances on spec. 103B tank car.

78.269–12 Entire section; 78.269–14 (c), (d)—To prevent the interchange of appurtenances on spec. 104 tank car.

78.280–14 (a), (b); 78.280–16 (c), (d), (e)—To prevent the interchange of appurtenances on spec. 103–W tank car.

78.281–14 (a), (b); 78.281–16 (b), (c), (d)—To prevent the interchange of appurtenances on spec. 103A–W tank car.

78.282–13 (a), (b), (c); 78.282–15 (b), (c), (d)—To prevent the interchange of appurtenances on spec. 103B–W tank car.

78.283–2 (b)—The requirement to coat the tank surface of spec. 103C–W tank car, before lagging is applied, is considered unnecessary.

78.284–14 (a), (b); 78.284–16 (c), (d), (e)—To prevent the interchange of appurtenances on spec. 104–W tank car.

78.285–4 (b) table—To provide for minimum plate thickness for spec. 105A100–W tank car having over 96 inches inside diameter.

78.285–12 (e)—To provide a definition for excess flow valve on spec. 105A100–W tank cars.

78.286–12 (f)—To provide a definition for excess flow valve on spec. 105A300–W tank car.

78.286–13 (b), (c), (d); 78.286–17 (a)—To provide for the use and test of safety valves used in combination with a breaking pin or frangible discs on spec. 105A300–W tank car.

78.287–12 (f)—To provide a definition for excess flow valve on spec. 105A400–W tank car.

78.287–13 (b), (c), (d); 78.287–17 (a)—Reason for sections 78.286–13–17 apply also to spec. 105A400–W tank car.

78.288–12 (f)—To provide a definition for excess flow valve on spec. 105A500–W tank car.

78.288–13 (b), (c), (d); 78.288–17 (a)—Reason for sections 78.286–13–17 apply also to spec. 105A500–W tank car.

78.289–12 (f)—To provide a definition for excess flow valve on spec. 105A600–W tank car.

78.289–13 (b), (c), (d), (e); 78.289–17 (a)—Reason for sections 78.286–13–17 apply also to spec. 105A600–W tank car.

78.291–4 (a)—To make reference to current ASTM aluminum alloy designations and provide for the use of alloy GM40A in the construction of spec. 103–AL–W tank car.

78.291–13 (a), (b); 78.291–15 (c), (d), (e)—To prevent interchange of appurtenances on spec. 103–AL–W tank car.

78.292–4 (a)—Reason for section 78.291–4 applies also to spec. 103A–AL–W tank car.

78.292–13 (a), (b); 78.292–15 (d), (e), (f)—To prevent interchange of appurtenances on spec. 103A–AL–W tank car.

78.294–4 (a)—Reason for section 78.291–4 applies also to spec. 105A100–AL–W tank car.

78.294–12 (e)—To provide a definition for excess flow valve on spec. 105A100–AL–W tank car.

78.297–13 (a), (b); 78.297–15 (c), (d), (e)—To prevent interchange of appurtenances on spec. 103D–W tank car.

78.298–13 Entire section; 78.298–15 (c), (d), (e)—To prevent interchange of appurtenances on spec. 103E–W tank car.

78.299–8 (a)—To make specific reference to bottom washout nozzle flange and provisions therefor in spec. 103A–N–W tank car.

78.299–13 Entire section; 78.299–15 (b), (c), (d)—To prevent interchange of appurtenances on spec. 103A–N–W tank car.

78.300–4 (a)—Reason for section 78.291–4 applies also to spec. 105A300–AL–W tank car.

78.300–12 (e)—To provide a definition for excess flow valve on spec. 105A300–AL–W tank car.

78.301–12 (d)—To provide a definition for excess flow valve on spec. 109A300–W tank car.

78.302–4 (a)—Reason for section 78.291–4 applies also to spec. 109A100–AL–W tank car.

78.302–12 (d)—To provide a definition for excess flow valve on spec. 109A100–AL–W tank car.

78.303–17 Entire section; 78.303–20 (c), (d), (e)—To prevent interchange of appurtenances on spec. 111A100–W–1 tank car.

78.304–17 (a); 78.304–20 (a), (b), (d)—To prevent interchange of appurtenances on spec. 111A100–W–2 tank car.

78.305–17 (a); 78.305–20 (c), (d), (e)—To prevent interchange of appurtenances on spec. 111A100–W–3 tank car.

78.306–18 (b)—To provide a definition for excess flow valve on spec. 111A100–W–4 tank car.

78.307–4 (b) table—To provide for minimum plate thickness for spec. 105A200–W tank car having over 96 inches inside diameter.

78.307–12 (e)—To provide a definition for excess flow valve on spec. 105A200–W tank car.

78.308–4 (a)—Reason for section 78.291–4 applies also to spec. 105A200–AL–W tank car.

78.308–12 (e)—To provide a definition for excess flow valve on spec. 105A200–AL–W tank car.

78.309 Entire section—To provide for the construction of new spec. 111A100–W–5 rubber lined fusion-welded steel tank car.

78.312–12 (e)—To provide a definition for excess flow valve on spec. 112A400–W tank car.

78.313–4 (a)—Reason for section 78.291–4 applies also to spec. 109A200–AL–W tank car.

78.313–12 (d)—To provide a definition for excess flow valve on spec. 109A200–AL–W tank car.

78.314–4 (a)—Reason for section 78.291–4 applies also to spec. 109A300–AL–W tank car.

78.314–12 (d)—To provide a definition for excess flow valve on spec. 109A300–AL–W tank car.

78.323 Heading; 78.323–11 (a)—To make reference to current ASTM aluminum alloy designations and provide for the use of alloy GM31A in the construction of spec. MC302 cargo tank.

78.326–10 (a)—Reason for § 78.323 applies also to spec. MC305 cargo tank.

[F. R. Doc. 58–6432; Filed, Aug. 13, 1958; 8:45 a. m.]

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 916]

[Docket No. AO–247–A5]

HANDLING OF MILK IN UPSTATE MICHIGAN MARKETING AREA

DECISION WITH RESPECT TO PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Traverse City, Michigan, on May 20, 1958, pursuant to notice thereof issued on April 25, 1958 (23 F. R. 2932).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Acting Deputy Administrator, Agricultural Marketing Service, on July 21, 1958 (23 F. R. 5608) filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues on the record of the hearing relate to:

1. The price for Class I milk;
2. Individual-handler pools and pool plant qualification requirements of distributing plants and supply plants;
3. Producer definition;
4. Allocation of producer milk and other source milk in Class II and Class III utilization;
5. Transfers to nonpool plants; and
6. Administrative assessment.

Findings and conclusions. The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *The price for Class I milk.* The Class I price differentials for each month should be retained with the present seasonal variations and at the same annual level.

Under the provisions of the order Class I price provisions would have expired on June 30, 1956. On the basis of the record of this hearing the terminating provision has been suspended for July and August, 1958, pending further consideration of continuing pricing provisions and other issues of the hearing. Class I price differentials added to a basic formula price under the order are $1.05 during the months of February through June and $1.45 during the months of July through January. These seasonal changes and the level of the Class I price differentials were made effective in October 1956, following the introduction of seasonal pricing in the Detroit market, which became effective in the Detroit order, September 1956. Seasonal changes in the Class I price differentials in the Muskegon order, following the same seasonal pattern as this order, have been made as of July 1, 1958. These revisions have been made in recognition of the need for alignment of prices among the Upstate Michigan, Muskegon and Detroit federal order markets. Regular supplemental supplies of milk priced under the Detroit order are received by a handler under the Upstate Michigan order. Other supplemental supplies of milk are received from handlers under the Muskegon order. The need for alignment of prices among these markets has been established on previous records. No evidence was introduced on this record which diminishes this need for maintaining the alignment of prices now established for these markets.

The percentage of producer receipts utilized as Class I milk has increased approximately 2 percent, on a monthly average basis, from 1956 to 1957. Producer receipts classified as Class I milk during the period October 1956 through January 1957 averaged 83 percent. For a similar period beginning in October

1957 this average was 85 percent. These four of the seven months when the higher rate of Class I price differentials applies in computing the Class I price are those for which there are comparable data. Producer receipts classified as Class I milk for February, March, and April, 1956, averaged 76 percent. During the same months of 1957, the average was 77 percent. Since July 1956 premium prices have been paid in this market for every month except July and August, 1957. These prices have exceeded Class I prices under the order by amounts that have been as much as 64 cents. This balance of producer receipts and Class I milk has been maintained with these prices somewhat above order prices.

The introduction of a supply-demand adjustment factor in the Class I price formula should be delayed until the market has had further experience under the present provisions of the order. Marketwide pooling provisions have been in effect less than a year under this order. Seasonal pricing in this market is of recent origin having been effective since October 1956. It can be expected that these factors will change the balance of the supply and demand in this market. At a future date, when more experience has been gained under these provisions, consideration may be given to the inclusion of a supply-demand adjustor. In view of these factors, it is concluded that the present level of Class I price should be continued without inclusion of automatic adjustment features other than the seasonal changes in the basic formula price.

Certain handlers recommended that the Class I price differential of $1.45 over the basic formula price for the month of January be reduced to $1.05. These handlers claim to have received increasing supplies of producer milk in excess of their Class I requirements during January 1957 and 1958. The total producer milk classified as Class I milk has increased from 76 percent in January 1956 to 82 percent in January 1958. These percentages are in each case almost identical with those for the preceding December. Similarly, producer milk classified as Class I milk has increased from 72 percent in February 1956 to 81 percent in February 1958. Although individual handlers may experience surplus supplies of milk in January, the market experience at this time does not warrant reduction of the Class I price differential for January.

Therefore, it is concluded that the current order Class I price differentials of $1.05 for the months of February through June, and $1.45 for the months of July through January should be continued.

2. The present marketwide type of pool and pool plant provisions should be retained.

This order was amended, effective August 1, 1957, to provide that returns to producers be distributed on the basis of a marketwide pool. The cooperative association representing a majority of producers, under the previous individual-handler pooling arrangement, was required to handle virtually all of the surplus milk of the market. Handlers with agreements with this association received only the volumes of milk necessary for their fluid milk requirement. These handlers depended on this association to provide supplemental supplies of milk and to handle their surplus milk. This situation has continued to the present time.

Another cooperative association with a fluid milk plant regulated under the Upstate Michigan order and a supply plant regulated under the Detroit order proposed returning to an individual-handler pool basis. It was pointed out that no plant under this order provides facilities for manufacture of surplus milk from the cooperative's fluid milk plant. They contend that individual-handler pools would permit greater returns to their producers who have reduced the seasonality in their production to a greater extent than the average of the remaining producers on the market. Producer members of this cooperative have farms located in an area in which competition for supplies from Detroit and unregulated markets exceeds that of the Upstate Michigan market. A handler also joined in the proposal for individual-handler pooling.

Handlers have continued to depend on the bargaining cooperative association, which does not have a fluid milk plant, to handle practically all of the excess milk and to provide supplemental supplies of milk. It was not demonstrated that handlers had changed their methods of operations significantly during the 10 month period that this market has been on a marketwide pool basis. The cooperative association which operates a distributing plant assumes the responsibility of procuring supplies of milk for its own bottling requirements and handling any excess production of its members. However, most handlers depend on the bargaining cooperative to perform these functions. In view of these marketing conditions, the marketwide pool should be continued.

The cooperative association with a fluid milk operation proposed that if individual-handler pools were not adopted, then distributing plant requirements should be revised to exclude plants distributing less than 30 percent of producer receipts as fluid milk products during the month in the marketing area. Under this proposal this association's plant would be fully regulated during the months of July and August and only partially regulated during other months.

A distributing plant becomes regulated when distribution of either 150,000 pounds or more, or 20 percent or more of producer receipts as fluid milk products is made in the marketing area during the month. The proposed elimination of the volume standard and increase in the percentage requirement to 30 percent for pool status would provide opportunity for plants with considerable volumes of milk to enter this small market under partial regulation. The major volume of sales in the market has continued to be by numerous small handlers with plants located throughout the area. The proponent, however, disposes of approximately 12 percent of the total in-area sales of the market, in addition to more extensive out-of-area sales. This proposal to permit the shift from full regulation to partial regulation during all months except July and August could cause instability in the market and wide fluctuations in sales and producer receipts. Other nearby unregulated plants with large volumes of milk would have the same opportunity as this plant. A situation could then result whereby a major portion of the sales in the marketing area would not be included in the pool. For these reasons it is concluded that the proposed revision of distributing plant standards should be denied.

A third cooperative association proposed that the shipment to a distributing plant of 30 percent of producer receipts at a supply plant should be sufficient to qualify the supply plant for pool status. It was also proposed that continued shipment of 30 percent of producer receipts by a supply plant to a distributing plant during each of the months of July through November would qualify a supply plant regardless of shipments through the following November. This plant at times has provided supplemental supplies of milk to handlers in the market, but for an extended period of time furnished no milk to regulated handlers. On the basis of experience since adoption of marketwide pooling, the present requirements provide reasonable standards for qualification in a market of this type. There was no showing that the present shipping standards for supply plants do not reflect the degree of association with the market on which pool plant status should depend. The proposed reduction in supply plant standards is therefore denied.

3. *Producer definition.* The order should specify more definitely the past association with the market required of producers whose milk is to be included in the marketwide pool when diverted for the account of a handler or cooperative association.

The cooperative association representing a substantial majority of the producers whose milk is delivered to pool plants of proprietary handlers in the Upstate Michigan market accepts the responsibility for marketing producer milk in excess of the needs of many of these handlers by diversion from farms to nonpool plants. Such diversions may represent either seasonal surpluses or those resulting from daily sales fluctuations of pool plants with limited storage and manufacturing facilities.

This cooperative association requested that the order specify a standard of association with the market so that they would know the producers eligible for pooling through diversion. Prior to adoption of the marketwide pooling provisions (August 1, 1957) a limited standard of such association defined the "associated producers" eligible to share in a handler's utilization on milk which the handler neither received nor diverted. Receipt at a handler's plant during the preceding November was required.

A more realistic standard of association with the market for purposes of identifying qualified dairy farmers eligible for producer status on diverted milk would be delivery to a pool plant on half or more of the delivery days of any three of the preceding twelve months or on any three days of the current or immediately preceding month. The Upstate Michigan market has two periods in which it may be expected that milk of all producers will be needed regularly in the market, the July–August tourist season of increased sales, and the October–December period of lowest production. Delivery to a pool plant on half of the delivery days (recognizing thereby the alternate day delivery of bulk tank producers) in any three of the preceding twelve months is a reasonable minimum qualification for pooling of diverted milk. Provision should also be made for those producers currently delivering milk to a pool plant whose milk may be diverted. Accordingly delivery in the preceding month or prior delivery in the current month should also qualify diverted milk for pooling. It is concluded that these standards should be included in the order.

4. *Allocation.* Provision should be included to allocate producer milk to Class II use in a handler's plant in July and August in a volume commensurate with his uses in other months if other source milk thereby allocated to Class I use is priced under another order or is received in the form of whole milk.

Class I sales in the Upstate Michigan marketing area are substantially higher during the vacation season of July and August than at other periods of the year. For 1957 daily average sales in July and August were 50 and 57 percent respectively above the averages for other months. For some handlers the increase is even greater; in some cases July and August sales are from two to three times those of other months.

It is uneconomical for the market to develop local production of milk adequate for the July and August business. To do so would require carrying substantial surpluses throughout other months of the year. July and August are months in which milk supplies are available from other markets which have seasonal surpluses at that time.

Under the present provisions of the order in July and August all producer receipts of many handlers are, except for allowable plant loss, priced as Class I milk. Handlers must import, for these months, either in finished form or as raw materials, the Class II items such as cream, cottage cheese and ice cream mix with which a number of such handlers complement their fluid milk sales. As a consequence, many handlers have discontinued manufacture of these products entirely, and Class II usage in the market represents only 2 to 3 percent of producer receipts, while a cooperative association must divert milk for manufacturing use as Class III milk at a lower return.

Handlers and producers agree that provisions which would retain in Class II a reasonable amount of producer milk in July and August for the handler who has regularly used milk for Class II use in other months would contribute to orderly marketing in the Upstate Michigan area. It is concluded that, up to the lesser of the weighted average percentage that Class II utilization was of producer receipts in the preceding 10-month period of September through June, or 8 percent, producer receipts should be allocated to Class II milk in preference to milk priced under another order or other receipts in whole milk form. This will provide a reasonable minimum basis upon which to observe effectiveness of the provision in encouraging Class II use in other months of milk now used in Class III. Producer milk should not yield priority of allocation to unpriced other source milk except in the form of whole milk, as it is normal practice for some unpriced cream and solids in concentrated form to be used in certain of the Class II products involved.

5. *Transfers to nonpool plants.* The rules for classification of milk transferred to a nonpool plant should not be changed to require that such milk have prior claim on the highest class utilization at the nonpool plant. The rule should be modified, however, to provide Class I classification to the extent that such utilization at the nonpool plant exceeds receipts at such plant from inspected dairy farmers plus milk classified as Class I milk under the Detroit order.

The Upstate Michigan order presently permits classification of milk transferred to a nonpool plant to be at any classification claimed if use of an equivalent volume of milk in such class can be verified. It was proposed that milk so transferred should be allocated to the highest available use at the nonpool plant, except for April, May or June, when the milk so transferred would be allocated to the lowest available use.

The proposed provision would be identical with that of the order for the Detroit marketing area. That provision was adopted in the Detroit order to discourage the practice of nonpool handlers with Class I disposition from depending upon the Detroit pool to carry their daily and seasonal reserves. There is no evidence, however, that operators of nonpool plants have depended upon Upstate Michigan supplies for such reserves. No handler operating an Upstate Michigan pool plant operates a nonpool bottling plant. This is in contrast to the situation where a number of Detroit handlers operate distributing plants serving other areas.

This order assigns prior claim to the Class I sales of pool plants to Upstate Michigan producers. Similarly, under the circumstances prevailing in this market, transfers to nonpool plants should not claim priority over the receipts at such plants from the inspected producers regularly supplying such plant. There is the probability that both Upstate Michigan and Detroit pool milk may be transferred to the same nonpool plant. In view of the Detroit provisions, priority should also be yielded to the milk required to be classified as Class I under that order. Any higher class utilization in excess of such receipts should be allocated to the pool milk transferred to the nonpool plant. As is currently provided, the same rules should apply in determining the utilization of any milk that may be transferred from the nonpool plant to a second plant.

6. *Administrative assessment.* The administrative assessment of 5 cents per hundredweight of milk should continue to apply to all producer receipts, and other source milk which is allocated to Class I milk in pool plants. Such other source milk should, however, be limited to that not priced under another order.

The cooperative association representing a majority of producers proposed that the administrative assessments be revised to apply only to milk classified as Class I milk. This association handles the major portion of the diverted milk from handlers in this market and thus pays administrative assessment on such diverted milk which is used for manufacturing purposes. This group claims that this assessment increases the costs to the association's members in providing outlets for surplus milk to handlers.

Verification of receipts, utilization and payments is required of all handlers regardless of the utilization of milk by a particular handler. Equity in sharing the cost of administration of the order among handlers is achieved under the present provisions.

The cooperative association with no Class I utilization of its own may act as the handler for a substantial portion of the surplus milk of the market. This situation, however, is not unique and does not provide a basis for exception to the universal practice in all Federal orders of applying assessment for administrative expense to producer receipts used in all classes. In the event the normal operating balance of the administrative assessment fund is reached, it is possible to reduce the rate of administrative assessment as it applies to producer receipts under the provisions of the order. Therefore, the proposed limitation of the administrative assessment to Class I milk is denied. In view, however, of the increased volumes of milk priced under other orders that may be allocated to Class I utilization under the amended allocation rules discussed elsewhere in this decision, it is considered appropriate to limit the other source milk for which administrative assessment is computed to that not priced under another order.

Rulings on proposed findings and conclusions. Briefs and proposed findings and conclusions were filed on behalf of certain interested parties in the market. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General findings. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Rulings on exceptions. In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing agreement regulating the handling of milk in the upstate Michigan marketing area", and "Order amending the order regulating the handling of milk in the upstate Michigan marketing area", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which will be published with this decision.

Referendum Order; Determination of Representative Period; and Designation of Referendum Agent

It is hereby directed that a referendum be conducted to determine whether the issuance of the attached order amending the order regulating the handling of milk in the Upstate Michigan marketing area, is approved or favored by the producers, as defined under the terms of the order, as hereby proposed to be amended, and who, during the representative period, were engaged in the production of milk for sale within the aforesaid marketing area.

The month of May, 1958, is hereby determined to be the representative period for the conduct of such referendum.

C. T. McCleery is hereby designated agent of the Secretary to conduct such referendum in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders, as published in the FEDERAL REGISTER on August 10, 1950 (15 F. R. 5177), such referendum to be completed on or before the 15th day from the date this decision is issued.

Issued at Washington, D. C., this 8th day of August 1958.

[SEAL] DON PAARLBERG,
Assistant Secretary.

Order[1] Amending the Order Regulating the Handling of Milk in the Upstate Michigan Marketing Area

§ 916.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Upstate Michigan marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk, as determined pursuant to section 2 of the act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Upstate Michigan marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as hereby amended, and the aforesaid order is hereby amended as follows:

1. Amend § 916.11 to read as follows:

§ 916.11 *Producer.* "Producer" means any qualified dairy farmer whose milk is received directly from the farm at a pool plant. "Producer" shall also include a qualified dairy farmer with respect to milk diverted from a pool plant to a nonpool plant for the account of a handler or cooperative association, if milk of such qualified dairy farmer was previously received at a pool plant (a) on any three days of the current or immediately preceding month or (b) on half or more of the delivery days of any three of the immediately preceding twelve months. Milk so diverted shall be deemed to have been received at the pool plant from which diverted if for the account of the operator of such pool plant, and at a pool plant at the location of the plant from which diverted, if diverted for the account of a cooperative association from the pool plant of another handler.

2. Amend § 916.43 (b) to read as follows:

(b) Skim milk and butterfat disposed of by a handler from a pool plant to a nonpool plant in the form of milk or skim milk shall be Class I utilization if so reported by the handler, or unless the market administrator is permitted to audit the records of receipts and utilization at such nonpool plant, in which case the classification of all skim milk and butterfat at such nonpool plant shall be determined and the skim milk and butterfat transferred from the pool plant shall be allocated to the highest use remaining after allocating, in series beginning with Class I, receipts from dairy farmers who are the regular source of supply of inspected milk for such plant, and receipts from plants regulated under Part 924 of this chapter (Order No. 24) for the Detroit, Michigan, marketing area. If any milk is transferred from such plant to a second nonpool plant, the same conditions of audit, classification and allocation shall apply in determining classification.

3. Amend § 916.46 to read as follows:

§ 916.46 *Allocation of butterfat classified.* The pounds of butterfat remaining after making the following computations shall be the pounds in each class allocated to milk received from producers:

(a) Subtract from the total pounds of butterfat in Class II utilization, the pounds of butterfat shrinkage allowed pursuant to § 916.41 (b) (3);

(b) Subtract from the pounds of butterfat remaining in each class the pounds of butterfat contained in milk or milk products received in packaged form which were classified and priced under another marketing agreement or order issued pursuant to the act and disposed of in the same form as received;

(c) Subtract from the pounds of butterfat remaining in each class, in series beginning with the lowest priced utilization, the pounds of butterfat remaining in other source milk not subject to the Class I pricing provisions of an order issued pursuant to the act received in a form other than whole milk;

(d) For the months of July and August only, subtract from the pounds of butterfat remaining in Class II the least of:

(1) Such remainder,

(2) A percentage of butterfat in receipts of producer milk equal to the weighted average percentage that Class II utilization (exclusive of shrinkage and inventory) was of producer receipts during the preceding months of September through June, or

(3) 8 percent of receipts of butterfat in producer milk;

(e) Subtract from the pounds of butterfat remaining in each class, in series beginning with the lowest priced utilization, the pounds of butterfat remaining in other source milk received in the form of whole milk and not subject to the Class I pricing provisions of another order issued pursuant to the act;

(f) Subtract from the pounds of butterfat remaining in each class, in series beginning with the lowest priced utilization, the pounds of butterfat remaining in other source milk subject to the Class I pricing provisions of another order issued pursuant to the act;

(g) Subtract from the remaining pounds of butterfat in Class II and Class I, in series beginning with Class II, the pounds of butterfat in inventory of fluid milk products and cream on hand at the beginning of the month;

(h) Subtract from the remaining pounds of butterfat in each class, the pounds of butterfat received from other handlers in such classes pursuant to § 916.43 (a);

(i) Add to the remaining pounds of butterfat in Class II utilization the pounds subtracted pursuant to paragraphs (a) and (d) of this section; and

(j) If the remaining pounds of butterfat in all classes exceed the pounds of butterfat in milk received from producers, subtract such excess from the remaining pounds of butterfat in each class, in series beginning with the lowest priced utilization.

4. Amend § 916.51 (a) to read as follows:

(a) *Class I milk.* The Class I milk price shall be the basic formula price plus $1.05 during the months of February through June and plus $1.45 during the months of July through January.

5. In § 916.60 (b) delete "§ 916.46 (g)" and substitute therefor "§ 916.46 (j)".

6. In § 916.60 (c) (1) delete "§ 916.46 (d)" and substitute therefor "§ 916.46 (g)".

7. In § 916.60 (c) (2) change the parenthetical statement "(except as shrinkage)" to "(except as shrinkage and pursuant to § 916.46 (d))".

8. In § 916.74 change "§§ 916.46 and 916.47" to "§ 916.46 (c) and (e) and the corresponding steps of § 916.47".

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

[F. R. Doc. 58-6506; Filed, Aug. 13, 1958; 8:45 a. m.]

DEPARTMENT OF LABOR

Wage and Hour Division

[29 CFR Part 522]

APPAREL INDUSTRY

EMPLOYMENT OF LEARNERS

Pursuant to section 14 of the Fair Labor Standards Act of 1938 (52 Stat. 1068, as amended; 29 U. S. C. 214), the Administrator has heretofore issued regulations for the employment of learners in the apparel industry under special certificates at wages lower than the minimum wage applicable under section 6 of the act (52 Stat. 1062, as amended; 29 U. S. C. 206) which are codified in § 522.24.

The minimum learner rates authorized for the employment of learners in the women's apparel division of the apparel industry were increased effective August 1, 1958 (23 F. R. 5038). These regulations, as they apply to all of the other divisions of the apparel industry, have been re-examined in the light of changes in wage levels and administrative experience in the operation of the regulations since the effective date of the $1.00 statutory minimum wage, and after consultation with interested parties in the industry. All relevant information presently available indicates that it is necessary to increase the special minimum learner rates presently authorized in these other divisions of the apparel industry from 75 cents and 80 cents an hour to 80 cents and 85 cents respectively.

Accordingly, notice is hereby given that pursuant to authority under section 14 of the Fair Labor Standards Act of 1938 (52 Stat. 1068, as amended; 29 U. S. C. 214), Reorganization Plan No. 6 of 1950 (64 Stat. 1263; 3 CFR, 1950 Supp., p. 165), and General Order No. 45-A (15 F. R. 3290) of the Secretary of Labor, and in accordance with section 4 of the Administrative Procedure Act (60 Stat. 238, 5 U. S. C. 1003), I propose to amend § 522.24, as indicated below:

1. Amend subparagraph (2) of paragraph (a) to read as follows:

(2) Not less than 80 cents per hour for the first 320 hours, and not less than 85 cents per hour for the next 160 hours, if employed in any of the other divisions of the Apparel Industry, as defined in § 522.21 (b), (c), (d), (e), and (f).

2. Amend subparagraph (3) of paragraph (a) to read as follows:

(3) An experienced worker in any one of the occupations shown in § 522.23 (a) for which a 480-hour learning period is authorized, who is being retrained in any other occupation shown in that paragraph, having such a 480-hour maximum period, shall be paid at wage rates not less than 85 cents per hour for the first 160 hours and not less than 90 cents per hour for the next 160 hours, if employed in the Women's Apparel Division of the Apparel Industry, as defined in § 522.21 (a); and at wage rates not less than 80 cents per hour for the first 160 hours and not less than 85 cents per hour for the next 160 hours, if employed in any of the other divisions of the Apparel Industry, as defined in § 522.21 (b), (c), (d), (e), and (f).

3. Amend subparagraph (2) of paragraph (b) to read as follows:

(2) Not less than 85 cents per hour, if employed in any of the other divisions of the Apparel Industry, as defined in § 522.21 (b), (c), (d), (e), and (f).

4. Amend paragraph (c) to read as follows:

(c) A learner employed in any occupation for which a 160-hour learning period is authorized in § 522.23 (a) shall be paid not less than 85 cents per hour if employed in the Women's Apparel Division, as defined in § 522.21 (a), and not less than 80 cents per hour if employed in any of the divisions of the Apparel Industry, as defined in § 522.21 (b), (c), (d), (e), and (f).

Prior to final adoption of the proposed amendments, consideration will be given to any data, views, or arguments by interested parties which are submitted in writing to the Administrator of the Wage and Hour Division, United States Department of Labor, Washington 25, D. C., within fifteen days of the publication of this notice in the FEDERAL REGISTER.

Signed at Washington, D. C., this 7th day of August 1958.

CLARENCE T. LUNDQUIST,
Administrator.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

ALASKA PUBLIC SALE ACT CLASSIFICATION NO. J-1

Pursuant to the authority delegated to me under section 2.5 of Order No. 541 of April 21, 1954, Bureau of Land Management, the following described land is classified for disposal under the Alaska Public Sale Act of August 30, 1949 (63 Stat. 679; 48 U. S. C. 364a-364e) for commercial, and/or industrial purposes:

Parcel 1

A small parcel of unsurveyed land located about 8 miles North of Sitka, Alaska, between the North Sitka Highway and the waters of Starrigavan Bay and to the Northeast of the tract sold under Alaska Public Sale Classification No. 25 on April 24, 1957, and further described as follows: Starting with a point common with corner No. 4 of a parcel of land sold under the Alaska Public Sale Act (Classification No. 25) and at approximately station 359+50 on the centerline of the North Sitka Highway as corner No. 1; thence N. 41°47' W. along the Northeastern boundary of the aforementioned tract to corner No. 2 which is common to corner No. 3 of that tract; and the point of intersection with the mean high tide line; thence meandering along said mean high tide line in an Easterly direction approximately 650 feet to a point where the mean high tide line intersects the right-of-way of the North Sitka Highway which is corner No. 3; thence 50 feet to corner No. 4 which is a point on the North Sitka Highway; thence along the centerline of the North Sitka Highway in a westerly direction approximately 470 feet to the point of beginning, containing approximately 2 acres more or less, and subject to minor change at time of approved survey.

Parcel 2

A parcel of unsurveyed land located adjacent to and across the North Sitka Highway from the tract sold under A. P. S. Classification No. 25 and the tract described as Parcel 1 in this Classification and further described as follows: Beginning at a point on the centerline of the North Sitka Highway at approximately station 357 as corner No. 1; thence in a Northeasterly direction along the centerline of the North Sitka Highway a distance of 410 feet to corner No. 2; thence approximately S. 41°47' E. for an approximate distance of 280 feet to corner No. 3; thence S. 48°13' W. a distance of 370 feet to corner No. 4; thence in a Northwesterly direction to the point of beginning a distance of approximately 310 feet and containing approximately 2.7 acres, and subject to minor changes upon approval of survey.

The above land will be offered for sale in accordance with regulations contained in 43 CFR 75.23 to 75.40. If no bid at the minimum acceptable price or above is made, the land may be held for future offering or the Classification may be rescinded.

WARNER T. MAY,
Operations Supervisor.

[Serial Wyoming-047652]

WYOMING

ORDER PROVIDING FOR RESTORATION OF PUBLIC LANDS

AUGUST 7, 1958.

Pursuant to Determination DA-124-Wyoming, of the Federal Power Commission and in accordance with authority delegated to me by the Wyoming State Supervisor, Bureau of Land Management, under Part II of Order of Delegation filed November 21, 1956 (21 F. R. 9147), it is ordered as follows:

The lands hereinafter described, so far as they are withdrawn and reserved for power purposes by Power Site Classification No. 253 and Power Site Reserve No. 563, are hereby restored, subject to the provisions of section 24 of the Federal Power Act of June 10, 1920 (41 Stat. 1075; 16 U. S. C. 818), as amended.

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 53 N., R. 101 W.,
Sec. 12, Lots 7, 8, 9, 11, 12, 13;
Sec. 14, Lots 1, 2, 3, 6, 7, SE¼NW¼, NW¼SW¼;
Sec. 21, Lots 1, 2, NW¼SE¼, SE¼SW¼;
Sec. 22, Lots 1, 3, 6, 7, SW¼NW¼;
Sec. 28, Lots 1, 2;
Sec. 29, Lots 1, 3, 4, 5, NW¼NE¼, S½NW¼;
Sec. 30, Lots 12, 13.
T. 53 N., R. 102.,
Sec. 35, Lots 5, 6, W½SW¼;
Sec. 36, Lots 5, 7, 8;
Tract 57.

Within the above described areas are 1201.03 acres of public lands.

The above described lands were withdrawn under First Form Reclamation withdrawal by orders dated February 19, 1916, and April 28, 1928, in accordance with the provisions of section 3 of the act of June 17, 1902 (32 Stat. 388), as amended, and are not subject to entry except under the provisions of said act.

The lands described shall be subject to application by the State of Wyoming for a period of 90 days from the date of publication of this order in the FEDERAL REGISTER for rights-of-way for public highways or as a source of material for construction and maintenance of such highways.

Inquiries concerning these lands should be addressed to the Manager, Land Office, Bureau of Land Management, P. O. Box 929, Cheyenne, Wyoming.

EUGENE L. SCHEIDT,
Lands and Minerals Officer.

NEW MEXICO

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

AUGUST 7, 1958.

The Civil Aeronautics Administration has filed an application, Serial No. New Mexico O32449, for the withdrawal of the lands described below, from all forms of appropriation, including the general mining laws, but not the mineral leasing laws, subject to existing valid claims. The applicant desires the land for the purpose of controlling and directing air navigation through the construction and utilization of a high altitude peripheral radio station.

For a period of thirty days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, P. O. Box 1251, Santa Fe, New Mexico.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

NEW MEXICO PRINCIPAL MERIDIAN

T. 30 N., R. 13 W.,
Sec. 27, SE¼SE¼.

The area described contains 40 acres.

E. R. SMITH,
State Supervisor.

[F. R. Doc. 58-6514; Filed, Aug. 13, 1958; 8:47 a. m.]

IDAHO

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

AUGUST 5, 1958.

Department of the Interior, Bureau of Reclamation, has filed an application, Serial No. Idaho 09451, for the withdrawal of the lands described below, from all forms of appropriation under the public land laws, including the mining laws but not the mineral leasing laws. The applicant desires the land for use with Anderson Ranch Dam and Reservoir.

For a period of thirty days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, P. O. Box 2237, Boise, Idaho.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

BOISE MERIDIAN

T. 1 N., R. 9 E.,
Sec. 20; SW¼NW¼;
Sec. 29; N½NE¼.
T. 1 N., R. 10 E.,
Sec. 19; Lots 1, 2, N½NE¼.

The above area includes 267.75 acres and is located near Anderson Ranch Reservoir in Elmore County, Idaho.

J. R. PENNY,
State Supervisor.

[F. R. Doc. 58-6515; Filed, Aug. 13, 1958; 8:48 a. m.]

UTAH (I-12)

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS; AMENDED

AUGUST 8, 1958.

A Notice of Proposed Withdrawal and Reservation of Lands, Utah 028949, by the U. S. Fish and Wildlife Service, dated June 24, 1958, published in the FEDERAL REGISTER July 3, 1958, Volume 23, No. 130, Page 5100, is hereby amended to exclude the provision that the withdrawal, if made, would withdraw the land from application under provisions of the Mineral Leasing Laws.

VAL B. RICHMAN,
State Supervisor.

[F. R. Doc. 58-6516; Filed, Aug. 13, 1958; 8:48 a. m.]

OREGON

SMALL TRACT CLASSIFICATION NO. 56-2; AMENDED

AUGUST 4, 1958.

For the purpose of correcting some inequities, vacating portions of rights-of-way, and designating additional rights-of-way agreed upon in signed agreements for roads and public utilities, that portion of paragraph No. 4, Classification No. 56-2, Oregon, Small Tract Opening, dated June 8, 1956, and published in the FEDERAL REGISTER of June 15, 1956, at page 4233, relating to Sandy River and Road Right-of-Way for access and utilities, is hereby vacated and the following is substituted therefor:

No.	Tract description	Acres	Access roads right-of-way, width—location
1	E½NE¼NE¼NW¼SW¼	1.25	16½' along S. boundary.
2	W½NE¼NE¼NW¼SW¼	1.25	16½' along S. boundary.
3	E½NW¼NE¼NW¼SW¼	1.25	33' along N. boundary, 16½' along S. boundary.
4	W½NW¼NE¼NW¼SW¼	1.25	33' along N. boundary, 16½' along S. boundary.
5	E½NE¼NW¼NW¼SW¼	1.25	33' along N. boundary.
6	W½NE¼NW¼NW¼SW¼	1.25	33' along N. boundary.
7	E½NW¼NW¼NW¼SW¼	1.25	16½' along N. boundary, 16½' N. and E. from S. W. corner.
8	NW¼NW¼NW¼NW¼SW¼	0.625	None.
9	SW¼NW¼NW¼NW¼SW¼	0.625	16½' along S. boundary.

IDAHO

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

AUGUST 8, 1958.

The Department of Agriculture has filed an application, Serial No. Idaho 09526, for the withdrawal of the lands described below, from all forms of appropriation under the General Mining Laws, subject to existing valid claims. The applicant desires the land for recreation areas and a landing field.

For a period of thirty days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, P. O. Box 2237, Boise, Idaho.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

BOISE MERIDIAN, IDAHO

Jim Moore Administrative Site—Landing Field

T. 25 N., R. 9 E. (Unsurveyed, but when surveyed probably will be),
Sec. 22, NE¼SE¼SW¼, S½SE¼SW¼, SE¼SW¼SW¼;
Sec. 27, N½NE¼NW¼, NE¼NW¼NW¼, SW¼SW¼;

Seven Devils Recreation Area

T. 23 N., R. 1 W.,
Sec. 7, Lot 2.
T. 23 N., R. 2 W. (Unsurveyed, but when surveyed probably will be),
Sec. 12, S½SE¼NE¼, NE¼SE¼.

Allison Creek Recreation Area

T. 24 N., R. 2 E.,
Sec. 13, Lot 6.

Spring Bar Creek Recreation Area

T. 24 N., R. 2 E.,
Sec. 12, SE¼SW¼SE¼;
Sec. 13, Lot 2.

Van Creek Recreation Area

T. 24 N., R. 3 E.,
Sec. 7, S½S½SE¼SW¼;
Sec. 18, Lot 2.

Kelly Creek Recreation Area

T. 24 N., R. 3 E.,
Sec. 18, Lot 1.

Robbins Creek Recreation Area

T. 24 N., R. 3 E.,
Sec. 13, Lot 1.

Pilot Rock Recreation Area

T. 24 N., R. 4 E.,
Sec. 7, S½S½SW¼SE¼, S½S½SE¼SE¼;
Sec. 18, Lots 1 and 8.

The above areas include 312.94 acres located throughout Nez Perce National Forest.

DONALD I. BAILEY,
Acting State Supervisor.

[LA-0157600]

CALIFORNIA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

AUGUST 8, 1958.

The Department of Commerce, Civil Aeronautics Administration has filed an application, Serial No. Los Angeles 0157600, for the withdrawal of the lands described below, from all forms of appropriation under the Public Land Laws, including mining and mineral leasing, subject to valid existing rights.

The applicant desires the land for a combined VHF Omni Range and TACAN Air Navigational Facility. The full 160 acres is necessary to insure against erection of other types of structures which

would adversely affect the operation and stability of the proposed facility.

For a period of 30 days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, 215 West Seventh Street, Los Angeles 14, California.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Classification Officer on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

SAN BERNARDINO MERIDIAN, CALIFORNIA

T. 1 S., R. 12 E.,
Sec. 6. S½S½NW¼, N½SW¼, N½S½SW¼.

The area includes 160 acres, more or less, twenty miles east of Twentynine Palms, in San Bernardino County.

ROLLA E. CHANDLER,
Officer-in-Charge,
Southern Field Group,
Los Angeles.

MARKET AGENCIES AT SIOUX CITY STOCK YARDS, SIOUX CITY, IOWA

NOTICE OF PETITION FOR MODIFICATION OF RATE ORDER

Correction

In F. R. Doc. 58-5441, appearing at page 5402 of the issue for Wednesday, July 16, 1958, the following change should be made:

In Section A of the table, under Calves, the proposed rate for first 5 head should read ".90".

DEPARTMENT OF COMMERCE

Bureau of Foreign Commerce

[File 23-530]

WILLI FARNER ET AL.

ORDER TEMPORARILY REVOKING AND DENYING EXPORT PRIVILEGES

In the matter of Willi Farner, also known as Willi Farner Moser, Grenchen, Switzerland, and Sagrera 44-58, Barcelona, Spain; Farner Werke A. G., Grenchen, Switzerland; Alexander Botez, also known as A. B. Gamboa, and as Alexander Botez Gamboa, and as Allessandro Donici Boetz, 11 Rue Emile Yung, and 22 Ave. Pierre Odier, Geneva, Switzerland; S. A. De Transports Internationaux Tramarsa, 17 Rue Du Mont Blanc, Geneva, Switzerland; Respondents; File 23-530.

The Director, Investigation Staff, Bureau of Foreign Commerce, U. S. Department of Commerce, applied to the Compliance Commissioner, pursuant to the provisions of § 382.11 of the Bureau of Foreign Commerce Export Regulations (Title 15, Chapter III, Subchapter B, Code of Federal Regulations), for an order temporarily denying to Willi Farner also known as Willi Farner Moser, the firm of Farner Werke A. G., Alexander Botez also known as A. B. Gamboa and as Alexander Botez Gamboa and as Allessandro Donici Botez, and the firm S. A. De Transports Internationaux Tramarsa, the respondents herein, all United States export privileges pending completion of the administrative proceeding heretofore brought for the purpose of obtaining a determination of violation and consequent order revoking all export privileges.

The Compliance Commissioner, having considered the evidence submitted in support of said application, has reported the facts upon which the application is based on has recommended that the application be granted to the extent hereinafter provided. After careful consideration of the report and the evidence submitted together therewith and finding that the said evidence reasonably supports a conclusion that the respondents have been engaged in a scheme or series of schemes whereby (a) they have acquired, by means of false representations as to destination and end-use, electronic materials of various kinds and descriptions from vendors in the United States or from vendors abroad who have in turn acquired such materials from the United States and (b) they have thereafter delivered such materials to a person or persons acting on behalf of the Communist Chinese purchasers, thus causing the diversion and transshipment thereof to Communist China in violation of the Export Control Act of 1949, as amended; and finding further, on the basis of the evidence submitted, that the said respondents, in furtherance of said scheme or schemes, have obtained and may continue to obtain such materials from the United States by resorting to prohibited practices in violation of the regulations provided for the administration of General Licenses established by the Bureau of Foreign Commerce; and having concluded therefrom that the protection of the public interest requires and that it is necessary to achieve effective enforcement of the law that respondents be denied all export privileges at least for the period hereinafter provided during which they may have an opportunity to contest the findings herein: It is ordered as follows:

(1) All outstanding validated export licenses in which respondents, Willi Farner, also known as Willi Farner Moser, Farner Werke A. G., Alexander Botez, also known as A. B. Gamboa, and as Alexander Botez Gamboa, and as Allessandro Donici Botez, and S. A. De Transports Internationaux Tramarsa, appear or participate as purchaser, intermediate consignee, ultimate consignee, or otherwise, are hereby revoked and shall be returned forthwith to the Bureau of Foreign Commerce for cancellation.

(2) The said respondents, their agents, servants, and employees, and all persons and firms associated with them, are hereby denied all privileges of participating directly or indirectly in any manner or form, or capacity in any exportation of any commodity from the United States to any foreign destination, including Canada, whether such exportation has heretofore or hereafter been completed. Without limitation of the generality of the foregoing, participation in an exportation shall include and prohibit respondents' participation (a) as parties or as representatives of a party to any validated export license application; (b) in the obtaining or using of any validated or general export license or other export control document; (c) in the receiving, ordering, buying, selling, delivering, or disposing of any commodities in whole or in part exported or to be exported from the United States; and (d) in the financing, forwarding, transporting, or other servicing of exports from the United States.

(3) Such denial of export privileges shall apply not only to the said respondents, but also to any other person, firm, corporation, or business organization with which the respondents may be now or hereafter related by ownership, control, position of responsibility, or other connection in the conduct of trade which may involve exports from the United States or services connected therewith.

(4) This order shall take effect forthwith and shall remain in effect for a period of thirty days from the date hereof unless it is hereafter extended, amended, modified, or vacated in accordance with the provisions of the Export Regulations.

(5) No person, firm, corporation, or other business organization, within the United States or elsewhere, and whether or not engaged in trade relating to exports from the United States, shall, without prior disclosure of the facts to, and specific authorization from the Bureau of Foreign Commerce, directly or indirectly in any manner, form, or capacity (a) apply for, obtain, transfer, or use any license, shipper's export declaration, bill of lading, or other export control document relating to any exportation of commodities from the United States, or (b) order, receive, buy, sell, use, deliver, dispose of, finance, transport, forward, or otherwise service or participate in an exportation from the United States, or a reexportation of any commodity exported from the United States, with respect to which any of the persons or companies within the scope of paragraphs (2) and (3) hereinabove receive any benefit or have any interest or participation of any kind or nature, direct or indirect.

(6) A certified copy of this order shall be served upon the said respondents.

(7) In accordance with the provisions of § 382.11 (c) of the Export Regulations, the respondents may move at any time to vacate or modify this temporary denial order by filing an appropriate motion therefor, supported by evidence, with the Compliance Commissioner and may request oral hearing thereon, which, if requested, shall be held before the Com-

...ance Commissioner at Washington, D. C., at the earliest convenient date.

Dated: August 11, 1958.

JOHN C. BORTON,
Director,
Office of Export Supply.

ATOMIC ENERGY COMMISSION

[Docket No. 50-88]

AEROJET-GENERAL NUCLEONICS

NOTICE OF ISSUANCE OF FACILITY LICENSE AMENDMENT

Please take notice that the Atomic Energy Commission has issued the following amendment (No. 1) to License R-35 authorizing certain minor modifications of control rods and the use of a critical mass of approximately 780 grams of contained uranium-235 rather than the originally estimated one kilogram in Aerojet-General Nucleonics' nuclear reactor Model AGN-211, Serial No. 100. The Commission has found that operation of the facility in accordance with the terms and conditions of the license as amended will not present undue hazard to the health and safety of the public and will not be inimical to the common defense and security.

The Commission has found that prior public notice of proposed issuance of this amendment is not necessary in the public interest since operation of the modified reactor does not present any substantial changes in the hazards to the health and safety of the public from those presented by the previously approved operation of the reactor.

In accordance with the Commission's rules of practice (10 CFR Part 2) the Commission will direct the holding of a formal hearing on the matter of the issuance of the license amendment upon receipt of a request therefor from the licensee or an intervener within thirty days after the issuance of the license amendment. For further details, see (1) the application for license amendment submitted by Aerojet-General Nucleonics and (2) a hazards analysis of the proposed operation of the modified reactor prepared by the Division of Licensing and Regulation, both on file at the Commission's Public Document Room, 1717 H Street NW., Washington, D. C. A copy of item (2) above may be obtained at the Commission's Public Document Room or upon request addressed to the Atomic Energy Commission, Washington 25, D. C., Attention: Director, Division of Licensing and Regulation.

Dated at Germantown, Md., this 7th day of August 1958.

For the Atomic Energy Commission.

H. L. PRICE,
Director, Division of Licensing and Regulation.

[License No. R-35, Amdt. No. 1]

Paragraph "A" of the licensing provisions in License No. R-35, issued to Aerojet-General Nucleonics, San Ramon, California for the Model AGN-211, Serial No. 100 reactor is hereby amended to read as follows: Pursuant to section 104c of the act and Title 10, CFR, Chapter 1, Part 50, "Licensing of Production and Utilization Facilities," to possess and operate as a utilization facility the nuclear reactor (hereinafter referred to as "the facility") designated above as modified in accordance with the design changes described in the amendment to the application dated April 5, 1958, and to transfer possession of or title to, or both, to said facility to any person licensed to acquire it;

The amendment is effective as of the date of issuance.

Date of issuance: August 7, 1958.

For the Atomic Energy Commission.

H. L. PRICE,
Director,
Division of Licensing and Regulation.

[Docket No. 50-103]

AEROJET-GENERAL NUCLEONICS

NOTICE OF ISSUANCE OF UTILIZATION FACILITY LICENSE

Please take notice that no request for a formal hearing having been filed following the filing of notice of the proposed action with the Federal Register Division on July 21, 1958, the Atomic Energy Commission has issued Facility License No. R-45 authorizing Aerojet-General Nucleonics to possess and operate the fifteen watt nuclear reactor designated by the applicant as Model AGN-211, Serial No. 101, at the site in San Ramon, California, described in the application. Notice of the proposed action was published in the FEDERAL REGISTER on July 22, 1958, 23 F. R. 5551.

Dated at Germantown, Md., this 7th day of August 1958.

For the Atomic Energy Commission.

NOTICE OF APPLICATIONS AND DATE OF HEARING

Correction

In Federal Register Document 58-6327, published at page 6089 in the issue for Friday, August 8, 1958, the docket number should read as set forth above.

[Docket No. G-13258]

SOUTHERN NATURAL GAS CO.

NOTICE FIXING DATE OF LIMITED HEARING

AUGUST 11, 1958.

This proceeding involves the increased rates and charges tendered for filing by Southern Natural Gas Company (Southern) on March 31, 1958, contained in its FPC Gas Tariff, Fifth Revised Volume No. 1, as accepted for filing by order issued herein on April 18, 1958, subject to refund of excess charges only as to one customer, South Georgia Natural Gas Company. The Commission, however, expressed reservations concerning the rates and charges so proposed although it expressly accepted the cost of service as presented. It, therefore, provided for a limited hearing concerning the issues set forth below.

Take notice that pursuant to the prior orders of the Commission in this proceeding and the Natural Gas Act, a public hearing will be held commencing September 23, 1958, at 10:00 a. m., e. s. t., in a Hearing Room of the Commission, 441 G Street NW., Washington, D. C., concerning only (1) the level of the demand and commodity components of the rates contained in Southern's FPC Gas Tariff, Fifth Revised Volume No. 1, and (2) the "Conditions Relating to Refunds and Future Rate Reductions."

Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

[F. R. Doc. 58-6532; Filed, Aug. 13, 1958; 8:52 a. m.]

[Docket No. G-14561]

PACIFIC NORTHWEST PIPELINE CORP.

NOTICE OF APPLICATION AND DATE OF HEARING

AUGUST 11, 1958.

Take notice that on February 24, 1958, Pacific Northwest Pipeline Corporation (Applicant) filed in Docket No. G-14561 an application, as supplemented on May 28, June 26, and July 3, 1958, for a certificate of public convenience and necessity authorizing the construction and operation of 51.3 miles of 30-inch lateral pipeline looping completely its existing 16-inch Big Piney lateral line in Lincoln and Sublette Counties, Wyoming, to enable Applicant to transport increased volumes of natural gas purchased in the Big Piney and nearby Tip Top and Hogsback areas of Sublette County to its 22-inch main line in Lincoln County, Wyoming, for service to existing customers in the Pacific Northwest, all as more fully set forth in the application and supplements which are on file with the Commission and open to public inspection.

The proposed facilities, together with other minor additions to Applicant's system which have already been authorized, would increase Applicant's certificated system delivery capacity by approximately 200,000 Mcf per day, to a total of about 922,000 Mcf per day.

The estimated investment in the facilities proposed herein is $5,542,000, which will be financed initially by a short-term bank loan, to be replaced eventually by the proceeds from the sale of securities.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on September 11, 1958, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 of 1.10) on or before August 29, 1958. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

[F. R. Doc. 58-6533; Filed, Aug. 13, 1958; 8:52 a. m.]

[Docket No. G-15220]

ARKANSAS LOUISIANA GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

AUGUST 11, 1958.

Take notice that on June 2, 1958, Arkansas Louisiana Gas Company (Applicant) filed in Docket No. G-15220 an application, pursuant to section 7 (b) of the Natural Gas Act, for authority to abandon service of natural gas to Southwest Gas Producing Company, Inc. (Southwest) from Applicant's share of production from the L. M. Martin No. 1 James Lime Unit well in the Ruston Field, Lincoln Parish, Louisiana, all as more fully set forth in the application and appended exhibit, which are on file with the Commission and open to public inspection.

Applicant states that production from the said well has declined in pressure to the point that the gas is no longer able to enter Southwest's supply system, and Applicant proposes to receive its share of the production from this well into its own system which is operated at a lower pressure.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on September 3, 1958, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before August 29, 1958. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

SECURITIES AND EXCHANGE COMMISSION

[File No. 31-648]

NATIONAL PROPANE CORP.

NOTICE OF FILING OF APPLICATION FOR EXEMPTION

AUGUST 8, 1958.

Notice is hereby given that National Propane Corporation ("National"), a Delaware corporation, has filed an application and an amendment thereto pursuant to section 3 (a) (3) of the Public Utility Holding Company Act of 1935 ("act"), requesting an order exempting it from all the provisions of the act, on the grounds that it is only incidentally a holding company, being primarily engaged or interested in one or more businesses other than the business of a public-utility company and not deriving, directly or indirectly, any material part of its income from any one or more subsidiary companies, the principal business of which is that of a public-utility company.

The application which is on file in the offices of the Commission may be summarized as follows:

National is engaged in the distribution and sale of liquefied petroleum gas in portable containers and in bulk in four eastern states and nine middle western states. National has a small subsidiary company, Ware Gas Company, which distributes liquefied petroleum gas through underground mains at Ware, Massachusetts, such gas being supplied to it by National. As at November 30, 1957, the end of its fiscal year, National's total assets were $21,815,121, and for this fiscal year National's total sales and other revenues were $12,433,094. Ware Gas Company, as at December 31, 1957, had total assets of $73,926, and for the year 1957 its sales and other revenues totaled $93,446.

Notice is further given that any interested person may not later than August 29, 1958 at 5:30 p. m. request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, said application, as amended, may be granted, or the Commission may take such other action as it may deem appropriate under the circumstances.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

SMALL BUSINESS ADMINISTRATION

[Delegation of Authority 30-IV-1, (Revision 1)]

CHIEF, FINANCIAL ASSISTANCE DIVISION

DELEGATION OF AUTHORITY RELATING TO FINANCIAL ASSISTANCE FUNCTIONS

I. Pursuant to the authority vested in the Regional Director by Delegation No. 30 (Revision 4), dated July 1, 1957 (22 F. R. 8197, 23 F. R. 557, 1768), there is hereby delegated to the Chief, Financial Assistance Division, the following authority:

A. *Specific.* To take the following actions in accordance with the limitations

of such delegations as set forth in SBA-300, Financial Assistance Manual:

1. To approve the following types of loans:

a. Direct business loans in an amount not exceeding $20,000;

b. Participation business loans in an amount not exceeding $100,000; and

c. Disaster loans in an amount not exceeding $50,000.

2. To decline original applications but not reconsideration of disaster loans.

3. To approve or decline Limited Loan Participation loans.

4. To enter into Disaster Participation Agreements with banks.

5. To execute loan authorizations for Washington approved loans and for loans approved under delegated authority, said execution to read as follows:

WENDELL B. BARNES,
Administrator.

By ----------,
Chief,
Financial Assistance Division.

6. To modify or amend authorizations for business or disaster loans approved by the Administrator, the Deputy Administrator for Financial Assistance, the Director, Office of Financial Assistance, or the Chairman, Loan Review Board, by the issuance of Certificates of Modification, and to modify or amend authorizations for loans approved under delegated authority in any manner consistent with the original authority to approve loans.

7. To extend the disbursement period on all loan authorizations or undisbursed portions of loans.

8. To reinstate any loan authorization cancelled prior to the first disbursement within six months from the date of the original authorization providing that no adverse change has occurred since the loan application was approved.

9. To cancel wholly or in part undisbursed balances of partially disbursed loans and deferred participation agreements, where the Administration has not purchased its participation.

10. To approve, after disbursement or partial disbursement, the salary of new employees, not to exceed $10,000 per annum.

11. To approve, when requested, in advance of disbursement, conformed copies of notes and other closing documents and certify to the participating bank that such documents are in compliance with the participation authorization.

12. To do and to perform all and every act and thing requisite, necessary and proper to be done for the purpose of effecting the servicing, administration and liquidation of any disaster loan including, without limiting the generality of the foregoing, all powers, terms, conditions and provisions as authorized herein for other loans. Said powers, terms, conditions and provisions shall apply to all documents, agreements or other instruments heretofore or hereafter executed in connection with any loan included in the above functions where such documents, agreements or other instruments are now, or shall be hereafter, in the name of the Reconstruction Finance Corporation or the Small Business Administration.

13. To take the following actions in the administration, collection and liquidation of business or disaster loans:

a. Approve or reject substitutions of accounts receivable and inventories.

b. Release, or consent to the release of inventories, accounts receivable or cash collateral, real or personal property, offered as collateral on loan, including the release of all collateral when loan is paid in full.

c. Release dividends on life insurance policies held as collateral for loans; approve the application of same against premiums due; release or consent to the release on participation loans, of insurance funds covering loss or damage to property securing the loan and expired hazard insurance policies.

d. Approve the sale of real or personal property and the exchange of equipment held as collateral on loans.

e. Defer until final maturity date payments on principal falling due prior to or within thirty days after initial disbursement and provide for the coincidence of principal and interest payments.

f. Designate proxies to vote at stockholders' meetings on stock held as collateral, and determine how such shares are to be voted.

g. Reinstate terms of payment provided in the borrower's note upon cancellation of authority to foreclose, termination of litigation, or correction of any other situation which caused the loan to be classified as a problem loan.

h. Effect the purchase of the Administration's agreed portion of a participation loan upon the request of the participating institution, consent to the sale to another institution of the SBA portion of a participation loan, and to cancel any deferred participation agreement upon request of the institution.

14. To take the following actions in the administration of fisheries' loans:

a. Amend loan authorizations.

b. Extend the period of disbursement of loans of $50,000 or less for a period not to exceed four months.

c. Amend the hull insurance provision of any authorization issued prior to January 31, 1958, for a loan of $10,000 or less.

d. Cancel loan authorizations prior to disbursement upon the written request of the applicant.

e. Disburse fisheries' loans in the same manner as SBA business loans.

f. Administer fisheries' loans within the same authority exercised with respect to SBA loans.

15. To take the following actions in all loans except those loans classified as "problem loans" or "in liquidation":

a. Extend to the maturity of a loan or to a date prior to the maturity, one monthly principal payment in any calendar year, and not more than a total of four such payments during the term of the loan, or one quarterly principal installment payment during the term of the loan, for loans with principal balances not exceeding $100,000.

b. Carry loans which are delinquent or past-due not more than three months in such status for an additional period of not more than six months when the principal balances of such loans do not exceed $100,000.

c. Extend the maturity of loans (within the statutory limitations) when the principal balances of such loans do not exceed $100,000.

d. Approve or decline requests for changes in the repayment terms of notes for loans with principal balances not exceeding $100,000.

e. Waive amounts due under net earnings clause.

f. Approve requests to exceed fixed assets limitations and waive violations of this limitation.

g. Approve payment of cash or stock dividends, payment of bonuses, increases in salaries, employment of new personnel, and waivers of violation of salary and bonus limitations, provided the Regional Director considers the bonuses and/or salary to be paid reasonable and that consent will not be given to any such payment if the payment will impair the borrower's cash position and if the loan is not current in all respects at the time the payment is made.

h. Approve changes in use of loan proceeds in connection with partially disbursed loans.

i. Waive violations of agreements to maintain working capital of a specified amount.

16. To extend, or consent to the extension of, the maturity date or time of payment, to change, or consent to the change of, the rate of interest, and otherwise alter or modify, or consent to the alteration or modification of any note, bond, mortgage or other evidence of indebtedness, and any contract for the sale or lease of real or personal property.

17. To accept and join with others in the acceptance of resignations of trustees under declarations of trust, trust indentures, deeds of trust and other trust instruments and agreements under which the Small Business Administration or its Administrator is a beneficiary and where the Small Business Administration or its Administrator now or hereafter is a holder of any note, notes, bond, bonds, instrument or instruments issued pursuant thereto and secured thereby.

18. To remove and join with others in the removal of any trustee or trustees under any declarations of trust, trust indentures, deeds of trust and other trust instruments and agreements under which the Small Business Administration or its Administrator now or hereafter is a beneficiary and where the Small Business Administration or its Administrator now or hereafter is the holder of any note, notes, bond, bonds, instrument or instruments issued pursuant thereto and secured thereby.

19. To select and designate persons or corporations as original, substitute or successor trustees under declarations of trust, trust indentures, deeds of trust or other trust instruments or agreements under which the Small Business Administration or its Administrator now or hereafter is a beneficiary and where the Small Business Administration or its Administrator now or hereafter is the holder of any note, bond or instrument issued pursuant thereto and secured

thereby to accept on behalf of Small Business Administration or its Administrator beneficial interests in real or personal property.

20. To appoint, consent to or approve of the appointment and join with others in the appointment, consent or approval of appointment of substitute and successor trustee or trustees under any declarations of trust, trust indentures, deeds of trust and other trust instruments and agreements under which the Small Business Administration or its Administrator now or hereafter is a beneficiary and where the Small Business Administration or its Administrator now or hereafter is the holder of any note, notes, bond, bonds, instrument or instruments issued pursuant thereto and secured thereby.

21. To do and to perform all and every act and thing requisite, necessary and proper to be done for the purpose of effecting the granted powers, including, but without limiting the generality of the foregoing, the execution and delivery of quit claim, bargain and sale or special warranty deeds, leases, subleases, assignments, subordinations, satisfaction pieces, affidavits, and such other documents as may be appropriate or necessary to effectuate the foregoing, and ratifying and confirming all that said Regional Director shall lawfully do or cause to be done by virtue hereof.

22. To take peaceable custody of collateral, as mortgages in possession thereof or otherwise, whenever such action becomes necessary to protect the interests of or a loan made by SBA; to take all steps necessary for the preservation and protection of the property, pending foreclosure of the lien and sale of the collateral; and, to obligate the Administration in an amount not in excess of a total of $1,000 for any one loan, for those expenditures as may be required to accomplish these purposes.

23. To enter into written arrangements with custodians or caretakers of collateral covering their services, which shall not have the effect of making such persons employees of SBA but shall be limited to their temporary services for the specific purpose involved.

24. To enter into written arrangements with owners of premises, when it is necessary to use a building not part of the loan collateral for the storage of chattels pending foreclosure and sale, for a period of not more than 90 days, including a period of 10 days after the date of sale of the collateral to permit orderly removal of the property from the premises.

25. To post indemnity or other bonds in proceedings in cases where such undertakings are required by State law.

26. To foreclose, by summary foreclosure proceedings where State law permits and in accordance with such State laws, in whole or in part, any chattel mortgage, real estate mortgage, deed of trust, security deed or collateral whatsoever kind of nature, securing any note, bond or other evidence of indebtedness now held or hereafter acquired by the Small Business Administration or its Administrator as pledgee, owner or otherwise, and to exercise any rights or authority which the Small Business Administration or its Administrator has or may have pursuant to the terms of such security instrument or evidence of indebtedness, and to assign all the right, title and interest of the Small Business Administration or its Administrator in and to any terms of sale or bid made at any such foreclosure sale.

B. *Correspondence.* To sign all nonpolicy making correspondence, except Congressional correspondence, relating to the financial assistance functions as specified in the above delegated authorities.

II. The authority delegated in IA may not be redelegated.

III. All authority delegated herein may be exercised by any SBA employee designated as Acting Chief, Financial Assistance Division.

IV. All previous authority delegated by the Regional Director to the Chief, Financial Assistance Division, is hereby rescinded without prejudice to actions taken under all such delegations of authority prior to the date hereof.

Dated: May 23, 1958.

CLARENCE P. MOORE,
Regional Director,
Richmond Regional Office.

[Delegation of Authority 30-VI-5 (Revision 1)]

BRANCH MANAGER, LOUISVILLE, KENTUCKY

DELEGATION RELATING TO FINANCIAL ASSISTANCE, PROCUREMENT AND TECHNICAL ASSISTANCE AND ADMINISTRATIVE FUNCTIONS

I. Pursuant to the authority delegated to the Regional Director by Delegation No. 30 (Revision 4), dated July 1, 1957 (22 F. R. 5811, 8197, 23 F. R. 557, 1768), there is hereby delegated to the Branch Manager, Louisville, Kentucky Branch Office, Small Business Administration, the authority:

A. *Specific.*

FINANCIAL ASSISTANCE

To take the following actions in accordance with the limitations of such delegations set forth in SBA-500, Financial Assistance Manual:

1. To approve but not decline the following types of loans:

a. Direct business loans in an amount not exceeding $20,000 and

b. Participation loans in an amount not exceeding $100,000.

2. To approve or decline Limited Loan Participation loans.

3. To approve or decline disaster loans not in excess of $50,000.

PROCUREMENT AND TECHNICAL ASSISTANCE

To take the following actions in accordance with the limitations of such delegations as set forth in SBA Procurement Agency Policy Manual, and SBA Procurement and Technical Assistance Manual:

4. To develop with Government procurement agencies required local procedures for implementing established inter-agency policy agreements, including but not limited to steps such as determining joint set-asides and representation at procurement centers.

ADMINISTRATIVE

5. To administer oaths of office.

6. To approve annual and sick leave for employees under his supervision.

B. *Correspondence.* To sign all nonpolicy making correspondence, including Congressional correspondence, relating to the functions of the Branch Office.

II. The specific authority delegated in I.A and B may not be redelegated.

III. All authority delegated herein may be exercised by any SBA employee designated as Acting Branch Manager.

IV. All previous authority delegated by the Regional Director to the Branch Manager, Louisville, Kentucky, is hereby rescinded without prejudice to actions taken under all such delegations of authority prior to the date hereof.

Effective date: July 7, 1958.

JAMES G. GARWICK,
Regional Director,
Cleveland Regional Office.

TARIFF COMMISSION

UMBRELLA FRAMES

SUPPLEMENTAL REPORT

AUGUST 11, 1958.

The United States Tariff Commission today submitted to the President a supplement to its report of January 14, 1958, on the "escape clause" investigation of umbrella frames, made under section 7 of the Trade Agreements Extension Act of 1951, as amended. In that report a majority of the Commission recommended an increase in the rate of duty on imported umbrella frames valued at $4.00 or less per dozen. The supplemental report was prepared in response to a letter of March 12, 1958, from the President requesting additional information.

The supplemental report gives for umbrella frames, data on the production, imports, exports, employment, and the profit or loss experience of domestic producers through March 31, 1958.

Copies of the report are available upon request as long as the limited supply lasts. Address requests to the United States Tariff Commission, Eighth and E Streets NW., Washington 25, D. C.

[SEAL] DONN N. BENT,
Secretary.

TITLE 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

PART 955—GRAPEFRUIT GROWN IN ARIZONA; IN IMPERIAL COUNTY, CALIFORNIA, AND IN THAT PART OF RIVERSIDE COUNTY, CALIFORNIA, SITUATED SOUTH AND EAST OF WHITE WATER, CALIFORNIA

ORDER AMENDING AMENDED ORDER REGULATING HANDLING

§ 955.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations made in connection with the issuance of the order and each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and the applicable rules of practice and procedure effective thereunder (7 CFR Part 900), a public hearing was held at Coachella, California, on October 31, 1957, upon a proposed amendment of the marketing agreement, as amended, and to Order No. 55, as amended (7 CFR Part 955) regulating the handling of grapefruit grown in Arizona, in Imperial County, California, and in that part of Riverside County, California, situated south and east of the San Gorgonio Pass. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The said order, as amended and as hereby further amended, regulates the handling of grapefruit grown in Arizona, in Imperial County, California, and in that part of Riverside County, California, situated south and east of White Water, California, in the same manner as, and is applicable only to persons in the respective classes of commercial or industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The said order, as amended and as hereby further amended, is limited in its application to the smallest regional production area that is practicable consistently with carrying out the declared policy of the act; and

(4) The said order, as amended and as hereby further amended, prescribes, so far as practicable, such different terms, applicable to different parts of the production area, as are necessary to give due recognition to differences in the production and marketing of the grapefruit covered thereunder.

(b) *Determinations.* It is hereby determined that:

(1) The "Marketing Agreement, as Amended, Regulating the Handling of Grapefruit Grown in Arizona; in Imperial County, California, and in that part of Riverside County, California, Situated South and East of White Water, California," upon which the aforesaid public hearing was held, has been executed by handlers (excluding cooperative associations of producers who are not engaged in processing, distributing, or shipping the grapefruit covered by this order) who, during the period August 1, 1956, through July 31, 1957, handled not less than 80 percent of the volume of grapefruit covered by the said amended order, as hereby further amended, and produced in the State of California, and not less than 50 percent of the volume of grapefruit covered by the said amended order, as hereby further amended, and produced in the State of Arizona; and

(2) The issuance of this order, amending the aforesaid amended order, is favored or approved by at least three-fourths of the producers who participated in a referendum on the question of its approval and who, during the de-

of grapefruit represented in such referendum.

It is, therefore, ordered, That, on and after the effective date hereof, all handling of grapefruit grown in Arizona, in Imperial County, California, and in that part of Riverside County, California, situated south and east of White Water, California, shall be in conformity to, and in compliance with, the terms and conditions of the said order, as amended, and as hereby further amended as follows:

1. Delete the provisions of §§ 955.1 through 955.4 and substitute in lieu thereof the following:

§ 955.1 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

§ 955.2 *Act.* "Act" means Public Law No. 10, 73d Congress (May 12, 1933), as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq., 68 Stat. 906, 1047).

§ 955.3 *Person.* "Person" means any individual, partnership, corporation, association or any other business unit.

§ 955.4 *Grapefruit.* "Grapefruit" means grapefruit grown in the State of Arizona; in Imperial County, California; and in that part of Riverside County, California, situated south and east of White Water, California.

2. Amend the provisions of paragraph (b) of § 955.5 by deleting therefrom the words "the San Gorgonio Pass" and inserting in lieu thereof the words "White Water, California."

3. Delete the provisions of §§ 955.6 through 955.9 and substitute in lieu thereof the following:

§ 955.6 *Producer.* "Producer" means any person engaged in a proprietary capacity in the commercial production of grapefruit.

§ 955.7 *Handler.* "Handler" means any person (except a common or contract carrier of grapefruit owned by another person) who handles grapefruit in fresh form.

§ 955.8 *Handle.* "Handle" means to transport, ship, sell, or in any other way to place grapefruit in the current of commerce between the State of California and any point outside thereof, or between the State of Arizona and any point outside thereof.

§ 955.9 *Carton.* "Carton" means either standard container No. 58 or standard container No. 59 as described in section 828.23 of the Agricultural Code of California, as amended, having a capacity of approximately 32 pounds of grapefruit, or such other container and capacity as may be established by the committee with the approval of the Secretary, or the equivalent thereof.

4. Delete the provisions of § 955.11 and substitute in lieu thereof the following:

§ 955.11 *Variety.* "Variety" or "varieties" means either or both of the following classifications or groupings of grapefruit: (a) White seeded grapefruit, and white seedless grapefruit, and (b) pink or red seeded grapefruit, and pink or red seedless grapefruit.

5. Delete the provisions of §§ 955.20 through 955.22 and substitute in lieu thereof the following:

§ 955.20 *Establishment and membership.* (a) An Administrative Committee, consisting of the number of members prescribed in paragraph (c) of this section, is hereby established for the 1958–59 fiscal period and for each fiscal period thereafter. There shall be an alternate member for each member of the committee, who shall have the same qualifications as the member. Each such member and alternate member shall be a producer.

(b) The members and alternate members shall hold office for a period of one year commencing on the first day of August and continuing for one year, or until their successors are selected and have qualified. The members, alternate members, and their respective successors shall be nominated by producers and shall be selected by the Secretary, as provided in §§ 955.21 and 955.22.

(c) Each district shall be represented on the committee by one member for each million cartons, or fraction thereof, of production of grapefruit in such district during the fiscal period preceding the date on which the nomination meetings for members and alternate members are held: *Provided*, That no district shall be represented by more than three members, regardless of the production of grapefruit in such district. If production in any district during such fiscal period is less than for the preceding fiscal period by 25 percent or more, the average production during the three fiscal periods preceding such nomination meetings shall be used to determine the representation from such district.

§ 955.21 *Nomination.* (a) The Secretary shall cause to be held each year a meeting or meetings of the producers in each of the several districts for the purpose of making nominations for members and alternate members of the Administrative Committee.

(b) In those districts entitled to two members on the Administrative Committee, one nominee for member and one nominee for alternate member shall be affiliated with a cooperative marketing organization, and one nominee for member and one nominee for alternate member shall not be affiliated with a cooperative marketing organization.

(c) In those districts entitled to one member on the Administrative Committee, the nominees for member and alternate member shall, in odd numbered years, be affiliated with a cooperative marketing organization, and the nominees for member and alternate member shall, in even numbered years, not be affiliated with a cooperative marketing organization.

(d) In those districts entitled to three members on the Administrative Committee, two nominees for members and two nominees for alternate members shall, in even numbered years, be affiliated with a cooperative marketing organization, and two nominees for members and two nominees for alternate members shall, in odd numbered years, not be affiliated with a cooperative marketing organization.

(e) Not more than one nominee for member and not more than one nominee for alternate member of the Administrative Committee from each district may be affiliated with the same packing house.

(f) Only producers affiliated with cooperative marketing organizations may elect the nominees affiliated with such organizations; and only producers not affiliated with cooperative marketing organizations may elect the nominees not so affiliated. At least one nominee shall be elected for each member and alternate member position to be filled. If nominations are not made by a particular group of producers in a district, as provided in this section, the producers of the other group may make nominations for all the positions to be filled in such district and, in such event, any limitations as to the affiliation of the nominees shall not apply.

(g) The committee may, with the approval of the Secretary, change the representation on the committee with respect to the number of nominees affiliated with cooperative marketing organizations and those not affiliated with cooperative marketing organizations in the event there is a substantial change in the number of producers affiliated with cooperative marketing organizations in any district.

(h) In voting for nominees each producer shall be entitled to vote in only one district, regardless of the number of districts in which he is producing grapefruit. Each vote shall be cast on behalf of himself, his agents, partners, subsidiaries, affiliates, and representatives. Producers who are affiliated with cooperative marketing organizations may cast one vote for each of the nominees from the district in which the producers are producing grapefruit, who are affiliated with cooperative marketing organizations. Producers who are not affiliated with cooperative marketing organizations may cast one vote for each of the nominees, from the district in which the producers are producing grapefruit who are not affiliated with cooperative marketing organizations.

(i) Nominations shall be submitted to the Secretary on or before July 1 each year.

§ 955.22 *Selection.* From the nominations made pursuant to § 955.21, or from other qualified producers, the Secretary shall select the members and alternate members from each district. If a district is represented by two members, the Secretary shall select one member and one alternate member who are affiliated with cooperative marketing organizations and one member and one alternate member who are not affiliated with cooperative marketing organizations. If a district is represented by one member, the Secretary shall, in odd numbered years, select a member and an

termined representative period (August 1, 1956, through July 31, 1957), were engaged, within the State of California, in the production of grapefruit for market, and by at least two-thirds of the producers who participated in such referendum and who, during such determined representative period, were engaged, within the State of Arizona, in the production of grapefruit for market, such producers having also produced for market at least two-thirds of the volume

alternate member who are affiliated with cooperative marketing organizations, and, in even numbered years, select a member and an alternate member who are not affiliated with cooperative marketing organizations. If a district is represented by three members, the Secretary shall, in even numbered years, select two members and two alternate members who are affiliated with cooperative marketing organizations, and, in odd numbered years, select two members and two alternate members who are not affiliated with cooperative marketing organizations. In the event nominations are not made in accordance with the provisions of paragraphs (b), (c), and (d) of § 955.21, the Secretary may select the members and alternate members without regard to their affiliation.

6. Delete from § 955.23 the reference to "§ 955.21 (e)" and substitute in lieu thereof "§ 955.21 (i)."

7. Delete the provisions of paragraphs (h) and (i) of § 955.28 and substitute in lieu thereof the following:

(h) To determine as near as practicable the total crop of grapefruit, and to make such determinations, including determinations by grade and size as it may deem necessary, or as may be prescribed by the Secretary, in connection with the administration of this part; and

(i) To investigate the growing, handling and marketing conditions with respect to grapefruit and to assemble data in connection therewith.

8. Delete the provisions of paragraphs (a), (b), and (d) of § 955.31 and substitute in lieu thereof the following:

§ 955.31 *Procedure.* (a) Three-fourths of the members of the Administrative Committee shall be necessary to constitute a quorum of the committee.

(b) For any decision of the Administrative Committee to be valid, three-fourths of the members of the Administrative Committee must cast a concurring vote. At all assembled meetings each vote must be cast in person.

• • • • •

(d) Except at an assembled meeting, the Administrative Committee may vote by telephone, telegraph, or other means, and any such vote so cast shall be confirmed promptly in writing.

9. Delete the provisions of § 955.41 and substitute in lieu thereof the following:

§ 955.41 *Assessments.* (a) Each handler who first handles grapefruit shall, with respect to the grapefruit so handled by him, pay to the Administrative Committee, upon demand, such handler's pro rata share of the expenses which the Secretary finds will be necessarily incurred by the said committee for its maintenance and functioning during each fiscal period. Such handler's pro rata share of such expenses shall be equal to the ratio between the total quantity of grapefruit handled by him as the first handler thereof, during the applicable fiscal period, and the total quantity of grapefruit so handled by all handlers during the same fiscal period.

(b) The Secretary shall fix the rate of assessment to be paid by handlers. At any time during or after the fiscal period, the Secretary may increase the rate of assessment in order to secure sufficient funds to cover any later finding by the Secretary relative to the expenses of the Administrative Committee. Any such increase shall be applied to all grapefruit handled during the given fiscal period. In order to provide funds to carry out the functions of the Administrative Committee, handlers may make advance payment of assessments.

(c) The payment of assessments for the maintenance and functioning of the Administrative Committee may be required under this part throughout the period it is in effect, irrespective of whether regulations are established by the Secretary, or whether particular provisions thereof are suspended or become inoperative.

10. Re-letter paragraph (b) of § 955.42 as paragraph (c) and insert a new paragraph (b) as follows:

(b) Notwithstanding the provisions of paragraph (a) of this section, the Administrative Committee may, with the approval of the Secretary, establish an operating reserve from funds remaining at the end of a fiscal period, which are in excess of expenses incurred during such period. Such operating reserve shall be accumulated over such period of time as the committee determines is fair and equitable to all handlers and shall not exceed an amount in excess of the preceding year's budget. The reserve shall be managed as a revolving fund and the credits and refunds provided in paragraph (a) of this section deferred until such time as the reserve reaches the amount prescribed by the committee.

11. Delete the provisions of paragraph (a) of § 955.51 and substitute in lieu thereof the following:

(a) It shall be the duty of the Administrative Committee to investigate the supply and demand conditions for grades and sizes of the varieties of grapefruit. Whenever the committee finds that such conditions make it advisable to regulate the handling of particular grades or sizes of any variety of grapefruit during any period, it shall recommend the particular grades or sizes thereof deemed advisable by it to be handled during such period, and any such recommendation may include a proposal that the handling of such variety in export, including Canada, shall be limited to sizes different from the proposed size limitation applicable to the handling of the same variety in interstate commerce. Thereafter, the committee shall promptly report such findings and recommendations, together with supporting information, to the Secretary.

12. Delete the words "shipment" and "fruit" wherever they appear in §§ 955.50 and 955.52 and in paragraph (b) of §§ 955.51 and 955.53 and substitute in lieu thereof the words "handling" and "grapefruit," respectively.

13. Delete the provisions of paragraph (a) of § 955.53 and substitute in lieu thereof the following:

§ 955.53 *Issuance of regulations.* Whenever the Secretary shall find, from the recommendation and information submitted by the Administrative Committee or from other available information, that to limit the handling of any variety or varieties of grapefruit to particular grades and sizes thereof would tend to effectuate the declared policy of the act, he shall so limit the handling of such variety or varieties during a specified period; and any such regulation may provide that shipments of any such variety or varieties in export, including Canada, shall be limited to sizes different from the limitation applicable to the handling of the same variety or varieties in interstate commerce. The Administrative Committee shall be informed immediately of any such regulation issued by the Secretary, and the said committee shall promptly give adequate notice thereof to handlers.

14. Delete the provisions of § 955.55 and substitute in lieu thereof the following:

§ 955.55 *Inspection and certification.* (a) During any period in which the Secretary has regulated the handling of any variety or varieties of grapefruit pursuant to § 955.53, each handler shall, prior to the handling of any lot of such variety or varieties, cause such lot to be inspected by an authorized representative of the Federal or Federal-State Inspection Service. Promptly thereafter, such handler shall submit to the Administrative Committee a copy of the inspection certificate issued thereon. The provisions of this section shall not be applicable to a handler who handles any lot which has been so inspected and a copy of such inspection certificate has been submitted to the Administrative Committee.

(b) The Administrative Committee may enter into an agreement with the Federal and Federal-State Inspection Services with respect to the costs of the inspection required by paragraph (a) of this section, and may collect from handlers their respective pro rata shares of such costs.

15. Delete from § 955.60 the words "standard box" and substitute in lieu thereof the word "carton".

16. Delete the words "fruit" and "shipped" wherever they appear in §§ 955.61 and 955.74 and substitute in lieu thereof the words "grapefruit" and "handled," respectively.

17. Delete the provisions of § 955.70 and substitute in lieu thereof the following:

§ 955.70 *Grapefruit not subject to regulation.* Nothing contained in this subpart shall be construed to authorize any limitation of the right of any person to handle grapefruit (a) by express, parcel post, or common or contract carrier in units of five cartons or less; (b) for consumption by charitable institutions or distribution by relief agencies; (c) for conversion into by-products; or (d) directly to a destination in Mexico. No assessment shall be levied on grapefruit handled under the exemptions provided in this section. The committee may prescribe adequate safeguards to prevent grapefruit handled for the purposes described in this section from entering commercial fresh fruit channels of trade contrary to the provisions of this subpart. The term "by-products" as used in this section includes all processed and manufactured products of grapefruit, including canned or bottled grapefruit or grapefruit juices.

18. Delete the provisions of § 955.71 and substitute in lieu thereof the following:

§ 955.71 *Compliance.* Except as provided in this subpart, no handler shall handle any variety of grapefruit, the handling of which has been prohibited by the Secretary in accordance with the provisions of this subpart; and no handler shall handle any variety of grapefruit except in conformity with the provisions of this subpart.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated August 12, 1958, to become effective 30 days after publication in the FEDERAL REGISTER.

[SEAL] TRUE D. MORSE,
Acting Secretary.

[F. R. Doc. 58-6567; Filed, Aug. 14, 1958; 8:51 a. m.]

PART 964—DRIED FIGS PRODUCED IN CALIFORNIA

APPROVAL OF EXPENSES OF DRIED FIG ADMINISTRATIVE COMMITTEE FOR 1958–59 CROP YEAR AND FIXING RATE OF ASSESSMENT FOR SUCH CROP YEAR

Notice was published in the July 23, 1958, issue of the FEDERAL REGISTER (23 F.R. 5568) that consideration was being given to the approval of proposed expenses of the Dried Fig Administrative Committee for the 1958–59 crop year and the fixing of a rate of assessment for such crop year, in accordance with the recommendations of the committee and pursuant to the provisions of Marketing Agreement No. 123, as amended, and Order No. 64, as amended (7 CFR Part 964), regulating the handling of dried figs produced in California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.). In said notice, interested persons were afforded the opportunity to file written data, views, or arguments with respect to the proposals. No such comment was filed within the prescribed time.

After consideration of all relevant matters pertaining to the proposals including the recommendations of the committee, it is hereby found, and determined, and, therefore, it is hereby ordered, that the expenses of the committee and the rate of assessment for the crop year beginning August 1, 1958 shall be as follows:

§ 964.303 *Expenses of the Dried Fig Administrative Committee and rate of assessment for the 1958–59 crop year—(a) Expenses.* Expenses in the amount of $26,460 are reasonable and likely to be incurred by the Dried Fig Administrative Committee for its maintenance and functioning during the crop year beginning August 1, 1958.

(b) *Rate of assessment.* Each handler shall pay to the Dried Fig Administrative Committee, in accordance with the provisions of Marketing Agreement No. 123, as amended, and this part, an assessment of $1.35 for each ton of salable tonnage dried figs handled by him as the first handler thereof during the crop year beginning August 1, 1958, which assessment rate is hereby fixed as each handler's pro rata share of the aforesaid expenses.

(c) *Salable tonnage dried figs.* The term "salable tonnage dried figs," as used in paragraph (b) of this section, means and includes all natural condition dried figs acquired by a handler during the crop year beginning August 1, 1958, pursuant to the applicable provisions of the aforesaid marketing agreement, as amended, and this part.

It is hereby further found that good cause exists for not postponing the effective date hereof until 30 days after publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that: (1) Under said marketing agreement, as amended, and order, as amended, assessments apply to all dried figs handled during the 1958–59 crop year, and such dried figs are already being handled; (2) the committee must be enabled to obtain adequate funds currently from 1958–59 crop year assessments in order to defray expenses of administering the program; (3) while the committee has on hand some assessment funds from the 1957–58 crop year that were not expended in connection with the operation of such crop year, such funds are not sufficient to pay the expenses of the committee, as authorized by §§ 964.71 and 964.72; (4) compliance herewith will not require any advance preparation on the part of handlers; and (5) it is imperative that this action be made effective as soon as possible and not later than the date on which this order is published in the FEDERAL REGISTER.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated August 11, 1958, to become effective upon publication in the FEDERAL REGISTER.

[SEAL] S. R. SMITH,
Director,
Fruit and Vegetable Division.

TITLE 6—AGRICULTURAL CREDIT

Chapter IV—Commodity Stabilization Service and Commodity Credit Corporation, Department of Agriculture

Subchapter B—Loans, Purchases, and Other Operations

[1958 C. C. C. Grain Price Support Bulletin 1, Supp. 1, Amdt. 2, Rye]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1958-CROP RYE LOAN AND PURCHASE AGREEMENT PROGRAM

MISCELLANEOUS AMENDMENTS

The regulations issued by the Commodity Credit Corporation and the Commodity Stabilization Service published in 23 F. R. 3500 and 5319 containing the specific requirements for the 1958-crop rye price support program are hereby amended as follows:

1. Section 421.3378 (c) (1) is amended to also make rye grading No. 4 on test weight eligible for price support so that the amended paragraph reads as follows:

§ 421.3378 *Eligible rye.* • • •

(c) • • •

(1) The rye must be rye grading No. 2 or better, or rye grading No. 3 or No. 4 on the factor of "test weight" only, but otherwise grading No. 2 or better.

2. Section 421.3380 (c) is amended by extending the schedule therein to apply to rye testing as low as 49 pounds per bushel so that the amended paragraph reads as follows:

§ 421.3380 *Determination of quantity.* • • •

(c) When the quantity of rye is determined by measurement, a bushel shall be 1.25 cubic feet of rye testing 56 pounds per bushel. The quantity determined shall be the following percentages of the quantity determined for 56-pound rye:

For rye testing:	*Percent*
56 pounds or over	100
55 pounds or over, but less than 56 pounds	98
54 pounds or over, but less than 55 pounds	96
53 pounds or over, but less than 54 pounds	95
52 pounds or over, but less than 53 pounds	92
51 pounds or over, but less than 52 pounds	91
50 pounds or over, but less than 51 pounds	89
49 pounds or over, but less than 50 pounds	87

3. Section 421.3383 (c) is amended by adding the following list of counties and basic support rates per bushel:

TEXAS	*Rate per bushel*
County:	
Fisher	$1.09
Howard	1.09
King	1.09
Mitchell	1.09
Scurry	1.09

4. Section 421.3383 is amended to provide a discount for rye having a test weight below 52 pounds per bushel by redesignating § 421.3383 (e) as § 421.3383 (f) and substituting a new § 421.3383 (e) as follows:

§ 421.3383 *Support rates.* • • •

(e) *Discount for test weight.* For rye grading No. 4 on the factor of test weight only, but otherwise grading No. 2 or better, the discounts from the support rate for No. 2 rye, in addition to any other applicable discounts, shall be as follows:

Test weight per bushel (pounds):	*Discount per bushel (cents)*
51 or over, but less than 52	5
50 or over, but less than 51	10
49 or over, but less than 50	15

(Sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 5, 62 Stat. 1072,

secs. 301, 401, 63 Stat. 1053, 1054; 15 U. S. C. 714c, 7 U. S. C. 1447, 1421)

Issued this 11th day of August, 1958.

[SEAL] CLARENCE L. MILLER,
Acting Executive Vice President,
Commodity Credit Corporation.

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 6497]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

JOHNSON HAIR & SCALP CLINIC ET AL.

Subpart—*Advertising falsely or misleadingly:* Qualifications and abilities; reputation, success, or standing; § 13.170 *Qualities or properties of product or service.* Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 13.1895 *Scientific or other relevant facts.*

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Leo O. Johnson doing business as Johnson Hair & Scalp Clinic (New Orleans, La.) et al., Docket 6497, June 10, 1958]

In the Matter of Leo O. Johnson, an Individual Doing Business as Johnson Hair & Scalp Clinic, and William G. Thompson, Harry B. Hause, and Charles L. Anderson, Individually

This proceeding was heard by a hearing examiner on the complaint of the Commission charging individuals with main office in New Orleans, La., and operating hair and scalp clinics also in several other States, with representing falsely in advertising that use of their hair and scalp preparations would prevent or overcome baldness or excessive hair loss or induce the hair to grow or become thicker, without clearly revealing that the great majority of cases of excessive hair fall and baldness are stages of male pattern baldness, and that in such cases the preparations would be of no value; that respondent Johnson was America's foremost professional authority on hair and scalp disorders; and that respondents and their agents were trichologists.

At the termination of the usual hearings, the hearing examiner made his initial decision and order to cease and desist. From this respondent Johnson appealed, and insofar as it related to the other respondents, the case was placed on the Commission's own docket for review as to the sufficiency of the showing of the jurisdictional requirement of commerce under section 12.

Upon review, the Commission denied respondent's appeal, modified the initial decision, substituted its own order for that of the initial decision, and on June 10 adopted the initial decision as modified as the decision of the Commission.

Said order to cease and desist, substituted by the Commission, is as follows:

It is ordered, That Leo O. Johnson, an individual doing business as Johnson Hair & Scalp Clinic, and respondents Charles L. Anderson and William G. Thompson, individually, and respondents' agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution of the various cosmetic or other preparations, as set out in the findings herein, for use in the treatment of conditions of the hair and scalp, or any preparation of substantially similar composition, do forthwith cease and desist from:

1. Disseminating or causing to be disseminated by means of the United States mail, or by any means in commerce, as "commerce" is defined in the Federal Trade Commission Act, any advertisement which represents, directly or by implication, that the use of said preparations, alone or in conjunction with any method or treatment, will:

(a) Prevent or overcome baldness or excessive hair loss, unless any such representation be expressly limited to cases other than those known as male pattern baldness, and unless the advertisement clearly and conspicuously reveals the fact that the great majority of cases of excessive hair fall and baldness are the beginning and more fully developed stages of said male pattern baldness and that in such cases respondents' preparations will be of no value in preventing or overcoming baldness or excessive hair loss;

(b) Induce new hair to grow, cause the hair to become thicker or otherwise grow hair, unless any such representation be expressly limited to cases other than those arising by reason of male pattern baldness, and unless the advertisement clearly and conspicuously reveals the fact that the great majority of cases of excessive hair fall and baldness are the beginning and more fully developed stages of said male pattern baldness and that in such cases respondents' preparations will not induce the growth of hair or thicker hair;

(c) Permanently eliminate dandruff, itching or irritation of the scalp; and

2. Disseminating or causing to be disseminated by means of the United States mail, or by any means in commerce, as "commerce" is defined in the Federal Trade Commission Act, any advertisement for the purpose of inducing, or which is likely to induce, directly or indirectly, the purchase of respondents' preparations, which advertisement represents, directly or by implication, that respondent Johnson is America's foremost professional authority, or one of America's foremost professional authorities, on hair and scalp disorders, or that respondents, their agents, representatives or employees are trichologists or have had professional or competent training in dermatology or other branches of medicine having to do with the diagnosis and treatment of scalp disorders affecting the hair.

It is further ordered, That the complaint be, and it hereby is, dismissed without prejudice as to respondent Harry B. Hause.

By "Final Order", report of compliance was required as follows:

It is further ordered, That the respondents shall, within sixty (60) days after service upon them of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: June 10, 1958.

By the Commission.

[SEAL] ROBERT M. PARRIEN,
Secretary.

[F. R. Doc. 58-6550; Filed, Aug. 14, 1958; 8:47 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter F—Personnel

PART 580—WOMEN'S ARMY CORPS

Part 580 is revised to read as follows:

Sec.
580.1 Purpose.
580.2 Statutory basis.
580.3 Mission.
580.4 Composition.
580.5 Organization.

AUTHORITY: §§ 580.1 to 580.5 issued under sec. 3012, 70A Stat. 157; 10 U. S. C. 3012. Interpret or apply sec. 3071, 70A Stat. 160; 10 U. S. C. 3071.

SOURCE: AR 600-110, July 8, 1958.

§ 580.1 *Purpose.* Sections 580.1 to 580.5 define the mission, composition, and organizatoin of the Women's Army Corps (WAC) and provide general information concerning operational factors involved in administering the Women's Army Corps.

§ 580.2 *Statutory basis.* Title 10, United States Code, section 3071 (a), establishes the Women's Army Corps in the Regular Army. Appointment as officers and enlistment of women in the Army Reserve is authorized respectively by Title 10, United States Code, sections 591 (c) and 510 (c).

§ 580.3 *Mission.* The mission of the Women's Army Corps is to provide for the assimilation and appropriate utilization within the United States Army of the volunteer womanpower of the nation, with the exception of those women officers appointed in the Army Medical Service, and to constitute a nucleus of trained military women upon which the expansion of the Corps would be based in time of national emergency.

§ 580.4 *Composition.* (a) The Women's Army Corps consists of a Director and such other commissioned officers, warrant officers, and enlisted women as are authorized by the Secretary of the Army.

(b) The authorized strength of Women's Army Corps commissioned and warrant officers on the active list is that prescribed by the Secretary of the Army. The strength so prescribed may not be more than 2 percent of the authorized strength of the Regular Army in commissioned and warrant officers on the respective active lists. (10 U. S. C. 3209 (a) and 3215 (a).) The authorized strength of the Women's Army Corps in enlisted members on active duty is as prescribed by the Secretary of the Army. It may not be more than 2 percent of the Regular Army authorized strength prescribed by Title 10, United States Code, section 3214 (10 U. S. C. 3215 (b)). The authorized strength of WAC personnel in the Army Reserve is that prescribed by the Secretary of the Army.

(c) Officers shall be commissioned permanently in the Women's Army Corps of the Regular Army in grades from second lieutenant to lieutenant colonel inclusive. Initial appointments will be made in the grade of second lieutenant in the Regular Army except that when the appointee has accrued more than 3 years of creditable service as authorized by statute, the appointment will be made in a higher grade. The authorized number of officers in the permanent grade of lieutenant colonel shall be such as the Secretary of the Army shall determine but shall not exceed 10 percent of the total authorized commissioned strength of the Corps. Warrant officers shall be appointed with permanent warrant in each of the warrant officer grades of the Regular Army. Commissioned officers shall also be appointed in the U. S. Army Reserve, Women's Army Corps and warrant officers in the U. S. Army Reserve.

§ 580.5 *Organization.* The Womens Army Corps consists of the Office of the Director, U. S. Women's Army Corps; the U. S. WAC Center; and detachments and individuals assigned for duty within the continental and oversea commands. This organization will be expanded in event of mobilization to include additional training centers, schools, and detachments as required.

[SEAL] HERBERT M. JONES,
Major General, U. S. Army,
The Adjutant General.

[F. R. Doc. 58-6543; Filed, Aug. 14, 1958; 8:45 a. m.]

TITLE 35—PANAMA CANAL

Chapter I—Canal Zone Regulations

PART 4—OPERATION AND NAVIGATION OF PANAMA CANAL AND ADJACENT WATERS

LOAD AND TRIM

Pursuant to the authority vested in the Governor by 35 CFR 4.11 as adopted by Canal Zone Order 30, January 14, 1953 (18 F. R. 280), 35 CFR 4.3 is hereby amended to read as follows:

§ 4.3 *Load and trim.* All vessels shall be properly trimmed before transiting the Canal. No vessel shall be permitted to transit while having a list of more than 10 degrees or while she is so loaded or is so trimmed as to dangerously affect her maneuverability. Any vessel having a list between 3 degrees and 10 degrees, or which is so loaded or so trimmed as to affect her maneuverability, will be denied transit unless the master, in the presence of the pilot, signs an undertaking releasing the Panama Canal Company from, and indemnifying it against, any loss, damage, or liability which may result from injury to the vessel or its cargo, to other vessels or their cargo, or to Canal structures or equipment, or from injury to or death of any person, where any such injury or death is caused in whole or in part by any such condition of the vessel. Nothing shall be done, or permitted to be done, by the Master or any member of the crew, which would materially alter the trim and/or draft of a vessel while it is transiting, without the prior, express approval of the pilot.

(Sec. 5, 37 Stat. 562, as amended; 2 CZ Code 9, 48 U. S. C. 1318. E. O. 4314, Sept. 25, 1925, E. O. 9746, 11 F. R. 7329, 3 CFR, 1946 Supp., E. O. 10101, 15 F. R. 595, 3 CFR, 1950 Supp.)

Issued at Balboa Heights, Canal Zone, July 22, 1958.

W. E. POTTER,
Governor.

[F. R. Doc. 58-6557; Filed, Aug. 14, 1958; 8:48 a. m.]

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans Administration

PART 4—DEPENDENTS AND BENEFICIARIES CLAIMS

ADJUDICATION OF CLAIMS BASED ON CONFEDERATE SERVICE

A new § 4.497 is added to read as follows:

§ 4.497 *Adjudication of claims based on Confederate service*—(a) *Scope of law.* Public Law 85-425 provides for payment of pension to veterans and widows and children of veterans who served in the military or naval forces of the Confederate States of America during the Civil War. The same basic conditions of eligibility and the same monthly rates that were applicable to Union veterans on December 31, 1957, and those currently applicable to widows and children of Union veterans are for application. A remarried widow is not included unless the purported remarriage is void.

(b) *Existing regulations and procedures.* Current Veterans Administration regulations, instructions, and procedures for the adjudication of claims and preparation of awards and disallowances in Civil War cases will be followed wherever applicable.

(c) *Applications and informal claims.* VA Form 21-534 will be used as an application for death pension. Section 3.27 of this chapter is for application to informal claims received in the Veterans Administration on or after May 23, 1958.

(d) *Service requirements.* The service requirements of section 432 (c) and the provisions relating to character of discharge in sections 101 (2) and 1003 of Public Law 85-56 are for application. Since many Confederate veterans were not formally discharged, however, separation will be accepted as being under other than dishonorable conditions unless there is a record of dishonorable discharge or desertion. Likewise, separation at any time by reason of being paroled by Union Forces upon taking an oath of allegiance to the United States will be accepted as under other than dishonorable conditions. The fact that the Confederate States may have considered the veteran a deserter for taking such oath is immaterial.

(e) *Evidence requirements*—(1) *General.* Requests for evidence to establish marriage, age or death (also divorce when considered necessary) will be made on the claimant.

(2) *Marriage.* Where satisfactory evidence is furnished showing a ceremonial marriage between the claimant and the veteran many years ago, such marriage may be accepted as a lawful marriage. Actual proof of dissolution of an alleged former marriage of either party will not be required in such cases.

(3) *Age.* Proof of age will not be requested where other evidence (such as a marriage record) establishes the widow's age to be that shown on her claim or on other evidence in file. Where there is a conflict as to the date of the widow's birth, the latest date will be accepted to establish her age.

(f) *State pensions.* The fact that a claimant may be receiving a State pension based on the Confederate service of her deceased husband will not preclude an award of pension under Public Law 85-425.

(g) *Effective date.* The effective dates of awards will be in accordance with controlling Veterans Administration regulations: *Provided*, That in no event will benefits be awarded for any period prior to July 1, 1958. Where claim was filed on or after May 23, 1958, and prior to July 1, 1958, the effective date of an award will be July 1, 1958. If claim is filed on or after July 1, 1958, the award will be made to commence from date of filing claim. (Instruction 2, Public Law 85-425)

(Sec. 210, 71 Stat. 91; 38 U. S. C. 2210)

This regulation is effective August 15, 1958.

[SEAL] ROBERT J. LAMPHERE,
Acting Deputy Administrator.

[F. R. Doc. 58-6563; Filed, Aug. 14, 1958; 8:50 a. m.]

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

SUBPART B—VETERANS' READJUSTMENT ASSISTANCE ACT OF 1952

COMMENCEMENT; TIME LIMITATION

In § 21.2012, paragraphs (a) and (b) are amended to read as follows:

§ 21.2012 *Commencement; time limitations*—(a) *Initiation of program.* The veteran must actually commence the active pursuit of the approved program of education or training not later than his delimiting date, i. e., enroll in and begin the course.

(1) A program to be pursued exclusively by correspondence or which consists of correspondence study followed by residence study will be held to have been initiated (commenced) when the first correspondence lesson has been transmitted to the veteran by the institution.

(b) *Continuous pursuit.* There are no requirements as to continuous pursuit of a program of education or training as to

any period prior to the veteran's delimiting date. However, on and after his delimiting date a veteran who, prior to the delimiting date, has commenced pursuit of his approved program must pursue his program continuously to completion, except that he may suspend the pursuit of his program for a period or for periods of not more than 12 consecutive months in length without Veterans Administration approval, and without limitation as to the number of such suspensions. If a veteran does suspend the pursuit of his program at any time for a period in excess of 12 consecutive months, he may resume the pursuit of his program only upon Veterans Administration approval based upon a finding by the Veterans Administration that the suspension for the portion of such period in excess of 12 consecutive months was occasioned by conditions beyond the veteran's control. The burden of proof in this matter shall be upon the veteran, and he will be required to establish that the suspension for such period was necessitated by conditions over which he had no control.

(i) In determining whether a suspension of training in excess of 12 months was due to conditions beyond the veteran's control, the following circumstances may be considered as constituting such conditions:

(i) A veteran in active pursuit of a program of education or training is appointed by the responsible governing body of an established church, officially charged with the selection and designation of missionary representatives, in keeping with its traditional practice, to serve the church in an official missionary capacity and is thereby prevented from the continuous pursuit of his program of studies.

(ii) Immediate family or financial obligations beyond the control of the veteran require him to suspend the pursuit of his program of training to obtain employment, which employment precludes continuous pursuit of training.

(iii) Continuous pursuit of his program of training is precluded because of the veteran's own illness or illness or death in his immediate family.

(iv) The first 12 months of his suspension of training ends during the vacation, recess, or other period during which it is not possible to enter the school at which he desires to resume pursuit of his program of training, and more than 12 months will have elapsed when the next term begins.

(v) Unavoidable conditions arising in connection with the veteran's employment which preclude continuous pursuit of his program.

(2) In each case where the veteran suspends his program for a period in excess of 12 months and such suspension is found to be for reasons beyond his control, he will, upon cessation of the condition causing the suspension, be required to resume active pursuit of his program not later than the date as of which training under his program first becomes available to him at the enrolling institution or training establishment of his choice.

(Sec. 210, 71 Stat. 91; 38 U. S. C. 2210. Interprets or applies secs. 201–274, 66 Stat. 663–682, as amended; 38 U. S. C. 911-984)

This regulation is effective August 15, 1958.

[SEAL] ROBERT J. LAMPHERE,
Acting Deputy Administrator.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 1713]

[53591]

[Fairbanks 016450]

ALASKA

PARTIALLY REVOKING PUBLIC LAND ORDER NO. 843 OF JUNE 24, 1952, WHICH WITHDREW CERTAIN LANDS FOR USE OF DEPARTMENT OF AIR FORCE FOR MILITARY PURPOSES

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

1. Public Land Order No. 843 of June 24, 1952, which withdrew public lands for use of the Department of the Air Force for military purposes, is hereby revoked so far as it affects the following-described lands:

GALENA AREA

Beginning at a point on line of longitude 156°42' W., which bears N. 85°30' E., 4,370 feet more or less; S. 31°30' E., 4,000 feet; S. 66°30' E., 4,500 feet; and N. 23°25' E., 1,440.6 feet from W. C. M. C. No. 8 of U. S. S. 2627; thence

N. 85°30' E., 13,730 feet;
S. 4°30' E., 11,700 feet;
S. 85°30' W., 22,300 feet to line of mean high water of Yukon River;
Northerly, 2,000 feet, approximately, along line of mean high water to line of latitude 64°41'20" N.;
East, 10,100 feet;
North, 4,000 feet;
West, 2,600 feet to line of longitude 156°42' W.;
North, 6,400 feet to point of beginning.

The tract described contains approximately 3,467 acres.

2. Pursuant to section 202 (b) of the act of July 28, 1956 (70 Stat. 709, 711; 48 U. S. C. 46–3 (b)), and subject to the requirements of that act and the regulations in 43 CFR Part 76, the Territory of Alaska shall be entitled until 10:00 a. m. on November 8, 1958, to a preferred right of selection of the restored lands in connection with its mental health program, except as against prior existing valid rights or as against equitable claims subject to allowance and confirmation.

3. Subject to any existing valid rights, the requirements of applicable law, and the selection rights of the Territory of Alaska, the restored lands are hereby opened to settlement and to filing of such applications, selections, and locations as are allowable on unsurveyed lands in accordance with the following:

a. Subject to the applications and claims described in paragraph b (1) below, the lands, beginning at 10:00 a. m. on November 8, 1958, will be subject to settlement under the Homestead and Alaska Home Site Laws by qualified veterans of World War II or of the Korean conflict, and by others entitled to preference rights under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284 as amended). Beginning at 10:00 a. m. on February 7, 1959, any remaining lands will be subject to settlement under these laws by other qualified persons.

b. Applications and selections under the nonmineral public-land laws and applications and offers under the mineral-leasing laws may be presented to the Manager mentioned below, beginning on the date of this order. Such applications, selections, and offers will be considered as filed on the hour and respective dates shown for the various classes enumerated in the following paragraphs:

(1) Applications by persons having preference rights conferred by existing laws or equitable claims subject to allowance and confirmation will be adjudicated on the facts presented in support of each claim or right. All applications presented by persons other than those referred to in this paragraph will be subject to the applications and claims mentioned in this paragraph.

(2) All valid applications under the Small Tract Laws by qualified veterans of World War II or of the Korean conflict, and by others entitled to preference rights under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284 as amended), presented prior to 10:00 a. m. on February 7, 1959, will be considered as simultaneously filed at that hour. Rights under such preference-right applications after that hour will be governed by the time of filing.

(3) All valid applications and selections under the nonmineral public-land laws, other than those coming under paragraphs (1) and (2) above, and applications and offers under the mineral-leasing laws, presented prior to 10:00 a. m. on February 7, 1959, will be considered as simultaneously filed at that hour. Rights under such applications and selections filed after that hour will be governed by the time of filing.

c. The lands will be open to applications and offers under the mineral-leasing laws, and to location under the United States mining laws beginning at 10:00 a. m. on February 7, 1959.

4. Persons claiming veteran's preference rights under paragraph b (2) above must enclose with their applications proper evidence of military or naval service, preferably a complete photostatic copy of the certificate of honorable discharge. Persons claiming preference rights based upon statutory preference or equitable claims must enclose properly corroborated statements in support of their applications, setting forth all facts relevant to their claims. Detailed rules and regulations governing applications which may be filed pursuant to this notice can be found in Title 43 of the Code of Federal Regulations.

Inquiries concerning the lands shall be addressed to the Manager, Land Office, Bureau of Land Management, Fairbanks, Alaska.

ROGER ERNST,
Assistant Secretary of the Interior.

AUGUST 8, 1958.

TITLE 46—SHIPPING

Chapter II—Federal Maritime Board, Maritime Administration, Department of Commerce

Subchapter C—Regulations Affecting Subsidized Vessels and Operators

[Gen. Order 22, Rev., Amdt. 3]

PART 282—UNIFORM SYSTEM OF ACCOUNTS FOR OPERATING DIFFERENTIAL SUBSIDY CONTRACTORS

MISCELLANEOUS AMENDMENTS

Part 282 is amended as follows:

1. Three new sections as set forth below are added following § 282.189; the heading of § 282.199 is changed to read "All other current assets."

§ 282.190 *Other current assets.* This account is provided for balance sheet purposes and shall be subdivided as set forth in §§ 282.191, 282.192 and 282.199.

§ 282.191 *Prepaid current insurance.* This account shall include the unexpired amount of insurance premiums prepaid, or recorded as a liability in advance of payment, but only to the extent that such premiums apply to the period within one year of the date of the balance sheet and are properly chargeable within that period to account 200 "Unterminated voyage expense," or to other accounts appropriate for insurance expense. This account shall be subdivided to show separately prepayments on the several classes of insurance.

§ 282.192 *Other prepaid current expenses.* This account shall include the amount of prepaid current expenses, such as interest, taxes, rentals, advertising, charter hire, and similar expense not otherwise specifically provided for, but only to the extent that such prepayments apply to the period within one year from the date of the balance sheet and are properly chargeable within that period to account 200, "Unterminated voyage expense," or to other accounts appropriate for such expenses. Minor items may be charged directly to the appropriate expense accounts.

2. Supplement 1 and all reference thereto appearing at the end of § 282.00 (a) are hereby deleted and a new section is added following § 282.369:

§ 282.370 *Maritime Administration allowance for obsolete vessels.* This account shall include the gross amounts allowed by the Administration for obsolete vessels traded in, except where the obsolete vessel is retained under a Use Agreement, in which case this account is debited with the net trade-in allowance. Credit this account and debit account 359, "Construction work in progress," with the amount of progress payments on new construction made by the Administration for the account of the purchaser (operator).

3. Sections 282.376 and 282.389 are amended to read as follows:

§ 282.376 *Unexpired long-term insurance.* This account shall include the amount of unexpired insurance premiums prepaid or recorded as a liability in advance of payment, but only to the extent that such premiums apply to a period more than one year following the date of the balance sheet. The proportions of the same premium payments properly chargeable to expenses prior to such period are provided for in account 191, "Prepaid current insurance." This account shall be subdivided to show separately prepayments on the several classes of insurance.

§ 282.389 *Deferred prepayments and other deferred charges.* This account shall include the amount of prepaid expenses such as interest, taxes, rentals, advertising, charter hire, and similar expenses not otherwise specifically provided for in accounts 380, 384, 385 and 386, but only to the extent that such prepayments apply to a period more than one year following the date of the balance sheet. The proportions of the prepayments and other deferred charges in this account, properly chargeable to expenses prior to such period are provided for in account 192, "Other prepaid current expenses." Minor items and nominal payments covering such expenses may be charged directly to the appropriate expense accounts, even though they relate to periods in excess of one year.

4. Section 282.0–20 *Balance sheet statement* is amended by changing account 199, "Other current assets" to read account 199, "All other current assets," and by changing account 495, "Advance ticket sales and deposits," to follow, in proper numerical sequence, account 489.

Effective date: The foregoing shall be effective October 1, 1958.

(Sec. 204, 49 Stat. 1987, as amended; 46 U. S. C. 1114)

By order of the Maritime Administrator.

Dated: August 12, 1958.

[SEAL] GEO. A. VIEHMANN,
Assistant Secretary.

[F. R. Doc. 58-6561; Filed, Aug. 14, 1958; 8:50 a. m.]

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

Subchapter C—Carriers by Water

[No. 32451]

PART 323—UNIFORM SYSTEM OF ACCOUNTS FOR MARITIME CARRIERS

MISCELLANEOUS AMENDMENTS

At a session of the Interstate Commerce Commission, division 2, held at its office in Washington, D. C., on the 6th day of August A. D. 1958.

Having under consideration the matter of accounting regulations prescribed for maritime carriers pursuant to provisions of section 313 of the Interstate Commerce Act, as amended; and,

It appearing, that a notice of proposed rule making was issued June 16, 1958 and published in the FEDERAL REGISTER on June 27, 1958 (23 F. R. 4762) by the terms of which any interested person could, on or before July 25, 1958, submit written views or arguments about certain modifications of the Uniform System of Accounts for Maritime Carriers, Issue of 1950, then under consideration, details of which modifications were attached to the notice, and consideration having been given to all responses to that notice which were timely filed, in the formulation of modifications hereinafter prescribed:

It is ordered, That effective October 1, 1958, each carrier by water which also operates vessels in foreign service, and every lessor thereof, shall comply with the modifications which are attached hereto and are by this reference made a part of this order; and,

It is further ordered, That this order shall be served on each carrier by water which is subject to its provisions and each lessor thereof, and on every trustee, receiver, executor, administrator, or assignee of such carrier or lessor, and notice of this order and the modifications shall be given to the general public by depositing a copy thereof in the office of the Secretary of the Commission at Washington, D. C., and by filing the order with the Director, Federal Register Division.

(Sec. 12, 24 Stat. 383, as amended, 316, 54 Stat. 946; 49 U. S. C. 12, 916. Interpret or apply sec. 313, 54 Stat. 944, as amended; 49 U. S. C. 913)

By the Commission, Division 2.

[SEAL] HAROLD D. MCCOY,
Secretary.

(1) In § 323.199 *Other current assets,* cancel the number, title, and text of this account and substitute the following provisions in lieu thereof:

§ 323.190 *Other current assets.* This account is provided for balance sheet purposes and shall be subdivided as set forth in accounts 191, 192, and 199.

§ 323.191 *Prepaid current insurance.* This account shall include the unexpired amount of insurance premiums prepaid, or recorded as a liability in advance of payment, but only to the extent that such premiums apply to the period within one year of the date of the balance sheet and are properly chargeable within that period to account 200, "Unterminated voyage expense," or to other accounts appropriate for insurance expense. This account shall be subdivided to show separately prepayments on the several classes of insurance.

§ 323.192 *Other prepaid current expenses.* This account shall include the amount of prepaid current expenses, such as interest, taxes, rentals, advertising, charter hire, and similar expense not otherwise specifically provided for, but only to the extent that such prepayments apply to the period within one year from the date of the balance sheet

and are properly chargeable within that period to account 200, "Unterminated voyage expense," or to other accounts appropriate for such expenses. Minor items may be charged directly to the appropriate expense accounts.

§ 323.199 *All other current assets.* This account shall include the amount of assets of a current nature not includible in any of the foregoing current asset accounts. Subsidiary accounts shall be maintained so as to show separately each class of such other current assets.

(2) Insert in its proper numerical order the following new and additional "other assets" account:

§ 323.370 *Maritime Administration allowance for obsolete vessels.* This account shall include the gross amounts allowed by the Administration for obsolete vessels traded in, except where the obsolete vessel is retained under a Use Agreement, in which case this account is debited with the net trade-in allowance. Credit this account and debit account 359, "Construction work in progress," with the amount of progress payments on new construction made by the Administration for the account of the purchaser (operator).

(3) In § 323.376 *Unexpired insurance*, cancel the title and text of this account and substitute the following in lieu thereof:

§ 323.376 *Unexpired long-term insurance.* This account shall include the amount of unexpired insurance premiums prepaid or recorded as a liability in advance of payment, but only to the extent that such premiums apply to a period more than one year following the date of the balance sheet. The proportions of the same premium payments properly chargeable to expenses prior to such period are provided for in account 191, "Prepaid current insurance." This account shall be subdivided to show separately prepayments on the several classes of insurance.

(4) In § 323.389 *Other deferred charges and prepaid expenses*, cancel the title and text of this account and substitute the following in lieu thereof:

§ 323.389 *Deferred prepayments and other deferred charges.* This account shall include the amount of prepaid expenses such as interest, taxes, rentals, advertising, charter hire, and similar expenses not otherwise specifically provided for in accounts 380, 384, 385, and 386, but only to the extent that such prepayments apply to a period more than one year following the date of the balance sheet. The proportions of the prepayments and other deferred charges in this account, properly chargeable to expenses prior to such period, are provided for in account 192, "Other prepaid current expenses." Minor items and nominal payments covering such expenses may be charged directly to the appropriate expense accounts even though they relate to periods in excess of one year.

(5) In § 323.0–20 *Balance sheet statement*, (1) change the reference to Account 109, "Other current assets," where it appears under the caption, "Current assets," to read Account 190, "Other current assets"; and (2) transfer the reference to Account 495 "Advance ticket sales and deposits," from where it appears following the caption, "Total current liabilities," to its proper numerical order immediately following Account 489, "Miscellaneous reserves for unrecorded liabilities."

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 905]

[Docket No. AO–297]

MILK IN MISSISSIPPI DELTA MARKETING AREA

NOTICE OF EXTENSION OF TIME FOR FILING EXCEPTIONS TO REVISED RECOMMENDED DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given that the time for filing exceptions to the revised recommended decision, with respect to the proposed marketing agreement and order, regulating the handling of milk in the Mississippi Delta marketing area which was issued August 5, 1958 (23 F. R. 6032; F. R. Doc. 58–6334) is hereby extended to August 24, 1958.

Dated: August 12, 1958.

ROY W. LENNARTSON,
Deputy Administrator.

[7 CFR Parts 982, 986]

[Docket Nos. AO–298; AO–238–A8]

MILK IN RED RIVER VALLEY AND CENTRAL WEST TEXAS MARKETING AREAS

REVISED RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this revised recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to a proposed marketing agreement and order, regulating the handling of milk in the Red River Valley marketing area.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Acting Deputy Administrator, Agricultural Marketing Service, on May 19, 1958 (23 F. R. 3530), filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision, containing notice of opportunity to file written exceptions thereto.

On the basis of the exceptions to the recommended decision, certain changes have been made in the regulations proposed, particularly with respect to the pooling provisions. In view of these changes, interested parties are being given further opportunity to file exceptions. Interested parties may file written exceptions to the revised decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 7th day after publication of this decision in the FEDERAL REGISTER. The exceptions should be filed in quadruplicate.

Preliminary statement. The hearing on the record of which the proposed marketing agreement and order hereinafter set forth were formulated, was conducted at Wichita Falls, Texas, on August 6–9, 1957, pursuant to notice thereof which was issued on July 10, 1957 (22 F. R. 5705) upon a proposed marketing agreement and order regulating the handling of milk in the Red River Valley and Central West Texas marketing areas.

The material issues of record related to:

(1) Whether the handling of milk produced for sale in the Red River Valley marketing area is in the current of interstate commerce or directly burdens, obstructs, or affects interstate commerce in milk and its products;

(2) Whether marketing conditions justify regulation of the handling of such milk and, if so, whether by the issuance of a separate order to regulate the handling of milk in the Red River Valley marketing area, or by the expansion of the Central West Texas marketing area to include portions of such area;

(3) If a separate order is issued, what its provisions should be with respect to:

(a) The scope of regulation,

(b) The classification and allocation of milk,

(c) The determination of and the level of class prices,

(d) The distribution of proceeds to producers, and

(e) The necessary administrative provisions; and

(4) Whether Palo Pinto County, Texas, should be added to the Central West Texas marketing area, and whether

or not other proposed amendments to the Central West Texas marketing area should be adopted.

Findings and conclusions. Issue No. 4, relating to the Central West Texas marketing order, required separate consideration from the remaining issues before the hearing, and it was disposed of through amendment of the Central West Texas order (No. 82) effective February 1, 1958 (23 F. R. 638).

With respect to the remaining issues, it is hereby found and concluded upon the evidence adduced at the hearing and the record thereof that:

(1) *Character of commerce.* All milk produced for sale in the Red River Valley marketing area is in the current of interstate commerce or directly burdens, obstructs, or affects interstate commerce in milk and its products.

Handlers located in the Texas portion of the proposed area regularly dispose of milk to wholesale and retail accounts in the Oklahoma portion of the area. Likewise, milk from Oklahoma plants is distributed to wholesale and retail customers in Texas. In the distribution of this milk, handlers in the Red River Valley marketing area are in direct competition with handlers who are regulated under the Oklahoma Metropolitan, Texas Panhandle, North Texas, and Central West Texas marketing orders. It has been determined by the Secretary that the handling of milk in the marketing areas regulated by the aforesaid orders is in the current of interstate commerce.

Milk from producers whose farms are in Oklahoma is regularly received in plants in the Texas portion of the proposed area for processing where it is intermingled with milk of Texas producers and is distributed in both Oklahoma and Texas. In addition to the milk which moves across state lines from farm to plant, there is a considerable degree of competition with interstate markets in the procurement of supplies. The production area of the Red River Valley marketing area is overlapped to a considerable extent in both Oklahoma and Texas by the milksheds of the Oklahoma Metropolitan, North Texas, and Texas Panhandle marketing areas and to a lesser extent by that of the Central West Texas marketing area.

The Red River Valley marketing area has been relatively short of milk and it has been necessary for handlers to secure supplemental supplies to meet their Class I requirements. In addition to milk which is brought in from other markets in Oklahoma and Texas, milk has been imported in substantial quantities within the past year from several points in Iowa, as well as from Kansas, Missouri, Minnesota, and Wisconsin.

(2) *Need for regulation.* The marketing and pricing conditions in the Red River Valley marketing area are such that regulation is necessary to establish and maintain orderly marketing and to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended. This can best be accomplished by the issuance of a separate marketing agreement and order program for the area. There is no basis for annexing any of the proposed area to the Central West Texas marketing area.

The problems encountered by producers in the Red River Valley marketing area are typical of those occurring in unregulated fluid milk markets where producers' cooperative associations have been unsuccessful in establishing effective bargaining relationships with handlers.

The Federal milk marketing program proposed for the Red River Valley will implement the declared congressional policy of establishing and maintaining orderly marketing conditions by:

(a) Providing a regular and dependable method for determining minimum prices to producers at level comparable to those contemplated under the Act;

(b) Establishing uniform prices to handlers for milk received from producers according to a classification plan based on the use made of such milk by the handler;

(c) Providing an impartial audit of handlers' records of receipts and utilization to further insure uniform prices for milk purchased;

(d) Providing all producers with a means whereby the weighing and testing of their milk can be checked to insure accuracy;

(e) Establishing uniform returns to producers, supplying milk to the area, and insuring that the lower returns from the sale of reserve supplies will be equitably shared by all producers;

(f) Establishing uniform rules for the operation of a market-wide base and excess plan that will (i) acquaint producers with the rules for establishing bases and determining base and excess prices, and (ii) encourage producers to deliver their milk on a more even pattern; and

(g) Providing market-wide information on receipts, sales, and other factors relating to milk marketing supplies in the area.

The lack of uniformity in prices paid producers for their milk, the wide variety of classification and pricing plans used by the several handlers in the area, and the ineffectiveness of producers in protecting themselves against sharp declines in prices brought on by price cutting among handlers, have created unstable marketing conditions.

At the present time, no two handlers pay producers on exactly the same basis. Prices paid producers vary greatly among handlers. These factors of lack of uniformity, and the uncertainty of prices paid to producers, foster market instability and permit inequities to occur among handlers in the prices paid for producers' milk. The classification and pricing plan of the attached order is a means of establishing uniform prices for milk received from producers according to its use by each handler. The use-classification plan is equitable and will apply similarly to all handlers. To insure its effectiveness it must be supplemented by an impartial audit of handlers' records of receipts and utilization. The pooling provisions of the proposed order will provide a means of insuring uniform returns to all producers supplying each handler and an equal sharing of the lower returns associated with seasonal and other excesses of producer milk.

Many producers supplying handlers in the Red River Valley marketing area have had no effective means of insuring the accuracy of the weights and tests of their regular deliveries of milk. They have not been permitted to audit the records of the handlers to establish the accuracy of the percentage of milk paid for as base and as excess under the several base and excess plans operated by the handlers.

These plans are operated by the individual handlers and there has been no uniformity in the methods of determining the proportion of excess milk. There are some indications that the plans have operated to the benefit of a few producers and to the disadvantage of others. There is need for a Federal order to correct these inequities.

Producers have had no method for participating in the price determining decisions that govern the sales of their milk. Handlers and their representatives have discouraged producers from joining the proponent producers' cooperative associations. In at least some instances, they have refused to make deductions for association dues, even though the producer members have authorized such deductions. These actions have kept producers from exercising an effective part in determining the prices they receive for their milk or the percentage of their deliveries which will be paid for as base milk and excess milk. An order will give producers a voice in the deliberations as to what prices they should receive for their milk and will provide a means whereby the producers' associations can carry out an effective marketing service program applicable to all handlers who receive milk from their members. The classified price plan of the attached order, together with the pricing formulas contained therein, will insure sufficient quantities of pure and wholesome milk for the marketing area and will protect the interests of producers, handlers, consumers, and the general public.

(3) *Order provisions*—(a) *The scope of regulation.* A Federal milk order achieves marketing and pricing stability by requiring that regulated handlers pay at least specified minimum prices to producers in accordance with a classified-use plan established in the order, and that these payments be distributed to each producer on a uniform basis through either an individual-handler pool or a market-wide pool. It is necessary therefore, to establish clearly which plants and which milk will be subject to all or a part of the pricing provisions of an order, and which producers will participate in the distribution of returns through the type of pool specified. To identify such persons in referring to them throughout this decision and in the proposed order, such terms as "marketing area", "producer", "pool plant", "handler", "producer milk", and "other source milk" are defined and used herein.

Marketing area. The Red River Valley marketing area should be defined to include all the territory within Caddo, Carter, Comanche, Grady, Jackson, Kiowa, Stephens, and Tillman counties in Oklahoma, and Hardeman, Wichita, and Wilbarger counties in Texas, includ-

ing all Federal, state, and municipal institutions or bases located therein.

Fluid milk products sold for consumption in the principal communities in the area must be approved by health authorities who administer health ordinances, practices, and procedures generally patterned after the U. S. Public Health Service Milk Ordinance and Code. Within this area, the health standards are substantially identical and are under the jurisdiction of operating health authorities.

Marketing areas as defined in the Federal milk orders are designed to cover, as nearly as is practicable, areas in which milk is sold to consumers rather than the area in which the milk is produced. The proposed order would regulate distributing plants that are in substantial competition with one another, within the defined marketing area.

The proposed marketing area as defined herein includes much less territory than was proposed by the handlers who would be subject to regulation, or than was proposed by one of the producer cooperative associations which requested the hearing. Some of the territory originally proposed in the notice of hearing was abandoned by the proponents at the hearing, and no evidence was presented in support of its inclusion in the proposed marketing area. In addition, a considerable area concerning which evidence was submitted has been eliminated in the proposed order. In defining the marketing area there has been eliminated that portion of the proposed area in which insignificant volumes of milk are disposed of by regulated handlers. At the present time, it is not feasible in defining the marketing area to include all the area in which any handler, who would be regulated by the proposed order, disposes of any milk. To do so would expand the limits of the marketing area almost indefinitely.

The recommended area encompasses all the territory within which any regulated handler sells a significant volume of milk. Further expansion of the marketing area would not enhance the effectiveness of the regulation; it might have a contrary effect by bringing under regulation plants which have only minor connection with the area proposed to be regulated.

The handlers who would be regulated sell by far the greater volume of their milk in the area which has been defined and only a very small proportion of their milk outside these counties. Individual handlers will not be disadvantaged significantly in making sales outside the proposed marketing area because:

(1) The principal competitors for out of area markets will be either handlers also regulated under the Red River Valley marketing order, or handlers regulated under the other Federal order markets; and

(2) The economies inherent in the large-scale processing and distribution of milk will tend to offset any advantage that might accrue to the occasional unregulated handler with whom they might be in competition;

Accordingly, the marketing area which is defined herein includes the territory necessary to minimize problems of competition with unregulated distributors and, at the same time, restore marketing stability to the Red River Valley marketing area.

A cooperative association with producer members supplying Wichita Falls, Texas, handlers in its filed exceptions contended that the Texas portion of the marketing area should be regulated under a separate order. As shown above, the marketing area recommended herein is an integrated area which should include the designated counties in both Texas and Oklahoma.

Plants and milk to be regulated. Most of the plants which will be regulated under the proposed order are primarily fluid milk plants; they are engaged in manufacturing operations only to a limited degree. These plants are required to dispose of milk products in conformity with similar Grade A ordinances, either municipal or state. Any plant which is under the supervision of a municipal or state health authority and which disposes of any appreciable volume of Grade A milk as fluid milk products to wholesale or retail accounts in the marketing area, should be defined as a pool plant, and should be subject to full regulation under the proposed order.

At the hearing, it was proposed to exempt from full regulation plants disposing of only a small quantity of milk in the marketing area. The proposed exemptions ranged from an average of 100 to 300 pounds of milk per day. It has been concluded that plants which dispose of less than an average of 600 pounds per day as Class I milk to wholesale and retail outlets in the marketing area should not be considered pool plants and should be subject to only partial regulation. The limit of 600 pounds per day approximates an average-sized retail route or a small to medium-sized combination wholesale and retail route. Such volume of milk would not constitute a significant factor in the market, and it is, therefore, not necessary that such a plant be subject to a full regulation under the order. Such a plant, however, should be required to furnish such reports as the market administrator may deem necessary and should be required to fulfill certain obligations under the order, including the payment of administrative assessment on the volume of milk actually disposed of as Class I in the marketing area.

The order should also provide standards for plants from which pool plants making sales to wholesale and retail outlets in the marketing area may draw their supplies. Plants shipping supplemental milk to a market ("supply plants") generally fall into two categories. One category includes plants which regularly supply milk to distributing plants, and must be considered to be closely associated with the market. At the present time, there are no plants in this category which regularly serve the plants distributing fluid milk product in the marketing area. Some provision, however, should be made to regulate plants of this type, in the event that one or more might become associated with the market. Plants of this type are a normal part of the milk procurement facilities in any market, and there is nothing in this order which would preclude any plant, wherever located, from serving the market in the future should a need for its milk arise. This objective can be best accomplished by including in the definition of pool plant a supply plant that ships to pool distributing plants, at least 50 percent of its producer receipts during the current month. Because of the seasonal fluctuation in milk production, supply plants which may be a necessary part of the market during the season of short supply, may not be required to ship a large volume of milk during the months of flush production. Nevertheless, these plants are closely associated with the market and should be subject to regulation. Accordingly, any supply plant which qualifies as a pool plant by shipping to distributing plants at least 50 percent of its receipts during each of the months of September through December should be permitted to continue as a pool plant until September 1 of the year following, even though its shipments to the market during the January through August period are less than 50 percent of its receipts. Supply plants which fail to ship 50 percent of their receipts, during the months of September through December, cannot be considered as closely associated with the market, and should not be considered pool plants except during those months in which they actually ship 50 percent of their receipts to distributing plants.

A handler should be defined as any person who operates a pool plant or any other plant from which milk is disposed of as Class I milk on wholesale or retail routes in the area. The term, "handler", should also include a cooperative association with respect to the milk of member producers, which may be diverted for the account of such cooperative association from a pool plant to a nonpool plant. This provision is necessary to assure that producers whose milk is needed on the market may have all of their deliveries included in the computation of bases even though their milk may be temporarily diverted to a manufacturing plant during the base-forming period.

The term, "handler", is not intended to include the operation of a nonpool plant by persons who may operate both pool plants and nonpool plants. The definition should also include producer-handlers, in order that they may be required to report to the market administrator whenever the market administrator deems it necessary to determine their continued status as producer-handlers.

The term, "producer", should be defined to include any person who produces milk that meets the requirements of the Grade A ordinances of any state or municipal health authority, and which is received at a pool plant or which is caused to be diverted to a nonpool plant by a cooperative association in its capacity as a handler. The definition should be broad enough to include any person producing milk which meets the standards fixed by the several agencies of the Federal Government for milk for

fluid consumption on its bases and installations, when the milk produced by such a person is received at a plant supplying milk to such Federal establishment, even though his milk may not be under inspection of a state or municipal authority.

There are within the proposed marketing area several Federal establishments. At the present time, all are purchasing milk which is approved by local health authorities. It is possible, however, that in the future milk may be disposed of to one of these establishments from a source which has been approved by the health officer of the Federal base, but which is not under inspection of any local municipal, or state, health authority. Should this happen, the persons who produce such milk should be considered producers the same as other producers who furnish milk to the marketing area.

Only a few pool plants have manufacturing facilities, and in order to facilitate the movement of milk of producers among the various pool plants, provision should be made so that milk of a producer may be diverted by a handler, other than a cooperative association, from his pool plant to the pool plant of another handler. Such diversion should be permitted for any period during the months of February through July, in the season of flush production, and for not more than 10 days' production of a producer during any month, August through January. Such diverted milk should be considered received by the diverting handler at the pool plant from which such milk was diverted; but for purposes of determining shrinkage, such diverted milk should be considered as producer milk at the pool plant to which it was diverted. Milk so diverted for more than 10 days during any month August through January should be deemed received at the plant to which it was diverted for the entire period of diversion.

Provision should also be made so that milk of producers which is regularly received at a pool plant may be diverted for the account of a handler to nonpool plants without such producers losing their status under the order. This will permit milk regularly associated with the market to be diverted to manufacturing plants during periods of flush production or over week-ends and holidays, when supply and demand relationships may require that some reserve milk be manufactured in plants not regulated by the order. However, to insure that a producer's milk is needed by the market and is associated with it, some limitation on diversion should be provided in the order. Such limitation should be made in the fall months when production is seasonally low and the market needs the milk most. Thus, provision is made to limit diversion to a nonpool plant to ten days' production of milk of a producer during any month during the period, September through December. If such diversion exceeds ten days' production of any producer, the diverted milk should not be considered producer milk for the entire period of such diversion. Subject to the foregoing qualifications, producers whose milk is diverted should continue to receive the uniform price under the order and their milk should continue to be available for fluid use when needed on the market. Diverted milk should be considered to have been received at the plant from which it was diverted. In the case of milk diverted by a proprietary handler, the handler would continue to be responsible for such milk, just as though the milk had been received in his pool plant. In the case of milk diverted by a cooperative association which does not operate a pool plant, the milk should be considered to have been received by the cooperative association at a pool plant at the same location as the pool plant from which it was diverted. The cooperative association would be the handler for such milk and would be required to account for it according to its classification and to make payment to the producer for such milk.

Some cooperative associations have members which are associated with and supply milk to different Federal order markets. Such cooperative associations may divert milk of their producer members from one market to another market. To establish under which order such diverted milk should be pooled, the producer definition should exclude any person whose milk is diverted to a pool plant by a cooperative association if such person retains his status as a producer as defined in another Federal order and his milk is classified and priced under such other order.

The term, "producer-handler", should include a person who operates a distributing plant in which he handles only milk of his own production, and such milk from other handlers as is priced under the order at such other handler's plant. A producer-handler should be subject to the order only to the extent that he must submit reports to the market administrator as required, and maintain and make available to the market administrator the accounts, records, and facilities that are necessary for the market administrator to verify such person's status as a producer-handler. It is unnecessary to require under the order that a producer-handler pay any particular price to himself for milk produced on his own farm.

The classification provisions of the proposed order should provide that any milk, skim milk, or cream transferred by a handler to a producer-handler should be Class I milk. Supplemental purchases which may be obtained by a producer-handler from other handlers may be presumed to be needed by the producer-handler for fluid use, and should be classified in the plant of the supplying handler as Class I milk. Purchases of milk from other handlers should not jeopardize a producer-handler's status as such. Producer-handlers, however, should not be permitted to maintain their status as producer-handlers if they dispose of other source milk as Class I. To permit a producer-handler to dispose of other source milk for Class I use, could result in serious disruption of orderly marketing, since it would enable such a person to purchase distress milk from nonpool plants during the period of flush production, thereby gaining a competitive advantage over regulated handlers.

Any milk which a handler receives from a producer-handler should be considered as other source milk, and it should be allocated to the lowest class utilization at the pool plant of the handler. This method of allocating receipts from a producer-handler recognizes that sales by a producer-handler to another handler is the means by which the producer-handler disposes of his surplus milk. It would be inappropriate under these circumstances to provide for the equal sharing by the producer-handler in the Class I market of another handler with respect to the producer-handler's surplus milk.

In their exceptions handlers suggested that the market administrator be required to publish each month a list of producer-handlers and that any milk purchased by a handler from a producer-handler not on the list be considered producer milk. In a market of this size there is little likelihood that a handler would purchase the milk of a producer-handler without knowing his status. The requirement to publish such a list would be unduly cumbersome in relation to the problem to be dealt with. Accordingly, no change should be made with respect to the treatment of milk received from a producer-handler.

"Other source milk" should be defined to include all skim milk and butterfat utilized by a handler in his operations, except fluid milk products received by such handler from producers. This would include any nonfluid milk products from any source, including those produced at the handler's plant during the same or an earlier month, which are reprocessed during the current month at the plant. The other source milk would represent all butterfat and skim milk from any source not subject to the pricing provisions of the attached order. Defining other source milk in this manner will insure uniformity among all handlers under the allocation and pricing provisions of the order.

(b) *Classification of milk.* Milk received by regulated handlers should be classified on the basis of skim milk and butterfat according to the form in which, or the purpose for which, it is used as either Class I milk or Class II milk.

A classified-use plan of this type will insure that minimum prices for milk will be uniform among handlers according to use, that a price may be fixed for the milk disposed of as Class I milk at a level that will bring forth an adequate supply of pure and wholesome milk, and that a necessary reserve supply of quality milk may be maintained without disrupting marketing and pricing conditions within and around the established marketing area.

The products which should be included in Class I milk are those which are required by the health authorities, exercising jurisdiction in the marketing area, to be produced from Grade A milk. The extra cost of getting quality milk produced and delivered to the market in the condition and quantities required, makes

it necessary to provide for Class I milk a price somewhat higher than that received for non-Grade A milk produced for use in manufactured dairy products. This higher price should be at such a level that it will yield a return to producers that will encourage the production of enough milk to meet the requirements of the market.

The reserve milk which is not needed seasonally, or at other times during the year for Class I use, must be disposed of for use in manufactured dairy products. These products are not required to be made from Grade A milk, and must be sold in competition with similar products produced through the entire United States. Milk so used should be classified as Class II milk and should be priced in accordance with its value in manufactured dairy products.

In accordance with these standards, Class I milk should include all those products which are disposed of in the form of milk, skim milk (including reconstituted and concentrated nonfat milk solids), buttermilk, flavored milk, flavored milk drinks, cream and any mixtures in fluid form of milk, skim milk and cream, which are disposed of for fluid use, such as half and half, and all milk which cannot be accounted for as having been used to produce a Class II product.

Fluid milk products which contain concentrated skim milk solids such as skim milk drinks, fortified skim milk, and buttermilk to which extra solids have been added, or concentrated whole milk disposed of for fluid use, should be included within the definition of Class I milk, and all the nonfat solids contained therein should be priced equally. For brevity and convenience in referring to Class I milk items, they are included in a definition of "fluid milk product". Products such as evaporated or condensed milk packaged in bulk or in hermetically sealed containers will not be considered Class I milk, since they need not be handled as fluid milk products, and are not required to be made from Grade A milk.

Skim milk and butterfat are not used in many products in the same proportions as in the milk received from producers and, therefore, should be classified separately according to their respective uses. The skim milk serum and butterfat content of milk products received and disposed of by a handler may be determined through certain recognized testing procedures. Some of these products, such as ice cream and condensed products, present a difficult problem of testing and accounting, in that some of the water contained in the milk originally has been removed. It is necessary in the case of such products to provide a special means of ascertaining the amount of skim milk and butterfat contained in or used to produce these products. This may be accomplished through the use of adequate plant records made available to the market administrator in the case of products manufactured by the handler, or by means of standard conversion factors of skim milk and butterfat used to produce such products in the case of items purchased by a handler, or where adequate plant records are not available.

The accounting procedures to be used in the case of any condensed milk product disposed of as Class I milk should be based on the pounds of milk or skim milk required in its production. Concentrated skim milk solids which are reconstituted for distribution as Class I products, or are used to fortify other Class I products are included in this category. The value of each pound of nonfat solids utilized in Class I products has a value to the handler the same as every other pound contained therein. Neither the form in which, nor the source from which, such solids are obtained change their value to the handler for this purpose. Solids contained in producer skim milk are in fluid form and are paid for on the basis of all the water that was originally associated with such solids. In order to account for skim milk solids in powder or condensed form on a basis comparable to that used in accounting for regular skim milk, it is necessary to account for such solids on the basis of the quantity of skim milk necessarily used in the production of such solids. Therefore, the accounting procedures to be used in the case of this and any other condensed product should be based on the pounds of milk or skim milk required in its production.

Each handler must be held responsible for a full accounting of all his receipts of skim milk and butterfat in any form. A handler who first receives milk from producers should be responsible for establishing the classification of, and making payment to producers for, such milk. Fixing responsibility in this manner is a practice which is followed consistently in both regulated and nonregulated markets. It is necessary, for effective administration of the provisions of the order, that equality of minimum prices among handlers be maintained. The operator of the plant at which the milk is first received from producers is the person with whom contractual relationships have been made by producers or their representatives. Except for the limited quantities of skim milk which may be classified as Class II under circumstances set forth elsewhere, all skim milk and butterfat which is received, and for which the handler cannot establish utilization, should be classified as Class I milk. This is necessary to remove any advantage to handlers who fail to keep complete and accurate records of their operations, and to assure that producers will receive full value for their milk on the basis of its use by the handler.

All skim milk and butterfat used to produce products, other than those which are classified as Class I milk, should be Class II milk. Included as Class II milk are such products as ice cream, ice cream mixes, frozen desserts and mixes, eggnog, yogurt, aerated cream, butter, cheese (including cottage cheese), evaporated and condensed milk (both plain and sweetened), nonfat dry milk solids, dry whole milk, sour cream, and any other product not specified as Class I. Class II milk should also include skim milk and butterfat disposed of to commercial food manufacturing plants such as wholesale bakeries, soup companies, candy manufacturers, etc., which do not dispose of fluid milk products for fluid consumption. The health ordinances do not require that the milk utilized in these products be of Grade A quality.

Cream placed in storage and from should be classified as Class II milk. Such cream is intended primarily for use in ice cream and ice cream mixes. Should any frozen cream or other Class II product later be utilized in the manufacture of another product, it would be considered a receipt of other source milk in the plant of the handler and would be assigned to the lowest class price utilization in the plant.

Producers proposed that sour cream be included in Class I. The record, however, fails to establish that any of the health departments having jurisdiction in the marketing area require that it be made from Grade A milk. The facts established are that most of the sour cream disposed of by handlers in the marketing area is purchased from outside sources already processed and is not generally produced from producer milk.

Classification as Class II milk should be provided for skim milk which is disposed of for livestock feed and for skim milk which is dumped by the handler after prior notification to the market administrator of his intention to do so. In some sections of the proposed marketing area, manufacturing facilities are rather limited. Many of the handlers who would be subject to the order also have rather small operations. As a consequence, there will be times when a plant will have small quantities of milk, which are in excess of its bottling requirements and which it would be uneconomical to transport to a manufacturing plant. In such instances, the handler should be permitted to dump the skim milk contained in such milk without having it classified as Class I milk. To prevent abuse of this privilege, however, the handler should be required to notify the market administrator of his intention to dump such skim milk so that the market administrator may have the opportunity to physically verify both the quantity of skim milk to be dumped, and its actual dumping, if he desires to do so. Failure to notify the market administrator in advance would result in such milk's being considered unaccounted for, and subject to classification in Class I milk as excess shrinkage.

While it is reasonable to permit skim milk for which a handler has no use to be disposed of to farmers for livestock feed or to be dumped, there is no justification for permitting fat to be so utilized. While excess skim milk may be of no value to a handler, except in condensed form, the fat can be disposed of in ice cream and possibly in butter at any point in the marketing area. The only appreciable quantities of fat which cannot be salvaged are those contained in returns of creamed cottage cheese and flavored milk. Any loss involved in such returns is a part of the normal risk associated with doing business, and should be compensated for by the 2 percent shrinkage permitted to be classified as Class II milk.

Shrinkage up to 2 percent of the handler's receipts from producers should be permitted to be classified as Class II milk, as should all shrinkage incurred in the handling of other source milk. Shrinkage should be determined by subtracting, from the total pounds of skim milk and butterfat received by the handler, his total utilization of skim milk and butterfat respectively, in the various products handled. The resulting figure should be prorated between the handler's receipts of milk from producers and from other sources. The shrinkage associated with the other source milk and that which is allocated to producer milk, in an amount not in excess of 2 percent of the handler's receipts of skim milk and butterfat from producers, should be classified as Class II. Any shrinkage allocated to producer milk in excess of 2 percent of the handler's receipts from producers, should be classified as Class I milk.

Handlers have inventories of fluid milk products at the beginning and end of each month, which enter into the problem of accounting for current receipts and utilization. Inventory is intended to include stocks on hand of bulk milk, skim milk, cream, and bottled milk, and other fluid milk products designated as Class I milk. Manufactured products on hand are not included in the inventory to be accounted for, because either they were in processed form or the milk used to produce such products will already have been accounted for as Class II milk. As noted above, handlers will be required to keep records of such products, but they will not be included in the inventory for the purpose of accounting for current receipts. Inventory should be accounted for as Class II milk. If fluid milk products in inventory are accounted for as Class II milk at the end of the month, it will be necessary to provide a method for dealing with the producer milk in inventory which is used in the current month for Class I purposes, but which the handler accounted for to producers as Class II at the end of the preceding month. Handlers at times will also have other source milk in inventory. Producer milk from inventory should have prior claim on Class I sales over current receipts of other source milk. This can be accomplished by considering the ending inventory in one month as a receipt by the handler in the following month, and substracting such receipt in series, starting with the Class II milk remaining after the subtraction of other source receipts during the month. To the extent that opening inventory is allocated to Class I Milk and there was an equivalent amount of producer milk classified in Class II in the preceding month, a reclassification charge should be made at the difference between the Class I price in the current month and the Class II price in the preceding month. This will ensure equality in the application of the minimum prices among handlers, and in returns to producers, whether such producer milk is from current receipts or from the preceding month's inventory.

Transfers. The classification of butterfat and skim milk used in the production of Class II items is established when the product is made. The classification of Class I milk should be established when butterfat or skim milk is disposed of by the handler. However, since some Class I items may be disposed of to other pool plants for processing, specified classification procedures must be prescribed for milk transferred to other pool plants.

Milk, skim milk, and cream, or other products designated as Class I milk, transferred by a handler to the plant of another handler, except a producer-handler, should be classified as Class I milk, unless both handlers indicate in their reports to the market administrator that they desire such milk to be classified as Class II milk. The plant to which the milk is transferred, however, must have sufficient Class II utilization available for such assignment after the prior allocation of shrinkage and other source milk. Furthermore, the assignment of classification must be such that it will result in the maximum amount of producer milk at both plants being assigned to Class I milk. This is in accordance with the principle that the higher valued usage should be assigned to those producers who regularly supply the market.

In order to reduce the administrative expenses of verifying the use of milk or skim milk transferred great distances, milk or skim milk which is moved to plants located more than 350 miles from Wichita Falls, Texas, should be Class I in all cases. There are ample manufacturing facilities within 350 miles of Wichita Falls to handle all of the excess supplies that may be produced seasonally for the market. It is a very costly procedure to verify the utilization of small lots of milk or skim milk moved great distances. In the interest of maintaining administrative costs as low as possible, any milk or skim milk moved more than 350 miles from Wichita Falls should be classified as Class I.

It is as uneconomical for the market administrator to travel several hundred miles to verify the utilization of a few cans of cream, as it is to travel the same distance to verify the utilization of a tank of milk. In the case of shipments of cream, however, the shipment is frequently labeled as being for use as manufacturing grade cream only. When this occurs and the market administrator has knowledge of the fact, cream moved more than 350 miles from Wichita Falls may be classified as Class II milk if all the following conditions are met:

(1) The transferring handler requests such a classification;

(2) It is clearly labeled as manufacturing grade cream, and is so invoiced; and

(3) The market administrator is notified, prior to the shipment, so that he may have an opportunity to verify the labeling.

The most common form of transfer to a nonpool plant is the movement of excess milk to nearby plants which have manufacturing facilities. It is provided that if milk, skim milk, or cream is transferred from a pool plant to a nonpool plant located less than 350 miles from Wichita Falls, Texas, it shall be Class I unless Class II use is established. If the transferee plant distributes milk on routes the market administrator shall first allocate to the Class I utilization in such plant, the receipts from dairy farmers who constitute its regular source of Grade A supply. If the Class I disposition of such plant exceeds its receipts from such dairy farmers the milk, skim milk, or cream transferred to such plant shall be assigned to Class I up to the amount that Class I disposition exceeds receipts from dairy farmers. Any additional amount shall be classified as Class II.

If the transferee plant does not distribute milk on routes, the milk, skim milk, or cream shall be classified as Class II milk except that: (1) if the nonpool plant transfers milk, skim milk, or cream to a pool plant, an amount equal to skim milk and butterfat transferred to the nonpool plant from other pool plants shall be classified as though it had been transferred directly between the pool plants; and (2) if skim milk and butterfat is transferred from the nonpool plant to another nonpool plant which does distribute fluid milk on routes, the skim milk and butterfat transferred from the pool plant to the first nonpool plant shall be Class I in an amount equal to that transferred to the second nonpool plant unless it is established that such skim milk or butterfat was transferred to the second nonpool plant without Grade A certification with each container labeled to show that the contents were for manufacturing use only and that the shipment was so invoiced. If, however, the transferee plant is a pool plant under another order issued pursuant to the Act, the milk received at such plant from dairy farmers who are producers under such order should receive prior claim to the Class I utilization over the fluid milk products diverted or transferred to such plant.

Allocation. Because the order prices apply only to producer milk, it is necessary, if a pool plant has butterfat or skim milk other than that received from producers, to determine the quantities of milk in each class to be assigned to current receipts from producers. The milk of producers who are regularly engaged in supplying the market should be assigned to Class I before any other milk is so assigned. This is necessary to insure the effectiveness of the classified pricing program of the order. The system of assigning utilization of milk to receipts from different sources which will carry out this objective is set forth in detail in the order.

In general, this procedure requires that skim milk and butterfat, respectively, remaining in each class be assigned to producer milk by making the following deductions from the gross utilization of each handler, starting with Class II milk, except as otherwise noted:

(1) Class II shrinkage of producer milk;

(2) Other source milk;

(3) Opening inventory;

(4) Receipts from other pool plants according to its classification; and

(5) Overage.

Since uniform prices paid producers by each handler are to be calculated monthly, the assignment of utilization described above should be carried out with respect to all milk received during each month. To apply a shorter accounting period would place a burden upon handlers and would increase substantially the cost of administering the order.

(c) *Class prices.* In order to restore and maintain orderly marketing conditions in the Red River Valley marketing area, Class I and Class II prices for producer milk must be established at levels that will reflect economic conditions affecting the market supply and demand for milk or its products, and assure the maintenance of a supply of quality milk adequate for the needs of the market. The act requires that minimum prices established by Federal milk orders meet this standard. An important point is that prices be at a level that, over a reasonable period of time, will result in a supply of milk meeting the quality standards of the market about equal to the needs of the market, considering the necessity for a reserve supply of milk and a seasonal fluctuation in production. This means that the minimum prices provided in the order can be related to general economic conditions, but they cannot be maintained out of line with such conditions or with prices in surrounding markets. If producers' prices are too low, not enough milk of acceptable quality will be produced and delivered to plants to supply the Class I needs of the market, and there will be a tendency for producers to shift to other markets where the prices are more nearly adequate. Likewise, if prices are too high, milk production will be overstimulated, consumption will tend to fall off, and there will be a tendency for producers to shift from other markets to the Red River Valley marketing area. These actions would result in a supply of milk greater than needed to supply the demands of the market, and would eventually result in the shifting of agricultural resources toward the production of unnecessary and uneconomical surplus which would reduce the uniform prices received by producers.

The Red River Valley marketing area is situated near to several other Federally regulated milk markets. As noted above, the production area for the Red River Valley overlaps the milksheds of the North Texas, Central West Texas, and Texas Panhandle marketing areas and to an even greater degree that of the Oklahoma Metropolitan milk marketing area. For this reason, it is particularly important that prices in the Red River Valley be established at a level which will not disrupt the supply and demand relations of the several surrounding marketing areas.

The prices in the Oklahoma Metropolitan marketing area are the lowest of any of the above-mentioned marketing areas. As one progresses south or west from the Oklahoma Metropolitan marketing area, prices are increased to compensate for the additional costs of transporting supplemental milk from the area of surplus production, and to compensate for the additional costs of getting milk produced in Western Oklahoma and Texas. Accordingly, the price for Class I milk in the Red River Valley marketing area must be higher than that established in the Oklahoma Metropolitan milk marketing order, and lower than those provided in the Texas marketing orders.

The price for milk received at pool plants located in Texas should be 15 cents higher than the Class I price established under the Oklahoma Metropolitan milk marketing order. At all other pool plants located within 100 miles of the City Hall in Wichita Falls, Texas, it should be 10 cents higher than the price established under the Oklahoma Metropolitan marketing order. At all other plants a location differential should apply based on the distance such plants are from the City Hall in Wichita Falls, Texas. This level of prices will maintain a proper alignment between the Red River Valley marketing area and the Federal marketing areas mentioned above. A greater difference in prices between the Oklahoma Metropolitan marketing area and the Red River Valley marketing area would place handlers in the Red River Valley at a competitive disadvantage with plants regulated under the Oklahoma Metropolitan marketing order, which dispose of milk in the Red River Valley marketing area and in the area lying between the Oklahoma Metropolitan and the Red River Valley marketing areas. At the same time, a price less than that provided would afford handlers regulated under the Red River Valley marketing area, especially those located south of the Red River, a competitive advantage over handlers whose milk is priced under the North Texas or Central West Texas marketing orders.

If the Class I pricing as proposed herein had been operative, the Class I price at Wichita Falls, Texas, in 1956 would have ranged from about $5.15 to $5.75, and averaged $5.48 per hundredweight. For the first six months of 1957, an average Class I price of $5.19 per hundredweight would have resulted.

Comparable Class I prices actually paid by handlers in the Red River Valley marketing area are not available, but prices reported to have been paid producers for base milk in 1956 ranged from about $4.75 to $5.65 per hundredweight; and for the first six months of 1957, they ranged from about $4.50 to $5.45 per hundredweight.

Exceptions to the Class I pricing provisions of the order were filed by several handlers who are subject to regulation under the Central West Texas order and by the cooperative association which supplies them with milk. It was their contention that the proposed price is too low and would place them at a competitive disadvantage. Their opposition is based largely on a comparison of the prices that would have prevailed under the proposed order with the prices that were actually effective in Central West Texas during the past four years. During a substantial portion of that period, however, the latter price was not based on the formula provided, but was fixed at a somewhat higher level because of the extreme drought which prevailed.

Were the proposed order in effect in July 1958, the Class I price would be 20 cents below the Central West Texas price at Abilene. This figure is very close to that which the exceptions allege should prevail.

On an annual average the difference in price between Wichita Falls and Abilene will exceed the above figure by a few cents. To increase the price at Wichita Falls, however, to bring it nearer to the Abilene price would cause a misalignment in price between Wichita Falls, and the Oklahoma Metropolitan, North Texas, and Texas Panhandle marketing areas.

Class II milk. Every fluid milk market needs a reserve supply of Grade A milk to meet day-to-day fluctuations in receipts from producers and in Class I sales. While sales of milk vary considerably on a day-to-day basis, they are rather uniform from season to season. Milk supplies, however, because of the seasonal variations in production, are greater during the late winter and spring months than they are in late summer and fall. As a result, handlers must process on a year-round basis the daily and seasonal surplus into various manufactured products. Since milk going into these products must be paid for at the Class II price, this price must be fixed at a level which will encourage handlers to accept whatever quantities of such milk may be offered from time to time by the producers who supply the market. It is of equal importance that the price be at a level which will return to producers the full value for their milk.

All products which are included in Class II may be made from milk which does not meet the requirements of the Grade A ordinances. Grade A milk which may be used in these products by regulated handlers, must be priced at a level which is competitive with the cost of alternative supplies of milk that would otherwise be used in the manufacture of such products. Ice cream, cottage cheese, and condensed milk are the most important outlets for reserve and surplus supplies on the market.

In the past, the Red River Valley has been relatively short of milk during the late summer and fall months, and it has been necessary for handlers to rely on receipts of ungraded milk to process the Class II products which they manufacture during the season of short supply. When milk is not available locally, these products have been purchased, for the most part, in the form of powder, condensed skim, and cream. It seems appropriate, therefore, that the formula for pricing Class II milk, at least during the season of short supply, should be one which would reflect the cost of obtaining supplies from alternative sources. Such a formula would be one which is based on the market value of butter and nonfat dry milk solids. One of the alternative formulas used for determining the Class I price under the Oklahoma Metropolitan milk marketing order is a formula based on the Chicago market prices of butter and nonfat dry milk solids. Since, as has been noted above, the prices in the Red River Valley marketing order must be aligned to those in the Oklahoma Metropolitan Order, the price for Class II milk under the Red River Valley marketing order during the season of short supply should be identical to the butter-powder formula in the Oklahoma Metropolitan milk marketing order. This formula arrives at a price for the butterfat by subtracting 3 cents from the price of 92-score butter at Chicago, adding 20 percent thereto, and multiplying by 4. The value of the skim milk is determined by subtracting from the average prices of nonfat dry milk solids both spray and roller process, f. o. b. manufacturing plants in the Chicago area, 5.5 cents, multiplying by 8.5, and then multiplying by 0.96. This is the price which should be effective for the months of August through January, inclusive.

During the months of heavier production, it will be necessary for many of the handlers in the Red River Valley marketing area to move excess supplies to nearby manufacturing plants for processing into Class II products, since the facilities of handlers for processing whole milk into manufactured dairy products are limited, particularly in the Texas portion of the proposed marketing area. During this period of the year, the Class II price should be one which will enable handlers to dispose of excess supplies to manufacturing plants without incurring a substantial loss on the transaction. The best reflector of the value of milk for Class II products during the months of flush production is the price paid by manufacturing plants for ungraded milk for use in these products. The Class II price during the months of February through July, therefore, should be the average of the prices paid for ungraded milk by the following plants: American Foods Company, Miami, Oklahoma; Gilt Edge Dairy, Norman, Oklahoma; the Muskogee Dairy Products Company, Muskogee, Oklahoma; the Page Milk Company, Coffeyville, Kansas; the Pet Milk Company, Siloam Springs, Arkansas; and the Real Test Foods Company, Tulsa, Oklahoma. These are the same plants whose pay prices are used in determining the Class II prices under the Oklahoma Metropolitan marketing order.

Prices determined in this manner will insure that handlers will make every effort during the months of short production to see that available supplies of producer milk are used in Class I to the greatest extent possible. It will also insure that handlers will be able to move surplus milk into manufacturing channels when it cannot be utilized in Class I on the market.

Producers proposed that for certain products, such as cottage cheese, ice cream, and similar products a Class II price be established somewhat higher than the price fixed for milk going into butter, cheese, nonfat dry milk solids, and other commodities which are less perishable and less bulky. At this time, it is not feasible to establish a separate classification for such products. Such products may be disposed of freely in the marketing area, regardless of whether they have been made from Grade A milk. Large quantities of cottage cheese and ice cream are distributed over the entire marketing area by plants which are subject to regulation under other Federal marketing orders, as well as by manufacturing plants which are completely free of regulation. Pricing milk going into these products at a somewhat higher level than the Class II price in surrounding markets, or than the price paid by unregulated manufacturing plants, would place regulated handlers at a competitive disadvantage and might result in their refusing to accept from producers more milk than was needed for their Class I use. Refusal by handlers to accept milk for use in ice cream, cottage cheese, and similar products would create disorderly marketing and would pose a severe problem for the cooperative association in disposing of the seasonal surplus in the market.

Location differentials. Class I milk products, because of their bulky, perishable nature, incur relatively high transportation costs, if such products or the milk used to produce them are moved a considerable distance. Milk delivered by farmers directly to plants in or near the centers of population is therefore, worth more to a handler than milk which is received from farmers at a plant located many miles from the point at which the milk is distributed. On such milk the handler must incur the additional cost of moving the milk to a central market. The producer, in turn, receives less for milk delivered to points distant from the central market in lieu of incurring the additional cost of hauling his milk directly to the central market. Under these conditions, the value of milk delivered by producers to plants located some distance from the central market is reduced by approximately the cost of transporting such milk from the point of receipt to the central market.

At the present time, there are no supply plants regularly furnishing milk to the Red River Valley marketing area. With the rapidly changing pattern that is developing in the milk industry, it is possible, however, that in the near future supply plants may begin to furnish milk to the market on a regular basis. In order to allow for the cost of moving Class I milk from distant plants that might become regular sources of supply for the market, it is necessary to establish the Class I price for milk delivered to plants at a point in the marketing area and then provide a schedule of deductions from the Class I price as location differentials or adjustments. The city of Wichita Falls, Texas, is the largest population center in the proposed marketing area. It is also the most distant from alternative sources of supply and, therefore, the cost of milk from surplus producing areas delivered to Wichita Falls would be greater than at other population centers in the marketing area. Accordingly, the Class I price should be established at Wichita Falls. Because of the extensive nature of the marketing area and its peculiar location in relation to sources of supply and to other marketing areas, the prices at all points in Texas should be the same as that at Wichita Falls. At plants located in Oklahoma and within 100 miles of Wichita Falls, the price should be 5 cents less than the price at Wichita Falls. At all other plants, the price should be reduced 1.5 cents per hundredweight for each 10 miles or fraction thereof that such plant is more than 100 miles distant from the City Hall at Wichita Falls, Texas. Although, normally, location differentials are uniform at the same distance from the central market regardless of the direction in which the plant is located, in the present instance, it is desirable to permit the deduction of a location differential only at those plants which are located north and east of Wichita Falls. Because the areas to the south and west are generally a deficit production area and the costs of alternative supplies in that area are higher than they are further north, prices at plants in other West Texas marketing areas are higher than those proposed for the Red River Valley marketing area by approximately the amount of the additional cost of transporting supplemental supplies from the surplus production areas in the north central states. If the prices at plants south of the Red River Valley were reduced because of their distance from the marketing area, it is possible that plants presently regulated under the Central West Texas marketing order might attempt to become regulated under the Red River Valley marketing order. If this were to happen, the prices such plants were required to pay would be substantially less than the prices paid by other plants regulated under the Central West Texas marketing order. The resulting competitive advantage enjoyed by such a handler would disrupt the orderly marketing in the Central West Texas marketing area.

One of the exceptions proposed that the location differential be revised so as to provide a Class I price at Ardmore, Oklahoma, four and one-half cents less than the price at Lawton, Oklahoma. This exception is denied since Ardmore is at least as far from the Oklahoma Metropolitan marketing area as Lawton is and is closer to the North Texas marketing area than any other point at which a plant is located in the Oklahoma portion of the proposed marketing area.

The proposed rate of 1.5 cents for each 10 miles or fraction thereof that a plant is more than 100 miles from the City Hall in Wichita Falls, Texas, reflects the actual cost of transporting milk in tank trucks. This rate is comparable to that which is generally contained in other Federal milk marketing orders.

A method is provided for determining, if necessary, the priority of milk from various plants and allocating milk to Class I use by computing the aggregate value of the location adjustments to be allowed, such adjustments to be made in sequence in the order that such plants are distant from the City Hall in Wichita Falls, Texas.

The value of milk used in manufactured dairy products is affected very little, if at all, by the location of the plant receiving and processing such milk. This occurs because of the differences in the cost of moving the two types of product.

Fluid milk products are bulky, easily contaminated, and highly perishable, whereas, such products as butter, cheese,

and nonfat dry milk solids are easily transported and may be stored for long periods of time, and have a high value relative to the cost of transporting them. The cost of such products is virtually the same at the plant of origin as it would be delivered to Wichita Falls. For this reason, the price for Class II products varies little, regardless of the location of the plant. Accordingly, no adjustment should be made in the Class II price by reason of the location of the plant at which the milk is received from producers.

In line with the economic considerations which affect the value of milk for fluid uses when it is delivered by farmers to plants located some distance from the consuming market, it is necessary and appropriate that the prices paid producers for milk delivered to plants at which a location differential applies should also be reduced at the same rate to reflect the lower value of such milk, f. o. b. the point of actual delivery, in contrast to its value when delivered to Wichita Falls.

Butterfat differentials. As noted above, it has been concluded that butterfat and skim milk should be accounted for and classified separately. It will be necessary, therefore, to adjust the Class I and Class II prices in accordance with the average butterfat content of the milk in each class by a butterfat differential that will reflect differences of value due to variations in the butterfat content of such products. In order to maintain prices on the same basis as those in surrounding markets, prices for the Red River Valley marketing area should be computed and announced in terms of milk of 4.0 percent butterfat content.

The butterfat differentials for Class I milk and Class II milk should be appropriate to the level of class prices provided for herein for Class I milk and Class II milk. To achieve this end, the Class I price should be increased or decreased, for each one-tenth of 1 percent of butterfat content above or below 4.0 percent, by the value obtained by multiplying the Chicago butter price for the preceding month by 0.125. The Class II differential would be determined by multiplying the Chicago butter price for the current month by 0.115.

The use of butterfat differentials in this manner is practiced in most fluid milk markets for adjusting for butterfat variations. At these levels they reflect the situation in the market and will maintain the prices in this market in proper alignment with prices in surrounding markets, regardless of the butterfat content of the milk. Identical butterfat differentials are provided in the Oklahoma Metropolitan marketing order.

In order that the Class I butterfat differential may be announced early each month, at the same time that the Class I price is announced, the Class I butterfat differential should be based on the average price of butter during the preceding month. Since Class II prices will not be announced until after the end of the month, and will be based on market prices of commodities during the month in which the milk is manufactured, the Class II butterfat differential should be based on the value of butter during the month in which the milk is utilized. Accordingly, the Class II butterfat differential should be based on the price of butter during the current month, and should be announced at the end of the month at the same time as the Class II price is announced. Although handlers will not know the cost of such milk until after it is utilized, they will know that in any sales competition with other processors of manufactured dairy products, whether regulated or not, they will be paying for milk on the basis of current market prices the same as their competitors.

The butterfat differentials used in making payments to producers should be calculated at the average of the returns actually received from the sale of butterfat in producer milk. The rate to be used for this purpose would be the average of the Class I and Class II differentials weighted by the proportion of the butterfat in producer milk which is classified in each class. Thus, producer returns for butterfat will reflect the actual sales value of the butterfat in their milk at the class prices provided in the order. The producer butterfat differentials in no way affect the amount of a handler's obligations which are computed at the class prices. It is merely a means of prorating returns among producers in accordance with the variations in the butterfat test of the milk which they deliver.

Equivalent prices. A provision should also be written in the order directing the market administrator to use a price determined by the Secretary to be comparable, in the event that any of the prices used in making the various computations provided in the order is not published and available to the market administrator. This would prevent the lack of a price quotation from affecting the operation of the order. Such a provision is incorporated in most milk marketing orders.

Compensatory payments. A compensatory payment should be assessed on other source milk disposed of as Class I milk.

Some handlers in the proposed marketing area have made a practice of keeping their purchases of milk from producers at the lowest possible level even during the months of flush production and have relied on purchases of milk from other plants to fulfill their Class I requirements. These handlers have purchased distress milk, particularly during the season of flush supplies, from other markets or from other plants in the market, at prices equal to or slightly in excess of its manufacturing value, and have used such milk for Class I purposes. Such practices have had a demoralizing effect on the market and contributed greatly to the chaotic conditions which led producers to request a marketing order for the Red River Valley.

An important function of an order is to insure that handlers paying producers the Class I price for fluid milk will not be placed at a disadvantage by other handlers using the market's excess or surplus milk for Class I use. It is equally important that the Class I market be protected from the use of seasonal excess milk from other markets, as well as from its own surplus. If the order fails to provide such protection, handlers could continue to curtail purchases of milk from producers to their own advantage and secure low cost surplus supplies from other markets for Class I use.

Seasonal supplies may be obtained easily and cheaply during the months of flush production when most markets have receipts of milk considerably greater than necessary to supply their regular fluid requirements. If adjoining milksheds were to dispose of seasonal surpluses in each other's Class I markets, the result would be confused and disorderly marketing conditions. Class I prices would be demoralized, production of milk would be impaired, and the future permanent supply of milk of both markets would be in jeopardy. Such disorderly marketing conditions would be contrary to the purposes of the act. Therefore, in order to insure the effectiveness of the classified pricing program, and to promote orderly marketing, it is necessary that some method of compensating for or neutralizing the effect of the advantage created for unpriced milk should be provided as an essential provision of this order.

It is concluded therefore that the inclusion of compensation payment provisions in the order is necessary to insure against the displacement of producer milk for the purpose of cost advantage. This is essential to preserve the integrity of the classified pricing program of the order. Since minimum class prices may not be set under the order for plants which do not participate in the market-wide equalization the only alternative is to levy a charge against unpriced milk for the removal of any advantage there may be in using unregulated milk in Class I instead of producer milk.

The rate of the compensatory payment on other source milk should be the difference between the Class I and Class II prices during the months of February through July, and the difference between the Class I price and the uniform price during the remainder of the year.

Surplus fluid milk would be available to Red River Valley handlers from unregulated markets during the months of February through July. The alternative outlet for such milk is in manufactured dairy products. A fair index of the value of such milk when used in manufactured dairy products is the Class II price proposed herein. This represents the actual value of such other source milk during these months.

During the remainder of the year when milk is in much shorter supply, and there is a much greater demand for fluid milk for bottled use, handlers in the Red River Valley will not be able to purchase milk at its value for manufacturing. During these months, it is likely that the minimum price at which handlers would be able to purchase fluid milk from unregulated sources would be one equivalent to the uniform price computed under the Red River Valley order. During the months of August through January, therefore, the rate of the compensatory payment on other source milk should be equal to the difference between the uniform price and the Class I price. The purpose of this provision is to remove any price advantage the handler may have in using unregulated milk, and hence, in making the adjustment for butterfat content, both the Class I price and the uniform price should be adjusted by the Class I butterfat differential, and not by the producer differential which is otherwise used in adjusting the uniform prices.

In addition to the other source milk which may enter the market in the form of fluid milk products, there are times when other source milk will be imported from unregulated sources in concentrated form for use as Class I milk. In order to remove the price advantage a handler might have through the reconstitution of such products into fluid milk products, the rate of compensatory payment on other source milk received in concentrated form should be the same as on that received in the form of fluid milk products.

Since the handler must pay the cost of transporting other source milk from the plant of origin to the marketing area, the rate of the compensatory payment on other source milk should be reduced by the amount of the location differential which would apply at the plant of origin were it a regulated plant under the proposed order. No location differential should be deducted, however, in the case of condensed skim milk or nonfat dry milk which at times may be allocated to Class I use. In the case of these products it would be extremely difficult and at times impossible to determine the plant of origin. They may pass through several hands between the manufacturer and the ultimate user and the output of many plants in many different localities may be commingled by the broker or jobber from whom such products are acquired. The administrative difficulties which would be involved make it impractical to apply location differentials to the payment associated with condensed skim milk and nonfat dry milk. Moreover, since the cost of transporting milk solids in concentrated form is slight in terms of its milk equivalent, the difference in cost to handlers would be negligible.

In computing the applicable location differential, if a handler has received other source milk from two or more nonpool plants, the amount of skim milk and butterfat allocated to Class I milk should be considered to have been received from the plants in sequence, according to the smallest location adjustment applicable.

In addition to the other source milk which may enter the market through pool plants, other source milk may also be distributed within the marketing area directly from nonpool plants. There is no evidence of distribution within the marketing area at the present time by plants which would not meet the requirements of pool plants. There are plants, however, in the vicinity which could extend their distribution routes into the marketing area and by preserving their unregulated status could operate with a substantial price advantage over regulated handlers unless provision is made to assure that all competing plants pay the minimum class prices.

The compensatory payment applicable to other source milk disposed of from nonpool plants on routes in the marketing area should be the same as that applicable to other source milk disposed of through pool plants. This is the only method of dealing with such problems which was considered. It will remove the advantage that might accrue to a nonpool plant should it begin the distribution of other source milk in the marketing area.

No compensatory payment should apply to other source milk which is classified and priced under another Federal milk order whether such milk is disposed of in the market directly from such plant or through a pool plant. In either case its proper classification and price would have been determined by the other order.

Payments to producers—(a) *Type of pool.* The order should provide for a market-wide pool, rather than for an individual-handler pool as proposed in the recommended decision.

The market-wide pool was proposed by producers. Under the market-wide pool, all producers delivering milk to all pool plants would receive uniform prices for all milk so delivered regardless of the use made of such milk by the handler to whom it is delivered. Under the individual-handler pool the producers supplying each of the regulated handlers would be paid a blend price based upon the proportion of the receipts of producer milk classified as Class I milk and Class II milk at the plant(s) of the particular handler receiving the milk. Under either type of pool, the uniform or blend prices are subject to adjustment for location and the butterfat content of the milk. Producers may also be charged different rates for hauling their milk from the farm to the plant. These rates, however, are not established by the order.

Three cooperative associations whose members supply milk to the market, in their exceptions, requested a market-wide type of pool. One of them, as noted above, requested that the Texas portion of the area be established as a separate marketing area with a market-wide pool, at least for that portion of the area; the others urged a market-wide pool be adopted for the entire area. Under the conditions prevailing in the market it is concluded that a market-wide type of equalization pool would be most effective in establishing and maintaining orderly marketing and pricing conditions.

Only two of the pool plants in the marketing area are equipped to process any appreciable quantity of the reserve and surplus milk.

One of these plants manufactures all of the cottage cheese for several other handlers in the market. For this reason, and those already pointed out in the discussion of the necessity for an appropriate Class II price, the type of pool established should provide for an equitable sharing, particularly during the flush production season, of the lower returns that will inevitably accompany an adequate and necessary reserve of milk.

A market-wide pool will permit any handler to bid on such business as that offered by the many military installations and other public institutions located in and adjacent to the marketing area, and obtain the necessary milk to supply such sales without upsetting the market stability whenever the contracts for supplying such installations might shift from one handler to another.

There are two cooperative associations which are in a position to assume the responsibility for removing the reserve and surplus milk of their member-producers. A market-wide pool will facilitate the movement of milk by these associations between handlers to meet their individual needs or to move milk which is not needed on the market, to manufacturing plants. A market-wide pool will aid the market in retaining qualified producers during periods of seasonal surplus by permitting them to receive the market-wide uniform price regardless of the utilization of their milk. This is necessary if their milk is to be available to fill the Class I requirements of the market at other seasons of the year. These factors and the variation in the amount of reserve supplies among the several plants all support the adoption of a market-wide pool.

Base and excess plan. A base and excess plan of distributing returns for milk among producers should be employed in connection with the "market-wide" pool established herein. Receipts of milk from producers vary between spring and fall months in a much greater degree than do Class I sales. In addition, some handlers have difficulty in using, during the periods of seasonally high production, all of the milk delivered to them by producers. Consequently, there is a need for an incentive to maintain production in the late summer and fall months, relative to that of the winter and spring months.

Handlers and producers on the market are now relying on various forms of base-excess plans to provide the incentive needed to induce local dairymen to strive for a more nearly level milk production throughout the year. The presently operated plans have served a function in the market, even though their operation has been deficient from the standpoint of equality between handlers and fairness to producers. These conditions can arise because the distributors themselves establish the rules of the base-excess plan and control the adjustment and transfers of bases. Producers have no say whatever in the operations of the several base plans now in use.

Base and excess plans have proved an effective means of improving the seasonal pattern of milk deliveries, because they relate producers' returns directly to the deliveries of milk in the late summer and fall months when production conditions are more difficult and milk is less plentiful. Such a plan will help to achieve a production which is more nearly fitted to the sales pattern of fluid milk products in this area. Were some version of this plan not included in the attached order, the most likely results would be increased seasonality in production with

the attendant problems of surplus disposal in the months of flush production and the need for additional imports of supplemental milk in the short production months. The base and excess plan uniformly applied to all producers, by being incorporated in the attached order, will play an essential part in stabilizing market conditions by encouraging the trend to a more nearly even production seasonally.

The base and excess plan proposed herein would establish for each producer a base equal to his average daily deliveries during the four months of September through December. If a producer did not deliver milk to the market during the entire period, the days of actual delivery from the first day of delivery, but not less than 90, would be used.

During the months of March through June, separate uniform prices will be computed for base milk and excess milk for the purpose of allocating Class I sales to base milk. Base milk would be that quantity of milk delivered by each producer up to his average daily base multiplied by the number of days in the month during which he delivers milk to any pool plant. The excess price would be the Class II price, except in those months when total Class I sales exceed the total quantity of base milk. During such months, the excess price would be a blend of the actual Class I and Class II utilization of excess milk.

Provision is made for producers who may enter the market after the start of the base-forming period to establish a full base by delivering a minimum of 90 days during the specified period. Producers delivering milk for less than 90 days will have their bases calculated by dividing their total deliveries during the base-forming period by 90.

Provision also is made for a person who becomes a producer after the base-forming period, and who has established a base under another Federal order, to be assigned a base equal to that which he would have received if he had been a producer during the base-forming period. This provision should facilitate the movement of milk of producers between the Red River Valley marketing area and adjacent Federal order marketing areas, where their milksheds overlap.

A producer should be permitted to transfer his base only to another member of his family and then only in the case of retirement of the producer or his entrance into the military service. In the event of death of a producer, the base should be transferable to a surviving member of the family who carries on the producing functions. In the case of a partnership composed of members of the same family, the base may be transferred in whole or in part to either member of the partnership upon its dissolution. For a base to be so divided, both parties must file application with the market administrator requesting division of the base, and the application must set forth the portion of the base which is to be transferred to each of the parties.

(b) *Payments to individual producers and to members of cooperative associations.* Handlers should make payment to each producer for milk delivered by such producer at the appropriate uniform prices. Payments due any producer for milk should be paid by the handler to a cooperative association that makes a written request for such payment, if the producer has given the cooperative association written authorization in the form of a contract or in any other form to collect such payments. The association's request should also agree to indemnify the handler for any loss incurred because of improper claim. In making such payments for producers' milk to a cooperative association, the handler should, at the same time, furnish the cooperative association with a statement showing the name of each producer for whom payment is being made to the cooperative association, the volume and butterfat content of the milk delivered by each such producer, and the amount of, and the reason for, any deduction which the handler withheld in the amount payable to each producer. This statement is necessary for the cooperative association in making proper distribution of the money it collects to the producer members for whom collection is made.

Qualified cooperative associations of dairymen should be permitted to receive a payment from handlers for their producer members as a group. In order to enable the association to carry out its essential functions as authorized in the Agricultural Marketing Agreement Act, a cooperative association, if it is to carry out these functions, must have full authority in the collective bargaining and sale of members' milk.

The proponent cooperative associations, in other markets, have assumed the responsibility for moving producers' milk during months of flush production. They are expected to assume the same responsibility with respect to the Red River Valley marketing area. Sales of surplus milk outside the marketing area may result in financial losses or gains to the cooperative associations. They must be in a position to spread such losses or gains over the entire membership, if they are to handle such milk effectively and efficiently. The Agricultural Marketing Agreement Act authorizes a qualified cooperative association to collect payment on behalf of all its members for milk caused to be moved by it to all types of outlets, and to reblend the proceeds from all sales over its entire membership. The order should provide that payment to such a cooperative association is proper satisfaction of the payments required by the order to be made to individual producer-members.

Producer settlement fund. Since the amount which the order requires a particular handler to pay for his milk may be more or less than the amount he is required to pay to producers or cooperatives associations, it is necessary to provide for some method of balancing these amounts. The producer-settlement fund is established for this purpose. All handlers who are required to pay more for their milk on the basis of their utilization, than they are required to pay to producers or cooperative associations, must pay the difference into the producer-settlement fund, and those handlers who are required to pay to producers or cooperative associations more than the utilization value of their milk must be reimbursed for the difference from the producer-settlement fund. The amounts paid into and out of the producer-settlement fund, except for minor differences that may result from the rounding-off of uniform prices will be equal. In order to permit this rounding-off of prices and to allow for unavoidable delays in receiving payments from handlers, and to permit payments to be made to any handler, which audit reveals is due to such handler a reserve should be held in the producer-settlement fund at all times. The amount of the reserve contemplated in the proposed order should be sufficient for these purposes. This reserve should be adjusted each month by the market administrator adding in the computation of the uniform price, not less than one-half of the balance in the producer-settlement fund at that time.

If at any time the balance in the producer-settlement fund is insufficient to cover payments due handlers from such fund, the payments to such handlers should be reduced at a uniform rate per hundredweight of milk. The handlers may then reduce payments to producers and cooperative associations by an equivalent amount per hundredweight. The amount remaining due such handlers from the producer-settlement fund, should be paid as soon as the balance in the fund is sufficient and handlers should then complete payments to producers and cooperative associations. In order to reduce the possibility of this occurring, milk received by any handler who has not made the payments required of him in the preceding month should not be considered in the computation of the uniform price.

(c) *Other administrative provisions.* Certain other provisions are needed in the order to carry out the administrative steps necessary to accomplish the purpose of the proposed regulation.

Terms and definitions. In addition to the definitions discussed earlier in this decision which define the scope of the regulation, certain other terms and definitions are desirable in the interest of brevity and to assure that each usage of the term implies the same meaning. Definitions for "base" and "excess" milk are included. The other terms defined in the proposed order are common to most other Federal milk marketing orders.

Market administrator. Provision should be made for the appointment by the Secretary of a market administrator to administer the terms and provisions of the order, and the powers and duties essential to the proper functioning of his office should be specified.

Records and reports. Provisions should be included in the order to advise handlers that they are required to maintain adequate records of their operations and to make the reports necessary to establish the proper classification and pricing of producers' milk and the payments due producers for such milk. Time limits must be prescribed for filing such reports and for making payments to producers. Dates must be established for the announcement of prices by the market administrator.

It should be provided that the market administrator report to a cooperative association, which so requests the amount and class utilization of milk received by each handler from producers who are members of such cooperative association. For purposes of this report the utilization of members' milk in each handler's plant will be prorated to each class in the same proportion that total receipts of producer milk were used by such handler.

In addition to the regular reports of handlers, provision is made for the handler, prior to the diversion of milk, to notify the market administrator and the cooperative association, if the producer is a member, of his intention to divert such milk, setting forth the dates of the proposed diversion and the plant to which it is to be diverted. This report is necessary if the weight of the milk delivered to a nonpool plant is to be verified and a sample taken for determining its butterfat content.

Handlers should maintain and make available to the market administrator all records and accounts of their operation and such facilities as are necessary to determine the accuracy of the information reported to the market administrator and any other information upon which the classification of producer milk depends. The market administrator must likewise be permitted to check the accuracy of the weights and tests of milk and milk products received and handled, and to verify all payments required to be made under the order.

It is necessary that handlers retain records to prove the utilization of the milk received from producers and that proper payment was made therefor. Since the books of all handlers associated with the market cannot be audited immediately after the milk has been delivered to a plant, it is necessary that such records be retained for a reasonable period of time.

The order should provide for specific limitations on the time that handlers are required to retain books and records and on the period of time within which obligations under the order should terminate. The provision made in this regard is identical in principle with the general amendment made to all milk orders in operation, July 30, 1947, following the Secretary's decision of January 26, 1949 (14 F. R. 444). That decision covering the retention of records and limitations of claims is equally applicable in this situation and is adopted as part of this decision. Without a provision for termination of obligation after a reasonable period of time has elapsed, handlers may file claims which, because the period involved might extend back over many years, could be in substantial amounts. This creates uncertainties which could endanger the stability of the market and lead to serious inequities. The order should provide that any obligation to pay a handler shall terminate two years after the month in which the milk was received if an overpayment is claimed, or within two years after payment was made if a refund is claimed, unless within the time specified the handler filed a petition, pursuant to section 8c (15) (A) of the act claiming such money. Handlers also need the protection of provisions terminating their obligations to make payments.

Since handlers cannot be forewarned always as to their contingent liabilities, it is extremely difficult and burdensome to make adequate provision by setting up reserves, or by taking other precautionary measures. The obligation of any handler to pay money should, except under certain extraordinary circumstances such as litigation, terminate two years after the last day of the month during which the market administrator receives the handler's report of utilization of the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. It is concluded that a period of two years is a reasonable time within which the market administrator should complete his auditing and inspection work and render his billing for money due under the order. Provisions are necessary as contained in the order included herewith to meet such contingencies, as failure of the handler to submit required books and records and to deal with situations where fraud or willful concealment of information may be involved.

It was proposed that if a handler fails to make the required reports or payments, his name should be publicly announced at the discretion of the market administrator. Such announcement is provided for by the act and it is concluded that its adoption will facilitate the enforcement of the details of the order.

Expense of administration. Each handler who operates a pool plant should be required to pay to the market administrator as his pro rata share of the cost of administering the order, not more than 5 cents per hundredweight or such lesser amount as the Secretary may from time to time see fit with respect to:

(a) Producer milk (including a handler's own production); and

(b) Other source milk which is allocated to Class I milk.

Each handler who operates a nonpool plant, not subject to the classification and pricing provisions of another Federal order, should be required, as his pro rata share of the cost of administering the order, to make such payment with respect to the volume of milk which is disposed of within the marketing area as Class I milk from such plant.

The market administrator must have sufficient funds to enable him to administer properly the terms of the order. The act provides that the cost of administration shall be financed through an assessment on handlers.

One of the duties of the market administrator is to verify the receipts and disposition of milk from all sources. Other source milk is received by handlers to supplement local producer supplies of milk. Equity in sharing the cost of administration of the order among handlers will be achieved, therefore, by applying the administrative assessment to all producer milk (including a handler's own production) and all other source milk allocated to Class I. Since the market administrator must also verify reports submitted by handlers who operate nonpool plants, it is necessary that a charge for administrative assessment be levied against the milk disposed of by such handlers in the marketing area.

In view of the anticipated volume of milk, and the cost of administering orders in markets of comparable size and circumstances, it is concluded that an initial rate of 5 cents per hundredweight is necessary to meet the expenses of administration. Provision should be made to enable the Secretary to reduce the rate of assessment below the 5 cents per hundredweight maximum without necessitating an amendment to the order. This should be done at any time that experience in the market reveals that a lesser rate will provide sufficient revenue to administer the order properly.

Marketing services. A provision should be included in the order for furnishing marketing services to producers, such as the verification of the tests and weights of producer milk and the furnishing of market information to producers. These services should be provided by the market administrator and the cost should be borne by the producer receiving the service. If a cooperative association is performing such services for member-producers, the market administrator may accept this in lieu of his own service. There is need for a marketing service program in connection with the administration of an order in this area. Orderly marketing will be promoted by assuring individual producers that the payments received for their milk will be in accordance with the classified pricing and pooling provisions of the order and reflect accurately the weights and tests of such milk. To accomplish this fully it is necessary that the butterfat tests and weights of individual producer's deliveries of milk, as reported by the handler, be verified for accuracy. In the case of producers who are members of a cooperative association, which the Secretary has determined is under the complete control of such producers and is actually marketing the milk of its member-producers such services may be rendered by the cooperative association rather than by the market administrator. The two cooperative associations in the area have been performing check-weighing and check-testing services for their members who are producers under other milk marketing orders. At the time of the hearing they had not been successful in securing permission from handlers to perform such services for their member-producers in the Red River Valley marketing area. It is assumed, however, that such services will be performed for their members if an order is issued and made effective. In order that such services be performed on a market-wide basis, the market administrator should provide them for producers not otherwise receiving such services through a cooperative association.

An important phase of the marketing service program order is to furnish pro-

ducers with correct market information. Efficiency in the production, utilization and marketing of milk will be promoted by the dissemination of current information on a market-wide basis to all producers.

To enable the market administrator to furnish these services, provisions should be made for a maximum deduction of 5 cents per hundredweight with respect to receipts of milk from producers for whom he renders marketing services. If later experience indicates that marketing services can be performed at a lesser rate provision is made for the Secretary to adjust the rate downward without the necessity of a hearing. In the event a qualified cooperative association has been determined to be performing such services for its members, handlers would be required to pay to the cooperative association such dues as are authorized by its members.

Rulings on exceptions. In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

General findings. (a) The proposed marketing agreement and order and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area and the minimum prices specified in the proposed marketing agreement and the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed marketing agreement and order will regulate the handling of milk in the same manner as, and will be applicable to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Recommended marketing agreement and order. The following order regulating the handling of milk in the Red River Valley marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the proposed order.

§ 986.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended, and as reenacted and amended by the Agricultural Marketing Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 986.2 *Secretary.* "Secretary" means the Secretary of Agriculture or any officer or employee of the United States who is authorized to exercise the powers or to perform the duties of the Secretary of Agriculture.

§ 986.3 *Department of Agriculture.* "Department of Agriculture" means the United States Department of Agriculture, or such other Federal agency as may be authorized to perform the price reporting functions specified in this part.

§ 986.4 *Red River Valley marketing area.* "Red River Valley marketing area", hereinafter called "marketing area" means all territory within the following counties, including all municipal corporations; Federal reservations, facilities, and installations; and state institutions located therein: Caddo, Carter, Comanche, Grady, Jackson, Kiowa, Stephens, and Tillman in Oklahoma, and Hardeman, Wichita, and Wilbarger in Texas.

§ 986.5 *Person.* "Person" means any individual, partnership, corporation, association or other business unit.

§ 986.6 *Producer.* "Producer" means any person, other than a producer-handler, who produces milk in compliance with the requirements specified in paragraph (a) or in paragraph (b) of this section, which milk is received directly from the farm at a pool plant or is caused to be diverted by a handler within the limits prescribed in § 986.63:

(a) Produces milk on a dairy farm subject to regular inspection by a duly constituted state or municipal health authority, under a dairy farm rating or permit issued by such authority for the production of milk to be disposed of for fluid consumption;

(b) Produces milk which is acceptable to an agency of the Federal Government for fluid consumption in its reservation, facility, or installation.

The term producer shall not include any person with respect to milk received by a handler who is partially exempt from the provisions of this part pursuant to § 986.61; nor shall it include a person whose milk is diverted to a pool plant by a cooperative association if such person retains his status as a producer as defined in another order issued pursuant to the act and his milk is classified and priced under such other order.

§ 986.7 *Distributing plant.* "Distributing plant" means all the buildings, premises, and facilities of a plant: (a) which is subject to regular inspection by a duly constituted state or municipal health authority, or by an agency of the Federal Government located in the marketing area, (b) in which milk or skim milk is processed or packaged and (c) from which Class I milk is disposed of during the month on routes (including routes operated by venders or through plant stores) to wholesale or retail outlets located in the marketing area (except deliveries in bulk to other pool plants) in an amount greater than an average of 600 pounds per day.

§ 986.8 *Supply plant.* "Supply plant" means all the buildings, premises, and facilities of a plant from which fluid milk products equal to not less than 50 percent of its receipts of milk from dairy farmers, who would be producers if this plant qualified as a pool plant, are shipped to a distributing plant during such month: *Provided*, That any plant which qualifies as a supply plant for each of the months of September through December shall, upon written application to the market administrator before January 31 of the following year, be designated as a supply plant for the months of January through August.

§ 986.9 *Pool plant.* "Pool plant" means a distributing plant (other than that of a producer-handler or one which is exempt pursuant to § 986.61) or a supply plant.

§ 986.10 *Nonpool plant.* "Nonpool plant" means any milk processing or manufacturing plant other than a pool plant.

§ 986.11 *Handler.* "Handler" means:

(a) Any person in his capacity as the operator of one or more pool plants;

(b) Any person in his capacity as the operator of a nonpool plant from which Class I milk is disposed of in the marketing area; or

(c) A cooperative association with respect to the milk of producers diverted for the account of such association from a pool plant to a nonpool plant within the limits prescribed in § 986.63.

§ 986.12 *Cooperative association.* "Cooperative association" means any cooperative association of producers which the Secretary determines:

(a) Is qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act"; and

(b) Has and is exercising full authority in the sale of milk of its members.

§ 986.13 *Producer-handler.* "Producer-handler" means any person who produces milk and who operates a plant from which there is distributed as Class I milk on routes in the marketing area only milk of such person's own production or milk which has been received from a pool plant.

§ 986.14 *Producer milk.* "Producer milk" means all skim milk or butterfat contained in milk of a producer which is received at a pool plant or which is diverted within the limits prescribed in § 968.63.

§ 986.15 *Fluid milk product.* "Fluid milk product" means milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream or any mixture in fluid form of cream and milk or skim milk (except cultured sour cream, frozen storage cream, aerated cream products, ice cream and frozen dessert mix, evaporated or condensed milk, and sterilized products in hermetically sealed containers).

§ 986.16 *Other source milk.* "Other source milk" means all skim milk and butterfat, other than that contained in producer milk or in receipts of fluid milk products from other pool plants, including products designated as Class II milk pursuant to § 986.41 (b) from any source (including those from a plant's own production), which are reprocessed or converted to another product in the plant during the month and any disappearance of nonfluid milk products not otherwise accounted for.

§ 986.17 *Base milk.* "Base milk" means milk received at a pool plant(s) from a producer during any of the months of March through June which is not in excess of such producer's daily average base computed pursuant to § 986.65 multiplied by the number of days in such month.

§ 986.18 *Excess milk.* "Excess milk" means milk received at a pool plant(s) from a producer during any of the months of March through June which is in excess of the base milk of such producer for such months, and shall include all milk received during such months from a producer for whom no daily average base can be computed pursuant to § 986.65.

MARKET ADMINISTRATOR

§ 986.25 *Designation.* The agency for the administration of this part shall be a market administrator, who shall be a person selected by the Secretary, who shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of the Secretary.

§ 986.26 *Powers.* The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To make rules and regulations to effectuate its terms and provisions;

(c) To receive, investigate, and report to the Secretary complaints of violations; and

(d) To recommend amendments to the Secretary.

§ 986.27 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including, but not limited to, the following:

(a) Within 30 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon his duties, and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of the funds received pursuant to § 986.86: (1) The cost of his bond and the bonds of his employees, (2) his own compensation, and (3) all other expenses (except those incurred under § 986.85) necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this section and, upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Publicly disclose, at his discretion, unless otherwise directed by the Secretary, the name of any handler who, after the date upon which he is required to perform such acts, has not made reports pursuant to §§ 986.30 and 986.31 or payments pursuant to §§ 986.80 to 986.86;

(g) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(h) On or before the 12th day after the end of each month, report to each cooperative association which so requests, the percentage of producer milk delivered by members of such association which was used in each class by each handler receiving such milk and the percentage relationship of such receipts to the total pounds of Class I milk available to assign to such receipts exclusive of the Class I milk disposed of by such handler to the pool plant(s) of other handlers and to nonpool plants. For the purpose of these reports the milk so received from members of such association shall be prorated to each class in accordance with the same percentage as the total receipts of producer milk bear to such utilization of milk by such handler;

(i) Verify all reports and payments of each handler by audit of the records of such handler or any other handler or person to whom skim milk and butterfat are transferred, or by such other means as are necessary;

(j) Prepare and make available for the benefit of producers, consumers and handlers, general statistics and information concerning the operation of this part which do not reveal confidential information; and

(k) On or before the date specified publicly announce, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the prices determined for each month as follows:

(1) On or before the 12th day of each month, the Class I price and the Class I butterfat differential, both for the current month;

(2) On or before the 5th day of each month, the Class II price, and the Class II butterfat differential, both for the preceding month; and

(3) On or before the 12th day of each month, the uniform price(s) computed pursuant to § 986.71 or § 986.72, whichever is applicable, and the butterfat differential computed pursuant to § 986.73, both for the preceding month.

REPORTS, RECORDS, AND FACILITIES

§ 986.30 *Reports of receipts and utilization.* On or before the 7th day after the end of each month, each handler, except a producer-handler, shall report to the market administrator in the detail and on forms prescribed by the market administrator as follows:

(a) The quantities of skim milk and butterfat contained in milk received from producers and, for the months of March through June, the aggregate quantities of base milk and excess milk;

(b) The quantities of skim milk and butterfat contained in (or used in the production of) receipts of fluid milk products from other handlers;

(c) The quantities of skim milk and butterfat contained in (or used in the production of) other source milk (except Class II products disposed of in the same form in which received without further processing or packaging by the handler) and any disappearance of other source milk held in inventory;

(d) The utilization of all skim milk and butterfat required to be reported pursuant to this section;

(e) The disposition of Class I products on routes wholly outside the marketing area;

(f) The quantities of fluid milk products on hand at the beginning and end of the month; and

(g) Such other information with respect to receipts and utilization as the market administrator may prescribe.

§ 986.31 *Reports of payments to producers.* On or before the 20th day of each month, each handler shall submit to the market administrator his producer payroll for deliveries of the preceding month showing:

(a) The total pounds of milk received from each producer and cooperative association, the total pounds of butterfat contained in such milk and the number of days' production represented by the milk received from such producer(s), including for the months of March through June each producer's deliveries of base and excess milk;

(b) The amount of payment to each producer or cooperative association; and

(c) The nature and amount of any deductions or charges involved in such payments.

§ 986.32 *Other reports.* (a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe.

(b) Each handler who causes milk to be diverted to another pool plant or to a nonpool plant shall, prior to such diversion, report to the market administrator and to the cooperative association of which such producer is a member, his intention to divert such milk, the proposed date or dates of such diversion, and the plant to which it is to be diverted.

§ 986.33 *Records and facilities.* Each handler shall maintain and make available to the market administrator or his representative during the usual hours of business such accounts and records of his operations and such facilities as are necessary for the market administrator to verify or establish the correct data with respect to:

(a) The receipts and utilization of all skim milk and butterfat handled in any form;

(b) The weights and tests for butterfat and other content of all milk, skim milk, cream, and milk products handled;

(c) Payments to producers and cooperative associations; and

(d) The pounds of skim milk and butterfat contained in or represented by all milk, skim milk, cream, and milk prod-

ucts on hand at the beginning and end of each month.

§ 986.34 *Retention of records.* All books and records required under this part to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided,* That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the Act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case, the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 986.40 *Skim milk and butterfat to be classified.* All skim milk and butterfat received by a handler during the month, which is required to be reported pursuant to § 986.30, shall be classified by the market administrator pursuant to the provisions of §§ 986.41 to 986.46, inclusive.

§ 986.41 *Classes of utilization.* Subject to the conditions set forth in §§ 986.43 and 986.44, the classes of utilization shall be as follows:

(a) Class I milk shall be all skim milk (including reconstituted skim milk and concentrated nonfat milk solids) and butterfat (1) disposed of from the plant in the form of fluid milk products, except those classified pursuant to paragraph (b) (4) of this section, and (2) not specifically accounted for as Class II milk;

(b) Class II milk shall be all skim milk and butterfat:

(1) Used to produce any product other than a fluid milk product;

(2) Disposed of to commercial food manufacturing establishments which do not dispose of fluid milk products for fluid consumption;

(3) Contained in inventories of fluid milk products on hand at the end of the month;

(4) Skim milk disposed of for livestock feed, or dumped after prior notification to and opportunity for verification by the market administrator;

(5) In shrinkage not to exceed 2 percent of the skim milk and butterfat contained in producer milk, except that diverted pursuant to § 986.63; and

(6) In shrinkage of other source milk.

§ 986.42 *Shrinkage.* The market administrator shall determine the assignment of shrinkage to Class II milk as follows:

(a) Determine the total shrinkage of skim milk and butterfat in each pool plant; and

(b) Assign the shrinkage of skim milk and butterfat pro rata between producer milk and other source milk received in the form of a fluid milk product.

§ 986.43 *Responsibility of handlers and reclassification of milk.* (a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk and butterfat can prove to the market administrator that such skim milk or butterfat should be classified otherwise.

(b) Any skim milk or butterfat classified as Class II milk, if later disposed of by such handler or another handler (whether in original or other form) as any fluid milk product, shall be reclassified as Class I milk. Any skim milk or butterfat classified as Class II milk in the previous month pursuant to § 986.41 (b) (3) shall be reclassified as Class I milk if it is substracted from Class I during the current month pursuant to § 986.46 (a) (6) or the corresponding step of § 986.46 (b).

§ 986.44 *Transfers.* Skim milk and butterfat if disposed of by a handler by transfer or diversion from a pool plant shall be classified as follows:

(a) If transferred or diverted to a pool plant of another handler (except a producer-handler) in the form of fluid milk products it shall be classified so as to result in the maximum assignment of the producer milk of both handlers to Class I milk. Any additional amounts of skim milk and butterfat shall be classified as Class I milk unless the operators of both plants claim utilization thereof in Class II milk in their reports submitted pursuant to § 986.30: *Provided,* That the skim milk or butterfat so assigned to Class II milk for any month shall be limited to the respective amounts thereof remaining in Class II milk for such month at the pool plant(s) of the receiving handler after subtraction of other source milk pursuant to § 986.46;

(b) As Class I milk, if transferred to the plant of a producer-handler in the form of fluid milk products;

(c) As Class I milk, if diverted or transferred in bulk in the form of milk or skim milk to a nonpool plant located more than 350 miles from the City Hall in Wichita Falls, Texas, by the shortest hard-surfaced highway distance as determined by the market administrator;

(d) As Class I milk, if transferred in the form of cream to a nonpool plant, located more than 350 miles from the City Hall in Wichita Falls, Texas, by the shortest hard-surfaced highway distance as determined by the market administrator, unless the handler claims classification as Class II milk, establishes the fact that such cream was transferred without Grade A certification, each container was tagged or labeled to show that the contents were only for manufacturing use, the shipment was invoiced accordingly, and the market administrator was given sufficient notice to allow him to verify the shipment;

(e) (1) As Class I milk, if transferred or diverted in bulk form as milk, skim milk, or cream to a nonpool plant located not more than 350 miles by the shortest hard-surfaced highway distance from the City Hall in Wichita Falls, Texas, from which fluid milk is disposed of on wholesale or retail routes or to other milk plants, unless the handler claims classification of Class II milk pursuant to § 986.30 and all of the following conditions are met:

(i) The operator of the nonpool plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant and the market administrator is permitted to audit such books and records for purposes of verification; and

(ii) Such nonpool plant received milk from dairy farmers who constitute a regular source of supply for Class I use as determined by the market administrator;

(2) If the above conditions are fulfilled, the market administrator shall classify such milk, subject to verification, in the following manner: (i) Determine the use of all skim milk and butterfat at such nonpool plant, and (ii) allocate the skim milk and butterfat so transferred to the highest use classification remaining after allowing first priority to that received at the nonpool plant directly from dairy farmers whom the market administrator determines constitute its regular source of Grade A milk for Class I use;

(f) As Class II milk, if transferred or diverted in bulk form as milk, skim milk, or cream to a nonpool plant which is not a pool plant as defined in any other order issued pursuant to the Act and which is located not over 350 miles from the City Hall, Wichita Falls, Texas, and from which no fluid milk is disposed of on wholesale or retail routes, except:

(1) If milk, skim milk, or cream is transferred from such nonpool plant to a pool plant, an amount equal to the skim milk and butterfat transferred to such nonpool plant from the pool plants of other handlers shall be deemed to have been transferred directly to the second pool plant and shall be classified in accordance with paragraph (a) of this section; and

(2) If milk, skim milk, or cream is transferred from such nonpool plant to a second nonpool plant from which fluid milk is distributed on wholesale or retail routes, the skim milk or butterfat transferred from the pool plant to the first nonpool plant shall be Class I milk in an amount equal to that transferred to such second nonpool plant, unless it is established that such milk or skim milk was transferred to the second nonpool plant without Grade A certification with each container labeled to show that the contents were for manufacturing use only, and that the shipment was invoiced accordingly.

(g) As Class II milk if transferred or diverted in bulk form as milk, skim milk or cream to a nonpool plant which is a pool plant as defined in another order issued pursuant to the Act and which is located not over 350 miles from the City Hall in Wichita Falls, Texas, and from which no fluid milk is distributed on wholesale or retail routes, except that if such transferee plant disposes of to other nonpool plants, which do distribute fluid milk products on wholesale or retail routes, more milk than the milk received at such transferee plant which is classified and priced under such other order, an amount equal to the difference shall be classified as Class I milk, except that if such transferee plant has received milk, skim milk or cream from other plants regulated under this or other Federal orders, the amount of such transferred milk allocated to Class I shall be determined by prorating the amount of milk available for Class I allocation in accordance with the receipts from all such plants at the transferee plant.

§ 986.45 *Computation of the skim milk and butterfat in each class.* For each month, the market administrator shall correct for mathematical or other obvious errors the monthly report submitted by each handler pursuant to § 986.30, and shall compute the pounds of skim milk and butterfat in Class I milk and Class II milk. Skim milk contained in any product utilized, produced or disposed of by the handler during the month shall be considered to be an amount equivalent to the nonfat milk solids contained in such product, plus all of the water originally associated with such solids.

§ 986.46 *Allocation of skim milk and butterfat classified.* After making the computations pursuant to § 986.45, the market administrator shall determine the classification of milk received from producers for each handler in the following manner:

(a) Skim milk shall be allocated as follows:

(1) Subtract from the total pounds of skim milk in Class II milk, the pounds of shrinkage of skim milk in producer milk determined pursuant to § 986.41 (b) (5);

(2) Subtract from the remaining pounds of skim milk, in series beginning with Class II milk, the pounds of skim milk in other source milk received in the form of nonfluid milk products other than condensed skim milk or nonfat dry milk;

(3) Subtract from the remaining pounds of skim milk in series beginning with Class II milk, the pounds of skim milk in other source milk received in the form of condensed skim milk or nonfat dry milk;

(4) Subtract from the remaining pounds of skim milk, in series beginning with Class II milk, the pounds of skim milk in other source milk received in the form of fluid milk products which were not subject to the Class I pricing and payment provisions of another order issued pursuant to the act;

(5) Subtract from the remaining pounds of skim milk, in series beginning with Class II milk, the pounds of skim milk in other source milk received in fluid milk products which were subject to the Class I pricing and payment provisions of another order issued pursuant to the act;

(6) Subtract from the remaining pounds of skim milk, in series beginning with Class II milk, the pounds of skim milk in inventory at the beginning of the month in the form of fluid milk products;

(7) Subtract from the remaining pounds of skim milk in each class the skim milk received from other handlers in the form of fluid milk products pursuant to § 986.44;

(8) Add to the pounds of skim milk remaining in Class II the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph; and

(9) If the pounds of skim milk remaining in both classes exceed the pounds of skim milk received from producers, subtract such excess from the pounds of skim milk remaining in the classes in series beginning with Class II milk. Any amount so subtracted shall be called "overage";

(b) Butterfat shall be allocated in the same manner prescribed in paragraph (a) of this section for determining the allocation of skim milk to producer milk; and

(c) Add the pounds of skim milk and the pounds of butterfat in each class computed pursuant to paragraphs (a) and (b) of this section and determine the percentage of butterfat in producer milk allocated to each class.

MINIMUM PRICES

§ 986.50 *Class prices.* Subject to the provisions of §§ 986.51 and 986.52 the minimum price per hundredweight to be paid by each handler for milk received at his plant from producers during the month shall be as follows:

(a) *Class I milk.* The Class I price shall be the price for Class I milk established under Federal Order No. 6 regulating the handling of milk in the Oklahoma Metropolitan marketing area at Oklahoma City, plus 15 cents.

(b) *Class II milk.* (1) For the months of February through July the Class II price per hundredweight shall be the average of the basic or field prices reported to have been paid or to be paid for ungraded milk of 4.0 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture.

Present Operator and Location

American Foods Company, Miami, Okla.
Gilt Edge Dairy, Norman, Okla.
Muskogee Dairy Products Company, Muskogee, Okla.
Page Milk Company, Coffeyville, Kans.
Pet Milk Company, Siloam Springs, Ark.
Real Test Foods Company, Tulsa, Okla.

(2) For the months of August through January, the Class II price per hundredweight shall be computed by adding the plus values pursuant to subdivisions (i) and (ii) of this subparagraph as follows:

(i) From the simple average as computed by the market administrator of the daily wholesale selling prices (using the mid-point of any price range as one price) per pound of Grade A (92-score) bulk creamery butter at Chicago, as reported by the Department of Agriculture during the month, subtract 3 cents, add 20 percent thereof and multiply by 4.0; and

(ii) From the simple average as computed by the market administrator of the weighted averages of carlot prices per pound for nonfat dry milk, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area as published by the Department of Agriculture for the period from the 26th day of the preceding month through the 25th day of the current month, deduct 5.5 cents, multiply by 8.5 and then multiply by 0.96.

§ 986.51 *Butterfat differentials to handlers.* If the average butterfat content of the producer milk of any handler allocated to any class pursuant to § 986.46 is more or less than 4.0 percent there shall be added to the respective class price, computed pursuant to § 986.50 for each one-tenth of one percent that the average butterfat content of such milk is above 4.0 percent, or subtracted for each one-tenth of one percent that such average butterfat content is below 4.0 percent, an amount equal to the butterfat differential computed by multiplying the simple average, as computed by the market administrator, of the daily wholesale selling price per pound (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter at Chicago as reported by the Department of Agriculture during the month specified below by the applicable factor listed and dividing the result by 10:

(a) *Class I milk.* Multiply such price for the preceding month by 1.25; and

(b) *Class II milk.* Multiply such price for the current month by 1.15.

§ 986.52 *Location adjustment credit to handlers.* For that milk which (a) is received from producers at a pool plant located outside the State of Texas and which is classified as Class I, the prices specified in § 986.50 shall be reduced 5 cents per hundredweight, plus an additional 1.5 cents per hundredweight for each 10 miles or fraction thereof that such plant is more than 100 miles distant from the City Hall in Wichita Falls, Texas, by the shortest hard-surfaced highway distance as determined by the market administrator: *Provided,* That in calculating such adjustment, transfers to a pool plant at which a location adjustment credit is not applicable or at which it is less than at the transferor plant, shall be assigned to Class I milk only to the extent that Class I disposition at the transferee plant exceeds 95 percent of the receipts from producers at such plant. Such assignment to transferor plants should be made first to plants at which no location adjustment credit is applicable and then in sequence to plants at which the lowest rate of such adjustment credit would apply.

§ 986.53 *Rate of compensatory payments.* The rate of compensatory payment per hundredweight applicable to other source milk assigned to Class I use at pool plants, or disposed of as Class I milk on routes in the marketing area from nonpool plants, shall be calculated as follows:

(a) For the months of February through July, subtract the Class II milk price, adjusted by the Class II butterfat differential from the Class I price, adjusted by the Class I butterfat differential, and, except in the case of condensed skim milk and nonfat dry milk, by the location adjustment pursuant to § 986.52 which would apply if the nonpool plant were a pool plant; and

(b) For the months of August through January, subtract the uniform price, adjusted by the Class I butterfat differential, from the Class I price, adjusted by the Class I butterfat differential, and, except in the case of condensed skim milk and nonfat dry milk, by the location adjustment pursuant to § 986.52 which would apply if the nonpool plant were a pool plant.

§ 986.54 *Use of equivalent prices.* If for any reason a price quotation required by this part for computing class prices or for any other purpose is not available in the manner described, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is required.

APPLICATION OF PROVISIONS

§ 986.60 *Producer-handlers.* Sections 986.40 to 986.46, 986.50 to 986.54, 986.65 to 986.67, 986.70 to 986.74, and 986.80 to 986.86, shall not apply to a producer-handler.

§ 986.61 *Handlers subject to other orders.* In the case of any handler who the Secretary determines disposes of a greater portion of his milk as Class I milk in another marketing area regulated by another milk marketing order issued pursuant to the Act and whose milk is classified and priced under such other order, the provisions of this part shall not apply except that such handler shall, with respect to his total receipts and utilization or disposition of skim milk and butterfat, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

§ 986.62 *Handlers operating nonpool plants.* Each handler who is the operator of a nonpool plant which is not subject to the classification and pricing provisions of another order issued pursuant to the act, shall report as required pursuant to §§ 986.30 and 986.31, reporting receipts from and payments to dairy farmers in lieu of such information with respect to producers, and shall allow verification of such reports, and, on or before the 12th day of each month, he shall pay to the market administrator an amount computed by multiplying the total volume of Class I milk disposed of on routes in the marketing area from such nonpool plant during the preceding month by the rate of compensatory payment computed pursuant to § 986.53.

§ 986.63 *Diverted milk.* (a) Milk of a producer diverted by a handler, other than a cooperative association, from a pool plant to the pool plant of another handler for any day during the months of February through July and for not more than 10 days' production of a producer during any month for the period of August through January, shall be deemed to have been received by the diverting handler at the pool plant from which such milk was diverted, except that for the purpose of determining shrinkage pursuant to § 986.41 (b) (5), such milk shall be considered as producer milk at the pool plant to which it was diverted. Milk so diverted for more than 10 days during any of the months of August through January, shall be considered as received at the plant to which it was diverted for the entire period of diversion.

(b) Milk diverted by a cooperative association, which does not operate a pool plant, for the account of such association from the pool plant of another handler to a nonpool plant, shall be deemed to have been received by such association at a pool plant at the same location as that from which the milk was diverted.

(c) Milk diverted from a pool plant by the handler operating such pool plant to a nonpool plant shall be considered to have been received at the plant from which diverted.

(d) Milk diverted by a handler, including a cooperative association, to a nonpool plant for more than 10 days' production of a producer during any month during the months of September through December, shall not be considered producer milk for the entire period of such diversion during the month.

DETERMINATION OF BASE

§ 986.65 *Computation of daily average base for each producer.* Subject to the rules set forth in § 986.66, the daily average base of each producer for the months of March through June of each year shall be computed by the market administrator by dividing the total pounds of milk received by a handler(s) at a pool plant(s) from such producer during the months of September through December immediately preceding by the number of days' production delivered by such producer during the period, or by 90, whichever is more: *Provided,* (a) That any person who becomes a producer after the base-forming period and who has established a base under another order issued pursuant to the act shall be assigned a base equal to that which he would have received if he had been a producer during the base-forming period if his milk is received at a pool plant during an entire month, and (b) That for any person who becomes a producer after the 3d day of October of any year by virtue of the plant to which such person delivers his milk having become a pool plant, the market administrator shall compute a base equal to that which such producer would have established had the plant to which he ships his milk been a pool plant during the entire base-forming period.

§ 986.66 *Base rules.* (a) A base shall apply to deliveries of milk by the producer for whose account that milk was delivered during the base-forming period;

(b) Base may be transferred during the months of March through June only in the following manner:

(1) In the event of death, retirement or entry into military service of a producer, the entire base may be transferred to a member(s) of such producer's immediate family who carries on the dairy enterprise, such transfer to be effective the first of the month following notification of the market administrator in writing of the person to whom such base is to be transferred;

(2) If a base is held jointly and such joint holding is terminated, the entire base may be transferred to either of the joint holders, or it may be divided, but only if the joint holders are members of the same family, and only upon application to the market administrator prior to the month in which the division is to become effective: *Provided,* That such application sets forth the percentage of the jointly held base which is to be assigned to each of the joint holders or his heirs and is signed by each joint holder or his heirs.

(c) A producer who ceases to deliver milk to a pool plant for more than 45 consecutive days during the six months prior to March 1, shall forfeit his base for the following base-utilization period.

§ 986.67 *Announcement of established bases.* On or before February 25 of each year, the market administrator shall notify each producer and the handler receiving milk from such producer, of the daily average base established by the producer.

DETERMINATION OF UNIFORM PRICES

§ 986.70 *Computation of value of producer milk for each handler.* For each month, the market administrator shall compute the value of producer milk for each handler as follows:

(a) Multiply the quantity of producer milk in each class computed pursuant to § 986.46 by the applicable class price (adjusted pursuant to §§ 986.51 and 986.52) and add together the resulting amounts;

(b) Add an amount computed by multiplying the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 986.46 (a) (2) (3) and (4) and the corresponding step of § 986.46 (b) by the rate of compensatory payment as determined pursuant to § 986.53;

(c) Add an amount computed by multiplying the pounds of any overage deducted from either class pursuant to § 986.46 (a) (9) and the corresponding step of § 986.46 (b) by the applicable class price(s); and

(d) Add any charges computed as follows: For any skim milk or butterfat in inventory reclassified pursuant to § 986.43 (b), which is not in excess of the quantity in producer milk classified as Class II milk (other than as shrinkage) in the handler's plant(s) for the preceding month, a charge shall be computed at the difference between its value at the Class I price for the current month and its value at the Class II price for the preceding month;

§ 986.71 *Computation of the uniform price.* For each of the months of July through February, the market administrator shall compute the uniform price per hundredweight of producer milk of 4.0 percent butterfat content, at Wichita Falls, Texas, as follows:

(a) Combine into one total the values computed pursuant to § 986.70 for the producer milk of all handlers who submitted reports prescribed in § 986.30 and who have made the payments pursuant to §§ 986.80 and 986.82 for the preceding month;

(b) Subtract, if the average butterfat content of the producer milk included under paragraph (a) of this section is greater than 4.0 percent, or add, if such average butterfat content is less than 4.0 percent, an amount computed as follows: Multiply the amount by which the average butterfat content of such milk varies from 4.0 percent by the butterfat differential computed pursuant to § 986.73, and multiply the resulting figure by the total hundredweight of such milk;

(c) Add an amount equal to the total value of all allowable location adjustments to producers pursuant to § 986.74;

(d) Add an amount equal to not less than one-half of the unobligated balance on hand in the producer-settlement fund;

(e) Divide the resulting amount by the total hundredweight of producer milk included under paragraph (a) of this section; and

(f) Subtract not less than 4 cents nor more than 5 cents.

§ 986.72 *Computation of uniform prices for base and excess milk.* For each of the months of March through June, the market administrator shall compute the uniform prices per hundredweight for base and for excess milk, each of 4.0 percent butterfat content, at Wichita Falls, Texas, as follows:

(a) Compute the total value of excess milk for all handlers who submitted reports pursuant to § 986.30, and who have made the payments pursuant to §§ 986.80 and 986.82 as follows: (1) Multiply the hundredweight of such milk not in excess of the total quantity of producer milk assigned to Class II milk in the pool plants of such handlers by the Class II milk price, (2) multiply any additional hundredweight of excess milk not included in subparagraph (1) of this paragraph by the Class I milk price, and (3) add together the resulting amounts;

(b) Divide the total value of excess milk obtained in paragraph (a) of this section by the total hundredweight of such milk and adjust to the nearest cent. The resulting figure shall be the uniform price for excess milk of 4.0 per cent butterfat received from producers;

(c) Subtract the total value of excess milk obtained in paragraph (a) of this section from the total value of milk computed pursuant to § 986.71 (a) to (d) and adjust by any amount involved in the adjustment of the uniform price of excess milk to the nearest cent;

(d) Divide the amount obtained in paragraph (c) of this section by the total hundredweight of base milk included in these computations; and

(e) Subtract not less than 4 cents nor more than 5 cents from the amount computed pursuant to paragraph (d) of this section. The resulting figure shall be the uniform price for base milk of 4.0 percent butterfat received from producers.

§ 986.73 *Butterfat differential to producers.* The applicable uniform price(s) to be paid each producer shall be increased or decreased for each one-tenth of one percent that the average butterfat content of his milk is above or below 4.0 percent, respectively, at the rate determined by multiplying the pounds of butterfat in producer milk allocated to each class by the appropriate butterfat differential for such class as determined pursuant to § 986.51, dividing by the total pounds of butterfat in producer milk and rounding to the nearest even tenth of a cent.

§ 986.74 *Location adjustment to producers.* In making payments to producers pursuant to § 986.80, for the months of July through February, each handler may deduct, for each hundredweight of milk, and for the months of March through June for each hundredweight of base milk received from producers at a pool plant which is located outside the State of Texas, 5 cents per hundredweight plus an additional 1.5 cents for each 10 miles or fraction thereof that such plant is more than 100 miles from the City Hall in Wichita Falls, Texas, by the shortest hard-surfaced highway distance as determined by the market administrator.

PAYMENTS

§ 986.80 *Time and method of payment for producer milk.* (a) Except as provided in paragraph (b) of this section, each handler shall make payment to each producer from whom milk is received during the month as follows:

(1) On or before the last day of each month, to each producer who did not discontinue shipping milk to such handler during the month, an amount equal to not less than the Class II price for the preceding month multiplied by the hundredweight of milk received from such producer during the first 15 days of the month;

(2) On or before the 15th day of the following month, an amount equal to not less than the applicable uniform price(s) adjusted by the butterfat and location differentials to producers multiplied by the hundredweight of milk or base milk and excess milk received from such producer during the month, subject to the following adjustments: (i) Less payments made to such producer pursuant to subparagraph (1) of this paragraph, (ii) less marketing service deductions made pursuant to § 986.85, (iii) plus or minus adjustments for errors made in previous payments made to such producer, and (iv) less proper deductions authorized in writing by such producer: *Provided,* That if by such date such handler has not received full payment pursuant to § 986.83, he may reduce pro rata his payments to producers by not more than the amount of such underpayment. Payments to producers shall be completed thereafter not later than the date for making payments pursuant to this paragraph next following after the receipt of the balance due from the market administrator.

(b) (1) Upon receipt of a written request from a cooperative association which the market administrator determines is authorized by its members to collect payment for their milk and receipt of a written promise to reimburse the handler for the amount of any actual loss incurred by him because of any improper claim on the part of the cooperative association, each handler shall:

(i) Pay to the cooperative association on or before the 27th and 13th day of each month, in lieu of payments pursuant to paragraph (a) of this section, an amount equal to the gross sum due for all milk received from certified members, less amounts owed by each member-producer to the handler for supplies purchased from him on prior written order or as evidenced by a delivery ticket signed by the producer;

(ii) Submit to the cooperative association on or before the 10th day of each month written information which shows for each member-producer (a) the total pounds of milk received during the preceding month, (b) the total pounds of butterfat contained in such milk, (c) the number of days of production included in such receipts, (d) for the months of March through June, the amount of base and excess milk received, and (e) the amounts withheld by the handler in payment for supplies sold; and

(iii) Submit to the cooperative association on or before the 25th day of each month written information which shows for each such member-producer the total pounds of milk received during the first 15 days of the current month.

The foregoing payment and submission of information shall be made with respect to the milk, of each producer who the cooperative association certifies is a member, which is received on and after the first day of the calendar month next following receipt of such certification through the last day of the month next preceding receipt of notice from the cooperative association of a termination of membership or until the original request is rescinded in writing by the association; and

(2) A copy of each such request, promise to reimburse, and certified list of members shall be filed simultaneously with the market administrator by the cooperative association and shall be subject to verification at his discretion through audits of the records of the cooperative association pertaining thereto. Exceptions, if any, to the accuracy of such certification by a producer claimed to be a member or by a handler, shall be made by written notice to the market administrator and shall be subject to his determination.

§ 986.81 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund," into which he shall deposit all payments made by handlers pursuant to §§ 986.62, 986.82, and 986.84, and out of which he shall make all payments to handlers pursuant to §§ 986.83 and 986.84: *Provided,* That any payments due to any handler may be offset by any payments due from such handler.

§ 986.82 *Payments to the producer-settlement fund.* On or before the 13th day after the end of each month, each handler shall pay to the market administrator any amount by which the value of producer milk as computed pursuant to § 986.70 for such month is greater than the amount required to be paid by him for such milk pursuant to § 986.80.

§ 986.83 *Payments out of the producer-settlement fund.* On or before the 14th day after the end of each month, the market administrator shall pay to each handler any amount by which the total value of his producer milk, computed pursuant to § 986.70, for such month is less than the amount required to be paid producers by such handler pursuant to § 986.80: *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uniformly per hundredweight such payments and shall complete such payments as soon as the necessary funds are available.

§ 986.84 *Adjustments of accounts.* Whenever audit by the market administrator or other verification discloses errors resulting in moneys due (a) the market administrator from a handler, (b) a handler from the market administrator, or (c) any producer or cooperative association from a handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which such errors occurred.

§ 986.85 *Marketing services.* (a) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers for milk (other than milk of his own production) pursuant to § 986.80 shall deduct 5 cents per hundredweight, or such amount not exceeding 5 cents per hundredweight, as may be prescribed by the Secretary and shall pay such deductions to the market administrator on or before the 15th day after the end of the month. Such money shall be used by the market administrator to provide market information and to check the accuracy of the testing and weighing of their milk for producers who are not receiving such service from a cooperative association.

(b) In the case of producers who are members of a cooperative association which the Secretary has determined is actually performing the services set forth in paragraph (a) of this section, each handler shall (in lieu of the deduction specified in paragraph (a) of this section) make such deductions from the payments to be made to such producers as may be authorized by the membership agreement or marketing contract between such cooperative association and such producers, and on or before the 13th day after the end of each month, pay such deductions to the cooperative association of which such producers are members, furnishing a statement showing the amount of such deductions and the amount of milk for which such deduction was computed for each producer.

§ 986.86 *Expense of administration.* On or before the 15th day after the end of each month, each handler who operates a pool plant shall pay to the market administrator, as his pro rata share of the expense of the administration of this part, 5 cents or such lesser amount as the Secretary may prescribe for each hundredweight of butterfat and skim milk contained in (a) producer milk, including such handler's own production, and (b) other source milk classified as Class I milk; and each handler who operates a nonpool plant, not subject to the classification and pricing provisions of another Federal order, shall make such payment only with respect to Class I milk disposed of within the marketing area on routes.

§ 986.87 *Termination of obligations.* The provisions of this section shall apply to any obligations under this part for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator the account for which it is to be paid;

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this order to be made available, the market administrator may within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the month following the month during which all such books and records pertaining to such obligations are made available to the market administrator or his representative;

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed; and

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or setoff by the market administrator) was made by the handler, if a refund of such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the Act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 986.90 *Effective time.* The provisions of this part, or any amendment thereto, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated.

§ 986.91 *Suspension or termination.* The Secretary shall, whenever he finds that any or all provisions of this part, or any amendment thereto, obstruct or do not tend to effectuate the declared policy of the act, terminate or suspend the operation of any or all provisions of this part or any amendment thereto.

§ 986.92 *Continuing obligations.* If, upon the suspension or termination of any or all provisions of this part, or any amendment thereto, there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 986.93 *Liquidation.* Upon the suspension or termination of any or all provisions of this part, the market administrator, or such other liquidating agent as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated, all assets, books and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidating and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 986.100 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent and representative in connection with any of the provisions of this part.

§ 986.101 *Separability of provisions.* If any provisions of this part, or its application to any person or circumstances, is held invalid, the application of such provision, and of the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

Issued at Washington, D. C., this 12th day of August 1958.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

[F. R. Doc. 58-6569; Filed, Aug. 14, 1958; 8:52 a. m.]

[7 CFR Part 1003]

[Docket No. AO-269-A1]

DOMESTIC DATES PRODUCED OR PACKED IN LOS ANGELES AND RIVERSIDE COUNTIES OF CALIFORNIA

DECISION WITH RESPECT TO PROPOSED AMENDMENT OF MARKETING AGREEMENT AND ORDER

Pursuant to the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900; 23 F. R. 4027, 4779), a public hearing was held April 10 and 11, 1958, at Coachella, California, on proposals to amend Marketing Agreement No. 127 and Order No. 103 (7 CFR Part 1003), regulating the handling of domestic dates produced or packed in Los Angeles and Riverside Counties of California. Notice of the hearing was published in the FEDERAL REGISTER (23 F. R. 1960) on March 25, 1958. The marketing agreement and order are effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), hereinafter referred to as the "act", and any amendment which may result from this proceeding also will be effective pursuant to said act.

On the basis of the evidence introduced at the hearing, and the record thereof, the Acting Deputy Administrator, Marketing Services, Agricultural Marketing Service, on July 14, 1958, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision in this proceeding. The notice of the filing of such recommended decision, affording opportunity to file written exceptions thereto, was published in the FEDERAL REGISTER (F. R. Doc. 58-5446; 23 F. R. 5454).

The material issues, findings and conclusions, and the general findings of the recommended decision set forth in the FEDERAL REGISTER (F. R. Doc. 58-5446; 23 F. R. 5454) are hereby approved and adopted as the material issues, findings and conclusions, and the general findings of this decision as if set forth in full herein, except as may otherwise be stated in this decision.

Clarifying change. The proposed revision of § 1003.45 (c), set forth in the second column on page 5464 (23 F. R. 5464), and the fourth paragraph in the third column on page 5458 (23 F. R. 5458) of the discussion thereof, should be clarified to express the intended meaning of such revised § 1003.45 (c). In the proposed revision of § 1003.45 (c), it is provided that a handler who has had more dates certified for handling or further processing than he subsequently shipped or otherwise handled may, upon request to the committee and with its approval, have any of such excess quantity of the certified dates "removed" from certification and his withholding and assessment obligations adjusted accordingly. Some of such dates for which removal from certification was proposed would be handled at a later date and it was not intended that a subsequent inspection and certification of these dates would be required. Moreover, it would be difficult to remove the evidence of certification from the containers of such dates. For order purposes, it would be sufficient that "removal" of certification on these dates be accomplished simply by an adjustment in the records of the committee, and the committee would hold the recording of such dates in suspension from other dates certified for handling or further processing. Therefore, the fourth paragraph (23 F. R. 5458) of the discussion under material issue (12) is revised to read as follows:

Handlers generally do not go to the expense of preparing dates and having them certified for handling or for further processing unless they have good reason for expecting to ship them. However, it is possible certified dates may become damaged or be diverted to outlets other than for free dates, or a handler may have dates certified in excess of the quantity for which he has markets. Also, a handler may desire to have certifications on dates he has not shipped suspended from recording, and hence a postponement of his assessment and withholding obligations until the succeeding crop year so the obligations of the new crop year, rather than of the then current crop year, will apply. To take care of such eventualities, present § 1003.45 (c) should be amended to provide that a handler who has dates which have been certified for handling or for further processing may, upon request to the committee and with its approval, have such dates suspended from certifications of record or, if damaged or the outlet changed, removed from certification, and his withholding and assessment obligation adjusted accordingly. Upon handling any such dates, or having the suspension removed, the handler should, of course, be required to meet the applicable withholding and assessment obligations effective at that time. This is consistent with the requirements that handlers meet the assessment and withholding obligations on dates actually handled.

A corresponding change is made in the provisions of proposed § 1003.45 (c).

Ruling on exceptions. Within the period reserved therefor, a set of two exceptions to the recommended decision was filed by Venus Foods, Los Angeles, California, a handler of dates. Each of the exceptions was carefully and fully considered in conjunction with the evidence in the record and the relevant discussions in the recommended decision in arriving at the findings, conclusions, and regulatory provisions set forth in this decision. To the extend that the exceptions are at variance with the findings, conclusions, and actions decided upon herein, such exceptions are overruled.

One exception relates to the proposed addition of new § 1003.48. The provisions of this section would authorize the Secretary to establish a container regulation for dates if he should find upon the basis of a recommendation by the committee or other available information that such regulation would tend to effectuate the declared policy of the act. The exceptor, although favoring standardization of date containers, states that such regulation would unfairly restrict the operations of each handler and hence tend to reduce industry sales of dates. The proposed authorization was justified on the basis of the evidence in the record, as stated in the discussion of material issue (14) (23 F. R. 5460) of the recommended decision. In addition, the evidence indicates that the committee should, of course, obtain adequate information and data on the relationship of date containers to sales and pricing of dates prior to the committee recommending any container regulation. Consideration of such information and data by the committee would serve to assure that any container regulation recommended by it would be designed to enhance the market position of dates. In any event, container regulations recommended by the committee may not be established under the proposed order unless the Secretary finds that such regulation would tend to effectuate the declared policy of the act. It should be noted that proposed § 1003.48 authorizes, but does not require, the establishment of container regulations. Accordingly, such exception is denied.

The other exception relates to the proposed revision of § 1003.56 which would eliminate, under certain conditions, macerated dates as an outlet for substandard dates. The exceptor states that a handler should have the right to decide whether to macerate substandard dates for use in products for human consumption or to divert such dates to nonhuman food products. The proposed revision of § 1003.56, as discussed in the recommended decision, was based on evidence of record to the effect that the use of substandard dates in products for human consumption should not be permitten when the quantity of restricted dates is expected to be in excess of the demand for dates in the available outlets for such products; and, by additional grade or size regulation for restricted dates, supply is being adjusted to demand by causing a greater proportion of the crop to be designated as substandard dates. If any dates so designated as substandard dates were permitted to supply one of the larger outlets for restricted dates (e. g., macerated dates), no useful purpose would be served by the additional grade or size regulation. However, it could happen, during a crop year after the quantity of marketable dates (including restricted dates) available for products for human consumption has been reduced by additional grade or size regulation, that the committee may find, due to changes in its prior estimates of supply or demand, that returns to producers would tend to be increased, and users better supplied, if substandard dates were also permitted to be used in certain products for human consumption. Therefore, recognition is given to the foregoing exception, insofar as it indicates the need for more flexibility in the provisions of proposed § 1003.56, by authorizing the committee, with the Secretary's approval, to permit substandard dates to be used in such products for human consumption as may be so approved. Hence the exception is denied insofar as it pertains to a handler's election to use substandard dates in any such

products in the absence of prior Secretarial approval of such use.

To the extent that the discussion of issue (16) (23 F. R. 5461) in the recommended decision is inconsistent with the foregoing, the discussion is hereby modified to accord therewith.

On the basis of the foregoing, the proviso appearing in proposed § 1003.56 (23 F. R. 5465) is revised so as to permit the use of substandard dates of any variety in specified products for human consumption whenever the committee concludes and the Secretary finds that the use of such dates in these products would tend to effectuate the declared policy of the act.

Amendment of the marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement, as Amended, Regulating the Handling of Domestic Dates Produced or Packed in a Designated Area of California" and "Order Amending the Order Regulating the Handling of Domestic Dates Produced or Packed in Los Angeles and Riverside Counties of California," which have been decided upon as the appropriate and detailed means of effecting the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the said rules of practice and procedure, governing proceedings to formulate marketing agreements and marketing orders, have been met.

It is hereby ordered, That all of this decision, except the annexed marketing agreement, as amended, be published in the FEDERAL REGISTER. The regulatory provisions of the said marketing agreement, as amended, are identical with those contained in the annexed order which will be published with this decision.

Dated: August 12, 1958.

TRUE D. MORSE,
Acting Secretary.

Order[1] *Amending the Order Regulating the Handling of Domestic Dates Produced or Packed in Los Angeles and Riverside Counties of California*

§ 1003.0 *Findings and determinations*—(a) *Previous findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations made in connection with the issuance of the order; and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(b) *Findings upon the basis of the hearing record.* Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, effective thereunder (7 CFR Part 900; 23 F. R. 4027, 4779), a public hearing was held at Coachella, California, on April 10–11, 1958, on a proposed amendment of Marketing Agreement No. 127, and Order No. 103 (7 CFR Part 1003), regulating the handling of domestic dates produced or packed in Los Angeles and Riverside Counties of California. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The said order, as hereby amended, regulates the handling of domestic dates produced or packed in Riverside, Orange, and Los Angeles Counties and that portion of San Bernardino County lying west of 116 degrees W. longitude, located within the State of California in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The said order, as hereby amended, is limited in its application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act and the issuance of several orders applicable to subdivisions of the area of production would not effectively carry out the declared policy of the act;

(4) There are no differences in the production and marketing of dates in the area of production covered by the order, as hereby amended, which would require different terms applicable to different parts of such area; and

(5) All handling of dates produced or packed in the area of production, as hereby amended, is in the current of interstate or foreign commerce, or directly burdens, obstructs or affects such commerce.

It is therefore, ordered, That, on and after the effective date hereof, all handling of dates produced or packed in the area of production shall be in conformity to, and in compliance with, the terms and conditions of the aforesaid order, as hereby amended as follows:

1. Revise the provisions of § 1003.4 to read as follows:

§ 1003.4 *Area of production.* "Area of production" means the Counties of Riverside, Orange and Los Angeles, and that portion of San Bernardino County lying west of 116 degrees W. longitude, located within the State of California.

2. Insert in § 1003.9, between the words "production" and "shall", the phrase "or the movement of dates by a handler to storage for his account within the area of production".

3. Delete from § 1003.11 the words "the quantity of marketable" and insert, in lieu thereof, the words "the aggregate quantity of whole dates and pitted".

4. Delete from § 1003.12 the phrase, "minimum grade permitted to be handled by the regulations imposed by this part", and insert, in lieu thereof, the phrase, "applicable minimum grade then in effect pursuant to § 1003.39 and any additional, applicable requirements pursuant to § 1003.40, which may then be in effect for restricted dates."

5. Add a new § 1003.15 as follows:

§ 1003.15 *Substandard dates.* "Substandard dates" means those dates which fail to meet the requirements for marketable dates but are not cull dates.

6. Add a new § 1003.16 as follows:

§ 1003.16 *Cull dates.* "Cull dates" means dates which fail to meet the requirements (with respect to freedom from defects) prescribed in section 709 of the Agricultural Code of California for dates for use in products or by-products other than alcohol, brandy, and products not intended for human consumption.

7. Add a new § 1003.17 as follows:

§ 1003.17 *Graded dates.* "Graded dates" means those dates which are eligible for certification as marketable dates.

8. Renumber present § 1003.15 as § 1003.18.

9. Renumber present § 1003.16 as § 1003.19 and revise its provisions to read as follows:

§ 1003.19 *Cooperative marketing association.* "Cooperative marketing association" means a cooperative marketing association of date growers organized under the laws of the State of California.

10. Renumber § 1003.17 as § 1003.20 and amend said section by deleting "and Riverside Counties of California", and inserting in lieu thereof, ", Riverside and Orange Counties, and that portion of San Bernardino County lying west of 116 degrees W. longitude located within the State of California".

11. Delete §§ 1003.21, 1003.22, 1003.23 and 1003.24, and insert, in lieu thereof, the following:

§ 1003.21 *Establishment of Date Administrative Committee.* A Date Administrative Committee, composed of seven members with an alternate member for each such member, is hereby established to administer the terms and conditions of this part: *Provided*, That the number of members and alternates may be changed consistent with findings made pursuant to § 1003.22 (b).

§ 1003.22 *Membership representation.* (a) Members and alternate members shall, until such time as a realignment of the committee membership is effected pursuant to paragraph (b) of this section, be selected by the Secretary from each of the following groups and on the following basis:

(1) One member from handlers, each of whom produced during the then current crop year to February 28 at least 51 percent of all of the dates handled by him during such period, and producers, each of whom delivered to such handlers during the then current crop year to February 28 at least 50 percent of his deliveries to all handlers during such period;

(2) Three members from cooperative marketing associations of whom one shall be an employee and serve as a handler member of the committee, and two shall be from among the producer members of such associations;

(3) Three members from all other handlers and producers of whom two shall be handler members selected from among such other handlers, and one shall be a producer member selected from among such other producers.

The foregoing representation is based on each member representing approximately 14.28 percent of date tonnage handled.

(b) Whenever the Secretary finds that any change in tonnage handled in any group is equivalent to more than one-half of the basic 14.28 percent for a member, he shall so notify the committee and thereafter nominations and selections of members and alternates in that group shall be in such numbers and follow such alignment as the Secretary may determine: *Provided*, That each group shall be entitled to at least one member and alternate. Any such realignment shall be based on the tonnage of dates acquired from producers and certified for handling or further processing during the then current crop year to February 28. Any increase or decrease in the number of members representing a particular group shall not be dependent upon a change in membership representation of any other group nor shall any increase or decrease in the total number of members on the committee change the basic percentage herein established for tonnage representation for members. Except for the group specified in paragraph (a) (1) of this section, any change in the nomination and selection of members for any group shall be made so as to keep producer members and handler members in balance insofar as possible.

§ 1003.23 *Term of office.* The term of office for members and alternate members shall be one year ending on May 14 but each such member and alternate member shall continue to serve until his successor has been selected and has qualified.

§ 1003.24 *Nominations.* (a) Each group specified in § 1003.22 (a) may nominate, at a nomination meeting or meetings held on or before April 15 of each year, members and alternates to represent the group. With respect to the group specified in § 1003.22 (a) (3), separate meetings of handlers and of producers shall be held to nominate the handler representatives and producer representatives, respectively.

(b) At any meeting of the group specified in § 1003.22 (a) (1), each producer and each producer-handler shall be entitled to one vote for each position to be filled. At the respective meetings of the cooperative marketing associations in the group specified in § 1003.22 (a) (2), and of the handlers in the group specified in § 1003.22 (a) (3), each such association and each such handler shall be entitled to vote for each position to be filled as a representative for the particular group; and each such vote shall be weighted by the tonnage of dates acquired from producers and certified, for handling or for further processing, through February 28 of the then current crop year. At any meeting of the producers in the group specified in § 1003.22 (a) (3), each such producer shall be entitled to one vote for each position to be filled. The individual receiving the highest number of votes for a position shall be the nominee. Immediately after the completion of the meetings covered by this section, the committee shall report to the Secretary the nominees for each position together with a certificate of all necessary tonnage data and other information deemed by the committee to be pertinent or which is requested by the Secretary. The Secretary shall select, in his discretion, members and alternates from such nominees or from other qualified persons; but any such selection shall be from the groups, and on the basis, prescribed in § 1003.22. However, the Secretary shall allow a reasonable time for nominations to be received before proceeding with any selection without regard to nominations.

12. Delete from § 1003.31 the second and third sentences and insert, in lieu thereof, the following two sentences: "All decisions of the committee shall be by an affirmative vote of at least two-thirds (in case of fractional numbers, rounded to the nearest whole number) of the members of the committee. The presence of two-thirds, determined in the same way, of the members of the committee shall be required to constitute a quorum."

13. Amend § 1003.34 (a) to read as follows:

(a) Its estimate of the total date production separated as to marketable dates and dates of other grades and, when applicable, sizes, which will be produced in such crop year;

14. Amend § 1003.34 (e) by inserting the words "and size" after the word "grade".

15. Delete from § 1003.39 the first sentence and insert, in lieu thereof, the following sentence: "In order to effectuate the declared policy of the act all whole dates and pitted dates handled under this subpart shall meet the requirements of U. S. Grade C, or, if for further processing, U. S. Grade C (Dry), of the effective United States Standards for Grades of Dates: *Provided*, That the Secretary may, upon recommendation of the committee, prescribe other minimum standards of quality."

16. Delete from § 1003.39 the last sentence and insert, in lieu thereof, the following two sentences: "Notice of the minimum standard regulation shall be sent by the committee to all handlers of record. On and after the effective date of such regulations no handler shall handle dates except in accordance with such minimum standard."

17. Delete § 1003.40 and insert, in lieu thereof, the following:

§ 1003.40 *Additional grade or size regulations.* Whenever the committee deems it advisable to establish grade or size requirements for any variety of dates, in addition to the minimum standard provided pursuant to § 1003.39, to govern dates of such variety to be handled or to be withheld to meet restricted obligation, or both, it shall recommend to the Secretary requirements as to grade based on the effective United States Standards for Grades of Dates or any modification thereof, and such size requirements as it may deem appropriate. If the Secretary finds, upon the basis of such recommendation or other information available to him, that such additional grade or size regulation, or both such regulations, will tend to effectuate the declared policy of the act, he shall establish such regulations. Notice thereof, showing the effective date, shall be sent by the committee to all handlers of record. On and after the effective date no handler shall handle dates of such variety or withhold such dates to meet withholding obligation except in accordance with such regulations.

18. Amend § 1003.41 in the following respects: (1) Revise § 1003.41 (a) and (b) to read as follows:

§ 1003.41 *Inspection*—(a) *Packed dates.* Prior to handling any dates packed for handling each handler shall, at his own expense, cause: (1) An inspection to be made of such dates in order to ascertain if such dates meet the applicable grade and size regulations prescribed or provided for in this part; and (2) a certification for handling to be made of all such dates as meet such grade and size regulations.

(b) *Dates for further processing.* Prior to handling any dates for further processing each handler shall, at his own expense, cause: (1) An inspection to be made to ascertain if such dates meet the applicable grade and size requirements effective pursuant to § 1003.39 or § 1003.40, except for character associated with moisture; and (2) a certification for further processing to be made of all such dates as meet such grade and size requirements: *Provided*, That such inspection and certification requirements shall not apply to interhandler transfers within the area of production of field-run dates or graded dates.

(2) Change in the first sentence of § 1003.41 (a), the word "shipped" to the word "handled".

19. Change in § 1003.44 (b) the word "shipped" to "handled".

20. Delete § 1003.45 (a) and insert, in lieu thereof, the following:

(a) Whenever free and restricted percentages for any variety of dates have been established for a crop year by the Secretary in accordance with § 1003.44, each handler shall, at the time of having dates of such variety certified for handling or for further processing, withhold from handling a quantity of marketable dates of such variety having a weight equal to the restricted percentage for such variety referable to the dates so certified. The weight required to be withheld shall be determined by dividing the restricted percentage by the free percentage and applying the resultant withholding percentage, rounded to the

[1] This order shall not be come effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders have been met. When this order becomes effective, the heading thereof that will appear in Title 7 of the Code of Federal Regulations will be "Part 1003—Domestic Dates Produced or Packed in a Designated Area of California".

nearest one-tenth of one percent, to the weight of dates so certified. The withholding percentage, computed as aforesaid, shall be established by the Secretary. When pitted dates are certified, the weight to be withheld shall be determined by dividing the weight of the pitted dates certified for handling or further processing by 0.90 and applying the withholding percentage.

21. Delete § 1003.45 (c) and insert, in lieu thereof, the following:

(c) At any time during the crop year dates may be inspected and certified for handling or for further processing as provided in § 1003.41. Dates so certified shall, at the time of certification, be identified by appropriate seals, stamps, or tags to be furnished by the committee and to be affixed to the containers by the handler under the direction and supervision of the committee or its designated inspectors. The assessment requirements in § 1003.72 as well as the withholding obligation prescribed in paragraph (a) of this section shall be met at the time of certification. However, a handler who has had more dates certified for handling or further processing than he subsequently shipped or otherwise handled may, upon request to the committee and with its approval, have any of such excess quantity of the certified dates suspended from certification of record or, if damaged or the outlet changed, removed from certification, and his withholding and assessment obligations adjusted accordingly. A handler, who has had dates certified for handling or further processing and has not had them so suspended from certification of record or removed from certification, may carry such certified dates over into the new crop year and need not pay the assessment nor meet the requirements of any withholding percentages established for such year.

22. Insert after § 1003.45 (d) new paragraphs (e) and (f) as follows:

(e) On request to the committee and with its approval, a handler may, in accordance with the provision of this paragraph and any applicable rules and regulations which the committee may prescribe with the approval of the Secretary, defer until any date not later than July 31 of the crop year the meeting of any portion of his obligation to withhold restricted dates by setting aside such amount of graded dates as will assure a quantity of marketable dates equal at least to the quantity needed to be withheld from handling to meet his withholding obligation. With respect to any such dates the handler may set aside in connection with such a deferment, the committee may require, if it deems it necessary, the handler to have made, at his own expense, such inspection as may be necessary for a determination as to whether such dates conform to the applicable requirements for dates that may be set aside under this paragraph. As a condition to the committee approving the deferment, the handler shall agree in writing that: (1) He will adequately mark and identify the set-aside graded dates as such and hold them separate and apart from other dates; (2) the graded dates will not be removed from the stacks in which so set aside without the prior written permission of the committee; (3) inspection of the dates by the committee will be permitted at any reasonable time; and (4) if the quantity, quality, or size of the set-aside dates is found by the committee at any time to be deficient, the handler will promptly set aside such additional or substitute quantity of graded dates as is necessary to correct the deficiency.

(f) Upon the committee prescribing, with the approval of the Secretary, minimum standards for inspection of field-run dates and appropriate administrative rules and regulations, a handler may, in accordance therewith and the provisions of this paragraph, satisfy all or any part of his obligation to withhold restricted dates by setting aside field-run dates or by disposing of field-run dates in outlets prescribed in, or pursuant to, § 1003.56. The field-run dates shall be of such quality or size as shall be prescribed in such rules and regulations. The setting aside, direct disposal, and disposal of any field-run dates set aside shall occur prior to July 31 of the crop year in which the withholding obligation occurs. Prior to the disposal or setting aside of the field-run dates, the handler shall have had them inspected to determine the weight of dates eligible to satisfy withholding obligation. Upon such disposal or setting aside of the field-run dates, the handler shall be credited with satisfaction of his restricted obligation to the extent of the eligible weight of dates. In permitting the handler to so satisfy his withholding obligation the committee shall require the handler to agree in writing that: (1) Any field-run dates set aside will be held separate and apart from other dates and appropriately marked; (2) such dates will not be removed from the stacks in which so set aside for substitution of other dates, disposition, or for any other reason without prior written permission of the committee; and (3) inspection of said dates by the committee will be permitted at any reasonable time. In order to satisfy a withholding obligation by direct disposal of field-run dates into cull outlets, the disposal shall be under the supervision of the committee and through persons on a committee approved list of feeders and manufacturers. The handler may, upon giving prior notice to the committee of any of the following proposed actions with respect to field-run dates withheld and obtaining its approval, (i) dispose of any such set-aside, field-run dates in the same manner as provided for direct disposal (ii) grade such dates and have the graded dates certified as marketable dates and withhold or dispose of such marketable dates as restricted dates, or (iii) substitute for the set-aside, field-run dates an equivalent quantity of marketable dates which he shall withhold or dispose of as restricted dates.

23. Add a new § 1003.48 as follows:

§ 1003.48 *Container regulation.* Whenever the committee deems it advisable to establish a container regulation for any variety of dates, it shall recommend to the Secretary the size, capacity, weight, or pack of the container, or containers, which may be used in the handling or packaging of dates, or both. If the Secretary finds upon the basis of such recommendation or other information available to him that such container regulation would tend to effectuate the declared policy of the act, he shall establish such regulation and notice thereof showing the effective date shall be sent by the committee to all handlers of record. After the effective date of such regulation, no handler shall handle dates of such variety except in accordance with such regulation and all other applicable requirements in effect pursuant to this part.

24. Delete from § 1003.51 the first sentence and insert, in lieu thereof, the following: "Transfers of dates may be made from one handler to another, and each handler who so transfers any such dates shall immediately upon the completion of the particular transfer notify the committee of the transfer, specifying the date of the transfer, the quantity and variety of dates involved, and the name of the receiving handler."

25. Add a new § 1003.54 as follows:

§ 1003.54 *Disposition of other than free dates.* Dates other than free dates shall not be used or otherwise disposed of except as provided in §§ 1003.55 and 1003.56.

26. Delete §§ 1003.55, 1003.56, and 1003.57 and insert, in lieu thereof, the following:

§ 1003.55 *Outlets for restricted and other marketable dates.* Restricted dates may be disposed of only through exportation to such countries as the committee may approve or by diversion in such form as rings, chunks, pieces, butter, macerated, or paste, or any other products which the committee concludes to be appropriate and which will result in the dates moving into consumption in a form other than that of whole dates or pitted dates. Dates other than restricted dates may also be so disposed of if they are inspected and certified as meeting the requirements for marketable dates. However, the provisions of this section shall not preclude any such dates from being disposed of in the outlets for substandard dates and cull dates prescribed in § 1003.56.

§ 1003.56 *Outlets for substandard and cull dates.* Substandard dates and cull dates may be disposed of without inspection, but only in feed, non-table syrup, alcohol, or brandy outlets, or in such other outlets for non-human food products as the committee concludes are non-competitive with the outlets for free and restricted dates: *Provided*, That whenever the committee concludes and the Secretary finds that the use of substandard dates of any variety in certain products for human consumption would tend to effectuate the declared policy of the act, the Secretary shall specify such products, and dates of such variety that are inspected and certified as substandard dates may be disposed of for use, or used, in such products.

§ 1003.57 *Approved manufacturers or feeders for diversion of restricted, other marketable, substandard, and cull dates.* (a) Diversion, pursuant to § 1003.55 or § 1003.56, of restricted dates, other marketable dates, substandard dates, or cull dates shall be accomplished only by such persons (which may include handlers) as are approved manufacturers or feeders. Any person may become an approved manufacturer or feeder if he (1) submits an application to the committee in which he agrees, as a condition to approval of his application, to furnish to the committee such information as it may require and to comply with the requirements and restrictions relative to the use and disposition of such dates, as set forth in this part, and (2) receives from the committee written approval of his application. The application and approval shall be in accordance with such rules, regulations and safeguards as may be prescribed pursuant to § 1003.59.

§ 1003.58 *Terminal dates.* Dates covered by §§ 1003.55 and 1003.56 shall, by September 30 of the subsequent crop year (a) in accordance with the applicable requirements of such sections, be disposed of, or be converted from their whole or pitted form; or (b) be set aside and marked for disposition pursuant to the applicable requirements of such sections. The committee may prescribe, with the approval of the Secretary, such rules, regulations and safeguards, pursuant to § 1003.59, as may be necessary to prevent dates covered by §§ 1003.55 and 1003.56 from interfering with the objectives of this part.

27. Renumber existing § 1003.58 as § 1003.59.

28. Amend § 1003.61 to read as follows:

§ 1003.61 *Reports of handler carry-over.* Each handler shall file each year with the committee written reports of his carry-over of dates as of January 1, June 1, and August 1, and at such other times as the committee may prescribe. Such reports shall be filed within 15 days of the respective dates.

29. Amend § 1003.64 to read as follows:

§ 1003.64 *Reports on disposition of restricted, other marketable, substandard and cull dates.* Each handler disposing of any quantity of restricted dates or other marketable dates, substandard dates, or cull dates for which disposition is prescribed in §§ 1003.55 and 1003.56 shall promptly thereafter report such disposition to the committee in such form as the committee may prescribe.

30. Delete from § 1003.72 the fourth sentence.

31. Amend § 1003.74 to read as follows:

§ 1003.74 *Refunds.* Excess funds held by the committee at the conclusion of a crop year may be used to defray expenses for no more than the ensuing four months and thereafter, within a reasonable time, the committee shall credit or, upon demand, refund the aforesaid excess to handlers who contributed to such excess. A handler's share of the excess funds shall be the amount of assessments he paid in excess of his actual pro rata share of the expenses of the committee.

32. Add a new § 1003.76 as follows:

§ 1003.76 *Compliance.* No handler shall handle any dates (including dates for further processing) except in conformity with, and as authorized by or pursuant to, the applicable provisions of this part, including but not being limited to the regulations relating to grade, size, and volume; and no handler shall use or otherwise dispose of restricted dates or any other dates which have not been certified for handling or for further processing except in conformity with, and as authorized by or pursuant to, the applicable provisions of this part.

33. Insert "or for further processing" immediately after the words "handled or certified for handling" wherever such words appear in §§ 1003.46, 1003.50, 1003.72 and 1003.73.

Order Directing That Referendum Be Conducted; Designation of Agents To Conduct Referendum; and Determination of Representative Period

Pursuant to the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), it is hereby directed that a referendum be conducted among the producers who, during the period August 1, 1957, through July 31, 1958 (which period is hereby determined to be a representative period for the purpose of such referendum), were engaged in the production of dates for market to ascertain whether such producers favor the issuance of an order amending the marketing order regulating the handling of domestic dates produced or packed in Los Angeles and Riverside Counties of California. Such amendatory order is annexed to the decision of the Secretary of Agriculture filed simultaneously herewith. Producers eligible to participate in the referendum are those who were so engaged in the production of Deglet Noor, Zahidi, or Khadrawy varities of dates produced or packed in Riverside, Orange and Los Angeles Counties, and that portion of San Bernardino County lying west of 116 degrees W. longitude, located within the State of California.

W. C. Noland, Edmund J. Blaine, M. G. Young, and E. C. Holly, of the Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, are hereby designated agents of the Secretary of Agriculture to conduct said referendum severally or jointly.

The procedure applicable to this referendum shall be the "Procedure for the Conduct of Referenda Among Producers in Connection with Marketing Orders (Except Those Applicable to Milk and its Products) to Become Effective Pursuant to the Agricultural Marketing Agreement Act of 1937, as Amended" (15 F. R. 5176), except that paragraph (a) (3) thereof is hereby modified for the purpose of this referendum to read as follows:

(3) Any individual casting a ballot in such referendum on behalf of a producer shall submit, with the ballot, evidence of his authority to cast such ballot, which evidence in the case of a corporation or a cooperative association shall be in the form of a certified copy of a resolution of the Board of Directors: *Provided*, That, corporations, other than cooperative associations, casting a ballot in such referendum, need not furnish the aforesaid resolution in the event the person signing said ballot on behalf of the corporation executes the following certification: "I hereby certify that I am an officer or employee of the corporate producer for whom this ballot is cast, and that I have authority to take such action on behalf of such corporation."

Copies of the aforesaid annexed order, of the aforesaid referendum procedure, and of this order may be examined in the Office of the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D. C.

Ballots to be cast in the referendum, and other necessary forms and instructions, may be obtained from Warren C. Noland, Western Marketing Field Office, 1031 So. Broadway, Room 1005, Los Angeles 15, California.

(48 Stat. 31, as amended; 7 U. S. C. 601 et seq.)

FEDERAL TRADE COMMISSION

[16 CFR Part 202]

[File No. 21-363]

SUN GLASS INDUSTRY

NOTICE OF HEARING AND OF OPPORTUNITY TO PRESENT VIEWS, SUGGESTIONS OR OBJECTIONS

In the matter of proposed amended trade practice rules for the Sun Glass Industry (16 CFR Part 202).

Opportunity is hereby extended by the Federal Trade Commission to any and all persons, firms, corporations, organizations, or other parties, affected by or having an interest in the proposed amended trade practice rules for the Sun Glass Industry, to present to the Commission their views concerning said rules, including such pertinent information, suggestions, or objections as they may desire to submit, and to be heard in the premises. Industry members may also present their views regarding the desirability of an industry trade practice committee provision in the form appended to the proposed amended rules for the industry. For this purpose copies of the proposed amended rules may be obtained upon request to the Commission. Such views, suggestions, or objections may be submitted by letter, memorandum, brief or other communication, to be filed with the Commission not later than September 9, 1958. Opportunity to be heard orally will be afforded at the hearing beginning at 10 a. m., e. d. t., Tuesday, September 9, 1958, in the Yacht Lounge of the Barbizon-Plaza Hotel, 106 Central Park South, New York, N. Y., to

any such persons, firms, corporations, organizations, or other parties, who desire to appear and be heard. After due consideration of all matters presented orally or in writing, the Commission will proceed to final action on the proposed amended rules.

The industry for which amended trade practice rules are under consideration in these proceedings consists of persons, firms, corporations, and organizations engaged in the manufacture, assembly, sale, or distribution in commerce of sun glasses and sun glass lenses and other glasses and lenses which are used to provide protection for the eyes from sun glare, strong light, or other similar conditions, and frames and other parts for such glasses. The glasses and lenses covered are eye-protective, not eye-corrective, devices.

These proceedings were instituted upon application by an industry group for amendment of the existing rules for the industry which were promulgated by the Commission on October 31, 1951. The announced hearing constitutes the first step in the proceedings.

Issued: August 12, 1958.

By direction of the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary.*

[No. 32464]

UNIFORM SYSTEM OF ACCOUNTS FOR CARRIERS BY INLAND AND COASTAL WATERWAYS

EXTENSION OF TIME TO FILE WRITTEN VIEWS OR SUGGESTIONS

AUGUST 6, 1958.

This rule making proceeding was instituted pursuant to a notice dated July 18, 1958, which was published in the FEDERAL REGISTER on July 29, 1958 (23 F. R. 5696), according to the terms of which notice written views or suggestions could be filed with the Commission's Secretary on or before August 31, 1958.

Requests have been made for additional time to consider and file such responses and, good cause appearing, the time within which any interested person may file written views or suggestions to be considered in this connection has been extended to and including September 30, 1958.

[SEAL] HAROLD D. MCCOY, *Secretary.*

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Classification Order No. 115]

ALASKA

ANCHORAGE LAND DISTRICT

JULY 29, 1958.

1. Pursuant to authority delegated to me by Bureau Order No. 541, dated April 21, 1954, (19 F. R. 2473), I hereby classify the following described public lands totalling 93.39 acres in the Anchorage Land District, Alaska, as suitable for lease and sale under the Small Tract Act of June 1, 1938 (52 Stat. 609, U. S. C. 682a), as amended, as follows:

ANCHORAGE AREA

NORTH NANCY LAKE UNIT

For Lease and Sale for Recreation or Business Sites

T. 19 N., R. 4 W., Seward Meridian,
Section 28: Lots 25, 33, 34 N½NW¼SE¼, W½SE¼NW¼SE¼.

Comprising 7 tracts totalling 37.22 acres.

For Lease and Sale for Recreation Sites

T. 19 N., R. 4 W., Seward Meridian,
Section 28: Lots 22–24, inc., 27, 29–32, inc., 35, 36, S½SE¼NW¼.

Comprising 10 tracts totalling 56.17 acres.

Aggregating 17 tracts containing 93.39 acres.

2. Classification of the above-described lands by this order segregates them from all appropriations, including locations under the mining laws, except as to applications under the Small Tract Act and applications under the mineral leasing laws.

3. The North Nancy Lake Unit is located approximately 90 road miles north and west of Anchorage, Alaska. It lies largely on the shores of the northernmost portion of Nancy Lake and to some extent along the southerly shore of a small lake known locally as "Kelly Lake".

The lands lie in an area of one-time glacial activity, which is evidenced by rolling terrain with shallow soils overlying unconsolidated deposits of sand and gravel. Vegetative cover is varied. A few of the lots contain only scattered mature trees and a dense cover of second growth birch, aspen and willow, the apparent result of fire some years ago. However, the majority of the lots contain a park-like growth of mature birch and white spruce.

The area is presently accessible via the Alaska railroad and ten of the tracts are traversed by a rough, dry weather, dirt road. The area will soon be made readily accessible by the Houston-Willow Road, for which plans have been finalized and bids are about to be asked by the Bureau of Public Roads. Lots not traversed by the road do not have access at this time, but easements are provided herein to facilitate eventual access to each lot.

The area is primarily recreational and there are no public services available such as power, telephone, mail service, and schools. The nearest stores and other commercial facilities are located at Wasilla, some twenty miles to the southeast.

4. The individual tracts vary in size from 3.88 acres to 7.07 acres but most of them contain between 4 and 5 acres. A plat of survey showing the location of each tract can be secured for $1.00 from the Cadastral Engineering Office, Bureau of Land Management, Hawver Building, Anchorage, Alaska, or by mail through Post Office Box 480. Brochures which describe the area and contain sketch maps of the platting can be obtained free of charge from the Manager, Anchorage Land Office, Anchorage, Alaska. The appraised value of the tracts varies from $200 to $700 per tract as shown below. Rights-of-way, 50 feet in width, for street and road purposes and for public utilities, and 200 feet for the Alaska Railroad easement will be reserved as shown below. All minerals in the lands will be reserved to the United States.

5. Leases will be issued for a term of three years and will contain an option to purchase in accordance with 43 CFR 257.13. Lessees who comply with the general terms and conditions of their leases will be permitted to purchase their tracts at the prices listed above providing that during the period of their lease they either (a) construct the improvements specified in paragraph 7 or (b) file a copy of an agreement in accordance with 43 CFR 257.13 (d). Leases will be renewable at the discretion of the Bureau of Land Management and the renewal lease will be subject to such terms and conditions as are deemed necessary in the light of the circumstances and the regulations existing at the time of renewal. However, a lease will not be renewable unless failure to construct the required improvements is justified under the circumstances and nonrenewal would work an extreme hardship on the lessee.

6. Persons who have previously acquired a tract under the Small Tract Act are not qualified to secure a tract in this opening unless they can make a showing satisfactory to the Bureau of Land Management that the acquisition of another tract is warranted in the circumstances.

7. Improvements referred to in paragraph 5 above must conform with health, sanitation, and construction requirements of local ordinances and must, in addition, meet the following minimum standards. The house or business structures must be of sound construction, be built of attractive materials, contain at least one door and one window, be firmly attached to a permanent foundation, and be finished suitable for occupancy or use. Adequate sanitary facilities must be provided and consist of either indoor plumbing, chemical toilet, or outhouse. Provision must be made for the disposal of garbage. If classified as a Recreation Site the house must be suitable for reasonable residence, contain a minimum of 120 square feet, outside dimensions, and insulation is not required. If classified and leased as a business site, the lessee must construct permanent building or buildings upon the tract that are suitable for the business engaged in.

The lease will be issued for a period of three years, at the appropriate annual rental listed above, which for a Recreation Site is calculated as being a sum equal to 1/20th of the appraised value for each of the three lease years. However, $10.00 will be the minimum annual rental charged. Rental on land classified for a Business Site is based on a percentage of the gross income as specified on Lease Form 4–776, provided, however, the minimum rental will be $20.00 per tract per year or 1/20th of the appraised price, whichever is higher. The payment of three years rental in advance is required. In the case of a Business Site, this advance rental will be the minimum rental for each of three years as explained above, subject to upward adjustment as determined by the volume of gross income derived.

3. Beginning at 10:00 a. m. on August 28, 1958 the lands will be open for filing of drawing-entry cards (Form 4–775) only by persons entitled to veterans' preference. In brief, persons entitled to such preference are (a) honorably discharged veterans who served in the armed forces of the United States for a period of at least 90 days after September 15, 1940, (b) surviving spouse or minor orphan children of such veterans through a legally authorized representative, and (c) with the consent of the veteran, the spouse of living veterans. The 90-day requirement does not apply to veterans who were discharged on account of wounds or disability incurred in the line of duty or the surviving spouse or minor children of veterans killed in the line of duty. Drawing-entry cards (Form 4–775) are available upon request from the Manager, Anchorage Land Office, 131 5th Avenue, Anchorage, Alaska.

Drawing-entry cards will be accepted if filed out in compliance with the instructions on the form and submitted to the above-named official prior to 10:00 a. m. on September 10, 1958. A drawing will be held on that date to select the successful entrants who will be sent copies of the lease form, Form 4–776, with instructions as to their execution and return and as to payment of fees and rentals. All entrants will be notified of the results of the drawing.

For a period of 91 days or until the close of business on December 10, 1958, any tracts remaining unappropriated will be subject to filing in the order received by qualified veteran applicants. Such filings will be executed upon the lease form, Form 4–776.

During the 21 day period extending between 10:00 a. m. on November 19, 1958 and December 10, 1958, drawing-entry cards will be accepted from the general public on any unappropriated parcels of the subject land, however, during this 21 day period veteran priority rights still prevail. A drawing will be held at 10:00 a. m. on December 10, 1958 to select successful entrants, after which the unappropriated portions of the subject land will be open to application under this classification in order of filing. All entrants will be notified of the results of the drawing and successful entrants will be sent copies of the lease forms with instructions as to their execution. Persons claiming veterans' preference rights must enclose with their applications proper evidence of military or naval service, preferably a complete photostatic copy of the certificate of honorable discharge.

The filing of the lease Form 4–776, must be accompanied by a filing fee of $10.00 plus the advance rental specified above. The advance rental for any unexpired full lease year, if any, subsequent to the filing of the application to purchase, will be subtracted from the sale price of the land as shown above. Failure to transmit the filing fee and the advance rental with the application will render the application invalid. Advance rentals will be returned to unsuccessful applicants. All filing fees will be retained by the United States.

L. T. MAIN,
Operations Supervisor, Anchorage.

[California No. 548]

CALIFORNIA

SMALL TRACT CLASSIFICATION ORDER

AUGUST 7, 1958.

1. Pursuant to authority delegated to me by the California State Supervisor, Bureau of Land Management, under Part II, Document 4, California State Office, dated November 19, 1954 (19 F. R. 7697), I hereby classify the following described public lands, totaling approximately 90 acres in Shasta County, California, as suitable for disposition for residence purposes under the Small Tract Act of June 1, 1938 (52 Stat. 609; U. S. C. 682a), as amended:

MOUNT DIABLO MERIDIAN

T. 32 N., R. 5 W.,
Sec. 10, Lots 1, 2, 12; SW¼NW¼.

Containing 90 acres, subdivided into 40 small tracts, of which 2 are covered by applications from persons entitled to preference under 43 CFR 257.5 (a).

2. Classification of the above-described lands by this order segregates them from all appropriations, including locations under the mining laws, except as to applications under the mineral leasing laws.

3. The lands classified by this order shall not become subject to application under the Small Tract Act of June 1, 1938 (52 Stat. 609; 43 U. S. C. 682a), as amended, until it is so provided by an order to be issued by an authorized officer, opening the lands to application or bid with a preference right to veterans of World War II and of the Korean Conflict and other qualified persons entitled to preference under the act of September 27, 1944 (58 Stat. 497; 43 U. S. C. 279–284), as amended.

4. All valid applications filed prior to August 7, 1958, will be granted, as soon as possible, the preference right provided for by 43 CFR 257.5 (a).

R. G. SPORLEDER,
Officer in Charge,
Northern Field Group,
Sacramento 14, California.

Office of the Secretary

CERTAIN LANDS AND WATERS ADJACENT TO HOLLA BEND NATIONAL WILDLIFE REFUGE, ARKANSAS

NOTICE OF INTENTION TO DESIGNATE AS CLOSED AREA UNDER MIGRATORY BIRD TREATY ACT

Pursuant to section 4 (a) of the Administrative Procedure Act, approved June 11, 1946 (60 Stat. 238, 5 U. S. C. 1003), and the authority contained in section 3 of the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755, 16 U. S. C. 704), as amended, notice is hereby given that the Secretary of the

Interior intends to issue a regulation designating as a closed area in which the pursuing, hunting, taking, capture or killing of migratory birds or attempting to take, capture, or kill migratory birds will not be permitted, those lands and waters adjoining the Holla Bend National Wildlife Refuge in Pope County, Arkansas, and comprising the bed of the Arkansas River approximately from river mile 242 to 250, including the waters thereof and those lands acquired by the Corps of Engineers for the Holla Bend Cutoff Project, together with the bed of the cutoff channel and the waters thereof.

All interested persons are hereby afforded an opportunity to participate in the formulation of the proposed regulation by submitting their views, data, or arguments in writing to D. H. Janzen, Director, Bureau of Sport Fisheries and Wildlife, Washington 25, D. C., within 30 days of the date of publication of this notice in the FEDERAL REGISTER.

ROSS LEFFLER,
Assistant Secretary of the Interior.

H. C. ROBINSON ET AL.

NOTICE OF PUBLIC HEARINGS

Application of H. C. Robinson, Secretary, Lexington Tobacco Board of Trade, Lexington, Kentucky, for Tobacco Inspection and Price Support Services for Additional Sales on the Lexington Tobacco Market.

Application of Herbert Moore, Harrison Tobacco Warehouse, et al., Cynthiana, Kentucky, for Tobacco Inspection and Price Support Services for Additional Sales on the Cynthiana Tobacco Market.

Application of John M. Walton, President, The Maysville Tobacco Board of Trade, Inc., Maysville, Kentucky, for Tobacco Inspection and Price Support Services for Additional Sales on the Maysville Tobacco Market.

Application of Robert R. Broyles, President, Greeneville Tobacco Board of Trade, Inc., Greeneville, Tennessee, for Tobacco Inspection and Price Support Services for Additional Sales on the Greeneville Tobacco Market.

Notice is hereby given of public hearings to be held upon applications for tobacco inspection and price support services for additional sales on applicant tobacco markets. The date, time, and place of hearing for each application is as follows:

The hearing upon the application of H. C. Robinson, Secretary, Lexington Tobacco Board of Trade, 620 South Broadway, Lexington, Kentucky, will be held in Courtroom No. 2, U. S. Post Office, Courthouse and Customhouse Building, Sixth and Broadway, Louisville, Kentucky, beginning at 10:00 a. m., c. d. t., on August 25, 1958.

The hearing upon the applications of Herbert Moore, Harrison Tobacco Warehouse, Cynthiana, Kentucky; J. R. Peak, Pepper-Peak Florence Tobacco Warehouse Company, Cynthiana, Kentucky; W. G. Wiglesworth, Jr., Wiglesworth Tobacco Warehouse Company, Cynthiana, Kentucky; Douglas McLoney, Independent Tobacco Warehouse, Cynthiana, Kentucky; Sterling P. Owen, New Dixie Tobacco Warehouse, Cynthiana, Kentucky, will be held in Courtroom No. 2, U. S. Post Office, Courthouse and Customhouse Building, Sixth and Broadway, Louisville, Kentucky, beginning at 10:00 a. m., c. d. t., on August 26, 1958.

The hearing upon the application of John M. Walton, President, Maysville Tobacco Board of Trade, Inc., 300 East Second Street, Maysville, Kentucky, will be held in Courtroom No. 2, U. S. Post Office, Courthouse and Customhouse Building, Sixth and Broadway, Louisville, Kentucky, beginning at 10:00 a. m., c. d. t., on August 27, 1958.

The hearing upon the application of Robert R. Broyles, President, Greeneville Tobacco Board of Trade, Inc., Greeneville, Tennessee, will be held in Room 104, U. S. Post Office Building, 500 Main Street, Knoxville, Tennessee, beginning at 10:00 a. m., e. s. t., on August 29, 1958.

The aforesaid public hearings will be conducted and evidence received pursuant to the concurrent and identical policy statements and regulations governing the extension of tobacco inspection and price support services to new markets and to additional sales on designated markets (23 F. R. 5109, 6113).

Done at Washington, D. C., this 12th day of August 1958.

[SEAL] TRUE D. MORSE,
Acting Secretary.

FEDERAL POWER COMMISSION

[Docket No. G-15680]

TEXACO SEABOARD, INC.

ORDER FOR HEARING, SUSPENDING PROPOSED CHANGE IN RATE, AND ALLOWING INCREASED RATE TO BECOME EFFECTIVE

JULY 31, 1958.

Texaco Seaboard, Inc. (Respondent) on June 30, 1958, tendered for filing a proposed change in its presently effective rate schedule for sales of natural gas subject to the jurisdiction of the Commission. The proposed change, which constitutes an increased rate and charge, is contained in the following designated filing:

Description: Notice of Change, undated.
Purchaser: Transcontinental Gas Pipe Line Corporation.
Rate schedule designation: Supplement No. 1 to Respondent's FPC Gas Rate Schedule No. 16.
Effective date: August 1, 1958 (effective date is the date proposed by Respondent).

The increased rate and charge so proposed is intended to reflect (in whole or in part) the additional "excise, license, or privilege tax" of one cent per Mcf levied by the State of Louisiana pursuant to Act No. 8 of 1958 (House Bill No. 303), as approved on June 16, 1958, amending Title 47 of the Louisiana Revised Statutes of 1950. The Commission is advised that litigation is being instituted to challenge the constitutionality of the said Act No. 8 of 1958. In consideration of this fact, and in order to assure appropriate refund in the event said Act No. 8 of 1958 should be declared unconstitutional or otherwise held invalid by final judicial decision, it is deemed advisable to suspend the said proposed increased rate and charge until August 2, 1958, and thereafter to permit it to become effective as of that date: *Provided*, That within 20 days from the date of this order Respondent shall file with the Secretary of the Commission an appropriate undertaking to assure such refund as may be ordered.

The Commission finds:

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed change, and that the above-designated supplement be suspended and the use thereof deferred as hereinafter ordered.

(2) It is necessary and proper in the public interest in carrying out the provisions of the Natural Gas Act that Respondent's proposed increased rate be made effective as hereinafter provided and that Respondent be required to file an undertaking as hereinafter ordered and conditioned.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rate and charge contained in the above-designated supplement to Respondent's FPC Gas Rate Schedule.

(B) Pending such hearing and decision thereon, said supplement be and it hereby is suspended and the use thereof deferred until August 2, 1958, and until such further time as it is made effective in the manner hereinafter prescribed.

(C) The rate, charge, and classification set forth in the above-designated supplement to Respondent's FPC Gas Rate Schedule shall be effective as of August 2, 1958: *Provided, however*, That within 20 days from the date of this order, Respondent shall execute and file with the Secretary of the Commission the agreement and undertaking described in paragraph (E) below.

(D) Respondent shall refund at such times and in such amounts to the persons entitled thereto, and in such manner as may be required by final order of the Commission, the difference between the presently effective rate and charge and the proposed increased rate and charge hereby allowed to become effective in the event the additional tax of one cent per Mcf levied by the State of Louisiana is for any reason held to be invalid. Should such additional tax eventually be held invalid and the State of Louisiana makes refund, with interest, of the tax monies collected pursuant to the said Act No. 8 of 1958, then, and in that event, a proportionate part of the interest so received by the Respondent herein shall be passed on and paid to the persons entitled thereto at such times and in such amounts, and in such manner as may be required by final order of the Commission. Respondent shall bear all costs of any such refunding; shall keep accurate accounts in detail of all amounts received by reason of the increased rate or charge allowed by this order to become effective, for each billing period, specifying by whom and in whose behalf such amounts were paid; and shall report (original and four copies), in writing and under oath, to the Commission quarterly, or monthly if Respondent so elects, for each billing period, and for each purchaser, the billing determinants of natural gas sales to such purchasers and the revenues resulting therefrom, as computed under the rate in effect immediately prior to the date upon which the increased rate allowed by this order becomes effective, and under the rate allowed by this order to become effective, together with the differences in the revenues so computed.

(E) As a condition of this order, within 20 days from the date of issuance thereof, Respondent shall execute and file in triplicate with the Secretary of this Commission its written agreement and undertaking to comply with the terms of paragraph (D) hereof, signed by a responsible officer of the corporation, evidenced by proper authority from the board of directors, and accompanied by a certificate showing service of copies thereof upon all purchasers under the rate schedule involved, as follows:

Agreement and Undertaking of _____ to Comply with the Terms and Conditions of Paragraph (D) of Federal Power Commission's Order Making Effective Proposed Rate Changes.

In conformity with the requirements of the order issued _____, in Docket No. G-_____, _____ hereby agrees and undertakes to comply with the terms and conditions of paragraph (D) of said order, and has caused this agreement and undertaking to be executed and sealed in its name by its officers, thereupon duly authorized in accordance with the terms of the resolution of its board of directors, a certified copy of which is appended hereto this _____ day of _____.

_____
By _____

Attest:

_____
(Secretary)

Unless Respondent is advised to the contrary within 15 days after the date of filing such agreement and undertaking, the agreement and undertaking shall be deemed to have been accepted.

(F) If Respondent shall, in conformity with the terms and conditions of paragraph (D) of this order, make the refunds as may be required by order of the Commission, the undertaking shall be discharged; otherwise, it shall remain in full force and effect.

(G) Neither the supplements hereby suspended nor the rate schedules sought to be altered thereby shall be changed until the period of suspension has expired, unless otherwise ordered by the Commission.

(H) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

By the Commission.

[SEAL] JOSEPH H. GUTRIDE,
Secretary.

[F. R. Doc. 58-6549; Filed, Aug. 14, 1958; 8:46 a. m.]

[Project No. 2248]

ARIZONA POWER AUTHORITY

NOTICE OF APPLICATION FOR LICENSE

AUGUST 11, 1958.

Public notice is hereby given that application has been filed under the Federal Power Act (16 U. S. C. 791a-825r) by Arizona Power Authority, an agency of the State of Arizona (Applicant), for license for a proposed hydroelectric project to be known as the Colorado River Project, designated Project No. 2248, consisting of the proposed Bridge Canyon and Marble Canyon developments on the Colorado River in Coconino and Mohave Counties, Arizona, affecting lands of the United States in the Lake Mead National Recreation Area, Hualpai Indian Reservation, Kaibab National Forest, Navajo Indian Reservation, and other lands of the United States.

The Bridge Canyon Development would consist of: A concrete dam comprised of an arch section about 600 feet long including a spillway section, gravity section 200 feet long and an intake structure 650 feet long; a reservoir with normal water surface at elevation 1,579, an area of 5,300 acres and storage of 640,000 acre-feet extending 47.4 miles upstream; vertical steel-lined penstocks leading to an underground powerhouse containing four 152,000-horsepower turbines each directly connected to 110,000-kilowatt generators; a switchyard and step-up transformers; a 345-kv transmission line to Round Valley substation, two 345-kv lines from Round Valley to Cave Creek, one 230-kv line from Cave Creek to Mesa, and one 230-kv line from Cave Creek to Phoenix; and appurtenant mechanical and electrical facilities. The Marble Canyon Development would consist of: a concrete arch dam about 700 feet long; including a submerged spillway at each end and an intake section; a reservoir with normal water surface at elevation 3,130, an area of 5,300 acres, and storage of 480,000 acre-feet extending about 55 miles upstream to the Glen Canyon dam; steel penstocks; a powerhouse containing four 117,500-horsepower turbines each directly connected to 85,000-kilowatt generators installed initially with provision for two additional units; step-up transformers; a switchyard; one 345-kv transmission line to Glen Canyon station and one 345-kv line to Flagstaff; and appurtenant electrical and mechanical facilities. The energy generated at the proposed Colorado River project woud be distributed throughout the State of Arizona by the applicant or sold or exchanged with other power distributors in adjacent states over an interconnected transmission system.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure of the Commission (18 CFR 1.8 or 1.10). The last day upon which protests or petitions may be filed is September 30, 1958. The application is on file with the Commission for public inspection.

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

GENERAL SERVICES ADMINISTRATION

OSMIUM, RHODIUM AND RUTHENIUM HELD IN NATIONAL STOCKPILE

PROPOSED DISPOSITION

Pursuant to the provisions of section 3 (e) of the Strategic and Critical Materials Stock Piling Act, 53 Stat. 811, as amended, 50 U. S. C. 98b (e), notice is hereby given of a proposed disposition of approximately 27 troy ounces of osmium, 2,515 troy ounces of rhodium, and 51 troy

ounces of ruthenium now held in the national stockpile.

The Office of Defense Mobilization, prior to July 1, 1958, made a revised determination, pursuant to section 2 (a) of the Strategic and Critical Materials Stock Piling Act, that there is no longer any need for stockpiling osmium, rhodium and ruthenium. The revised determination was made for the reason that the estimated supply of osmium, rhodium and ruthenium is adequate to meet any foreseeable emergency needs for such materials.

General Services Administration proposes to sell said materials by competitive bidding. It is proposed that the sale of rhodium will be spaced over a period of at least nine months with an offering of not more than approximately 280 ounces each month. In view of the small amounts of osmium and ruthenium, it is proposed to offer the entire quantities for sale at one time. These materials will also be available for transfer to any Federal agency having a need therefor.

It is believed that this plan of disposition will protect the United States against avoidable loss on the sale or transfer of such materials and will also protect producers, processors and consumers against avoidable disruption of their usual markets.

It is proposed to make the osmium, rhodium and ruthenium covered by this notice available for sale or transfer beginning six months after the date of publication of this notice in the FEDERAL REGISTER. Since the revised determination is not by reason of obsolescence of osmium, rhodium and ruthenium for use in time of war, this proposed disposition is being referred to the Congress for its express approval, as required by section 3 (e) of the Strategic and Critical Materials Stock Piling Act.

Dated: August 8, 1958.

FRANKLIN FLOETE,
Administrator of General Services.

[F. R. Doc. 58-6551; Filed, Aug. 14, 1958; 8:47 a. m.]

[Delegation of Authority 352]

SECRETARY OF THE INTERIOR

DELEGATION OF AUTHORITY WITH RESPECT TO NEGOTIATION OF CONTRACTS WITH PRIVATE INDUSTRY FOR ON-THE-JOB TRAINING OF ADULT INDIANS

1. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, (63 Stat. 377), as amended, herein called "the act", authority is hereby delegated to the Secretary of the Interior to negotiate, without advertising, under section 302 (c) (9) of the act, contracts with private industry for on-the-job training of adult Indians required to carry out the vocational program responsibilities of the Bureau of Indian Affairs under the act of August 6, 1956 (70 Stat. 986, 25 U. S. C. 309).

2. This authority shall be exercised in accordance with applicable limitations and requirements in the act, particularly sections 304 and 307 thereof, and in accordance with policies, procedures and controls prescribed by the General Services Administration.

3. The authority herein delegated may be redelegated to any official or employee of the Department of the Interior.

4. This delegation of authority shall be effective as of the date hereof.

Dated: August 8, 1958.

FRANKLIN FLOETE,
Administrator.

DEPARTMENT OF LABOR

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938 (52 Stat. 1060, as amended; 29 U. S. C. 201 et seq.), the regulations on employment of learners (29 CFR Part 522), and Administrative Order No. 485 (23 F. R. 200) and Administrative Order No. 507 (23 F. R. 2720), the firms listed in this notice have been issued special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates otherwise applicable under section 6 of the act. The effective and expiration dates, occupations, wage rates, number or proportion of learners, learning periods, and the principal product manufactured by the employer for certificates issued under general learner regulations (§§ 522.1 to 522.11) are as indicated below. Conditions provided in certificates issued under special industry regulations are as established in these regulations.

Apparel Industry Learner Regulations (29 CFR 522.1 to 522.11, as amended, and 29 CFR 522.20 to 522.24, as amended).

The following learner certificates were issued authorizing the employment of 10 percent of the total number of factory production workers for normal labor turnover purposes. The effective and expiration dates are indicated.

Benton Industries, Inc., Colley Street, Benton, Pa.; effective 7-30-58 to 7-29-59 (men's sport shirts).

Bestform Foundations of Pa., Inc., Baumer and Cherry Streets, Johnstown, Pa.; effective 8-3-58 to 8-2-59 (girdles, brassieres).

Clayburne Manfacturing Co., Inc., Clayton, Ga.; effective 8-5-58 to 8-4-59 (sport shirts).

Dickson Manufacturing Co., Dickson, Tenn.; effective 8-8-58 to 8-7-59 (work shirts, work jackets).

Hamurnat Manufacturing Corp., 212 Hull Avenue, Olyphant, Pa.; effective 8-1-58 to 7-31-58 (children's outerwear).

Kenrose Manufacturing Co., Inc., Buchanan, Va.; effective 8-10-58 to 8-9-59 (apparel—cotton wash dresses).

Martin Shirt Co., 27 East Poplar Street, Shenandoah, Pa.; effective 8-1-58 to 7-31-59 (boys' shirts, ladies' tailored blouses).

Mylcraft Manufacturing Co., Inc., North Main Plant, Rich Square, N. C.; effective 7-31-58 to 7-30-59 (ladies' pajamas).

Shawnee Garment Manufacturing Co., 115½ North Bell Street, Shawnee, Okla.; effective 8-19-58 to 8-18-59 (overalls, denim pants, khaki, etc.).

Henry I. Siegel Co., Inc., Hohenwald, Tenn.; effective 8-1-58 to 7-31-59 (work pants, shirts, and sport shirts).

Sylvania Garment Co., Inc., Sylvania, Ga.; effective 8-1-58 to 7-31-59 (blouses).

Todd Manufacturing Co., Elkton, Ky.; effective 8-19-58 to 8-18-59 (work shirts and work jackets for men).

Weatherbee Coats, Inc., 461 East Federal Street, Youngstown, Ohio; effective 7-30-58 to 7-29-59 (ladies' rainwear).

The following learner certificates were issued for normal labor turnover purposes. The effective and expiration dates and the number of learners authorized are indicated.

Baroness, Inc., 24 High Street, Womelsdorf, Pa.; effective 8-7-58 to 8-6-59; 10 learners (ladies' and girls' blouses).

Iolani Sportswear, Ltd., 1596 Makiki Street, Honolulu, Hawaii; effective 8-4-58 to 8-5-59; 10 learners (men's shirts—sportswear).

Linden Manufacturing Co., Birdsboro, Pa.; effective 8-7-58 to 8-6-59; 10 learners (ladies' and girls' blouses).

Linden Manufacturing Co., Newmanstown, Pa.; effective 8-7-58 to 8-6-59; 6 learners (ladies' and girls' blouses).

Linden Manufacturing Co., 848 North Ninth Street, Reading, Pa.; effective 8-7-58 to 8-6-59; 6 learners (ladies' and girls' blouses).

Linden Manufacturing Co., Inc., 24 High Street, Womelsdorf, Pa.; effective 8-7-58 to 8-6-59; 10 learners (ladies' and girls' blouses).

Marine Garment Co., Marine, Ill.; effective 8-5-58 to 8-4-59; 10 learners; learners may not be engaged at special minimum wage rates in the production of separate skirts (women's sportswear).

Pajama-Craft Manufacturing Co., Inc., Littlestown, Pa.; effective 7-3-58 to 7-2-59; 10 learners (corrected certificate) (men's and boys' pajamas).

Pickenbrock Co., Dyersville, Iowa; effective 8-4-58 to 8-3-59; five learners (women's cotton pajamas and cotton uniforms).

Rose Marie, Inc., 117½ South Waco Street, Hillsboro, Texas; effective 8-4-58 to 8-3-59; five learners; learners may not be employed at special minimum wage rates in the production of separate skirts (women's and children's apparel, sportswear).

Sunbeam Sportswear, Inc., Valley View, Pa.; effective 8-1-58 to 7-31-59; 10 learners (women's and children's apparel).

The following learner certificates were issued for plant expansion purposes. The effective and expiration dates and the number of learners authorized are indicated.

Carbon Hill Manufacturing Corp., Carbon Hill, Ala.; effective 7-29-58 to 1-28-59; 50 learners (boys' dress slacks).

Curtis Manufacturing Co., Ocoee, Fla.; effective 8-1-58 to 1-20-59; 20 learners (supplemental certificate) (men's shirts).

So-Rite Lingerie, Bright Building, Keyser, W. Va.; effective 8-1-58 to 1-31-59; 35 learners (ladies' pajamas and dusters).

Glove Industry Learner Regulations (29 CFR 522.1 to 522.11, as amended, and 29 CFR 522.60 to 522.65, as amended).

St. Johnsbury Glovers, Inc., St. Johnsbury, Vt.; effective 8-11-58 to 8-10-59; 10 percent of the total number of workers engaged in machine stitching operations for normal labor turnover purposes (knit fabric).

Hosiery Industry Learner Regulations (29 CFR 522.1 to 522.11, as amended, and 29 CFR 522.40 to 522.43, as amended).

Hollar Hosiery Mills, Inc., Hickory, N. C.; effective 8-5-58 to 8-4-59; five learners for normal labor turnover purposes (men's seamless hosiery).

Knitted Wear Industry Learner Regulations (29 CFR 522.1 to 522.11, as amended, and 29 CFR 522.30 to 522.35, as amended).

Movie Star of Ellisville, Ellisville, Miss.; effective 7-30-58 to 7-29-59; five percent of the total number of factory production workers for normal labor turnover purposes (slips, petticoats, nightgrowns, bouffant petticoats).

Shoe Industry Learner Regulations (29 CFR 522.1 to 522.11, as amended, and 29 CFR 522.50, as amended).

Osceola Shoe Co., Inc., Osceola, Ark.; effective 8-4-58 to 2-3-59; 50 learners for plant expansion purposes (shoes).

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.11, as amended).

Darwood Manufacturing Co., Inc., 18 Pocasset Street, Fall River, Mass.; effective 8-4-58 to 2-3-59; 5 percent of the total number of factory production workers for normal labor turnover purposes in the occupation of sewing machine operator, for a learning period of 480 hours at the rates of at least 90 cents an hour for the first 280 hours, and not less than 95 cents an hour for the remaining 200 hours (boys' clothing, outerwear).

Gem, Inc., One Gem Blvd., Byhalia, Miss.; effective 8-4-58 to 2-3-59; 10 percent of the total number of factory production workers for normal labor turnover purposes in the occupation of sewing machine operator, for a learning period of 320 hours at the rate of 85 cents an hour (closet accessories, ironing table pads and covers, household mops).

Lambert Manufacturing Co., Inc., Ogden and Main Streets, Gallatin, Mo.; effective 8-4-58 to 2-3-59; five learners for normal labor turnover purposes in the occupation of sewing machine operator for a learning period of 240 hours at the rate of 90 cents an hour (sport and work caps).

Stanberry Manufacturing Co., Stanberry, Mo.; effective 8-1-58 to 1-31-59; five percent of the total number of factory production workers for normal labor turnover purposes in the occupation of sewing machine operator, for a learning period of 240 hours at the rate of 90 cents an hour (headwear).

The following learner certificates were issued in Puerto Rico to the companies hereinafter named. The effective and expiration dates, learner rates, occupations, learning periods, and the number or proportion of learners authorized to be employed, are as indicated.

Angus Manufacturing Co., P. O. Box 417, Aguadilla, P. R.; effective 7-17-58 to 7-16-59; authorizing the employment of 10 learners for normal labor turnover purposes in the occupation of sewing machine operators, for a learning period of 480 hours at the rates of 65 cents an hour for the first 240 hours and 70 cents an hour for the remaining 240 hours (men's work clothes).

Boricua Shoe Co., P. O. Box 381, Aguada, P. R.; effective 7-21-58 to 1-20-59; authorizing the employment of 22 learners for plant expansion purposes in the occupations of flanger sewing machine operators, lacers, each for a learning period of 480 hours at the rates of 46 cents an hour for the first 240 hours and 51 cents an hour for the remaining 240 hours (felt slippers, ladies' and men's leather slippers).

Cole Industries, Inc., Industrial Sub-Division Calle "E", Hato Rey, P. R.; effective 1-10-58 to 1-9-59; authorizing the employment of eight learners for plant expansion purposes in the occupations of machine operators, assemblers and inspectors, each for a learning period of 480 hours at the rates of 75 cents an hour for the first 240 hours and 88 cents an hour for the remaining 240 hours (key duplicating machines).

Columbia Manufacturing Co., P. O. Box 333, San Lorenzo, P. R.; effective 7-21-58 to 7-20-59; authorizing the employment of five learners for normal labor turnover purposes in the occupations of, straightening, inspection, sandblast washing, degrease and color, induction brazing, slot milling, and thread rolling, each for a learning period of 480 hours at the rates of 75 cents an hour for the first 240 hours and 88 cents an hour for the remaining 240 hours (metal cutting tools).

Gordonshire Knitting Mills, Inc., P. O. Box 1127, Cayey, P. R.; effective 7-1-58 to 12-31-58; authorizing the employment of 210 learners for plant expansion purposes in the occupations of, sweater looping, seaming, and knitting, each for a learning period of 480 hours at the rates of 68 cents an hour for the first 240 hours and 80 cents an hour for the remaining 240 hours (sweater manufacturing).

Newport Brassiere Co., Inc., P. O. Box 10,008, Caparra Heights, P. R.; effective 7-7-58 to 7-6-59; authorizing the employment of 11 learners for normal labor turnover purposes in the occupations of: (1) sewing machine operators for a learning period of 480 hours at the rates of 60 cents an hour for the first 320 hours and 70 cents an hour for the remaining 160 hours; (2) final inspection of fully assembled garment for a learning period of 160 hours at the rate of 60 cents an hour (brassieres and accessories).

Puerto Rico Industrial Manufacturing Corp., P. O. Box 505, Manati, P. R.; effective 7-8-58 to 1-7-59; authorizing the employment of 60 learners for plant expansion purposes in the occupations of: (1) sewing machine operators, and final pressing, each for a learning period of 480 hours at the rates of 54 cents an hour for the first 240 hours and 63 cents an hour for the remaining 240 hours; (2) machine operations other than sewing (cleaning), final inspection of fully assembled garments, each for a learning period of 160 hours at the rate of 54 cents an hour (men's work pants and shirts).

Sunscreen Corp., Igualdad St., P. O. Box 117, Fajardo, P. R.; effective 7-16-58 to 1-15-59; authorizing the employment of five learners for plant expansion purposes in the occupations of, weaving machine operator, electrostatic coating machine operator, each for a learning period of 480 hours at the rates of 65 cents an hour for the first 240 hours and 76 cents an hour for the remaining 240 hours (koolshade sunscreens).

Each learner certificate has been issued upon the representations of the employer which, among other things, were that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be annulled or withdrawn, as indicated therein, in the manner provided in Part 528 of Title 29 of the Code of Federal Regulations. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of 29 CFR 522.9.

Signed at Washington, D. C., this 6th day of August 1958.

MILTON BROOKE,
Authorized Representative of the Administrator.

INTERSTATE COMMERCE COMMISSION

[Notice 14]

MOTOR CARRIER TRANSFER PROCEEDINGS

AUGUST 11, 1958.

Synopses of orders entered pursuant to section 212 (b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 179), appear below:

As provided in the Commission's special rules of practice, any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17 (8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC 61344. By order of August 6, 1958, the Transfer Board approved the transfer to Wiley's Auto Express, Inc., Glenolden, Pennsylvania, of Permits Nos. MC 13471 and MC 13471 Sub 1, issued October 3, 1941, and September 7, 1956, respectively, to Fred E. Wiley, doing business as Wiley's Chester Auto Express, Glenolden, Pennsylvania, authorizing the transportation of petroleum products and related commodities, and paper and paper products and wood pulp from specified points in Pennsylvania to specified points in Delaware, Virginia, New Jersey, New York, Massachusetts, Connecticut, Pennsylvania, and the District of Columbia. Robert B. Greer, 17 South Avenue, Media, Pennsylvania, for applicants.

No. MC-FC 61437. By order of August 7, 1958, the Transfer Board approved the transfer to Esfeld Trucking, Inc., Great Bend, Kans., of Certificate No. MC 94928 Sub 2, issued July 6, 1953, to William E. Esfeld and Frances A. Esfeld, a partnership, doing business as Esfeld Dirt Construction, Great Bend, Kans., authorizing the transportation of *Machinery, equipment, materials,* and *supplies* used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and byproducts, and *Machinery, materials, equipment* and *supplies* used in connection with the construction, operation, repair, servicing, maintenance and dismantling of pipe lines, including the stringing and picking up thereof, over irregular routes, between points in Kansas and Oklahoma; and *Commodities,* the transportation of which, because of their size or weight, require the use of special equipment, and parts thereof when moving in connection with such commodities, over irregular routes, between Wichita, Kans., on the one hand, and, on the other, points in Oklahoma. Floyd D. Strong, 214 Insurance Building, Topeka, Kansas, for applicants.

No. MC-FC 61439. By order of August 7, 1958, the Transfer Board approved the transfer to William R. Toupin, doing business as Toupin Rigging, Lowell, Mass., of Certificate No. MC 59892, issued

February 27, 1941, to Joseph M. Lassonde, Fall River, Mass., authorizing the transportation of *Used textile machinery and textile mill equipment*, over irregular routes, between points in Rhode Island, those in Massachusetts and Connecticut on and east of U. S. Highway 5, and those in that part of New Hampshire south of a line extending from the Connecticut River along U. S. Highway 4 to East Northwood, N. H., thence along U. S. Highway 202 to the New Hampshire-Maine State line; and between Fall River and New Bedford, Mass., and Pawtucket and Woonsocket, R. I., on the one hand, and, on the other, New Britain, Conn., Newark and Paterson, N. J., and New York and Long Island City, N. Y. Russell B. Curnett, 49 Weybosset Street, Providence 3, R. I., for applicants.

No. MC-FC 61447. By order of August 7, 1958, the Transfer Board approved the transfer to A. G. Williams and Robert J. Williams, a partnership, doing business as Williams Bros. Truck Service, Gridley, Kans., of Certificate No. MC 52960, issued December 21, 1956, to Reta Fay Heffron doing business as Heffron Truck Service, Burlington, Kans., authorizing the transportation of *General Commodities*, excluding household goods and other specified commodities, over regular routes, between points in Missouri and Kansas; various specified commodities between points in Kansas and Missouri; and *Livestock*, and *emigrant movables*, over irregular routes, between Virgil, Kans., and points within 17 miles thereof, Westphalia, Kans., and points within 15 miles thereof, and Burlington, Kans., and points within 25 miles thereof, on the one hand, and, on the other, points in Arkansas, Colorado, Missouri, Nebraska, Oklahoma, and Texas. Lawrence Traffic Bureau, Inc., 625 Live Stock Exchange Building, Kansas City 2, Missouri.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Valencia Orange Reg. 149]

PART 922—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 922.449 *Valencia Orange Regulation 149*—(a) *Findings.* (1) Pursuant to the marketing agreement and Order No. 22, as amended (7 CFR Part 922), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the said marketing agreement and order, as amended, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act by tending to establish and maintain such orderly marketing conditions for such oranges as will provide, in the interests of producers and consumers, an orderly flow of the supply thereof to market throughout the normal marketing season to avoid unreasonable fluctuations in supplies and prices, and is not for the purpose of maintaining prices to farmers above the level which it is declared to be the policy of Congress to establish under the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Valencia oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Valencia oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date

harvest. Such committee meeting was held on August 14, 1958.

(ii) *Order.* (1) The respective quantities of Valencia oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., August 17, 1958, and ending at 12:01 a. m., P. s. t., August 24, 1958, are hereby fixed as follows:

(i) District 1: Unlimited movement;
(ii) District 2: 600,600 cartons;
(iii) District 3: Unlimited movement.

(2) As used in this section, "handled," "handler," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in said marketing agreement and order, as amended.

[Tokay Grape Order 1]

PART 951—TOKAY GRAPES GROWN IN SAN JOAQUIN AND SACRAMENTO COUNTIES IN CALIFORNIA

LIMITATION OF SHIPMENTS

§ 951.321 *Tokay Grape Order 1*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 51, as amended (7 CFR Part 951) regulating the handling of Tokay grapes grown in San Joaquin and Sacramento Counties in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendations of the Industry Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of Tokay grapes, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than August 17, 1958. A reasonable determination as to the supply of, and the demand for, Tokay grapes must await the development of the crop and adequate information thereon was not available to the Industry Committee until August 5, 1958; recommendation as to the need for, and the extent of, limitation of shipments was made at the meeting of said committee on August 5, 1958, after consideration of all available information relative to the supply and demand conditions for such grapes, at which time the recommendations and information were transmitted to the Department; shipments of the current crop of such grapes are expected to begin on or about August 20, 1958, and this section should be applicable to all shipments of such grapes in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., August 17, 1958, and ending at 12:01 a. m. P. s. t., January 1, 1959, no shipper shall ship:

(i) Any Tokay grapes, grown in the production area, unless such grapes are mature and, when tested in accordance with the applicable provisions of section 802 of the Agricultural Code of California, the juice thereof contains soluble solids equal to or in excess of twenty-seven (27) parts to one (1) part of acid.

(2) As used in this section "handler," "shipper," "ship," and "production area," shall have the same meaning as when used in the amended marketing agreement and order, and "mature," shall have the same meaning as when used in the United States Standards for Table Grapes (§§ 51.880 to 51.911 of this title).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: August 13, 1958.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 58-6610; Filed, Aug. 15, 1958; 8:52 a. m.]

[Lemon Reg. 751, Amdt. 1]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF HANDLING

Findings. 1. Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons as hereinafter provided will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication hereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended, is insufficient, and this amendment relieves restriction on the handling of lemons grown in California and Arizona.

Order, as amended. The provisions in paragraph (b) (1) (ii) of § 953.858 (Lemon Regulation 751, 23 F. R. 6101) are hereby amended to read as follows:

(ii) District 2: 372,000 cartons.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: August 13, 1958.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 58-6590; Filed, Aug. 15, 1958; 8:49 a. m.]

[Lemon Reg. 752]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF HANDLING

§ 953.859 *Lemon Regulation 752*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons as hereinafter provided will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based becomes available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for

such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The Committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on August 13, 1958.

(b) *Order.* (1) The respective quantities of lemons grown in California and Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., August 17, 1958, and ending at 12:01 a. m., P. s. t., August 24, 1958, are hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 255,750 cartons;

(iii) District 3: Unlimited movement.

(2) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: August 14, 1958.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 58-6661; Filed, Aug. 15, 1958; 8:59 a. m.]

[Avocado Order 16, Amdt. 2]

PART 969—AVOCADOS GROWN IN SOUTH FLORIDA

LIMITATION OF SHIPMENTS

Findings. 1. Pursuant to the marketing agreement, as amended, and Order No. 69, as amended (7 CFR Part 969) regulating the handling of avocados grown in south Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendations of the Avocado Administrative Committee, established under the aforesaid marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of avocados, as hereinafter provided, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than the date hereinafter set forth. A reasonable determination as to the time of maturity of avocados must await the development of the crop thereof, and adequate information thereon was not available to the Avocado Administrative Committee until August 12, 1958; a determination as to the time of maturity of the varieties of avocados covered by this amendment was made at the meeting of said committee on August 12, 1958, after consideration of all available information relative to such maturity and growing conditions prevailing during the current season for such avocados, at which time the recommendations and supporting information for such maturity regulation were submitted to the Department; such meeting was held to consider recommendation for such regulation after giving due notice thereof, and interested parties were afforded an opportunity to submit their views at this meeting; the provisions of this regulation are identical with the aforesaid recommendations of the committee and information concerning such provisions has been disseminated among the handlers of avocados; and compliance with the provisions of this regulation will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

It is, therefore, ordered, That the provisions of paragraph (b) of § 969.316, as amended (23 F. R. 4349, 5476), are hereby further amended as follows:

1. Revise that portion of Table I applicable to the Trapp, Pinelli, Tonnage, Fairchild, Booth 8, and Nirody varieties to read as follows:

Variety	Date	Minimum weight or diameter	Date	Minimum weight or diameter	Date	Minimum weight or diameter	Date
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Trapp	8-11-58	11 oz 3 9/16 in.	9- 1-58	12 oz 3 7/16 in.	9-14-58	10 oz. 3 3/16 in.	10- 6-58
Pinelli	8-25-58	18 oz.	9- 1-58	16 oz.	9- 8-58	12 oz.	9-29-58
Tonnage	9- 8-58	15 oz 3 5/16 in	9-15-58	14 oz. 3 3/16 in.	9-22-58	11 oz. 3 in.	9-29-58
Fairchild	9- 8-58	16 oz. 3 9/16 in.	9-22-58	14 oz. 3 7/16 in.	10- 6-58	12 oz. 3 3/16 in.	10-20-58
Booth 8	9-22-58	16 oz. 3 7/16 in	10- 6-58	14 oz. 3 5/16 in.	10-20-58	12 oz. 3 3/16 in.	11-17-58
Nirody	9-22-58	18 oz 3 15/16 in.	10- 6-58	15 oz 3 11/16 in.	10-20-58	12 oz. 3 5/16 in.	11- 4-58

2. Revise subparagraph (7) to read as follows:

(7) After the effective time of this section, no handler shall handle any avocados not covered by subparagraphs (2) through (6) of this paragraph except in accordance with the following terms and conditions:

(i) Such avocados shall not be handled prior to 12:01 a. m., e. s. t., September 22, 1958.

(ii) During the period beginning at 12:01 a. m., e. s. t., September 22, 1958, and ending at 12:01 a. m., e. s. t., October 20, 1958, the individual fruit in each lot of such avocados shall weigh at least 15 ounces.

(iii) During the period beginning at 12:01 a. m., e. s. t., October 20, 1958, and ending at 12:01 a. m., e. s. t., December 22, 1958, the individual fruit in each lot of such avocados shall weigh at least 13 ounces.

(iv) Any lot of such avocados may be handled without regard to the minimum weight requirements of this subparagraph (7) if the exterior seed-coat of the individual fruit is of a brown color characteristic of a mature avocado, or if such avocados, when mature, normally change color to any shade of red or purple and any portion of the skin of the individual fruit has changed to the color normal for that fruit when mature.

The provisions of this amendment shall become effective at 12:01 a. m., e. s. t., August 19, 1958.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: August 14, 1958.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 58-6660; Filed, Aug. 15, 1958; 8:59 a. m.]

PART 984—WALNUTS GROWN IN CALIFORNIA, OREGON, AND WASHINGTON

ORDER ESTABLISHING REVISION IN ADMINISTRATIVE RULES AND REGULATIONS

Notice was published in the FEDERAL REGISTER of July 30, 1958 (23 F. R. 5736) that the Secretary was considering the revision of § 984.463 and the addition of a new section, § 984.479, in the administrative rules and regulations (7 CFR 984.401 to 984.488) pertaining to operating procedures of the Walnut Control Board applicable to walnut handlers pursuant to Marketing Agreement No. 105, as amended, and Order No. 84, as amended (7 CFR Part 984), regulating the handling of walnuts grown in California, Oregon, and Washington, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

The notice afforded interested persons an opportunity to file data, views, or arguments concerning the proposals. The prescribed time has expired and one exception has been filed.

The Walnut Control Board has advised that certain walnut handlers in the Northwest wish to dispose of substandard walnuts to livestock feed manufacturers and has requested that the proposed revision of § 984.463 be further amended to accommodate such substandard walnut disposition. Accordingly, § 984.463 herein has been modified to include livestock feed manufacturers as outlets for substandard walnut disposition.

Subsequent to the publication of the aforesaid notice, the Walnut Control Board has also specified WCB Form 20 for use in submitting the reports required by § 984.463 (c). Accordingly, § 984.463 (c) herein has been revised to specify this form for such reports.

After consideration of all available information, it is hereby found that the revision of § 984.463 and the addition of § 984.479 as hereinafter set forth will implement the objectives of the marketing agreement and order, as amended, and, thereby, tend to effectuate the declared policy of the act. It is, therefore, ordered that present § 984.463 be amended and § 984.479 be added to read as follows:

§ 984.463 *Disposition of substandard walnuts.* (a) (1) No handler may dispose of substandard walnuts which he holds except:

(i) By crushing them into oil, feeding them to livestock or otherwise rendering them unfit for use as walnuts; or

(ii) To an approved crusher, livestock feed manufacturer, or livestock feeder at an approved location where the crushing, feed manufacture, or feeding is to take place.

(2) During each marketing year the Control Board shall maintain an approved list of crushers, livestock feed manufacturers, and livestock feeders and of the locations within the area of production to which substandard walnuts may be shipped. The Board may deny approval to any applicant or remove any crusher, feed manufacturer, or feeder from the approved list when such denial or removal is deemed necessary to insure control of substandard walnut disposition.

(3) Applications for approval to crush, manufacture feed, or feed substandard walnuts should be submitted to the Board annually on a form prescribed by the Board and which includes the location and a description of the disposal facilities to be used and a certification to the Control Board and the Secretary of Agriculture that the applicant will:

(i) Crush, manufacture feed, or feed such walnuts at the approved location.

(ii) Use such walnuts for no other purpose than for crushing into oil, manufacturing livestock feed, or livestock feeding.

(iii) Permit such inspection of his premises and of walnuts received and held by him, and such examination of his books and records covering walnut transactions as the Control Board may require.

(iv) Keep a record of his receipts, holdings and use of substandard walnuts available for examination by authorized representatives of the Control Board and the U. S. Department of Agriculture for a period of two years after the end of the marketing year in which the recorded transactions are completed.

(b) Each handler who uses substandard walnuts for oil production or livestock feeding or otherwise renders them unfit for use as walnuts shall report the quantity and use of such substandard walnuts on WCB Form No. 20a not later than the 10th day of each month with respect to the substandard walnuts rendered unfit for use as walnuts during the preceding month.

(c) Each handler who disposes of substandard walnuts to a crusher, livestock feed manufacturer, or livestock feeder approved by the Control Board shall upon shipment furnish to the Control Board on WCB Form 20 "Report of Substandard Walnuts Delivered for Livestock Feed or Oil Manufacture" a report giving the date, name and address of the handler and of the buyer, the quantity of substandard walnuts shipped, the intended use, the location to which shipped, and such other information as the Control Board may require.

§ 984.479 *Books and other records.* (a) Pursuant to § 984.79, each handler shall maintain true and complete records of all shelled and unshelled walnuts or walnut material, by categories, received, held, or disposed of by him. Such records shall include the following:

(1) The names and addresses of the persons from whom received, and the quantities received from each such person.

(2) The names and addresses of the persons to whom disposal is made, and the quantities disposed of to each such person.

(3) The quantities used by the handler in manufacturing; production of oil, livestock feeding, or other outlets.

(4) The quantities held on August 1, and January 1 of each marketing year.

(b) The records shall be maintained in such form as to permit verification of all transactions involved and shall be made available during normal business hours to authorized representatives of the Walnut Control Board or the Secretary of Agriculture.

It is hereby found that good cause exists for not postponing the effective date hereof later than the date of publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that (1) the 1958–59 marketing year for walnuts has already begun and considerable quantities of substandard walnuts are or soon will be available for disposition, and (2) the effectiveness of the minimum standard regulations for shelled walnuts requires control of substandard walnut disposition.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated August 13, 1958, to become effective upon publication in the FEDERAL REGISTER.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

[Reg. SR-401C]

PART 4b—AIRPLANE AIRWORTHINESS; TRANSPORT CATEGORIES

PART 40—SCHEDULED INTERSTATE AIR CARRIER CERTIFICATION AND OPERATION RULES

PART 41—CERTIFICATION AND OPERATION RULES FOR SCHEDULED AIR CARRIER OPERATIONS OUTSIDE CONTINENTAL LIMITS OF UNITED STATES

PART 42—IRREGULAR AIR CARRIER AND OFF-ROUTE RULES

SPECIAL CIVIL AIR REGULATION; SMOKE AND FIRE DETECTORS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 13th day of August 1958.

Special Civil Air Regulation No. SR-401B waived until April 1, 1958, those provisions of the Civil Air Regulations which required the installation of smoke or fire detectors in aircraft cargo compartments of types "B" and "C." Furthermore, that special regulation authorized the Administrator to permit an air carrier, upon application, to operate aircraft without full compliance with the currently effective cargo compartment fire detector requirements if the Administrator found that the air carrier had made a diligent effort to comply with such requirements by April 1, 1958, and that the air carrier had shown that it would comply by a date certain. Since the termination date of SR-401B is April 1, 1959, the Administrator, in an extreme case, could have granted extensions up to that date.

At the present time there are a number of operators requesting extensions beyond those which were granted by the Administrator. It is anticipated that more and more of these requests will be received as the extensions granted by the Administrator terminate and some operators find themselves not in full compliance with the smoke or fire detector requirements.

The Board has been seriously concerned with the delays which have been encountered in the installation of this equipment, and has authorized further extensions only in unusual circumstances.

The justification given in the increasing number of requests for extensions has been that the required parts have not been delivered by the supplier, or the systems installed have not been approved by the Administrator in the time authorized. Such circumstances indi-

cate that the air carriers have made the necessary effort to comply with the smoke or fire detector requirements, and that compliance may be achieved by the operators if the extensions which recently terminated, or will terminate in the near future, were to be reinstated and/or continued in effect for a reasonable period of time.

In view of the foregoing, the Board is making those individual extensions of the smoke or fire detector requirements which were in effect on July 31, 1958, effective until 90 days beyond their present expiration date, subject to the condition that such extensions shall not, in any event, continue beyond April 1, 1959. This regulation will provide for any circumstance which may prevent the installation of approved equipment within the period of the extensions previously granted, and will not be further extended beyond the period granted by this regulation.

The provisions of this special regulation are applicable to all airplanes certificated in the transport category in accordance with Part 4b, effective November 1, 1946, regardless whether these airplanes are used in cargo or passenger service, as well as to all other airplanes having engines rated at more than 600 horsepower each when used in passenger operations in accordance with Part 40, 41, or 42 of the Civil Air Regulations.

Since this superseding Special Civil Air Regulation is substantively the same as SR–401A and SR–401B, which interested persons have had an opportunity to comment on, and since this regulation imposes no additional burden on any person, the Board finds that notice and public procedure are unnecessary and that good cause exists for making this regulation effective on less than 30 days' notice.

In consideration of the foregoing, the Civil Aeronautics Board hereby makes and promulgates the following Special Civil Air Regulation, effective August 13, 1958.

Contrary provisions of Parts 4b, 40, 41, and 42 of the Civil Air Regulations notwithstanding, any extension of the date for compliance with the smoke or fire detector requirements of those parts which was in effect on July 31, 1958, shall be effective for 90 days beyond its present expiration date: *Provided*, That such authorization shall not continue beyond April 1, 1959.

This regulation supersedes Special Civil Air Regulation No. SR–401B and shall terminate on April 1, 1959, unless sooner superseded or rescinded by the Board.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 603, 604, 52 Stat. 1007, 1009, 1010, as amended; 49 U. S. C. 551, 553, 554)

Effective: August 13, 1958.

Adopted: August 13, 1958.

By the Civil Aeronautics Board.

[SEAL] PHYLLIS T. KAYLOR, *Acting Secretary.*

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 6820]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

AUTOMATIC CANTEEN CO. OF AMERICA

Subpart—*Acquiring stock, or assets, etc., of competitor:* § 13.5 *Acquiring stock, or assets, etc., of competitor.*

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interprets or applies sec. 7, 38 Stat. 731; 15 U. S. C. 18) [Cease and desist order, Automatic Canteen Company of America, Chicago, Ill., Docket 6820, June 24, 1958]

This proceeding was heard by a hearing examiner on the complaint of the Commission charging the nation's largest operator of vending machines, with main office in Chicago, with acquiring in 1955 the vending machine subsidiaries of a major competitor in New York City, at that time the largest operator of cigarette vending machines in the United States, thereby violating section 7 of the Clayton Act.

Following acceptance of an agreement providing for entry of a consent order, the hearing examiner made his initial decision and order to cease and desist which became on June 24 the decision of the Commission.

The order to cease and desist is as follows:

It is ordered, That respondent, Automatic Canteen Company of America shall divest itself absolutely, in good faith, of the following vending machine operating branches, subsidiaries, or affiliates, including machine locations, and vending machines owned by each and the contracts relating thereto, which branches, subsidiaries, or affiliates were formerly operated by The Rowe Corporation prior to the merger:

Rowe Service Co., Inc.—Downtown Los Angeles Operations, Los Angeles, Calif.; California Cigarette Concessions, Inc., Los Angeles, Calif.; Rowe Cigarette Service Corp., San Diego, Calif.; San Jose Cigarette Service, Inc., (Campbell) San Jose, Calif.; Cigarette Service Co., Inc., Denver, Colo.; Wagg Cigarette Service Co., Louisville, Ky.; Syracuse Cigarette Service Co., Inc., Syracuse, N. Y.; Allegheny Cigarette Service Co., (Wilkinsburg) Pittsburgh, Pa.; Ace Cigarette Service Co., Inc., Brackenridge, Pa.; Ace Wheeling Cigarette Service Co., Wheeling, West Va.; Acme Cigarette Service Co., Greensburg, Pa.; Acorn Cigarette Service Co., Aliquippa, Pa.; Uniontown Cigarette Service Co., Uniontown, Pa.

The Downtown Los Angeles Operations of Rowe Service Co., Inc., as used hereinabove, is defined as that part of the operating branch known as the downtown section of Rowe Service Co., Inc., Los Angeles, California, which is located in the City of Los Angeles, California, and is bounded on the West by Alvarado Street, on the South by Washington Boulevard, on the North by a straight line running East from the intersection of Alvarado and Avalon Streets approximately four miles to Valley Boulevard, and on the East by a straight line from Valley Boulevard to Washington Boulevard, containing nineteen square miles, more or less.

Such divestiture shall be completed within one year from the date of this order and shall consist of the sale of all stock and assets, real and personal, of said branches, subsidiaries, or affiliates which stock and assets are owned by respondent, or its subsidiaries. Respondent shall not sell any such stock or such assets, directly or indirectly, to any officer, director, employee, distributor, agent or subsidiary of, or anyone otherwise directly or indirectly under the control or influence of, respondent or any of its officers or directors.

It is further ordered, That since the Syracuse Cigarette Service Co., Inc., Syracuse, New York, has been dissolved, all assets formerly belonging thereto shall be divested in like manner as other divestitures required by this order, except that vending machines, not exceeding forty in number, located in industrial plants, may be retained.

It is further ordered, That for a period of ten years from the date of the issuance of this order by the Federal Trade Commission, respondent shall cease and desist from acquiring, directly or indirectly, through subsidiaries or otherwise, by merger, consolidation, purchase of physical assets, or acquisition of stock or other share capital, any interest in any corporation engaged in the business of manufacturing vending machines whose product has competed or competes to any extent with any vending machine manufactured or assembled by respondent, its subsidiaries or affiliates.

It is further ordered, That for a period of ten years from the date of the issuance of this order by the Federal Trade Commission, respondent shall cease and desist from taking for its own use, or selling, to respondent's subsidiaries, franchised distributors or the former merchandising companies of The Rowe Corporation, more than fifty percent of the total annual production of each type vending machine from the facilities now operated as the Rowe Manufacturing Company, Inc., unless said machines in excess of that percentage have been made available in good faith to all other prospective purchasers at respondent's regular prices and terms and conditions of sale.

It is further ordered, That after the date of the issuance of this order by the Federal Trade Commission, respondent shall cease and desist from acquiring, directly or indirectly, the whole or any part of the stock or other share capital, or the whole or any part of the assets of another corporation engaged in commerce, where in any line of commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly.

By "Decision of the Commission", etc., report of compliance was required as follows:

It is ordered, That respondent, Automatic Canteen Company of America, a corporation, shall, within one year after service upon it of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with the order contained in said initial decision.

Issued: June 23, 1958.

By the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary.*

[F. R. Doc 58–6583; Filed, Aug. 15, 1958; 8:47 a. m.]

[Docket 6515]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

CHICAGO SCHOOL OF NURSING, DIVISION OF CAREER INSTITUTE

Subpart—*Advertising falsely or misleadingly:* § 13.115 *Jobs and employment service;* § 13.143 *Opportunities.*

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, W. Lane Schulze et al. trading as Chicago School of Nursing, Division of Career Institute, Chicago, Ill., Docket 6515, June 10, 1958]

In the Matter of W. Lane Schulze and W. C. Schulze II, Copartners Trading Under the Name of Chicago School of Nursing, Division of Career Institute

This case was heard by a hearing examiner on the complaint of the Commission charging operators in Chicago of a mail order course in auxiliary nursing with misrepresenting the completeness of the course, the benefits and opportunities available to graduates, etc.

After the usual proceedings, the hearing examiner made his initial decision, finding most of the charges unproven, and including order to cease and desist. Cross-appeals filed by the respective counsel were denied, and the Commission on June 10 adopted the initial decision as the decision of the Commission.

The order to cease and desist is as follows:

It is ordered, That respondents, W. Lane Schulze and W. C. Schulze II, individually and as copartners, trading under the name of Chicago School of Nursing, Division of Career Institute, their agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution of a course of instruction in auxiliary nursing, including practical nursing and nurse's aide, or any similar or related course of instruction in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing, directly or by implication, that persons completing respondents' course of instruction are eligible for employment or will be employed as practical nurses by hospitals or institutions unless it is clearly revealed that such persons will not be eligible for employment and will not be employed as practical nurses in the States of Arkansas, Idaho, Louisiana, Nevada or New York, or in hospitals in the State of Rhode Island, or in any other State that may now have, or may hereafter enact, a law making it mandatory for practical nurses to be licensed.

By "Decision of the Commission", report of compliance was required as follows:

It is further ordered, That the respondents, W. Lane Schulze and W. C. Schulze II, shall, within sixty (60) days after service upon them of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with the order contained in said initial decision.

Issued: June 10, 1958.

By the Commission.

[Docket 6919]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

DAN DEE PRETZEL & POTATO CHIP CO. ET AL.

Subpart—*Discriminating in price under section 2, Clayton Act, as amended*—Price discrimination under 2 (a): § 13.715 *Charges and price differentials; (Discriminating in price under section 2, Clayton Act, as amended)*—Payment for services or facilities for processing or sale under 2 (d): § 13.824 *Advertising expenses; (Discriminating in price under section 2, Clayton Act, as amended)*—Furnishing services or facilities for processing, handling, etc., under 2 (e): § 13.835 *"Demonstrators".*

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 2, 38 Stat. 730, as amended; 15 U. S. C. 13) [Cease and desist order, Dan Dee Pretzel & Potato Chip Company (Cleveland, Ohio), et al., Docket 6919, June 25, 1958]

In the Matter of Dan Dee Pretzel & Potato Chip Company, a Corporation, Dan Dee Northern Ohio Corporation, a Corporation, and Dan Dee West Virginia Corporation, a Corporation

This proceeding was heard by a hearing examiner on the complaint of the Commission charging a manufacturer and its sales corporation with discriminating in price in the sale of their pretzels, potato chips, and corn chips, specifically with violating section 2 (a) of the Clayton Act by giving certain large retail customers a five per cent or five per cent plus two per cent discount from the published wholesale prices charged other customers, and by granting certain jobbers a 25 per cent discount from such wholesale prices while their nonfavored competitors received only 20 per cent; violating section 2 (d) of the same Act by granting to some customers but not to their competitors special advertising allowances amounting to three per cent of purchases; and violating section 2 (e) by furnishing some stores, but not their competitors, with demonstrators who gave coupons to customers entitling them to a 10 percent price reduction for which they reimbursed the stores.

Following acceptance of an agreement providing for entry of a consent order, the hearing examiner made his initial decision and order to cease and desist. Respondents filed a motion requesting a stay of the effective date thereof pending adoption by the industry of trade practice rules, which was denied, and on June 25 the initial decision became the decision of the Commission.

The order to cease and desist is as follows:

It is ordered, That respondents Dan Dee Pretzel & Potato Chip Company, a corporation, and Dan Dee West Virginia Corporation, a corporation, their officers, representatives, agents, and employees, directly or through any corporate or other device in connection with the offering for sale, sale or distribution of pretzels, potato chips, corn chips, or related products in commerce as "commerce" is defined in the Clayton Act, do forthwith cease and desist from:

1. Discriminating in the price of such products of like grade and quality by selling to any one purchaser at net prices higher than the net prices charged to any other purchaser who in fact competes with the purchaser paying the higher price in the resale and distribution of respondents' products.

2. Paying or contracting for the payment of anything of value to or for the benefit of any of respondents' customers as compensation or in consideration of any service or facility furnished by or through such customer in connection with the processing, handling, sale or offering for sale of any of respondents' products unless such payment or consideration is made available on proportionally equal terms to all of respondents' other customers competing in the distribution of such products.

3. Discriminating in favor of any of respondents' purchasers against any of their other purchasers of said products bought for resale by contracting to furnish or furnishing, or by contributing to the furnishing of any services or facilities connected with the processing, handling, sale, or offering for sale of such products unless such services or facilities are accorded to all of respondents' purchasers on proportionally equal terms.

It is further ordered, That the complaint be, and it hereby is, dismissed without prejudice as to respondent Dan Dee Northern Ohio Corporation.

By "Order Denying Motion for Stay of Effective Date of Initial Decision, and Decision of the Commission", etc., report of compliance was required as follows:

It is further ordered, That respondents, Dan Dee Pretzel & Potato Chip Company and Dan Dee West Virginia Corporation, shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in

which they have complied with the order to cease and desist.

Issued: June 27, 1958.

By the Commission.

[SEAL] ROBERT M. PARRISH,
Secretary.

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 54662]

PART 8—LIABILITY FOR DUTIES, ENTRY OF IMPORTED MERCHANDISE

PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

EXAMINATION OF MERCHANDISE BEFORE ENTRY FOR CONSUMPTION OR WAREHOUSE AND REIMBURSABLE SERVICES

In the case of shipments in transit under bond, applications are sometimes made by consignees or their agents in this country for permission to examine, sample, weigh, or perform other operations on the merchandise. Such examination, sampling, weighing, and so forth are usually not necessary to satisfy any United States Government requirement but are desired solely to enable the United States consignee or forwarder to check the shipment for his own purposes before it is forwarded to its destination.

In the past, the Bureau, in denying such applications pointed out that the granting thereof, with the consequent necessity of having a customs officer or officers in attendance during the performance of the operation or operations, would neither serve any purpose for the collection or protection of the revenue of the United States nor further any purpose expressly authorized by law.

However, consignees or forwarders of in-transit shipments have continued from time to time to make such applications for various legitimate business reasons, such as for the purpose of verifying that the merchandise meets the specifications of foreign buyers under contracts of sale to them. A special study of the problem was made, therefore, to see whether a more satisfactory solution could be reached for both the Government and the applicants.

The examination, sampling, weighing, or other processing of merchandise in transit under bond would appear to be for the principal benefit and to serve the business interests of the consignee or forwarder of such merchandise. To a much lesser extent it would be of incidental benefit to the Government in its revenue protection function, particularly where loss or diversion occurs during the transportation requiring the collection of duty or liquidated damages, but such incidental benefit would not of itself warrant examination, sampling, or other related operation on the Government's own initiative.

Since the Government is authorized to permit the above-described operations on merchandise in customs custody even though the performance of the operations would not be warranted solely for governmental purposes, the services of customs officers or employees required in connection with the supervision of any such operation with respect to merchandise in customs custody in transit should properly be charged to the consignee or forwarder making application to perform such operation.

Such applications may, therefore, be granted provided the costs to the Government including the salary and expenses of customs officers or employees assigned to supervise are paid by the applicant. This conforms with the sense of the Congress as expressed in section 501 of the Independent Offices Appropriation Act, 1952 (5 U. S. C. 140).

Notice of the proposed amendment of §§ 8.5 and 24.17 of the Customs Regulations to permit such examination, etc. of merchandise was published in the FEDERAL REGISTER on July 24, 1956 (21 F. R. 5536) and a revised notice was published in the FEDERAL REGISTER on December 8, 1956 (21 F. R. 9746), pursuant to section 4 of the Administrative Procedure Act (5 U. S. C. 1003).

Consideration of the data, views, and inquiries received relating to the proposed amendments indicate a necessity for clarification of the types of operations which collectors of customs may permit under the amended § 8.5.

It is the purpose of this regulation to authorize collectors of customs to permit only such operations in addition to examining, sampling and weighing as are made necessary by reason of an emergency, provided the operation does not constitute a manufacture and to limit its application to merchandise entered or withdrawn for transportation in bond or for exportation. The Bureau of Customs may permit any other operations not constituting a manufacture under the changed regulation on merchandise so entered or withdrawn when neither the protection of the revenue nor the proper conduct of customs business requires that such operation be done in a customs bonded warehouse.

Accordingly, the Customs Regulations are hereby amended as follows:

1. Section 8.5 is amended as follows:

The headnote and paragraphs (a) and (b) are amended to read as follows:

§ 8.5 *Examination of merchandise before entry for consumption or warehouse.* (a) Except as provided for in § 14.5 (a) of this chapter or unless an examination is required for the exclusive benefit of the United States or is permitted in accordance with paragraph (b) of this section, no imported merchandise shall be opened, examined, or inspected until it has been entered under some form of an entry for consumption or warehouse.

(b) As a bona fide incident to exportation or further transportation, merchandise entered or withdrawn for transportation in bond to another port or place in the United States or for exportation may, upon written application by the consignee or his agent be permitted by the collector to be examined, sampled, weighed, or subjected to an operation not constituting a manufacture required by reason of an emergency, under conditions set forth in subparagraphs (2) to (5) of this paragraph. Merchandise entered or withdrawn as prescribed in the preceding sentence may be subjected to any other operation not constituting a manufacture if neither the protection of the revenue nor the proper conduct of customs business requires it to be done in a customs bonded warehouse and the following conditions are met:

(1) A special application by the consignee or his agent is submitted to the Bureau of Customs with the recommendation of the collector concerned and is approved by the Bureau;

(2) The operation permitted is executed under customs supervision;

(3) The application is supported by a legitimate business reason for the request;

(4) If the merchandise is in possession or joint possession of a carrier, the concurrence of the carrier is obtained; and

(5) The Government is reimbursed for the compensation, computed in accordance with § 19.5 (b) of this chapter, and other expenses of the customs officer or employee supervising the action permitted.

2. Footnote 4 to § 8.5 (b) is amended by inserting "of perishable merchandise" after the word "inspection" where it first appears.

(R. S. 161, 251, sec. 624, 46 Stat. 759; 5 U. S. C. 22, 19 U. S. C. 66, 1624)

3. Section 24.17 (a) is amended by adding a new subparagraph designated (11) reading as follows:

(11) When a customs officer or employee is assigned to supervise examination, sampling, weighing, or other operation on merchandise in accordance with § 8.5 (b) of this chapter, the compensation and other expenses of such officer or employee shall be reimbursed to the Government by the party in interest except when a warehouse proprietor is liable therefor.

(R. S. 161, 251, secs. 524, 624, 46 Stat. 741, as amended, 759; 5 U. S. C. 22, 19 U. S. C. 66, 1524, 1624)

The amendments set forth above shall become effective 30 days after the date of publication in the FEDERAL REGISTER.

[SEAL] C. A. EMERICK,
Acting Commissioner of Customs.

Approved: August 11, 1958.

A. GILMORE FLUES,
Acting Secretary of the Treasury.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 1714]

[Idaho 08506]

IDAHO

WITHDRAWING PUBLIC LANDS IN BITTERROOT NATIONAL FOREST FOR USE OF FOREST SERVICE AS ADMINISTRATIVE SITES AND PUBLIC CAMPGROUNDS

By virtue of the authority vested in the President by the act of June 4, 1897 (30 Stat. 34, 36; 43 U. S. C. 473) and otherwise, and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public lands within the Bitterroot National Forest in Idaho are hereby withdrawn from all forms of appropriation under the public land laws, including the mining but not the mineral-leasing laws, nor disposals under the act of July 31, 1947 (61 Stat. 681; 69 Stat. 367; 30 U. S. C. 601–604) as amended, and reserved for use of the Forest Service, Department of Agriculture, for administrative sites and public campgrounds:

BOISE MERIDIAN

BITTERROOT NATIONAL FOREST

Lolo Bar Guard Station Administrative Site

T. 24 N., R. 13 E.,
Sec. 16, E½SW¼ and E½W½SW¼, (unsurveyed), those parts lying north of the Salmon River.

The areas described aggregate approximately 65 acres.

Magruder Ranger Station Administrative Site

T. 27 N., R. 14 E.,
Sec. 3, W½E½SW¼, E½W½SW¼, W½SE¼NW¼, and E½SW¼NW¼ (unsurveyed).

The areas described aggregate approximately 120 acres.

Deep Creek Public Campground

T. 27 N., R. 14 E.,
Sec. 3, N½NW¼NE¼ and E½NE¼NW¼ (unsurveyed).
T. 28 N., R. 14 E.,
Sec. 34, S½SW¼SE¼ (unsurveyed).

The areas described aggregate approximately 60 acres.

Magruder Public Campground.

T. 28 N., R. 14 E.,
Sec. 29, SW¼NW¼ and E½NW¼NW¼ (unsurveyed).

The areas described aggregate approximately 60 acres.

Paradise Guard Station Administrative Site

T. 29 N., R. 14 E.,
Sec. 9, W½SW¼NE¼, SE¼NW¼, NE¼SW¼, E½NW¼SW¼, E½SW¼SW¼, and W½SE¼SW¼ (unsurveyed).

The areas described aggregate approximately 160 acres.

The areas withdrawn by this order total approximately 465 acres.

This order shall be subject to existing withdrawals for other than national forest purposes so far as they affect any of the above-described lands, and shall take precedence over, but not otherwise affect the existing reservation of the lands for national forest purposes.

ROGER ERNST,
Assistant Secretary of the Interior.

AUGUST 11, 1958.

Chapter II—Bureau of Reclamation, Department of the Interior

PART 411—SALE AND EXCHANGE OF LAND IN FARM UNITS OWNED BY THE UNITED STATES, COLUMBIA BASIN PROJECT, WASHINGTON

SALES AND EXCHANGES OF PORTIONS OF FARM UNITS

Section 411.4 is amended to read as follows:

§ 411.4 *Sales and exchanges of portions of farm units.* If the owner or contract purchaser holds a farm unit or units together with portions of one or more farm units, or holds only portions of more than one farm unit or has heretofore purchased a farm unit from the United States, the cumulative total acreage transferred to a common ownership at any time by the sale or exchange of a portion of a farm unit or units owned by the United States shall not exceed one-half of the irrigable acreage of the largest farm unit conformed by such sales or exchanges, except that if the owner or contract purchaser holds only portions of one or more farm units and has not heretofore purchased a farm unit from the United States, and desires to conform only a single farm unit the portion owned by the United States of one of the farm units may be sold to or exchanged with the owner or contract purchaser even though such sale or exchange may exceed one-half of the irrigable acreage of the unit. In no case may a portion of a farm unit owned by the United States be sold to or exchanged with the owner or contract purchaser of the remaining portion where the sale or exchange is not in the interest of sound project development or where it will not place the entire farm unit in a single ownership to which water may be delivered under the regulations in Part 404 of this chapter.

(Sec. 8, 57 Stat. 20; 16 U. S. C. 835c-4)

The purpose of the foregoing amendment is to permit the sale of a portion of a farm unit by the United States to the owner of the remaining portion where the portion owned by the United States is more than one half of the unit and only where the owner of the remaining portion does not own a farm unit or portions of farm units other than the one for which the sale is to be completed. Also, the amendment is to make clear that sales of portions of units by the United States are to be cumulative as to the owner for the purpose of this section. The restrictions applicable to an owner of a conformed unit are also made appli-

cable to a person who has heretofore acquired a farm unit from the United States but has disposed of the unit. The amendment also includes all matters covered by this section as originally promulgated and published.

This amendment is to become effective immediately upon its publication in the FEDERAL REGISTER inasmuch as the original section of this part was effective May 29, 1958.

FRED A. SEATON,
Secretary of the Interior.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 101]

COTTON WAREHOUSES

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given, in accordance with section 4 of the Administrative Procedure Act (5 U. S. C. 1003), that the Department of Agriculture is considering amending the regulations relating to cotton warehouses (7 CFR Part 101, as amended) under the United States Warehouse Act (7 U. S. C. 241 et seq.) in the following respects:

It is proposed to:

1. Amend § 101.2 by adding the following new definition:

(w) *Board of Cotton Examiners.* A board of cotton examiners properly qualified and designated as such under the regulations (Part 28 of this chapter) under the United States Cotton Standards Act.

2. Amend § 101.16 (a) by changing subparagraphs (6) and (8) and adding a new subparagraph (9) therein, to read, respectively:

(6) A statement, conspicuously placed, whether or not the cotton is insured, and, if insured, to what extent, by the warehouseman, against loss or damage by fire, lightning and other risks;

(8) A blank space designated for the purpose in which the grade and/or other classification may be stated; and

(9) A statement to the effect that the weight was determined by a weigher licensed under the United States Warehouse Act.

3. Amend § 101.16 (c) and (d) to read, respectively:

(c) Every negotiable receipt issued for cotton stored in a licensed warehouse shall, in addition to complying with paragraphs (a) and (b) of this section, embody within its written or printed terms the following: (1) If the cotton covered by such receipt was classified by a licensed classifier or a board of cotton examiners, a statement to that effect, and (2) a form of indorsement which may be used by the depositor, or his authorized agent, for showing the ownership of, and liens, mortgages, or other encumbrances on, the cotton covered by the receipt.

(d) Whenever the grade or other class of the cotton is stated in a receipt issued for cotton stored in a licensed warehouse, such grade or other class shall be determined by a licensed classifier of a board of cotton examiners upon the basis of a sample drawn in accordance with § 101.71, and shall be stated in the receipt in accordance with §§ 101.68 to 101.74.

4. Amend § 101.23 (a) and (b) by substituting for the phrase "and/or flood" the phrase "and other risks."

5. Amend § 101.38 by changing the first sentence to read: "All cotton, before being stored in a licensed warehouse, shall be weighed at the warehouse by a licensed weigher, and the weight so determined shall be stated on the warehouse receipt."

6. Amend § 101.47 by adding at the end thereof the following: "The licensed warehouseman shall also keep a copy of each Form A memorandum and Form C certificate issued by a board of cotton examiners which forms a basis of any receipt issued by the warehouseman. All certificates and memorandums within this section shall be retained in the records of the licensed warehouseman for a period of one year from the date of their issuance and thereafter until the receipts based on such certificates have been surrendered and cancelled."

7. Amend § 101.48 by inserting in the first sentence the phrase "or to be stored" before the phrase "in the licensed warehouse" and by deleting the word "sole" from the third sentence.

8. Amend the first and second sentences in § 101.49 to read, respectively: "All samples drawn from cotton in the custody of a licensed warehouseman for storage in a licensed warehouse shall be drawn by licensed samplers in the employ of the licensed warehouseman and at his direction and under his supervision, except when they are drawn as provided in § 101.79 or are drawn by or under the direction of a cotton exchange inspection agency in accordance with the regulations in Part 27 of this chapter under the cotton futures legislation (26 U. S. C. 4851 et seq.) or are drawn under the supervision of a Cotton Division employee in accordance with the regulations in Part 28 of this chapter under the United States Cotton Standards Act (7 U. S. C. 51 et seq.). Each sample shall be appropriately marked to show the tag number of the bale of cotton from which it was drawn and the date of sampling."

9. Amend § 101.57 to read:

§ 101.57 *Duties of sampler, classifier and weigher.* Each licensed classifier or weigher whose license remains in effect shall, without discrimination, as soon as practicable, and upon reasonable terms, classify or weigh and certificate the class or weight, respectively, of cotton stored or to be stored in a licensed warehouse to which his license applies, if such cotton is offered to him under such conditions as permit the proper performance of such functions; except that no class or weight certificate need be issued when the class or weight so determined is entered on a receipt by the licensed classifier or weigher making the determination thereof. Each licensed sampler shall sample cotton stored or to be stored in a licensed warehouse for which he holds a license, in accordance with § 101.48. Each licensed sampler, classifier, and weigher shall give preference to persons who request his services as such over persons who request his services in any other capacity. No class or weight certificate shall be issued under the act for cotton not in the custody of a licensed warehouseman for purposes of storage in a licensed warehouse, nor shall cotton not in the custody of such a warehouseman for such purpose be sampled by a licensed sampler acting as such.

10. Amend § 101.58 (b) to read:

(b) Form A memorandums and Form C certificates issued by a board of cotton examiners and class certificates issued by licensed classers under the United States Cotton Standards Act (7 U. S. C. 51 et seq.) shall be deemed sufficient for the purposes of the United States Warehouse Act and the regulations in this part, if the samples on which they are based were drawn in accordance with applicable requirements of § 101.71, and, in case of a class certificate issued by such a licensed classer, if the classer holds an unsuspended and unrevoked license under each of said acts.

11. Amend § 101.70 (b), (c) (5) and (7) to read, respectively:

(b) If cotton be reduced in value, by reason of the presence of extraneous matter of any character or irregularities or defects below its grade or below its apparent length of staple according to the official cotton standards of the United States, the grade or length of staple from which it is so reduced, and the grade or length of staple to which it is so reduced, and the quality or condition which so reduces its value shall be determined and stated.

(c) • • •

(5) *Repacked cotton.* Cotton that is composed of factors', brokers', or other samples, or of loose or miscellaneous lots collected and rebaled, or cotton in a bale which is composed of cotton from two or more smaller bales or parts of bales.

• • • • • •

(7) *Mixed packed cotton.* Cotton in a bale which, in the samples drawn therefrom, shows (i) a difference of three or more grades, or (ii) a difference of three or more color gradations, or (iii) a difference of two or more grades and two or more color gradations, or (iv) a difference in length of staple of one-eighth inch or more.

12. Amend § 101.71 by inserting, after the word "classifier," the phrase "or board of cotton examiners," and by adding the following sentence at the end of the section: "Samples submitted to a board of cotton examiners for issuance of Form A memorandums and samples upon which classification is to be determined by licensed classifiers for purposes of the Act and the regulations in this part shall be drawn by samplers licensed under the Act and said regulations and in accordance with § 101.72."

13. Amend § 101.72 to read:

§ 101.72 *Samples.* Each sample shall be approximately 6 ounces in weight, not less than 3 ounces of which are to be drawn from each side of the bale. Each sample must be representative of the bale from which drawn. Samples shall not be dressed or trimmed and shall be carefully handled in such manner as not to cause loss of leaf, sand, or other material, or otherwise change their representative character. Any sample which does not meet these requirements may be rejected.

14. Amend § 101.73 to read:

§ 101.73 *Lower grade (of two samples) to determine classification.* If a sample drawn from one portion of a bale is lower in grade or shorter in length than one drawn from another portion of such bale, the classification of the bale shall be that of the sample showing the lower grade or shorter length.

15. Amend § 101.79 (b) by changing the second sentence to read: "Such samples shall be drawn in accordance with § 101.72."

Present regulations for cotton warehouses under the United States Warehouse Act do not require that the weight, grade or other class stated on a licensed warehouse receipt be established by a weigher or classifier licensed under the Act. Custom with respect to weighing and classification of cotton has changed. Weights in practically all instances are determined by weighers licensed under the Act, and where grade or other class of cotton is stated on a warehouse receipt such grade or class is customarily established by a classifier licensed under the Act or a U. S. Department of Agriculture board of cotton examiners. The primary purpose of the proposals stated above is to establish better control over the weighing and classification of cotton stored in licensed warehouses in view of this change in trade practices. Other minor changes are also proposed as indicated above.

Any interested person who wishes to submit written data, views, or arguments concerning the proposed amendments may do so by filing them with the Director, Special Services Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D. C., not later than 30 days after publication of this notice in the FEDERAL REGISTER.

Done at Washington, D. C., this 8th day of July 1958.

[SEAL] GEORGE A. DICE,
Director,
Special Services Division,
Agricultural Marketing Service.

Agricultural Research Service

[9 CFR Part 131]

[Docket No. AO16-A7]

HANDLING OF ANTI-HOG-CHOLERA SERUM AND HOG-CHOLERA VIRUS

DECISION WITH RESPECT TO PROPOSED AMENDMENT TO MARKETING AGREEMENT AND ORDER, AS AMENDED

Pursuant to Public Law 320, 74th Congress, approved August 24, 1935 (49 Stat. 781; 7 U. S. C. 851 et seq.) as amended by Public Law 85-574, approved July 31, 1958 (72 Stat. 454), hereinafter referred to as the "act," and the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders applicable to anti-hog-cholera serum and hog-cholera virus (9 CFR Part 132), a public hearing was held at Chicago, Illinois on August 6, 1958, pursuant to notice thereof published in the FEDERAL REGISTER (23 F. R. 5879) upon proposed amendment to the Marketing Agreement, as amended, hereinafter referred to as the "Marketing Agreement," and to the order, as amended (9 CFR Part 131), hereinafter referred to as the "order," regulating the handling of anti-hog-cholera serum and hog-cholera virus.

The material issues presented on the record are (1) the date upon which manufacturers shall have the emergency reserve supply of completed serum specified in section 58 (b) of the act, as amended; (2) the procedure for the fixing of a date between January 1 and May 1 by the Secretary for such serum reserve; (3) the requirements for reporting such serum reserve by each manufacturer; (4) definition of the terms "Secretary," "completed serum," and "inventory in his own possession;" and (5) the need for immediate action by the Secretary with respect to issuance of a decision.

Findings and conclusions. Upon the basis of evidence adduced at the hearing and on the record thereof, it is hereby found and concluded that:

1. The marketing agreement and order should be amended to provide that each manufacturer shall have in inventory in his own possession on April 1 of each year a reserve supply of completed serum equivalent to not less than 40 per centum of his previous year's sales of all serum, except that upon written application by a manufacturer filed before September 1 of the preceding year, the Secretary may fix another date between January 1 and May 1 on which such manufacturer shall have such inventory for a particular year if the Secretary finds that such action tends to effectuate the purposes of the act. Provision should also be made that serum used in computing the reserve supply of any manufacturer should not again be used in computing the reserve supply of any other manufacturer.

The present provisions of the marketing agreement and the order require each manufacturer to have on hand on May 1 of each year a reserve supply of completed serum equivalent to not less than 40 per centum of his previous year's sales, which requirement was issued pursuant to the original provisions of section 58 (b) of the act. The amendment to section 58 (b) of the act, approved July 31, 1958, provides that a marketing agreement may contain terms and conditions requiring each manufacturer to have in inventory in his own possession on April 1 of each year a reserve supply of completed serum equivalent to not less than 40 per centum of his previous year's sales of all serum, except that it may provide that upon written application by a manufacturer filed before September 1 of the preceding year, the Secretary may fix another date between January 1 and May 1 on which such manufacturer shall have such inventory if the Secretary finds that such action will tend to effectuate the purposes of the act. The Secretary may impose such terms and conditions upon granting any such application as he finds necessary to effectuate the purposes of the act. It further provides that serum used in computing the required reserve supply of any manufacturer shall not again be used in computing the reserve supply of any other manufacturer.

This amendment to the act makes necessary the amendment of the marketing agreement and the order to specify April 1 as the compliance date for the serum reserve to bring them into conformity with the provisions of the act, as amended, with respect to the time that each manufacturer shall have the required reserve supply of completed serum. Unusual circumstances with respect to the incidence of hog cholera nationally and in a particular area; the adequacy and availability of serum nationally and in a particular area; a difference in the farrowing season in a particular area from the national pattern; and fluctuations in the national pig crop and the percentage of inoculation of such pig crop may warrant the fixing of a date other than April 1 on which a manufacturer shall have the required serum reserve. Therefore, the marketing agreement and the order should provide authority for the Secretary to fix a different date between January 1 and May 1 on which a manufacturer shall have his required serum reserve. In order that there be no uncertainty in the supply of serum on a national basis, it is necessary that the Secretary's decision on an application for a date other than April 1 be final.

2. The marketing agreement should be amended to provide specific procedures to follow in the filing of and rendering a decision on an application by a manufacturer for a date other than April 1 on which a manufacturer shall have the required reserve supply of completed serum. It should set forth the time and place of filing, the form and content of such application and the basis for and issuance of a decision thereon. Provision should also be made that the Secretary may publish in the FEDERAL REGISTER a notice of such filing, affording interested persons opportunity to file written data, views and arguments with respect to any or all of such applications, and, upon the granting of an application, or applications, publish the name of each such applicant and the date set on which he shall have the required reserve supply of serum.

The setting of a date other than April 1 of each year on which a manufacturer shall have the required reserve supply of completed serum will be conditioned on whether the setting of such date will tend to effectuate the purposes of the act. The reserve supply of serum is for the purpose of having an adequate supply of serum immediately available at all times when the disease of hog cholera is most prevalent in order to guard against a widespread epizootic. Serious outbreaks generally occur in the late spring and summer months and unless checked spread very rapidly. The greater the percentage of the pig crop inoculated the easier it is to check the disease and consequently there is less danger of an uncontrolled outbreak, and, conversely, the less the percentage of the pig crop inoculated the greater the danger of a serious outbreak. Among the factors that should be considered in granting or denying an application, therefore, are the area of distribution of serum by applicant, the incidence of the disease of hog cholera in his area of distribution and its incidence nationally; the farrowing seasons of the pig crop nationally and in said area of distribution; the percentage of the national pig crop inoculated; and conditions with respect to the available supply of serum nationally and in said area of distribution. Consideration should be given to all relevant and material facts submitted by applicant and all other available information, including information and data on file in the Department. Consideration should also be given to any written data, views and arguments submitted by interested persons.

Because of the numerous factors, data and information to be considered in rendering a decision on an application; the possibility of having to obtain additional information from applicant and the fact that some period must necessarily elapse between the filing of an application and a decision thereon, it is believed that the marketing agreement and order should not specify a particular time in which a decision should be rendered. A time limit could result in denial of an application because of insufficient data submitted by the applicant which could be produced upon request therefor except for the lapsing of the specified period of time. A decision on an application should be rendered as expeditiously as possible under the circumstances in each particular case. The time required for an applicant to manufacture his serum reserve should be given consideration in expediting the decision on such application.

It is recognized that if the provisions with respect to the fixing of a date other than April 1 on which a manufacturer shall have his serum reserve is to have any force and effect for the year 1959, it will be necessary to receive applications for the fixing of such date before September 1, 1958, and to engage in collecting data and information with respect thereto during the period necessary for the signing of the marketing agreement herein by the required number of handlers and the issuance of the final order pursuant thereto. Therefore, it is contemplated that a decision on such applications will be issued immediately following the effective date of such order.

3. The marketing agreement and the order, should be amended to require each manufacturer to file with the Secretary a sworn report, on a form furnished by and available from the Secretary, setting forth the cubic centimeter volume of completed serum such manufacturer had in inventory in his own possession on April 1 of such year, identifying such serum by serial number, quantity in each serial and the name and address of the facility where stored on April 1 of such year. If any of such serum was acquired from another handler, the name of the manufacturer and the seller, the serial numbers and amount so acquired with the delivery date thereof should be set forth. The report should also set forth the volume of all serum sold by such manufacturer the preceding calendar year. If a date other than April 1 is set for a particular manufacturer by the Secretary, such manufacturer should file a report within 30 days after said date set by the Secretary, which report should contain the aforesaid information as of the date set by the Secretary.

The foregoing information is necessary in order to determine that the serum reported is "completed serum"; that it is in inventory in the possession of the reporting manufacturer; and that it has not been, nor will be, computed in the serum reserve of another manufacturer, all of which are requirements of the act. By means of the specified information the Department will be able to check the accuracy of such reports with the plant production records of manufacturers and other information on file in the Department and thereby determine compliance with the provisions of the Act and order.

4. The terms "Secretary" "completed serum" and "inventory in his own possession" should be defined so that all handlers under the marketing agreement and the order will know their specific meaning when used in said agreement and order.

The term "Secretary" should be redefined to show that it also includes officers and employees to whom authority has been delegated. The term "completed serum" should be defined to include "completed serum" and "finished serum" as those terms are defined in the regulations of the Secretary governing the production of anti-hog-cholera serum (9 CFR Part 119). These two classes of serum have been used in the past in computing the required serum reserve of manufacturers. The term "inventory in his own possession" should be defined to mean completed serum owned by a manufacturer and stored for his own account in premises owned and leased by him. Only "completed serum" that is owned by and in the actual physical possession of a manufacturer should be used in computing such manufacturer's required serum reserve.

5. The due and timely execution of the Secretary's functions under the act imperatively and unavoidably require the omission of a recommended decision by the Director, Animal Inspection and Quarantine Division, Agricultural Research Service, and the opportunity for filing exceptions thereto, for the following reasons:

The amendment of section 58 (b) of the act, approved July 31, 1958, provides that upon written application by a manufacturer filed before September 1 of the preceding year, the Secretary may fix another date between January 1 and May 1 on which such manufacturer shall have his required serum reserve specified by the act. Any manufacturer desiring a date between January 1 and May 1, 1959, is therefore required to file his application before September 1, 1958. The issuance of a recommended decision, and time for filing exceptions thereto, is time consuming and would not permit the issuance of a final decision, setting forth the Secretary's action with respect to the terms and conditions for the filing of applications, in sufficient time to allow for the filing of such applications before September 1, 1958. Inability to file an application for the year 1959 may result in a hardship on one or more of such manufacturers, thus defeating the purpose of the amendment for the year 1959. It is, therefore, found on the basis of the hearing record that good cause exists for the omission of a recommended decision.

Rulings on proposed findings and conclusions. Although time for filing was allowed therefor no proposed findings and conclusions were filed.

General findings. Upon the basis of the evidence adduced at the hearing, and the record thereof, it is hereby found that:

(a) The said agreement, as amended and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The said order, as amended and as hereby proposed to be further amended, regulates the handling of anti-hog-cholera serum and hog-cholera virus in the same manner as, and contains only such terms and conditions as are contained in the said marketing agreement upon which a hearing has been held.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled, respectively, "Agreement Amending the Marketing Agreement, as amended, Regulating the Handling of Anti-Hog-Cholera Serum and Hog-Cholera Virus" and "Order Amending the Order, as amended, Regulating the Handling of Anti-Hog-Cholera Serum and Hog-Cholera Virus", which have been decided upon as the appropriate and detailed means of effecting the foregoing conclusions. The aforesaid amendments shall not become effective unless and until the requirements of § 132.14 (b) of the aforesaid rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

It is hereby ordered, That all of this decision, except the attached agreement amending the marketing agreement, as amended, be published in the FEDERAL REGISTER. The regulatory provisions of the said agreement are identical with those contained in the attached order which will be published with this decision.

Done at Washington, D. C., this 14th day of August, 1958.

[SEAL] TRUE D. MORSE, *Acting Secretary.*

Order[1] Amending the Order, as Amended, Regulating the Handling of Anti-Hog-Cholera Serum and Hog-Cholera Virus

1. Amend § 131.1 and add new §§ 131.17 and 131.18 to read as follows:

§ 131.1 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

§ 131.17 *Completed serum.* "Completed serum" as used in this subpart means "completed serum" and "finished serum" as defined in § 119.23 (a) (5) and (6), respectively, of this chapter (regulations of the Secretary governing the production of anti-hog-cholera serum).

§ 131.18 *Inventory in his own possession.* "Inventory in his own possession" as used in this subpart means completed serum owned by a manufacturer and stored for his own account in premises owned or leased by him.

2. Delete the second sentence of paragraph (a) of § 131.48 and add a new paragraph (c) to § 131.48 to read as follows:

(c) Except as provided in the last sentence of this paragraph, each manufacturer, on or before May 1 of each year, shall file a sworn report with the Secretary, on a form furnished by and available from the Secretary, setting forth the cubic centimeter volume of completed serum such manufacturer had in inventory in his own possession on April 1 of such year, identifying such serum by serial number, the quantity covered by each serial number and the name and address of the facility where such serum was stored on April 1 of such year. If any such serum was acquired from another handler, the name of the manufacturer and of the seller, the serial numbers and the amount so acquired, together with the delivery date thereof, shall be set forth in the report. The report shall also set forth the cubic centimeter volume of all serum sold by such manufacturer during the preceding calendar year. In the event a date other than April 1 is set for a particular manufacturer by the Secretary pursuant to the provision of § 131.79 (b), the report specified in this paragraph shall be filed by such manufacturer within 30 days after said date set by the Secretary and the information given therein with respect to his serum inventory shall be given as of the date set by the Secretary.

3. Amend § 131.79 to read as follows:

§ 131.79 *Emergency reserve.* (a) Except as provided in paragraph (b) of this section, each manufacturer shall have in inventory in his own possession on April 1 of each year a reserve supply of completed serum equivalent to not less than 40 per centum of his previous year's sales of all serum. Serum used in computing the required reserve supply of any manufacturer shall not again be used in compting the required reserve supply of any other manufacturer.

(b) Upon the written application by a manufacturer filed before September 1 of the preceding year, the Secretary may fix another date between January 1 and May 1 on which such manufacturer shall have the inventory specified in paragraph (a) of this section for a particular year if the Secretary finds that such action will tend to effectuate the purposes of the act. The Secretary may impose such terms and conditions upon granting any such application as he finds necessary to effectuate the purposes of the act.

4. Add a new § 131.80 to read as follows:

§ 131.80 *Procedure for filing and decision on application filed pursuant to § 131.79 (b) of this subpart*—(a) *Time and place of filing.* Application for a date between January 1 and May 1 on which a manufacturer shall have the inventory specified in § 131.79 (a) for a particular year shall be filed with the Director, Animal Inspection and Quarantine Division, Agricultural Research Service, United States Department of Agriculture, Washington, D. C., before September 1 of the preceding year. Said application shall be deemed to be filed when received by the Office of the Director.

(b) *Form and content of application.* The application shall be in writing and signed by the applicant. If the applicant is a corporation, the application shall be signed by an officer of such corporation, and if applicant is a partnership, it shall be signed by one of the partners. The application shall contain (1) the name, address, principal place of business and form of business organization of applicant. If it is a corporation, such fact shall be stated together with the State of incorporation, date of incorporation and the names of its officers and directors; if it is a partnership, the name and address of each partner; (2) a request for a definite date between January 1 and May 1 which applicant desires the Secretary to set on which the applicant shall have said inventory specified in § 131.79 (a); and (3) a full statement of the facts upon which applicant relies to support his application which statement shall include information with respect to the area of his distribution of serum, giving the percentage of his total marketings for each State within said area and for export and may include information covering other factors specified in paragraph (d) of this section. The Secretary may, at any time following receipt of the application, request additional information from applicant.

(c) *Notice of filing.* Following the receipt of such applications, the Secretary may publish in the FEDERAL REGISTER a notice setting forth the names of the applicants and the date so requested by each of them, and may afford all interested parties the opportunity of filing written data, views and arguments with respect to any or all such applications within a time to be fixed by the Secretary. After publication of the aforesaid notice, an application may be withdrawn only upon written request to the Secretary showing good cause therefor, but in no event may an application be withdrawn after final decision thereon by the Secretary.

(d) *Basis of decision.* The setting of a date other than April 1 of each year on which a manufacturer shall have the inventory specified in § 131.79 (a) will be conditioned on whether the setting of such date will tend to effectuate the purposes of the act. In granting or denying such applications, consideration will be given, but not limited to the following factors: (1) The areas of distribution of serum by applicant; (2) the incidence of the disease of hog cholera in the area of distribution of serum of the applicant, the time of its greatest incidence in said marketing area and the time of its greatest incidence nationally; (3) the farrowing season or seasons of the pig crop nationally and in said marketing area; (4) conditions with respect to the available supply of serum nationally and in said area; and (5) the percentage of the national pig crop inoculated. Consideration will be given to all relevant and material matters submitted and all other available information and data relating to the applications, including information and data on file in the Department.

(e) *Final decision.* The Secretary shall issue a decision on all applications and such decision shall be final: *Provided*, That any decision setting a date other than April 1 may be reviewed and may be vacated if it is subsequently found that any material fact upon which such determination was based was materially erroneous or false. A true copy of the final decision shall be sent to the applicant by registered mail. Upon the granting of an application, or applications, the Secretary may publish in the FEDERAL REGISTER the name of each such applicant and the date set for each such applicant on which he shall have the inventory specified in § 131.79 (a).

[F. R. Doc. 58-6666; Filed, Aug. 15, 1958; 8:59 a. m.]

[1] This order shall not become effective unless and until the requirements of § 132.14 (b) of the rules of practice governing proceedings to formulate marketing agreements and marketing orders have been met.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 120]

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

NOTICE OF FILING OF PETITION FOR INCREASED TOLERANCES FOR RESIDUES OF SODIUM O-PHENYLPHENATE

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (1), 68 Stat. 512; 21 U. S. C. 346a (d) (1)), the following notice is issued:

A petition has been filed by Vis-Ko, Inc., 925 Kincaid Avenue, Sumner, Washington, proposing an increase in

the tolerance to 25 parts per million for residues of sodium o-phenylphenate, calculated as o-phenylphenol, in or on apples and pears.

The analytical method proposed in the petition for determining residues of sodium o-phenylphenate involves the conversion of the sodium salt into the free phenol, which is then steam-distilled. The free phenol is reacted with 4-aminoantipyrine in the presence of potassium ferricyanide to give a red color, which is measured spectrophotometrically.

Dated: August 13, 1958.

[SEAL] ROBERT S. ROE,
Director,
Bureau of Biological and Physical Sciences.

[F. R. Doc. 58-6599; Filed, Aug. 15, 1958; 8:51 a. m.]

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 240]

EXEMPTION OF CERTAIN SECURITIES

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Securities and Exchange Commission has under consideration a proposal to adopt § 240.15a-3 (Rule 15a-3) under the Securities Exchange Act of 1934. This rule would exempt from section 15 (a) of the act a specialist's block purchases and sales off the floor of the exchange when the transaction is approved by the exchange and is effected under its rules to help the specialist to maintain a fair and orderly market. The exemption would make it unnecessary for a specialist who effects no other over-the-counter transactions in non-exempt securities to become registered as a broker-dealer.

Section 15 (a) of the act provides that no broker or dealer shall use the mails or any federal instrumentality to effect any transaction in a security (other than an exempted security) otherwise than on a national securities exchange unless he is registered as a broker-dealer with this Commission or his business is exclusively intrastate. Section 3 (a) (12) of the act defines the term "exempted security" to include a security which the Commission, by rules and regulations deemed necessary or appropriate in the public interest or for the protection of investors, exempts from the operation of any one or more provisions of the act which by their terms do not apply to an "exempted security".

The rules of some national securities exchanges provide that a member registered as a specialist in a particular security may buy or sell blocks of such security off the floor of the exchange when it appears that such transactions will help the specialist to perform his function of maintaining a fair and orderly market in such security on the exchange and they are approved by the exchange. It has been suggested that since such transactions are regulated by the exchange, a specialist who effects no other securities transactions off the floor of the exchange should not be required to be registered as a broker-dealer with the Commission.

The above action would be taken under the provisions of the Securities Exchange Act of 1934, particularly sections 3 (a) (12), 15 (a) and 23 (a) thereof.

The proposed rule would read substantially as follows:

§ 240.15a-3 *Exemption for specialists' block purchases and sales.* Securities registered or exempt from registration on a national securities exchange are hereby exempted from the operation of section 15 (a) of the act when they are bought or sold off the floor of such exchange in a block by a specialist registered in such security and the transaction involving such securities has been approved by such exchange pursuant to its rules to assist the specialist to maintain a fair and orderly market in such security on such exchange.

All interested persons are invited to submit their views and comments on the proposed rule in writing to the Securities and Exchange Commission, Washington 25, D. C. on or before September 11, 1958. Unless a person submitting any such views or comments requests in writing that they be held confidential they will become public records available for public inspection.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

AUGUST 11, 1958.

NOTICES

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

ORGANIZATION, FUNCTIONS, AND DELEGATIONS OF AUTHORITY

MISCELLANEOUS AMENDMENTS

Pursuant to authority (19 F. R. 74), as amended, delegated to the Administrator, Agricultural Marketing Service, the Organization, Functions, and Delegations of Authority of the Agricultural Marketing Service (22 F. R. 1452), as amended, is further amended as follows:

1. In section 1 delete the word "school" between the words "special" and "milk".

2. In section 2 (c) (2) delete the word "school" between the words "special" and "milk".

3. In section 2 (d) (2) insert the words "management analysis," between the word "personnel," and the words "and administrative services"; also insert the words "Management Analysis," between the words "Budget and Finance," and the words "and Personnel Divisions".

4. In section 3 delete paragraph (c) in its entirety and add a new paragraph (c) to read as follows:

(c) *Statistical Standards Division.* The Statistical Standards Division under the direction and supervision of the Administrator is responsible for:

(1) Reviewing all statistical forms, survey plans, and reporting and record keeping requirements originating in the Department and requiring approval by the Bureau of the Budget;

(2) Providing liaison for coordination of statistics within the Department and with other statistical agencies,

(3) General improvement of statistical methods and techniques in AMS and throughout the Department through counseling, investigation of alternative methods and techniques, and development of new methods and techniques, and

(4) Systems analysis, programming, and processing of data by electronic and electro-mechanical equipment to meet the requirements of the over-all programs and activities of AMS.

5. In section 3 (e) first and second line change the words "Program Appraisal and" to "Internal".

6. In section 4 (a) (1) change the words "agricultural labor" between the word "population" and the word "levels" to "farm manpower"; delete the words "and standards" between the word "levels" and the words "of living"; and change the word "organization" between the words "rural" and "and other rural problems" to "development".

7. In section 5 (f) (1) insert the words "Poultry Products Inspection Act (71 Stat. 441)," between the words "authorized by" and "Section 32".

8. In section 5 (f) delete paragraph (4).

9. In section 5 (h) (1) delete the word "school" between the words "special" and "milk".

10. In section 6 add "Management Analysis" between the words "Budget and Finance," and "and Personnel".

11. In section 6 (a) (1) delete "procedure, forms," between the word "communications," and the words "and related management".

12. In section 6 renumber paragraphs (c) and (d) to (d) and (e) respectively, and add a new paragraph (c) to read as follows:

(c) *Management Analysis Division.* The Management Analysis Division is responsible for:

(1) Planning and administering the procedures, forms, reports, paperwork, and related management programs and activities necessary to meet requirements of the over-all programs and activities of AMS, and

(2) Providing staff assistance to the Assistant Administrator for Management in the coordination of management improvement including the preparation of management improvement reports; coordination of administrative management activities cutting across administrative division lines; maintaining follow-up and coordination on administrative actions necessary as a result of audits; committee management activities of AMS; and defense planning administrative activities of AMS.

13. In section 6 (e) add "management analysis," between the word "fiscal," and the words "and personnel".

14. In section 8 add "management analysis," between the words "fiscal," and "personnel,".

15. In section 9 delete the letter "s" in the word "officers" and "offices"; delete "and the Statistical Clearance and Standards"; add "the Statistical Standards," between the words "Marketing Information" and "and the"; delete "Program Appraisal and" and insert "Internal" before the words "Audit Divisions".

16. In section 12 add "Management Analysis Division," between the words "Budget and Finance Division," and "Personnel Division,".

Issued at Washington, D. C., this 13th day of August 1958 to become effective August 13, 1958.

[SEAL] ORIS V. WELLS,
Administrator,
Agricultural Marketing Service.

DEPARTMENT OF COMMERCE

Federal Maritime Board

FLOTA MERCANTE GRANCOLOMBIANA, S. A., ET AL.

NOTICE OF AGREEMENTS FILED FOR APPROVAL

Notice is hereby given that the following described agreements have been filed with the Board for approval pursuant to section 15 of the Shipping Act, 1916 (39 Stat. 733, 46 U. S. C. 814):

(1) Agreement No. 8326, between Flota Mercante Grancolombiana, S. A., and Waterman Steamship Corporation of Puerto Rico, covers the transportation of general cargo under through bills of lading from Ecuador, Colombia, Honduras, Costa Rica, and Guatemala to Puerto Rico, with transhipment at Mobile, Alabama, or New Orleans, Louisiana.

(2) Agreement No. 8327, between Rederiet Ocean A/S and West Coast Line., Inc., (the carriers comprising the West Coast Line joint service), and Waterman Steamship Corporation of Puerto Rico, covers the transportation of general cargo under through bills of lading from Chile, Ecuador, Peru and Colombian Pacific Coast ports to Puerto Rico, with transhipment at Mobile, Alabama, or New Orleans, Louisiana.

Interested parties may inspect these agreements and obtain copies thereof at the Regulation Office, Federal Maritime Board, Washington, D. C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to either of the agreements and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: August 13, 1958.

By order of the Federal Maritime Board.

[SEAL] GEO. A. VIEHMANN,
Assistant Secretary.

Office of the Secretary

DIRECTOR, BUREAU OF CENSUS

AMENDED DELEGATION OF AUTHORITY WITH RESPECT TO NEGOTIATION OF CERTAIN CONTRACTS FOR SUPPLIES AND SERVICES IN CONNECTION WITH BUREAU OF CENSUS PROGRAMS

This material supersedes the material on the same subject dated July 3, 1957, 22 F. R. 4873-4874 of July 10, 1957.

1. Pursuant to the authority vested in the Secretary of Commerce by Reorganization Plan No. 5 of 1950 and in accordance with delegations from the Administrator, General Services Administration to the Secretary of Commerce, on the above subject, the Director of the Bureau of the Census is hereby authorized to negotiate, without advertising, under sections 302 (c), (4), (5) and (10) of the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, contracts for the procurement of those supplies and services which are directly connected with the Bureau of the Census programs pertaining to the collection, collation, testing and analysis of statistical data and developments of new methods and equipment pertaining thereto.

2. In connection with the procurement of supplies hereunder, this authority shall be exercised for procurement only of those supplies of a highly technical, experimental or developmental nature.

3. This authority shall be exercised in accordance with applicable limitations and requirements in the Act, particularly sections 304, 305, and 307 thereto, and in accordance with policies, procedures, and controls prescribed by the General Services Administration.

4. Subject to the provisions of paragraph 3 above, the authority herein delegated may be redelegated to any officer or employee of the Census Bureau. Attention is invited to that part of section 307 of the act which provides that the power to make the determinations or decisions specified in section 302 (c) (10) shall be delegable only to a chief officer responsible for procurement and only with respect to contracts which will not require the expenditure of more than $25,000 and that each determination or decision required by section 302 (c) (10) shall be based upon written findings a copy of which shall be furnished the General Accounting Office with the contract.

5. The authority delegated herein shall remain in effect until December 31, 1959.

Dated: August 8, 1958.

SINCLAIR WEEKS,
Secretary of Commerce.

ATOMIC ENERGY COMMISSION

[Docket No. 50-70]

GENERAL ELECTRIC CO.

NOTICE OF HEARING

Pursuant to the Atomic Energy Act of 1954, as amended, and the regulations in Part 2, 10 CFR, "Rules of Practice," notice is hereby given that a hearing will be held to consider the issuance of a facility license for a testing facility to the above-named applicant under sections 104c and 185 of the Atomic Energy Act of 1954, as amended. The hearing will commence at 10:30 a. m., e. d. t., on Wednesday, September 17, 1958, in the Auditorium at the AEC Headquarters, Germantown, Maryland. The application is available for public inspection at the AEC's Public Document Room, 1717 H Street NW., Washington, D. C.

The issues to be considered at the hearing will be the following:

1. Whether the utilization facility authorized for construction by Construction Permit No. CPTR-2 dated March 11, 1958, and issued to the General Electric Company, has been constructed in compliance with the terms and conditions of the construction permit and will operate in conformity with the application as amended, the construction permit, the act and rules and regulations of the Commission;

2. Whether there is reasonable assurance that the facility can be operated without endangering the health and safety of the public;

3. Whether the General Electric Company is technically and financially qualified to operate the facility;

4. Whether the General Electric Company has furnished to the Commission proof of financial protection in accordance with 10 CFR Part 140, "Financial Protection Requirements and Indemnity Agreements."

5. Whether issuance of a license to operate the facility will be inimical to the common defense and security or to the health and safety of the public.

Petitions for leave to intervene must be received in the Office of the Secretary, Atomic Energy Commission, Germantown, Maryland, or in the AEC Public Document Room, 1717 H Street NW., Washington, D. C., not later than the day preceding the day of the hearing specified above or in the event of a postponement at such time as the Presiding Officer may provide upon application of the petitioner.

Answers to this notice shall be filed by General Electric Company pursuant to § 2.736 of the rules of practice on or be-

fore Monday, September 8, 1958. In the absence of good cause shown to the contrary, the AEC staff proposes to recommend at the hearing that the AEC issue a facility license to the applicant substantially in the form annexed as Annex "A".

Papers required to be filed with the AEC in this proceeding shall be filed by mailing to the Secretary, Atomic Energy Commission, Washington 25, D. C., or may be filed in person at the office of the Secretary, Atomic Energy Commission, Germantown, Maryland, or at the AEC Public Document Room, 1717 H Street NW., Washington, D. C. Pending further order of the Presiding Officer, parties shall file twenty copies of each such paper with the AEC and where service of papers is required on other parties shall serve five copies of each.

Pursuant to section 182b of the Atomic Energy Act of 1954, as amended, notice is hereby given that the report of the Advisory Committee on Reactor Safeguards in this matter is available for public inspection at the Commission's Public Document Room. A hazards analysis by the AEC Staff on this matter is also available at the Public Document Room.

The Commission designates Samuel W. Jensch, Esq., as the presiding officer to conduct the hearing and to render a decision pursuant to § 2.751 (a) of the Commission's rules of practice.

Dated at Germantown, Md., this 13th day of August 1958.

For the Atomic Energy Commission.

WOODFORD B. MCCOOL,
Secretary.

ANNEX "A"

PROPOSED LICENSE

1. Subject to the conditions and requirements incorporated herein, the Commission hereby licenses General Electric Company:

a. Pursuant to section 104 (c) of the Atomic Energy Act of 1954, as amended, and Title 10, CFR, Chapter I, Part 50, "Licensing of Production and Utilization Facilities", to possess and operate as a utilization facility the nuclear testing reactor designated below.

b. Pursuant to the act and Title 10, CFR, Chapter I, Part 70, "Special Nuclear Material", to receive, possess and use 154 kilograms of contained uranium 235 for use as fuel for operation of the facility.

2. This license applies to the pressurized light water-cooled and -moderated 33 megawatt (heat) testing reactor which is owned by General Electric Company and located in Alameda County, California, and described in General Electric Company's application dated June 14, 1957, and amendments to the application dated July 18, 1957, December 12, 1957, March 4, 1958, May 15, 1958, and June 15, 1958, and for which construction permit No. CPTR–2 was issued by the Commission on March 11, 1958 (hereinafter referred to as "the application").

3. This license shall be deemed to contain and be subject to the conditions specified in § 50.54 of Part 50 and § 70.32 of Part 70; is subject to all applicable provisions of the Act and rules, regulations and orders of the Commission now or hereafter in effect; and is subject to any additional conditions specified or incorporated below:

a. *Operating restrictions.* Unless further authorized by the Commission:

(1) GE shall operate the facility in accordance with the procedures and limitations described in the application except as modified by the following: If, after review by the GE Laboratory Safeguards Group, the Company determines that a proposed change involves a substantial alteration of facility design or operating procedures, or a decrease in safety (i. e. an increase in the possible frequency of accidents, large and small, or an increase in consequences of major accidents), a description and safety evaluation of the proposed change shall be furnished to the Commission prior to making the change. Within fifteen days after acknowledgment of receipt by the Commission of the description and safety evaluation the change may be made by GE without specific authorization, in the absence of notice to the contrary from the Commission.

(2) Operation of the reactor with the five experimental loops other than the preasurized water and boiling water loops described in the application may be undertaken without amendment of this license if GE demonstrates in writing to the satisfaction of the Commission that operation with such other loops will not increase the probability or magnitude of accidents beyond those analyzed and evaluated for the pressurized water and boiling water loops in the application.

(3) GE shall not operate the reactor at thermal power levels in excses of 33,000 kilowatts.

(4) GE shall operate the reactor in a manner such that the temperature and void coefficients are restricted to negative values that do not eliminate the reactor's inherent ability to withstand without melting of fuel element cladding a 1 4 percent step increase in reactivity.

b. *Records.* In addition to those otherwise required under this license and applicable regulation, GE shall keep the following records:

(1) Reactor operating records, including power levels.

(2) Records showing radioactivity released or discharged into the air or water beyond the effective control of GE as measured at the point of such release or discharge.

(3) Records of emergency scrams, including reasons for emergency shutdowns.

c. *Reports.* (1) GE shall make a prompt report in writing to the Commission of any indication or occurrence of a possible unsafe condition relating to the operation of the reactor.

(2) GE shall submit to the Commission a report of the results of operation of the reactor pertinent to the safety of the facility during (a) critical assembly tests (power levels up to 100 watts); (b) low power tests (power levels up to 50 kilowatts); (c) full power testing (without experiments); (d) low power tests with experiments; and (e) full power tests with experiments. These reports should also include any changes made in the reactor design or operating procedures, and a listing of those changes referred to and authorized by the Laboratory Safeguards Group. Each such report shall be submitted to the Commission immediately following the conclusion of each stage except that the report of full power testing (with initial experiments) shall be submitted after three months of such operations.

(3) An annual report of operating experience and changes in reactor design and operating procedure shall be submitted to the Commission, the first such report to be due one year following issuance of this license.

4. This license is effective as of the date of issuance and shall expire at midnight March 10, 1968.

Date of issuance:

For the Atomic Energy Commission.

Director,
Division of Licensing and Regulation.

FEDERAL POWER COMMISSION

[Docket No. G–15903]

UNION OIL COMPANY OF CALIFORNIA

ORDER FOR HEARING AND SUSPENDING PROPOSED CHANGE IN RATES

AUGUST 12, 1958.

Union Oil Company of California (Union Oil) on July 16, 1958, tendered for filing a proposed change in its presently effective rate schedule for the sale of natural gas subject to the jurisdiction of the Commission. The proposed change, which constitutes an increased rate and charge, is contained in the following designated filing:

Description: Notice of Change, undated.
Purchaser: West Lake Natural Gas Company.
Rate schedule designation: Supplement No. 2 to Union Oil's FPC Gas Rate Schedule No. 32.
Effective date: August 16, 1958 (effective date is the first day after expiration of the required thirty days' notice).

In support of the proposed periodic rate increase, Union Oil cites the contract provision therefor and states that the contract was negotiated at arm's length; that the price increase resulted from a contractual division of the entire contract price, is fixed and determined and its effect is readily calculable and is not spiral or inflationary or dependent upon extraneous occurrences. Union Oil further states that such pricing provisions are common in long-term casinghead gas contracts and results in a low initial price during the time the buyer's unamortized capital costs are high, and that the increased price is not in excess of the range of prices for like gas in west Texas.

The increased rate and charge so proposed has not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed change, and that Supplement No. 2 to Union Oil's FPC Gas Rate Schedule No. 32 be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rate and charge contained in Supplement No. 2 to Union Oil's FPC Gas Rate Schedule No. 32.

(B) Pending such hearing and decision thereon, said supplement be and it is hereby suspended and the use thereof deferred until August 17, 1958, and until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(C) Neither the supplement hereby suspended nor the rate schedule sought to be altered thereby shall be changed until this proceeding has been disposed of or until the period of suspension has expired, unless otherwise ordered by the Commission.

(D) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

By the Commission (Commissioners Kline and Hussey dissenting).

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

[F. R. Doc. 58–6577; Filed, Aug. 15, 1958; 8:45 a. m.]

[Docket No. G–15904]

HUMBLE OIL & REFINING CO.

ORDER FOR HEARING AND SUSPENDING PROPOSED CHANGE IN RATES

AUGUST 12, 1958.

Humble Oil & Refining Company (Humble) on July 18, 1958, tendered for filing a proposed change in its presently effective rate schedule for the sale of natural gas subject to the jurisdiction of the Commission. The proposed change, which constitutes an increased rate and charge, is contained in the following designated filing:

Description: Notice of Change, dated July 8, 1958.
Purchaser: West Lake Natural Gas Company.
Rate schedule designation: Supplement No. 1 to Humble's FPC Gas Rate Schedule No. 141.
Effective date: August 18, 1958 (effective date is the first day after expiration of the required thirty days' notice).

In support of the proposed periodic rate increase, Humble cites the contract provision therefor and states that the contract was negotiated at arm's length. Humble also states that suspension of its increase would abrogate the contract, unjustly enrich West Lake Natural Gas Company at Humble's expense, would be unjust and unreasonable and would deprive Humble of contractual rights without due process of law.

The increased rate and charge so proposed has not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed change, and that Supplement No. 1 to Humble's FPC Gas Rate Schedule No. 141 be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rate and charge contained in Supplement No. 1 to Humble's FPC Gas Rate Schedule No. 141.

(B) Pending such hearing and decision thereon, said supplement be and it is hereby suspended and the use thereof deferred until August 19, 1958, and until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(C) Neither the supplement hereby suspended nor the rate schedule sought to be altered thereby shall be changed until this proceeding has been disposed of or until the period of suspension has expired, unless otherwise ordered by the Commission.

(D) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

By the Commission (Commissioners Kline and Hussey dissenting).

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

[F. R. Doc. 58–6578; Filed, Aug. 15, 1958; 8:46 a. m.]

[Docket No. G–15905]

EL PASO NATURAL GAS PRODUCTS CO.

ORDER FOR HEARING AND SUSPENDING PROPOSED CHANGE IN RATES

AUGUST 12, 1958.

El Paso Natural Gas Products Company (El Paso) on July 18, 1958, tendered for filing a proposed change in its presently effective rate schedule for the sale of natural gas subject to the jurisdiction of the Commission. The proposed change, which constitutes an increased rate and charge, is contained in the following designated filing:

Description: Notice of Change, dated July 16, 1958.
Purchaser: West Lake Natural Gas Company.
Rate schedule designation: Supplement No. 3 to El Paso's FPC Gas Rate Schedule No. 3.
Effective date: August 18, 1958 (effective date is the first day after expiration of the required thirty days' notice).

In support of the proposed periodic rate increase, El Paso cites the contract provision therefor and states that the contract was negotiated at arm's length. El Paso also states that it bargained away its gas in reliance upon the schedule of periodic price increases and that the increased price is in all respects just and reasonable.

The increased rate and charge so proposed has not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed change, and that Supplement No. 8 to El Paso's FPC Gas Rate Schedule No. 3 be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rate and charge contained in Supplement No. 8 to El Paso's FPC Gas Rate Schedule No. 3.

(B) Pending such hearing and decision thereon, said supplement be and it is hereby suspended and the use thereof deferred until August 19, 1958, and until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(C) Neither the supplement hereby suspended nor the rate schedule sought to be altered thereby shall be changed until this proceeding has been disposed of or until the period of suspension has expired, unless otherwise ordered by the Commission.

(D) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

By the Commission (Commissioners Kline and Hussey dissenting).

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

[Docket No. G–15906]

EL PASO NATURAL PRODUCTS CO. ET AL.

ORDER FOR HEARING AND SUSPENDING PROPOSED CHANGE IN RATES

AUGUST 12, 1958.

El Paso Natural Products Company (Operator) et al. (El Paso), on July 18, 1958, tendered for filing a proposed change in its presently effective rate schedule for the sale of natural gas subject to the jurisdiction of the Commission. The proposed change, which constitutes an increased rate and charge, is contained in the following designated filing:

Description: Notice of Change, dated July 16, 1958.
Purchaser: West Lake Natural Gas Company.
Rate schedule designation: Supplement No. 18 to El Paso's FPC Gas Rate Schedule No. 2.
Effective date: August 18, 1958 (effective date is the first day after expiration of the required thirty days' notice).

In support of the proposed periodic rate increase, El Paso cites the contract provision therefor and states that the contract was negotiated at arm's length. El Paso states additionally that it bargained away its gas in reliance upon the schedule of periodic price increases and that the increased price is in all respects just and reasonable.

The increased rate and charge so proposed has not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed change, and that Supplement No. 18 to El Paso's FPC Gas Rate Schedule No. 2 be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rate and charge contained in Supplement No. 18 to El Paso's FPC Gas Rate Schedule No. 2.

(B) Pending such hearing and decision thereon, said supplement be and it is hereby suspended and the use thereof deferred until August 19, 1958, and until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(C) Neither the supplement hereby suspended nor the rate schedule sought to be altered thereby shall be changed until this proceeding has been disposed of or until the period of suspension has expired, unless otherwise ordered by the Commission.

(D) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

By the Commission (Commissioners Kline and Hussey dissenting).

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

[F. R. Doc. 58-6580; Filed, Aug. 15, 1958; 8:46 a. m.]

[Docket No. G-15907]

SUNRAY MID-CONTINENT OIL CO.

ORDER FOR HEARING AND SUSPENDING PROPOSED CHANGE IN RATES

AUGUST 12, 1958.

Sunray Mid-Continent Oil Company (Sunray) on July 14, 1958, tendered for filing a proposed change in its presently effective rate schedule for the sale of natural gas subject to the jurisdiction of the Commission. The proposed change, which constitutes an increased rate and charge, is contained in the following designated filing:

Description: Notice of Change, dated July 10, 1958.

Purchaser: West Lake Natural Gas Company.

Rate schedule designation: Supplement No. 1 to Sunray's FPC Gas Rate Schedule No. 158.

Effective date: August 14, 1958 (effective date is the first day after expiration of the required thirty days' notice).

In support of the proposed periodic rate increase, Sunray cites the contract provisions therefor and states that the contract was negotiated at arm's length. Sunray further states that without such pricing provisions which are common in long-term contracts, it would not have committed the gas for such a long term, that the increased price is just and reasonable and in line with other gas prices in the area and to suspend such increased price would be unjust and unduly discriminatory.

The increased rate and charge so proposed has not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed change, and that Supplement No. 1 to Sunray's FPC Gas Rate Schedule No. 158 be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rate and charge contained in Supplement No. 1 to Sunray's FPC Gas Rate Schedule No. 158.

(B) Pending such hearing and decision thereon, said supplement be and it is hereby suspended and the use thereof deferred until August 15, 1958, and until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(C) Neither the supplement hereby suspended nor the rate schedule sought to be altered thereby shall be changed until this proceeding has been disposed of or until the period of suspension has expired, unless otherwise ordered by the Commission.

(D) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

By the Commission (Commissioners Kline and Hussey dissenting).

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

[Docket No. G-15880]

MISSISSIPPI RIVER FUEL CORP.

ORDER FOR HEARING, SUSPENDING PROPOSED CHANGES IN RATES, AND ALLOWING INCREASED RATES TO BECOME EFFECTIVE

AUGUST 12, 1958.

Mississippi River Fuel Corporation (Mississippi), on July 9, 11, and 14, 1958, tendered for filing four tariff sheets[1] to its FPC Gas Tariff, Volume No. 2, by which Mississippi proposes to increase its rates for the sale of gas so as to increase revenues by $58,779 for gas produced or gathered in the State of Louisiana and supplied to Southern Natural Gas Company under Mississippi's FPC Gas Rate Schedule No. 10 and to Tennessee Gas Transmission Company under Mississippi's FPC Gas Rate Schedule Nos. 8 and 9.

The increased rates and charges so proposed are intended to reflect (in whole or in part) the additional "excise, license, or privilege tax" of one-cent per Mcf levied by the State of Louisiana pursuant to Act No. 8 of 1958 (House Bill No. 303), as approved on June 16, 1958, amending Title 47 of the Louisiana Revised Statutes of 1950. The Commission is advised that litigation is being instituted to challenge the constitutionality of the said Act No. 8 of 1958. In consideration of this fact, and in order to assure appropriate refund in the event said Act No. 8 of 1958 should be declared unconstitutional or otherwise held invalid by final judicial decision, it is deemed advisable that the Commission waive the requirements of § 154.63 of its regulations and suspend the said proposed increased rates and charges until August 2, 1958, and thereafter to permit them to become effective as of that date; provided, that within 20 days from the date of this order Mississippi shall file with the Secretary of the Commission an appropriate undertaking to assure such refund as may be ordered.

The Commission finds:

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed changes, and that the above-designated revised tariff sheets be suspended and the use thereof deferred as hereinafter ordered.

(2) It is necessary and proper in the public interest in carrying out the provisions of the Natural Gas Act that Mississippi's proposed increased rates be made effective as hereinafter provided and that Mississippi be required to file an undertaking as hereinafter ordered and conditioned.

[1] First Revised Sheet No. 39A to FPC Gas Tariff, Original Volume 2 (Rate Schedule 8), tendered July 9, 1958; buyer, Tennessee Gas Transmission Company. (On July 11, 1958, a substitute First Revised Sheet No. 39A was filed to correct a typographical error contained in the July 9 submittal).

First Revised Sheet No. 76 and Original Sheet No. 76A to FPC Gas Tariff, Original Volume 2 (Rate Schedule No. 10), tendered July 11, 1958; buyer, Southern Natural Gas Company.

First Revised Sheet No. 56A to FPC Gas Tariff, Original Volume 2 (Rate Schedule No. 9), tendered July 14, 1958; buyer, Tennessee Gas Transmission Company.

First Revised Sheet No. 76 and Original Sheet No. 76A were withdrawn on July 28, 1956, and a new First Revised Sheet No. 76 was submitted the same date in substitution for First Revised Sheet No. 76 and Original Sheet No. 76A as originally submitted.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rates and charges contained in the above-designated revised tariff sheets.

(B) Pending such hearing and decision thereon, said First Revised Sheet No. 39A, as filed July 11, 1958; First Revised Sheet No. 76, as filed July 28, 1958, and First Revised Sheet No. 56A, as filed July 14, 1958, to Mississippi's FPC Gas Tariff, Original Volume 2, are each hereby suspended and the use thereof deferred until August 2, 1958, and until such further time as each is made effective in the manner hereinafter prescribed.

(C) The rates, charges, and classifications set forth in the above-designated filings shall be effective as of August 2, 1958: *Provided, however,* That within 20 days from the date of this order, Mississippi shall execute and file with the Secretary of the Commission the agreement and undertaking described in paragraph (E) below.

(D) Mississippi shall refund at such times and in such amounts to the persons entitled thereto, and in such manner as may be required by final order of the Commission, the difference between the presently effective rates and charges and the proposed increased rates and charges hereby allowed to become effective in the event the additional tax of one-cent per Mcf levied by the State of Louisiana is for any reason held to be invalid. Should such additional tax eventually be held invalid and the State of Louisiana makes refund, with interest, of the tax moneys collected pursuant to the said Act No. 8 of 1958, then, and in that event, a proportionate part of the interest so received by Mississippi herein shall be passed on and paid to the persons entitled thereto at such times and in such amounts, and in such manner as may be required by final order of the Commission. Mississippi shall bear all costs of any such refunding; shall keep accurate accounts in detail of all amounts received by reason of the increased rates or charges allowed by this order to become effective, for each billing period, specifying by whom and in whose behalf such amounts were paid; and shall report (original and four copies), in writing and under oath, to the Commission quarterly, or monthly if Mississippi so elects, for each billing period, and for each purchaser, the billing determinants of natural gas sales to such purchasers and the revenues resulting therefrom, as computed under the rates in effect immediately prior to the date upon which the increased rates allowed by this order to become effective, and under the rates allowed by this order to become effective together with the differences in the revenues so computed.

(E) As a condition of this order, within 20 days from the date of issuance thereof, Mississippi shall execute and file in triplicate with the Secretary of this Commission its written agreement and undertaking to comply with the terms of paragraph (D) hereof, signed by a responsible officer of the corporation, evidenced by proper authority from the board of directors, and accompanied by a certificate showing service of copies thereof upon all purchasers under the revised tariff sheets involved, as follows:

Agreement and Undertaking of Mississippi River Fuel Corporation to Comply with the Terms and Conditions of Paragraph (D) of Federal Power Commission's Order Making Effective Proposed Rate Changes

In conformity with the requirements of the order issued ------, 1958, in Docket No. G-15880, Mississippi River Fuel Corporation hereby agrees and undertakes to comply with the terms and conditions of paragraph (D) of said order, and has caused the agreement and undertaking to be executed and sealed in its name by its officers, thereupon duly authorized in accordance with the terms of the resolution of its board of directors, a certified copy of which is appended hereto this ------ day of -------

MISSISSIPPI RIVER FUEL CORPORATION
By ----------
Attest:

(Secretary)

Unless Mississippi is advised to the contrary within 15 days from the date of filing such agreement and undertaking, the agreement and undertaking shall be deemed to have been accepted.

(F) If Mississippi shall, in conformity with the terms and conditions of paragraph (D) of this order, make the refunds as may be required by order of the Commission, the undertaking shall be discharged; otherwise, it shall remain in full force and effect.

(G) The revised tariff sheets hereby suspended shall not be changed until the period of suspension has expired, unless otherwise ordered by the Commission.

(H) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

By the Commission.

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

SECURITIES AND EXCHANGE COMMISSION

[File No. 24 FW-1143]

MISSILE OIL CORP.

NOTICE OF AND ORDER FOR HEARING

AUGUST 12, 1958.

I. Missile Oil Corporation ("Issuer") a Nevada corporation with its principal office at 1435 South La Cienega Boulevard, Los Angeles, California, filed with the Commission on June 26, 1958, a notification on Form 1-A and an offering circular relating to an offering of 300,000 shares of its 10 cents par value nonassessable common stock at $1.00 per share for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of sections 3 (b) and Regulation A thereunder.

II. The Commission on July 17, 1958, issued an order pursuant to Rule 261 of the general rules and regulations under the Securities Act of 1933, as amended, temporarily suspending the conditional exemption under Regulation A, and affording to any person having an interest therein an opportunity to request a hearing pursuant to Rule 261. A written request for hearing was received by the Commission.

The Commission, deeming it necessary and appropriate to determine whether to vacate the temporary suspension order or to enter an order permanently suspending the exemption.

It is hereby ordered, That a hearing under the applicable provisions of the Securities Act of 1933, as amended, and the rules of the Commission be held in the San Francisco Regional Office, Room 339, 821 Market Street, San Francisco, California, at 10:00 a. m., September 4, 1958, with respect to the following matters and questions without prejudice, however, to the specification of additional issues which may be presented in these proceedings:

A. Whether the conditional exemption provided by Regulation A is not available for the securities purported to be offered in that:

1. The offering circular and other material contain untrue statements of material facts and omit to state material facts necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading, particularly with respect to:

a. The statement on page 2 of the offering circular that "Officers, Directors and present Stockholders will own 63 percent of the outstanding stock * * * in exchange for leases costing in excess of $207,000, services rendered and an actual cash expenditure of $37,000", in that the directors, officers, and stockholders have not paid said $207,000 for the subject leases and are not obligated to make such payments, but such amount is to be paid from the proceeds of the offering.

b. The failure to disclose in the offering circular that the public investors, if the offering is completely sold, will have invested approximately 88½ percent of the cash in the enterprise for their 37 percent interest, while the officers, directors, and present stockholders will have contributed approximately only 11½ percent of the cash investment for their 63 percent interest.

c. The inclusion in the financial statements as an asset the sum of $210,000, described as "Oil Leases at Cost", when, in fact, there is only an agreement to purchase oil leases, and the only cost incurred was a $3,000 earnest money deposit.

d. The statement on page 3 of the offering circular setting forth the conclusion of the Conkling Brothers, geologists, that the leases are a "safe and profitable investment", in that said conclusion, taken from the geological report, referred to the proposed purchase price of $210,000 and not to the interests of the public in the leases which would amount to only 37 percent of the total outstanding interests.

e. The failure to disclose in the offering circular that the royalties to be paid on the Texas and California properties are materially higher than customary, and are particularly burdensome on the Texas properties.

f. The statement on page 5 of the offering circular that in connection with the California properties the issuer plans "an extensive exploratory and drilling program there" in that there is a failure to disclose that even if the entire offering were sold and the proceeds distributed in the manner set forth in the offering circular there would be little if any funds available for such exploration and drilling.

g. The failure to include in the offering circular adequate maps showing the location of the leases and the present status and depth of all wells drilled for oil and gas on or in the immediate vicinity of such leases in both Texas and California and the geological structural contours in the area where the California leases are located.

h. The statement on page 6 of the offering circular that, in connection with the Texas properties, "oil production on two of the four well can be increased, possibly up to the allowable (212 barrels per allowable day)" and "* * * by so recompleting these wells the oil production from this property should be doubled and have a sizable increase in the gas production", in that the productivity of the wells in the area referred to does not indicate such statements would be reasonable for any substantial period of time.

i. The failure to include in the offering circular the actual oil and gas production by months from the date of completion of each of the Texas wells to the present time; the total allowable production for each well during each month; and the net production of oil and of gas for each month which would have accrued to the Issuer's interest.

j. The statement on page 6 of the offering circular implying that the increase of gas production from the Texas wells offset the decline in oil production, in that such increase does not offset the loss from decline in oil production.

k. The statement on page 7 of the offering circular that there are estimated gross future recoverable reserves from the Texas wells in the amount of 194,971 barrels as of January 1, 1958, in that the productivity of such wells indicates such estimation is excessive and without adequate foundation.

l. The statement on page 7 relating to reserves estimated to be recoverable through secondary methods in that there is no past experience from such methods of operation on or in the general vicinity of issuer's leases to justify the inclusion of reserves based on recovery from secondary methods.

m. The statement on page 7 that the value of the Texas property net to the working interest is $2,143,857 in that past experience, and future unknown and indeterminable factors make such an estimation of value unreasonable and without adequate basis.

n. The statement on page 8 relating to the 1957 earnings from the four wells on the Texas properties in that such figure, $201,243, apparently represents gross income.

o. The statement on page 8 of the offering circular implying that reduced allowable production accounted solely for the decline in production in that other material factors were involved which accounted for the production decline.

p. The statement on page 9 relating to the value of the California properties in the amount of $403,340 in that the assigned value of $20 per acre is of such a speculative, arbitrary and fluctuating nature as to preclude the inclusion of such amount as a representation.

q. The failure to disclose in the offering circular the use of proceeds in the event the amount sold is insufficient to purchase the Texas properties.

2. The terms and conditions of Regulation A have not been complied with in that:

a. Copies of the underwriting agreement and signed consents of underwriters have not been filed as required by Items 11 (b) and 11 (c) of Form 1–A.

B. Whether the order dated July 17, 1958 temporarily suspending the exemption under Regulation A should be vacated or made permanent.

III. *It is further ordered*, That William Swift, Sr. or any officer or officers of the Commission designated by it for that purpose shall preside at the hearing, and any officer or officers so designated to preside at any such hearing are hereby authorized to exercise all of the powers granted to the Commission under sections 19 (b), 21 and 22 (c) of the Securities Act of 1933, as amended, and to hearing officers under the Commission's rules of practice.

It is further ordered, That the Secretary of the Commission shall serve a copy of this order by registered mail on Missile Oil Corporation, that notice of the entering of this order shall be given to all other persons by general release of the Commission and by publication in the FEDERAL REGISTER. Any person who desires to be heard or otherwise wishes to participate in such hearing shall file with the Secretary of the Commission on or before August 28, 1958, a request relative thereto as provided in Rule XVII of the Commission's rules of practice.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 24SF–1838]

GOLD CROWN MINING CORP.

NOTICE OF AND ORDER FOR HEARING

AUGUST 12, 1958.

I. Gold Crown Mining Corporation, a Nevada corporation, filed with the Commission on November 12, 1953, a notification and offering circular relating to a proposed offering of 40,000 shares of its $1 par value common stock at $5.00 per share, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to section 3 (b) thereof and Regulation A promulgated thereunder.

II. The Commission on June 18, 1958, issued an order pursuant to Rule 223 (a) of the general rules and regulations under the Securities Act of 1933, as amended, temporarily suspending the conditional exemption under Regulation A, and affording to any person having an interest therein an opportuntiy to request a hearing pursuant to Rule 223. A written request for hearing was received by the Commission.

The Commission, deeming it necessary and appropriate to determine whether to vacate the temporary suspension order or to enter an order permanently suspending the exemption,

It is hereby ordered, That a hearing under the applicable provisions of the Securities Act of 1933, as amended, and the rules of the Commission be held in the San Francisco Regional Office of the Commission, Room 339, 821 Market Street, San Francisco, California at 10:00 a. m., September 3, 1958, with respect to the following matters and questions without prejudice, however, to the specification of additional issues which may be presented in these proceedings:

A. Whether the conditional exemption provided by Regulation A is not available for the securities purported to be offered in that:

1. The underwriter and the secretary-treasurer of the issuer have been convicted of violating the California Corporate Securities Law.

2. The offering circular contains untrue statements of material facts and omits to state material facts necessary in order to make the statements made in light of the circumstances under which they are made not misleading, particularly with respect to the failure to disclose that the issuer offered and sold its securities to certain persons including its officers and directors at prices below the price set forth in the offering circular.

3. The offering would operate as a fraud and deceit upon purchasers.

B. Whether the order dated June 18, 1958 temporarily suspending the exemption under Regulation A should be vacated or made permanent.

III. *It is further ordered*, That James Ewell or any officer or officers of the Commission designated by it for that purpose shall preside at the hearing, and any officer or officers so designated to preside at any such hearing are hereby authorized to exercise all of the powers granted to the Commission under sections 19 (b), 21 and 22 (c) of the Securities Act of 1933, as amended, and to hearing officers under the Commission's rules of practice.

It is further ordered, That the Secretary of the Commission shall serve a copy of this order by registered mail on Gold Crown Mining Corporation, that notice of the entering of this order shall be given to all other persons by General release of the Commission and by publication in the FEDERAL REGISTER. Any person who desires to be heard or otherwise wishes to participate in such hearing shall file with the Secretary of the Commission on or before August 27, 1958, a request relative thereto as provided in Rule XVII of the Commission's rules of practice.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

INTERSTATE COMMERCE COMMISSION

FOURTH SECTION APPLICATIONS FOR RELIEF

AUGUST 11, 1958.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 34866: *Sand—Attica, Ind., to Morrisonville and Harvel, Ill.* Filed by Illinois Freight Association, Agent (No. 22), for and on behalf of the Wabash Railroad Company. Rates on sand, carloads, as described in the application from Attica, Ind., to Morrisonville and Harvel, Ill.

Grounds for relief: Motor truck competition from wayside points to jobsites.

Tariff: Supplement 22 to Wabash Railroad Company's tariff I. C. C. 7844.

FSA No. 34867: *Gravel—Dickason Pit, Ind., to Craigs, Ill.* Filed by Illinois Freight Association, Agent (No. 21), for the Chicago & Eastern Illinois Railroad Company. Rates on road surfacing gravel, carloads, as described in the application from Dickason Pit, Ind., to Craigs, Ill.

Grounds for relief: Motor truck competition from wayside points to jobsites.

Tariff: Supplement 103 to Chicago & Eastern Illinois Railroad Company's tariff I. C. C. 144.

FSA No. 34868: *Substituted service—Rail for motor—Pennsylvania Railroad.* Filed by The Eastern Central Motor Carriers Association, Ind., Agent (No. 90), for interested carriers. Rates on property, loaded in highway trailers and transported on railroad flat cars in substituted rail service by the Pennsylvania Railroad between Kearny, N. J., Harrisburg and Philadelphia, Pa., on the one hand, and Chicago, East St. Louis, Ill., Cincinnati, Cleveland, Toledo, Ohio, Detroit, Mich., Indianapolis, Ind., and Louisville, Ky., on the other, on traffic originating at or destined to points on motor carriers in the territories described in the application.

Grounds for relief: Motor truck competition.

FSA No. 34869: *Ethylene glycol—Plaquemine, La., to Graingers, N. C.* Filed by Southwestern Freight Bureau, Agent (No. B–7351), for interested rail carriers. Rates on ethylene glycol, tank-car loads from Plaquemine, La., to Graingers, N. C.

Grounds for relief: Market competition.

Tariff: Supplement 58 to Southwestern Freight Bureau tariff I. C. C. 4094.

FSA No. 34870: *Substituted Service—Rail for motor—Pennsylvania Railroad.* Filed by Central States Motor Freight Bureau, Agent (No. 20), for interested carriers. Rates on property loaded in highway trailers and transported on railroad flat cars in substituted service between Chicago, East St. Louis, Ill., or Indianapolis, Ind., on the one hand, and Cleveland, Ohio, Indianapolis, Ind., or Pittsburgh, Pa., on the other, as substitution interchange points on traffic originating at or destined to points on motor carriers beyond the named points, as described in the application.

Grounds for relief: Motor truck competition.

By the Commission.

[F. R. Doc. 58–6522; Filed, Aug. 13, 1958; 8:49 a. m.]

FOURTH SECTION APPLICATIONS FOR RELIEF

AUGUST 12, 1958.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 34871: *Caustic Soda—Plaquemine, La., to Florida points.* Filed by Southwestern Freight Bureau, Agent (B–7344), for interested rail carriers. Rates on caustic soda, in solution, tank-car loads from Plaquemine, La., to Cantonment, Foley, Gonzales, North Pensacola, and Pensacola, Fla.

Grounds for relief: Market competition.

Tariff: Supplement 328 to Southwestern Freight Bureau tariff I. C. C. 4087.

FSA No. 34872: *Cottonseed and soybean products from Victoria, Ark.* Filed by Southwestern Freight Bureau, Agent (No. B–7347), for interested rail carriers. Rates on cottonseed and soybean products, and related articles, carloads from Victoria, Ark., to points in official (including Illinois) territory.

Grounds for relief: Market competition with the producing points in Arkansas and Missouri.

Tariff: Supplement 52 to Southwestern Freight Bureau tariff I. C. C. 4054.

FSA No. 34873: *Synthetic plastics—Louisiana and Texas points to Denver, Colo.* Filed by Southwestern Freight Bureau, Agent (No. B–7349), for interested rail carriers. Rates on plastics, synthetic, liquid or other than liquid, noibn, carloads, as further described in the application from specified points in Louisiana and Texas to Denver, Colo.

Grounds for relief: Market competition with producers at Marshall and Tuscola, Ill., and other eastern producing points.

Tariffs: Supplement 155 to Southwestern Freight Bureau tariff I. C. C. 4136. Supplement 94 to Western Trunk Line Committee I. C. C. A–3861.

FSA No. 34874: *Soda ash from Westvaco, Wyo., to Ottawa, Ill.* Filed by Western Trunk Line Committee, Agent (No. A–1995), for interested rail carriers. Rates on soda ash, in bulk, carloads from Westvaco, Wyo., to Ottawa, Ill.

Grounds for relief: Market competition.

Tariff: Supplement 85 to Western Trunk Line Committee tariff I. C. C. A–4123.

FSA No. 34875: *Limestone from Cherokee and Margerum, Ala.* Filed by O. W. South, Jr., Agent (SFA No. A3718), for interested rail carriers. Rates on asphaltic limestone, carloads from Cherokee and Margerum, Ala., to points in southern territory.

Grounds for relief: Short-line distance formula and motor truck competition.

Tariff: Supplement 76 to Southern Freight Association tariff I. C. C. 1183.

FSA No. 34876: *Road building material in southern territory.* Filed by O. W. South, Jr., Agent (SFA No. A3713), for interested rail carriers. Rates on road building material, carloads, as described in the application between points in southern territory, including specified points in Arkansas, Illinois, Indiana, and Ohio.

Grounds for relief: Short-line distance formula and motor truck competition.

Tariff: Supplement 9 to Southern Freight Association tariff I. C. C. 1622.

FSA No. 34877: *Sand from Attica, Ind., to Gibson City, Ill.* Filed by Illinois Freight Association, Agent (No. 23), for interested rail carriers. Rates on sand, carloads, as described in the application from Attica, Ind., to Gibson City, Ill.

Grounds for relief: Motor truck and wayside pit competition. Supplement 23 to Wabash Railroad Company tariff I. C. C. 7844.

FSA No. 34878: *Barytes from Arkansas and Missouri to Louisiana.* Filed by Southwestern Freight Bureau, Agent (No. B–7350), for interested rail carriers. Rates on barite (barytes), ground, carloads from points in Arkansas and Missouri to points in Louisiana.

Grounds for relief: Market competition.

Tariff: Supplement 103 to Southwestern Freight Bureau tariff I. C. C. No. 4092.

FSA No. 34879: *Vegetables to points in western trunk line territory.* Filed by Western Trunk Line Committee, Agent (No. A–1994), for interested rail carriers. Rates on vegetables, carloads, as described in the application from points in Colorado, Idaho, New Mexico, Utah, and Wyoming to points in western trunk line territory.

Grounds for relief: Motor truck competition.

Tariff: Supplement 148 to Western Trunk Line Committee tariff I. C. C. A–3511.

FSA No. 34880: *Pallets, platforms, on skids from southwest to Illinois.* Filed by Southwestern Freight Bureau, Agent (No. B–7354), for interested rail carriers. Rates on pallets, platforms, or skids, for lift trucks, wooden, carloads from points in southwestern territory to points in Illinois on the Chicago Burlington and Quincy Railroad.

Grounds for relief: Operation through higher-rated territory.

Tariff: Supplement 27 to Southwestern Freight Bureau tariff I. C. C. 4262.

By the Commission.

TITLE 7—AGRICULTURE

Chapter I—Agricultural Marketing Service (Standards, Inspections, Marketing Practices), Department of Agriculture

REDESIGNATION OF SUBCHAPTERS

EDITORIAL NOTE: Subchapter D, Warehouse Regulations, and Subchapter E, Naval Stores, of this chapter, are redesignated Subchapters E and F, respectively.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Valencia Orange Reg. 148, Amdt. 1]

PART 922—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

Findings. 1. Pursuant to the marketing agreement and Order No. 22, as amended (7 CFR Part 922), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the said marketing agreement and order, as amended, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act by tending to establish and maintain such orderly marketing conditions for such oranges as will provide, in the interests of producers and consumers, an orderly flow of the supply thereof to market throughout the normal marketing season to avoid unreasonable fluctuations in supplies and prices, and is not for the purpose of maintaining prices to farmers above the level which it is declared to be the policy of Congress to establish under the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication hereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of Valencia oranges grown in Arizona and designated part of California.

Order, as amended. The provisions in paragraph (b) (1) (ii) of § 922.448 (Valencia Orange Regulation 148, 23 F. R. 6101) are hereby amended to read as follows:

(ii) District 2: 600,600 cartons.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: August 14, 1958.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 58-6662; Filed, Aug. 18, 1958; 8:54 a. m.]

PART 993—DRIED PRUNES PRODUCED IN CALIFORNIA

ORDER FINDING THAT ESTIMATED SEASON AVERAGE PRICE OF PRUNES FOR 1958-59 CROP YEAR WILL BE IN EXCESS OF PARITY AND PROVIDING FOR SPECIAL REGULATION

Notice was published in the July 30, 1958, issue of the FEDERAL REGISTER (23 F. R. 5737) that consideration was being given to the making of a finding and determination that the estimated season average price for prunes for the crop year beginning August 1, 1958, would be in excess of the price level contemplated by the provisions of section 2 (1) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.),

Appendix (Public land orders):
1690 (correction) — 6344

If the below-parity regulatory provisions of Marketing Agreement No. 110, as amended, and Order No. 93, as amended (7 CFR Part 993), regulating the handling of dried prunes produced in California, effective under the act, hereinafter called the "order," were made operative for the 1958–59 crop year. In conjunction therewith it was contemplated that the Secretary would order that the provisions of paragraphs (b), (c), (d), (e) and (f) of § 993.50 of the order apply to all handling of prunes, and would suspend the current pack regulations (§§ 993.501 to 993.518; 23 F. R. 3373) for the remainder of the 1958–59 crop year. Opportunity was afforded all interested persons to file written data, views, or arguments with respect thereto; and none was filed.

After consideration of all relevant matters, including the proposals contained in the notice and other available information, it is hereby found that the estimated season average price for prunes for the crop year which began on August 1, 1958, will be in excess of the price level contemplated by the provisions of section 2 (1) of the act, irrespective of whether the provisions (other than those that may be made effective pursuant to § 993.50) of the order, are operative for the remainder of the said crop year. It is hereby further found that the handling of prunes during such period in accordance with the provisions of paragraphs (b), (c), (d), (e) and (f) of § 993.50 will tend to effectuate the declared policy of the act by establishing and maintaining such minimum standards of quality and maturity and such grading and inspection requirements for prunes in interstate commerce as will effectuate such orderly marketing of prunes as will be in the public interest, and is not for the purpose of maintaining prices to farmers above the level which it is declared to be the policy of Congress to establish thereunder.

Since the provisions of § 993.50 are being made effective in lieu of the requirements of §§ 993.48 and 993.49 for the remaining portion of the 1958–59 crop year beginning at the effective time of this order, the minimum standards as to grade for natural condition prunes or processed prunes, as the case may be, shall be those set forth in § 993.97 (Exhibit A). Therefore, the combined tolerance allowance of 20 percent as provided in § 993.97 (Exhibit A) for defects included therein would be in effect during the remaining portion of the 1958–59 crop year instead of the modified combined tolerance allowances of 15 percent, which was made effective August 20, 1957 (22 F. R. 6645) pursuant to the provisions of §§ 993.48 (c) and 993.49 (c) of the order. Moreover, the pack regulations, which became effective June 20, 1958 (§§ 993.501 to 993.518; 23 F. R. 3373) pursuant to § 993.49 (b) (3) of the order, would be inoperative for the same period. Since the current crop year has just begun and handlers generally do not receive prunes this early in the crop year, the aggregate quantity, if any, of unsold surplus tonnage prunes received by handlers after August 1, 1958 and prior to the effective time of this order, and then on hand, would not be substantial. Under the circumstances, it is hereby determined that it would be appropriate to provide for the orderly disposition of such prunes by ordering the releases of any such unsold surplus tonnage prunes to the handlers entitled thereto for disposition in accordance with § 993.50.

It is, therefore, ordered, That:

1. The provisions of paragraphs (b), (c), (d), (e) and (f) of § 993.50 shall apply to all handling of prunes during the remaining portion of the 1958–59 crop year beginning at the effective time of this order.

2. The modified (22 F. R. 6645) combined tolerance allowance of 15 percent for the defects contained in § 993.97 (Exhibit A), effective August 20, 1957, shall not be applicable for the remaining portion of the 1958–59 crop year beginning at the effective time of this order.

3. The pack regulations, effective June 20, 1958 (§§ 993.501 to 993.518; 23 F. R. 3373), shall not be applicable during the said remaining portion of said crop year.

4. The applicability of the salable and surplus percentages of 90 percent and 10 percent, respectively, established (22 F. R. 6645) for the 1957–58 crop year is hereby terminated with respect to said remaining portion of said crop year.

5. To the extent that there may be on hand any unsold surplus tonnage (standard and substandard) prunes received by handlers on or after August 1, 1958, but not later than the effective time of this order, such prunes shall, as soon as practicable after the effective time of this order, be released to the respective handlers for disposition in accordance with the provisions of § 993.50.

It is further found that good cause exists for not postponing the effective date hereof until 30 days after publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) and for making the provisions hereof effective upon publication in that: (1) The 1958–59 crop year has already begun and handlers will soon begin receiving 1958 crop prunes and are now handling 1957 crop prunes; (2) handlers will need to know as soon as possible the regulations which will apply to the handling of prunes during the 1958–59 crop year; (3) this order will require no advance preparation by prune handlers in order to comply therewith; and (4) this order relieves restrictions on the handling of prunes, and should be made effective upon publication in the FEDERAL REGISTER.

(Sec. 5, 49 Stat. 758, as amended; 7 U. S. C. 608c)

Dated August 13, 1958, to become effective upon publication in the FEDERAL REGISTER.

[SEAL] S. R. SMITH,
Director,
Fruit and Vegetable Division.

[F. R. Doc. 58-6665; Filed, Aug. 18, 1958; 8:55 a. m.]

PART 993—DRIED PRUNES PRODUCED IN CALIFORNIA

APPROVAL OF EXPENSES OF PRUNE ADMINISTRATIVE COMMITTEE FOR 1958–59 CROP YEAR AND FIXING RATE OF ASSESSMENT FOR SUCH CROP YEAR

Notice was published in the July 30, 1958, issue of the FEDERAL REGISTER (23 F. R. 5736) that consideration was being given to the approval of proposed expenses of the Prune Administrative Committee for the 1958–59 crop year and the fixing of a rate of assessment for such crop year, in accordance with the recommendations of the committee and pursuant to the provisions of Marketing Agreement No. 110, as amended, and Order No. 93, as amended (7 CFR Part 993), regulating the handling of dried prunes produced in California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.). In said notice, interested persons were afforded the opportunity to file written data, views, or arguments with respect to the proposals. No such comment was filed within the prescribed time.

After consideration of all relevant matters pertaining to the proposals, including the recommendations of the committee, it is hereby found, and determined, and, therefore, it is hereby ordered, that the expenses of the committee and the rate of assessment for the crop year beginning August 1, 1958 shall be as follows:

§ 993.309 *Expenses of the Prune Administrative Committee and rate of assessment for the 1958–59 crop year.*—(a) *Expenses.* Expenses in the amount of $88,660 are reasonable and likely to be incurred by the Prune Administrative Committee for its maintenance and functioning during the crop year beginning August 1, 1958.

(b) *Rate of assessment.* Each handler shall pay to the Prune Administrative Committee, in accordance with the provisions of § 993.50 (e), an assessment of 65 cents for each ton of prunes received by him as the first handler thereof

during the crop year beginning August 1, 1958, which assessment rate is hereby fixed as each handler's pro rata share of the aforesaid expenses.

It is hereby further found that good cause exists for not postponing the effective date hereof until 30 days after publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that: (1) Under said marketing agreement, as amended, and order, as amended, assessments apply to all prunes handled during the 1958–59 crop year, and handling of such prunes will begin soon; (2) the committee must be enabled to obtain adequate funds currently from 1958–59 crop year assessments in order to defray expenses of administering the program; (3) while the committee has on hand some assessment funds from the 1957–58 crop year that were not expended in connection with the operation of such crop year, such funds are not sufficient to pay the expenses of the committee, as authorized by §§ 993.81 and 993.82; (4) compliance herewith will not require any advance preparation on the part of the handlers; and (5) it is imperative that this action be made effective as soon as possible and not later than the date on which this order is published in the FEDERAL REGISTER.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated August 13, 1958, to become effective upon publication in the FEDERAL REGISTER.

[SEAL] S. R. SMITH,
Director,
Fruit and Vegetable Division.

[F. R. Doc. 58-6664; Filed, Aug. 18, 1958; 8:55 a. m.]

PART 1003—DOMESTIC DATES PRODUCED OR PACKED IN LOS ANGELES AND RIVERSIDE COUNTIES OF CALIFORNIA

APPROVAL OF EXPENSES OF DATE ADMINISTRATIVE COMMITTEE FOR 1958–59 CROP YEAR AND FIXING RATE OF ASSESSMENT FOR SUCH CROP YEAR

Notice was published in the August 2, 1958, issue of the FEDERAL REGISTER (23 F. R. 5879) that consideration was being given to the approval of proposed expenses of the Date Administrative Committee for the 1958–59 crop year and the fixing of a rate of assessment for such crop year, in accordance with the recommendations of the committee and pursuant to the provisions of Marketing Agreement No. 127, and Order No. 103 (7 CFR Part 1003), regulating the handling of domestic dates produced or packed in Los Angeles and Riverside Counties of California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.). In said notice, interested persons were afforded the opportunity to file written data, views, or arguments with respect to the proposals. No such comment was filed within the prescribed time.

After consideration of all relevant matters pertaining to the proposals, including the recommendations of the committee, it is hereby found, and determined, and, therefore, it is hereby ordered, that the expenses of the committee and the rate of assessment for the crop year beginning August 1, 1958, shall be as follows:

§ 1003.303 *Expenses of the Date Administrative Committee and rate of assessment for the 1958–59 crop year*—(a) *Expenses.* Expenses in the amount of $38,595 are reasonable and likely to be incurred by the Date Administrative Committee for its maintenance and functioning during the crop year beginning August 1, 1958.

(b) *Rate of assessment.* Each handler shall pay to the Date Administrative Committee, in accordance with the provisions of Marketing Agreement No. 127, and this part, an assessment of 15 cents per hundredweight of dates which he handles or has had certified for handling or for further processing during the crop year beginning August 1, 1958, which assessment rate is hereby fixed as each handler's pro rata share of the aforesaid expenses.

It is hereby further found that good cause exists for not postponing the effective date hereof until 30 days after publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that: (1) Under said marketing agreement and order assessments apply to all Daglet Noor, Zahidi and Khadrawy dates handled or certified for handling or for further processing during the 1958–59 crop year, and handling of such dates is already occurring; (2) there are already assessable dates to which the aforesaid rate of assessment will apply retroactively, and these should be assessed as soon as possible for efficient administration of the program; (3) compliance herewith will not require any advance preparation on the part of handlers; and (4) it is imperative that this action be made effective as soon as possible and not later than the date on which this order is published in the FEDERAL REGISTER.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated August 14, 1958, to become effective upon publication in the FEDERAL REGISTER.

[SEAL] S. R. SMITH,
Director,
Fruit and Vegetable Division.

[F. R. Doc. 58-6663; Filed, Aug. 18, 1958; 8:54 a. m.]

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

[Civil Air Regs., Amdt. 60–12]

PART 60—AIR TRAFFIC RULES

CRUISING ALTITUDES

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 14th day of August 1958.

On June 6, 1958, the Civil Aeronautics Board adopted Amendment 60–10 to Part 60 of the Civil Air Regulations which established a simplified system of cruising altitude rules. The rules in this amendment are to become effective August 15, 1958.

One of the provisions which was intended to be included in this amendment was the specification that all aircraft being operated under the instrument flight rules and cleared "on top" would be operated at altitudes prescribed for VFR flight.

While such a provision was included in the amendment, it was inadvertently placed in § 60.44 (a) which is entitled "Within controlled airspace." This arrangement technically limits the applicability of this provision to flights within controlled airspace. Contrary to the intent this would require a flight operating "on top" on an IFR flight plan to change altitude as it transited from or to uncontrolled airspace.

In order to make this provision consistent with the intent and to make it clear that all flights being operated "on top" should comply with the cruising altitude rules prescribed for VFR flight whether in or outside of controlled airspace, it is considered appropriate to amend § 60.44.

This amendment replaces the provision dealing with "on top" flights in the introductory paragraph of § 60.44 which makes it applicable to all IFR flights being conducted in or outside of controlled airspace.

Since this amendment is of a clarifying nature and does not impose additional burden on any person, it may be made effective on less than 30 days' notice.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 60 of the Civil Air Regulations (14 CFR Part 60, as amended) effective August 15, 1958:

1. By amending the introductory paragraph of § 60.44 to read as follows:

§ 60.44 *IFR cruising altitudes.* When an aircraft is operated in level cruising flight, it shall be operated in accordance with the following cruising altitudes except that, in the absence of a specific altitude authorized by air traffic control, aircraft operating "on top" shall be flown at altitudes specified in § 60.32.

2. By amending § 60.44 (a) to read as follows:

§ 60.44 *IFR cruising altitudes.* • • •

(a) *Within controlled airspace.* At altitudes authorized by air traffic control.

(Sec. 205 a, 52 Stat. 984; 49 U. S. C. 425 a. Interpret or apply sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

By the Civil Aeronautics Board.

[SEAL] MABEL MCCART,
Acting Secretary.

[F. R. Doc. 58-6668; Filed, Aug. 18, 1958; 8:55 a. m.]

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 10]

PART 507—AIRWORTHINESS DIRECTIVES

MISCELLANEOUS AMENDMENTS

This amendment to Part 507 contains the Airworthiness Directives amended or issued during July 1958. Individual notice of the Airworthiness Directives contained herein has been given to operators and other interested persons who are subscribers to a Civil Aeronautics Administration mailing service.

In the interest of safety, compliance with the notice, procedures and effective date provisions of section 4 of the Administrative Procedure Act is impracticable and contrary to the public interest, and therefore, is not required.

Section 507.10 (a) is amended as follows:

1. 58–12–1 applying to all aircraft with sea level engines equipped with pressure type carburetors as it appeared in 23 F.R. 5561 is canceled.

2. 58–8–1 Bendix 756–62C or D and 756–64C or D starters installed on Lycoming engines as it appeared in 23 F. R. 3587 is revised by changing the compliance date to October 1, 1958.

3. 58–7–2 Lockheed 18 as it appeared in 23 F. R. 3585 is amended by adding the following statement: "For the purpose of compliance with this airworthiness directive, X-ray inspection is not considered an equivalent of dye penetrant or magnetic particle inspection."

4. The following new airworthiness directives are added:

58–14–1 SUD AVIATION. Applies to All Alouette II SE 3130 Helicopters.

Compliance required prior to next flight and each 5 hours of operation thereafter.

Two cases of defective bonding at the outboard end of the root end side plates of the tail rotor blades have been found. In order to preclude any possible fatigue failures of the blade, Sud Aviation has issued the following corrective measures which the French SGACC considers mandatory:

Inspection.

A. Blades with rigid flapping restrainer.

(Aircraft Numbers 1137 and above or aircraft incorporating modification V.14.)

(1) Saturate with turbine oil (Spec. AIR 3512 or DED 2479/6, Shell turbine oil No. 9 or Esso aviation oil No. 57) the edge of the side plate and the bead of adhesive at the outboard end of the side plate.

(2) Move blade to and fro by pushing and pulling blade tip alternately four or five times respectively, applying a load of approximately 13 pounds (check with spring balance).

(3) In the case of a defective blade, the oil will flow in and out and, at the same time, air bubbles may be produced.

(4) If in doubt, wipe the side plate and repeat the above loading procedure.

B. Blades with earlier type flapping restrainer.

(Aircraft Numbers 1136 and below which do not incorporate modification V.14.)

The previously described inspection procedure cannot be applied without risking distortion of the flapping restrainers.

The procedure may, however, be applied if the blades are removed and are clamped in a vise over the two inboard blade-cuff retaining bolts (bolts nearest root end of blade.)

To avoid blade removal and inspection in a vise, the tools may be fabricated in order to rigidly support the blade root on the helicopter.

The tools can simply consist of a wood block cut to proper length so as to rest at one end against the two tail gearbox nuts and at the other end against the blade-cuff bolts.

To hold the blade in the other direction, strap the blade and the tail gearbox housing as shown in the sketch in the referenced Service Bulletin, using a cable cut to the proper length or, alternatively, a non-elastic strap.

The inspection procedure is the same as previously described.

C. Defective blades shall be retired from service immediately. Others may be left in service as long as the bonding is satisfactory up to a maximum of 300 hours.

The CAA concurs with this action and considers compliance therewith mandatory.

(Sud-Aviation Helicopter Service Bulletin No. AL 34.11.131/A covers the same subject.)

This supersedes AD 58–13–4.

58–15–1 DOUGLAS. Applies to DC–6 and DC–7 Series Aircraft.

Compliance required by September 1, 1958.

Hook assemblies, P/N CSS1000–D, installed in safety belt assemblies, P/N 5610175, have been found to be understength due to improper heat treat by the vendor.

All DC–6 and DC–7 series aircraft equipped with these safety belt assemblies that were manufactured during the months of December 1957, January 1958, and February 1958, are affected. These belts can be identified by the manufacturing date (month and year) stamped on the part number tag sewn on the belt (i. e., date manufactured, December 1957, etc.). Belt assemblies manufactured prior to these dates are satisfactory and all future DC–6 and DC–7 aircraft will have safety belts with proper hook assemblies installed.

All hook assemblies that give a Rockwell reading of 36 or above on the "C" scale are satisfactory. Those that show a Rockwell reading below 36 are unsatisfactory and the belt must be replaced.

(Douglas Alert Service Bulletin A–779 for the DC–6 series and A–321 for the DC–7 series cover the above subject and describe acceptable inspection and replacement procedures.)

58–15–2 MARVEL-SCHEBLER. Applies to All Marvel-Schebler MA4–5 and MA4–5AA Carburetors With Serial Numbers 3999574 and Under. These Carburetors Are Used With Various Continental, Franklin, and Lycoming Engine Models.

Compliance required at next carburetor overhaul, but not later than at next engine overhaul.

Repetitive reports of retention failure of the float and lever assembly used with early type MA4–5 and MA4–5AA carburetors necessitate compliance with the following to correct this difficulty, and maintain engine airworthiness:

(1) Remove float assembly P/N 30–629. (In this assembly the float is soldered to the lever for retention.)

(2) Install revised float assembly P/N A30–629. (In this assembly a rigid reinforcing brace is added at the junction of the float and lever.) This revised assembly is incorporated in serial numbers 3999575 and up. (Marvel-Schebler Products Division, Borg-Warner Corporation, Decatur, Illinois, Service Bulletin No. 5–57, Continental Service Bulletin 57–3, and Lycoming Service Bulletin No. 237, cover this same subject.)

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 608, 52 Stat. 1007, 1009, as amended; 49 U. S. C. 551, 553)

[SEAL] WILLIAM B. DAVIS,
Acting Administrator of Civil Aeronautics.

AUGUST 12, 1958.

[F. R. Doc. 58–6621; Filed, Aug. 18, 1958; 8:45 a. m.]

TITLE 9—ANIMALS AND ANIMAL PRODUCTS

Chapter I—Agricultural Research Service, Department of Agriculture

Subchapter C—Interstate Transportation of Animals and Poultry

[B. A. I. Order 383, Rev., Amdt. 104]

PART 76—HOG CHOLERA, SWINE PLAGUE, AND OTHER COMMUNICABLE SWINE DISEASES

SUBPART B—SWINE DISEASES SPREAD THROUGH RAW GARBAGE

CHANGES IN AREAS QUARANTINED

Pursuant to the provisions of sections 1 and 3 of the act of March 3, 1905, as amended (21 U. S. C. 123, 125), sections 1 and 2 of the act of February 2, 1903, as amended (21 U. S. C. 111–113, 120), and section 7 of the act of May 29, 1884, as amended (21 U. S. C. 117), § 76.27, as amended, Subpart B, Part 76, Title 9, Code of Federal Regulations (9 CFR, 1957 Supp., 76.27; 23 F. R. 794, 1855, 2589, 3850, 5271), which quarantines certain areas because of vesicular exanthema, a contagious, infectious, and communicable disease of swine, is hereby further amended in the following respects:

1. Subparagraph (3) of paragraph (d), relating to Camden County in New Jersey, is deleted.

2. A new subdivision (lxxxix) is added to subparagraph (5) of paragraph (d), relating to Gloucester County in New Jersey, to read:

(lxxxix) Block 4, Lot 8, Plot 2, in Deptford Township, owned by Vincent Koropha, and operated by Charles Messner.

Effective date. The foregoing amendment shall become effective upon issuance.

The amendment releases areas in New Jersey, heretofore quarantined because of vesicular exanthema. Hereafter, the restrictions pertaining to the interstate movement of swine, and carcasses, parts and offal of swine, from or through quarantined areas, contained in 9 CFR, 1957 Supp., Part 76, Subpart B as amended, will not apply to such areas. However, the restrictions pertaining to such movement from nonquarantined areas, contained in said Subpart B, as amended, will apply thereto.

The amendment relieves certain restrictions presently imposed, and must be made effective immediately to be of maximum benefit to persons subject to the restrictions which are relieved. Accordingly, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003), it is found upon good cause that notice and other public procedure with

respect to the amendment are impracticable and contrary to the public interest, and good cause is found for making the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

(Sec. 7, 23 Stat. 32, as amended, secs. 1, 2, 32 Stat. 791–792, as amended, secs. 1, 3, 33 Stat. 1264, as amended, 1265, as amended; 21 U. S. C. 111–113, 117, 120, 123, 125)

Done at Washington, D. C., this 14th day of August 1958.

[SEAL] M. R. CLARKSON,
Acting Administrator,
Agricultural Research Service.

[F. R. Doc. 58-6667; Filed Aug. 18, 1958; 8:55 a. m.]

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

Subchapter C—Drugs

PART 141a—PENICILLIN AND PENICILLIN-CONTAINING DRUGS; TESTS AND METHODS OF ASSAY

PART 146a—CERTIFICATION OF PENICILLIN AND PENICILLIN-CONTAINING DRUGS

PART 146b—CERTIFICATION OF STREPTOMYCIN (OR DIHYDROSTREPTOMYCIN) AND STREPTOMYCIN- (OR DIHYDROSTREPTOMYCIN-) CONTAINING DRUGS

MISCELLANEOUS AMENDMENTS

Under the authority vested in the Secretary of Health, Education, and Welfare by the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended; sec. 701, 52 Stat. 1055, as amended; 21 U. S. C. 357, 371) and delegated to the Commissioner of Food and Drugs by the Secretary (22 F. R. 1045), the regulations for tests and methods of assay and certification of antibiotic and antibiotic-containing drugs (21 CFR Parts 141a, 146a, 146b; 21 CFR, 1957 Supp., 146a.104) are amended as indicated below:

1. Section 141a.82 is amended by changing the headnote to read as follows: "§ 141a.82 *Penicillin V for oral suspension (phenoxymethyl penicillin V for oral suspension); potassium penicillin V for oral solution.*"

2. Section 146a.104 is amended as follows:

a. The section headnote and paragraph (a) are amended to read:

§ 146a.104 *Penicillin V for oral suspension (phenoxymethyl penicillin for oral suspension); potassium penicillin V for oral solution*—(a) *Standards of identity, strength, quality, and purity.* Penicillin V for oral suspension or potassium penicillin V for oral solution is a mixture of penicillin V or potassium penicillin V, with or without one or more suitable and harmless suspending agents, colorings, flavorings, buffer substances, and preservatives, and with or without one or more suitable sulfonamides. Its moisture content is not more than 1 per cent. The penicillin V used conforms to the requirements of § 146a.103 (a). The potassium penicillin V used conforms to the requirements of § 146a.61 (a). Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

b. In paragraph (c) *Labeling*, subparagraph (1) (iv) is changed to read:

(iv) The statement "Expiration date _____," the blank being filled in with the date that is 24 months after the month during which the batch was certified, if it is penicillin V, or 18 months if it is potassium penicillin V, except that if it contains sulfonamides the blank shall be filled in with the date that is 12 months after the month during which the batch was certified.

c. Paragraph (c) (3) is changed to read:

(3) On the label and labeling, if it contains sulfonamides, after the name "penicillin V for oral suspension" or "potassium penicillin V for oral solution," wherever such name appears, the words "with sulfonamides," in juxtaposition with such name.

d. In paragraph (d) *Request for certification* * * *, subparagraph (2) (ii) is changed to read:

(ii) The penicillin V or potassium penicillin V used in making the batch: Potency, toxicity, moisture, pH, crystallinity, and penicillin V content.

3. In § 146b.126 *Streptomycin-neomycin powder* * * *, subparagraph (1) (iii) of paragraph (c) *Labeling* is amended by changing the colon after the word "certified" to a comma and adding the following new clause: ", except that the blank may be filled in with the date that is 24 months or 36 months after the month during which the batch was certified if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section:".

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the amendments contained in this order.

Effective date. This order shall become effective on the date of publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

(Sec. 701, 52 Stat. 1055, as amended; 21 U. S. C. 371. Interprets or applies sec. 507, 59 Stat. 463, as amended; 21 U. S. C. 357)

Dated: August 12, 1958.

[SEAL] GEO. P. LARRICK,
Commissioner of Food and Drugs.

[F. R. Doc. 58-6638; Filed, Aug. 18, 1958; 8:49 a. m.]

TITLE 26—INTERNAL REVENUE, 1954

Chapter I—Internal Revenue Service, Department of the Treasury

Subchapter E—Alcohol, Tobacco, and Other Excise Taxes

[T. D. 6303]

PART 270—CIGARS AND CIGARETTES; MANUFACTURERS, IMPORTERS, AND DEALERS

TIMELY FILING OF CIGAR TAX RETURNS

In order that the period for filing cigar tax returns will be extended if the last day for filing falls on a legal holiday in the District of Columbia, regardless of whether the return is required to be filed in the District of Columbia (consistent with the provisions in 26 CFR 301.7503-1, Procedure and Administration Regulations), regulations in 26 CFR Part 270 are amended as follows:

PARAGRAPH 1. Section 270.220, relating to returns, is amended by striking the expression "(of the particular State or of the District of Columbia wherein the return is required to be filed)" and inserting, in lieu thereof, the expression "of the District of Columbia, or on a Statewide legal holiday of the particular State where the return is required to be filed".

Because the amendment made by this Treasury decision is liberalizing in character, it is found that it is unnecessary to issue this Treasury decision with notice and public procedure under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4 (c) of said act.

This Treasury decision shall be effective upon publication in the FEDERAL REGISTER.

(68A Stat. 917; 26 U. S. C. 7805)

[SEAL] RUSSELL C. HARRINGTON,
Commissioner of Internal Revenue.

Approved: August 14, 1958.

DAN THROOP SMITH,
Deputy to the Secretary.

[F. R. Doc. 58-6651; Filed, Aug. 18, 1958; 8:53 a. m.]

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 1690]

[1271673]

OREGON

REVOKING EXECUTIVE ORDER NO. 4708 OF AUGUST 5, 1927, WHICH WITHDREW LANDS FOR USE OF FOREST SERVICE AS A LOOKOUT STATION

Correction

In Federal Register Document 58-5716, published on page 5672 of the issue for Saturday, July 26, 1958, the land description should read as follows:

WILLAMETTE MERIDIAN

T. 4 S., R. 7 W.,
Sec. 11, NE¼SW¼ and NW¼SE¼.

TITLE 32—NATIONAL DEFENSE

Chapter I—Office of the Secretary of Defense

Subchapter A—Armed Services Procurement Regulations

[Amdt. 33]

MISCELLANEOUS AMENDMENTS

The following miscellaneous amendments are made to this subchapter:

PART 1—GENERAL PROVISIONS

SUBPART C—GENERAL POLICIES

1. Section 1.301 relating to methods of procurement has been revised to prescribe maximum utilization of competition. Section 1.301, as revised, reads as follows:

§ 1.301 *Methods of procurement.* It shall be the objective to use that method of procurement which will be most advantageous to the Government—price, quality, and other factors considered. Such procurement shall be made on a competitive basis, whether by formal advertising or by negotiation, to the maximum practicable extent, in accordance with the policies and procedures set forth in this subchapter. Procurement shall be effected by advertising for bids and thereafter awarding a contract to the lowest responsible bidder, in accordance with the detailed requirements and procedures set forth in Part 2 of this subchapter; except that procurement may be effected by negotiation when authorized by and conducted in accordance with the detailed requirements and procedures set forth in Part 3 of this subchapter. Procurement may also be effected, as provided in Parts 4 and 5 of this subchapter, by such means as coordinated procurement or interdepartmental procurement.

2. Section 1.305 has been revised to prescribe the extent Federal specifications are mandatory for use by the Department of Defense. Section 1.305–1 has been added listing exemptions from the requirement for Federal and military specifications. Section 1.305, as revised, reads as follows:

§ 1.305 *Specifications.* The following specifications are mandatory for use by the Department of Defense in the procurement of supplies and services covered by such specifications:

(a) Federal specifications, unless determined by the Department of Defense to be inapplicable for its use; and

(b) Coordinated Military specifications, approved by the Department of Defense for its use.

However, if it be determined in accordance with the procedures established under the Defense Standardization Program by the Assistant Secretary of Defense (Supply and Logistics) that such specifications do not meet the particular or essential needs of a bureau, service, or command, then applicable interim Federal specifications or limited coordination Military specifications should be used. Where no applicable specification exists, a purchase description may be used, subject to the restriction indicated in § 1.305–1 (g) below.

§ 1.305–1 *Exemptions.* Federal and Military specifications need not be used for the following:

(a) Purchase incident to research and development;

(b) Purchase of items for test or evaluation;

(c) Purchase of laboratory test equipment for use by Government laboratories;

(d) Purchase of items for authorized resale except military clothing;

(e) Purchase of items in an amount not to exceed $2,500 (multiple small purchases of less than $2,500 of the same item shall not be made for the purpose of avoiding the intent of this exception);

(f) Purchase of one-time procurement items; or

(g) Purchase of items for which it is impracticable or uneconomical to prepare a specification (repetitive use of a purchase description containing the essential characteristics of a specification will be construed as evidence of improper use of this exception).

§ 1.305–2 *Inadequate specifications.* Whenever a specification is found to be inadequate, immediate action shall be taken to effect the issuance of an amendment or a revision in accordance with established procedures to obviate the necessity for repeated departures from the specification.

§ 1.305–3 *Packaging, specifications, and requirements.* Appropriate provisions shall be included in contracts to insure that contractors will package the supplies in accordance with applicable specifications and requirements.

3. Sections 1.307 and 1.604–2 have been revised to provide a firmer approach to eliminating discrimination in the performance of Government contracts, to be adopted in cases where education, conciliation, mediation and persuasion do not achieve the desired results. This action is responsive to recommendations set forth by the President's Committee on Government Contracts. A new § 1.312 has been added to state Department of Defense policy regarding the issuance of solicitations for informational or planning purposes. Sections 1.307, 1.312 and 1.604–2 read as follows:

§ 1.307 *Responsible prospective contractor.* * * *

(f) Appears to be able to conform to the requirements of the standard nondiscrimination clause; and

(g) Is otherwise qualified and eligible to receive an award under applicable laws and regulations.

Where it is considered necessary by the contracting officer to prevent practices prejudicial to fair and open competition or for other reasons, prospective contractors may be required to submit affidavits concerning any of the requirements enumerated in (a) through (g) of this section and company ownership and control (but see § 2.201 (c) (17) of this subchapter).

§ 1.312 *Solicitations for informational or planning purposes.* It is the general policy of the Department of Defense to solicit bids, proposals or quotations only where there is a definite intention to award a contract or a purchase order. However, in some cases solicitation for informational or planning purposes may be justified. In such cases the invitation or request shall clearly state its purpose, explaining that the Government does not intend to award a contract on the basis of the invitation or request, or otherwise pay for the information solicited.

SUBPART F—DEBARRED, INELIGIBLE, AND SUSPENDED BIDDERS

§ 1.604 *Causes and conditions under which Department may debar contractors.* * * *

§ 1.604–2 *Period of debarment.* All debarments shall be for a reasonable, definitely stated period of time, commensurate with the seriousness of the cause therefor. As a general rule, a period of debarment should not exceed 5 years following the date of conviction for fraud or other criminal offense, or 3 years following the date of debarment for any other cause. However, with respect to debarment for violation of the nondiscrimination clause, the debarment shall be removed prior to the expiration of the debarment period by the Secretary who imposed the debarment upon receipt of satisfactory evidence that corrective action has been taken. In the event debarment is preceded by suspension, consideration shall be given to such period of suspension in determining the period of debarment.

(R. S. 161, sec. 2202, 70A Stat. 120; 5 U. S. C. 22, 10 U. S. C. 2202)

PART 2—PROCUREMENT BY FORMAL ADVERTISING

SUBPART A—USE OF FORMAL ADVERTISING

A new § 2.105 has been added, cross-referencing § 1.312. Section 2.105 reads as follows:

§ 2.105 *Solicitations for informational or planning purposes.* See § 1.312 of this subchapter.

(R. S. 161, sec. 2202, 70A Stat. 120; 5 U. S. C. 22, 10 U. S. C. 2202)

PART 3—PROCUREMENT BY NEGOTIATION

SUBPART A—USE OF NEGOTIATION

A new § 3.110 has been added, cross-referencing § 1.312. Section 3.110 reads as follows:

§ 3.110 *Solicitations for informational or planning purposes.* See § 1.312 of this subchapter.

SUBPART D—TYPES OF CONTRACTS

1. Section 3.403–4 has been revised to describe an alternate form of incentive contract to be used on a limited basis in lieu of the delayed firm target type formerly included in this subchapter. The successive targets type is designed for use when a firm target cannot be established at the time of contract negotiation and it provides an incentive to reduce costs prior to the establishment of a firm target. Section 3.403–4, as revised, reads as follows:

§ 3.403 *Fixed-price type contracts.* * * *

§ 3.403–4 *Fixed-price incentive contracts*—(a) *Description*—(1) *General.* The fixed-price incentive contract is a

fixed-price type contract with provision for adjustment of total target profit and establishment of the final contract price by a formula based on the relationship which final negotiated total cost bears to total target cost.

(2) *Initial target.* Under this type of incentive contract there is negotiated at the outset a target cost, a target profit, a price ceiling and a final profit and price adjustment formula. The formula may also provide, within the price ceiling, for a ceiling, a floor, or both on final profit. The formula should reflect the risks involved. After performance of the contract, the final cost is negotiated and the final contract price is then established in accordance with the formula. Where the final cost is less than the target cost, the formula provides for a final profit above the target profit; conversely, where the final cost is more than the target cost, the formula provides for a final profit below the target profit. Thus, the formula provides for sharing cost savings or, within the price ceiling, excesses, as revealed by a comparison of final cost with target cost. The increase or decrease in the actual profit included in the final price is thus designed to provide in advance a calculable incentive to the contractor for efficiency in performance.

(3) *Successive targets.* Under this type of incentive contract there is negotiated at the outset an initial target cost, an initial target profit, a price ceiling, a formula for fixing the firm target profit, and a production point at which the formula will be applied. Generally, the production point will be prior to delivery or shop completion of the first item. This formula does not apply to the life of the contract but simply fixes the firm target profit for the contract. The formula for fixing the firm target profit may also provide for a ceiling and floor on the firm target profit, but not one without the other. When the production point for applying the formula is reached, the firm target cost is then negotiated, giving consideration to experienced cost and all other pertinent factors, and the firm target profit is automatically determined in accordance with the formula which then passes out of existence. At this point, two alternatives are possible. First, if the remaining performance of the contract provides opportunity for application of an incentive arrangement for additional and substantial reductions in cost, a final profit and price adjustment formula may be negotiated, using the firm target profit and the firm target cost. As in the initial target type of contract described in (a) (2) above, the final cost is negotiated at the completion of the contract and the final contract price is then established in accordance with the final profit and price adjustment formula. Second, if the firm target cost plus the firm target profit present a price which is reasonable and provides normal business risks to the contractor for the performance of the contract, the price may be established as a firm fixed price.

(4) *Billing price.* In either of the above types of contract, a billing price will be established as an interim basis for payment. This billing price may be adjusted within the ceiling limits, upon request of either party to the contract, when it becomes apparent that final negotiated costs will be substantially different from the target cost.

(b) *Applicability.* (1) The initial target type of incentive contract, described in paragraph (a) (2) of this section, is appropriate for use where targets which are reasonably free of contingencies and which provide a fair and reasonable incentive can be established at the outset.

(2) The successive targets type of incentive contract, described in paragraph (a) (3) of this section, is appropriate for use where the contractor's and the Government's knowledge of probable cost of performance, though substantial, is so indefinite that fair, firm targets cannot be established at the outset, but will become sufficiently definite at an early point in the performance of the contract to permit negotiation of targets which are reasonably free of contingencies and which provide a fair and reasonable incentive.

(3) Neither type of incentive contract should be used unless there is a sufficiently long period of performance to permit achievement of substantial cost reductions.

(c) *Limitations.* Fixed-price incentive contracts shall not be used unless the contractor's accounting system is adequate for price revision purposes and permits satisfactory application of the profit and price adjustment formulas. In no case should such contracts be used where (i) reliable cost estimates are not available at the time of initial contract negotiation or at a very early point in performance, or (ii) the sole or principal purpose is to shift substantially all of the risk of performance to the Government. In no case shall the firm target profit or the final profit and price adjustment formula be established prior to the establishment of the firm target cost. Neither type of incentive contract shall be used unless a determination has been made, in accordance with the requirements of Subpart C of this part, that—

(1) Such method of contracting is likely to be less costly than other methods, or

(2) It is impractical to secure supplies or services of the kind or quality required without the use of such type of contract.

The successive targets type of contract, described in paragraph (a) (3) of this section, shall be used only after written approval by (i) Office of the Deputy Chief of Staff for Logistics or Offices of Heads of the Technical Services, for the Army, (ii) Office of Naval Material, for the Navy, and (iii) Headquarters, Air Material Command, for the Air Force.

2. Sections 3.404–3 and 3.404–4 have been revised to reflect the codification of DoD Directive 7800.3, November 1, 1957, in § 7.203–4. Sections 3.404–3 and 3.404–4, as revised, read as follows:

§ 3.404 *Cost-reimbursement type contracts.* • • •

§ 3.404–3 *Cost-plus-a-fixed-fee contract.* • • •

(d) *Contractors' investment in work-in-process.* (1) It is the policy of the Department of Defense that contractors having cost-reimbursement type contracts should maintain a reasonable investment in the supplies and facilities acquired and in the services rendered in the performance of such contracts. This investment provides a strong incentive for the contractor to strive for greater efficiency and economy and better management, with resultant lower costs to the Government.

(2) In keeping with this policy, cost-reimbursement type contracts other than those set forth below shall provide for interim payment of not to exceed 80% of the costs incurred by the contractor in the performance of the contract:

(i) Contracts under which the contractors receive no fee or profit;

(ii) Contracts with educational institutions or nonprofit organizations;

(iii) Contracts solely for the operation of Government-owned plants or vessels;

(iv) Contracts with small business concerns;

(v) Contracts for research and development which do not provide for quantity production;

(vi) Contracts for performance outside the United States, its Territories, its possessions, and Puerto Rico;

(vii) Contracts having an estimated cost not in excess of $250,000;

(viii) Contracts for construction and architect-engineer services; or

(ix) As determined by the Secretary concerned, contracts in which the application of the policy set forth in (1) above would impose undue hardship on the contractor or adversely affect the interests of the Government.

The appropriate one of the clauses set forth in § 7.203–4 of this subchapter shall be inserted in all cost-reimbursement type supply contracts. In all other cost-reimbursement type contracts to which the policy set forth in this paragraph § 3.404–3 (d) applies, insert the clause set forth in § 7.203–4 (a) or (b) of this subchapter, appropriately modified.

(3) Application of this policy need not affect the method of payment of the fee, but the extent of the contractor's capital investment in the performance of the contract will be taken into consideration in fixing the amount of fee or profit.

§ 3.404–4 *Cost-plus-incentive-fee contract.* • • •

(d) *Contractors' investment in work-in-process.* See § 3.404–3 (d).

SUBPART H—PRICE NEGOTIATION POLICIES AND TECHNIQUES

1. A new sentence has been added to § 3.804 to provide for additional emphasis on oral discussions or written communications during the course of negotiations. § 3.804, as revised, reads as follows:

§ 3.804 *Conduct of negotiations.* Evaluation of offerors' or contractors' proposals, including price revision proposals, by all personnel concerned with the procurement, as well as subsequent negotiations with the offeror or contractor, shall be completed expeditiously. Complete agreement of the parties on all basic issues shall be the objective of the contract negotiations. Oral discussions or written communications shall be conducted with offerors to the extent necessary to resolve uncertainties relating to the purchase or the price to be paid. Basic questions should not be left for later agreement during price revision or other supplemental proceedings. Cost and profit figures of one offeror or contractor shall not be revealed to other offerors or contractors.

2. Section 3.808–4 (c) is amended to read as follows:

§ 3.808–4 *Profit.* • • •

(c) *Extent of Government assistance.* The Department of Defense encourages its contractors to perform their contracts with the minimum of financial, facility, or other assistance from the Government. Where extraordinary financial, facility, or other assistance must be furnished to a contractor by the Government, such extraordinary assistance should have a modifying effect in determining what constitutes a fair and reasonable profit. (See also § 3.404–3 (d).)

(R. S. 161, sec. 2202, 70A Stat. 120; 5 U. S. C. 22, 10 U. S. C. 2202)

PART 7—CONTRACT CLAUSES

SUBPART A—CLAUSES FOR FIXED PRICE SUPPLY CONTRACTS

1. Paragraph (a) of § 7.103–5 has been revised as follows:

§ 7.103–5 *Inspection.*

INSPECTION

(a) All supplies (which term throughout this clause includes without limitation raw materials, components, intermediate assemblies, and end products) shall be subject to inspection and test by the Government, to the extent practicable at all times and places including the period of manufacture, and in any event prior to acceptance.

2. Section 7.104–2 is revised as follows:

§ 7.104 *Clauses to be used when applicable.* • • •

§ 7.104–2 *Copeland Act.* In accordance with the requirements of Subpart D of Part 12 of this subchapter, insert the applicable contract clauses set forth in §§ 12.403–1 or 12.403–4, as the case may be.

3. The clause set forth in § 7.104–20 is in furtherance of Department of Defense policy to provide all possible assistance to small business and to concerns located in labor surplus areas. The clause informs contractors of the order of preference in subcontracting with small business concerns in labor surplus areas. It is made applicable to cost-reimbursement type supply contracts by § 7.203–26.

§ 7.104–20 *Utilization of concerns in labor surplus areas.* Insert the clause set forth below in all fixed-price supply contracts, in amounts exceeding $5,000, except those contracts entered into with foreign contractors which are to be performed outside of the United States, its Territories, its possessions, and Puerto Rico.

UTILIZATION OF CONCERNS IN LABOR SURPLUS AREAS

It is the policy of the Government to place supply contracts with suppliers who will perform such contracts substantially in areas of current labor surplus where this can be done, consistent with the efficient performance of the contract, at prices no higher than are obtainable elsewhere. The Contractor agrees to use its best efforts to place its subcontracts in accordance with this policy. In complying with the foregoing and with paragraph (b) of the clause of this contract entitled "Utilization of Small Business Concerns", the Contractor in placing its subcontracts shall observe the following order of preference: (i) small business concerns in labor surplus areas; (ii) other concerns in labor surplus areas; (iii) small business concerns not in labor surplus areas.

SUBPART B—CLAUSES FOR COST-REIMBURSEMENT TYPE SUPPLY CONTRACTS

1. Section 7.203–4 has been revised to codify DoD Directive 7800.6, November 1, 1957, which prescribes that certain categories of cost-reimbursement contracts will provide for payment of not to exceed 80% of the costs incurred with payment of the balance at a subsequent time. The existing clause has been revised and an alternate clause provided for use in cost-plus-incentive-fee contracts. Section 7.203–4, as revised, reads as follows:

§ 7.203–4 *Allowable cost, fee, and payment.* (a) Except as provided in paragraphs (b) and (c) (5) of this section, the following clause shall be inserted in all cost-reimbursement type supply contracts. Additional instructions for use are in paragraph (c) of this section.

ALLOWABLE COST, FIXED FEE, AND PAYMENT

(a) For the performance of this contract, the Government shall pay to the Contractor:

(i) The cost thereof (hereinafter referred to as "allowable cost") determined by ------* to be allowable in accordance with—

(A) Subpart B of Part 15 of this Subchapter as in effect on the date of this contract; and

(B) the terms of this contract; and

(ii) such fixed fee, if any, as may be provided for in the Schedule.

(b) Once each month (or at more frequent intervals, if approved by ------*) the Contractor may submit to an authorized representative of ------*, in such form and reasonable detail as such representative may require, an invoice or public voucher supported by a statement of cost incurred by the Contractor in the performance of this contract and claimed to constitute allowable cost. Each statement of cost shall be certified by an officer or other responsible official of the Contractor authorized by it to certify such statements.

(c) (1) Promptly after receipt of each invoice or voucher and statement of cost, the Government shall, except as otherwise provided in this contract, and subject to the provisions of paragraph (d) below, make payment thereon, to the extent of 80% thereof, as approved by ------*. The cumulative amount of such invoices or vouchers from time to time approved but not paid pursuant to the foregoing provisions (regardless of whether they are paid under the next sentence hereof) shall constitute a gross withheld payments amount. Upon acceptance and delivery of articles called for by item ------** of this contract, the Government shall pay to the Contractor an amount which, when added to any amounts previously paid under this sentence, shall be the same percentage of the gross withheld payments amount as the cumulative number of articles accepted and delivered under item ------** of this contract is of the total number of articles called for by such item.

(2) Payment of the fixed fee, if any, shall be made to the Contractor as specified in the Schedule; *provided*, however, that after payment of eighty-five percent (85%) of the fixed fee set forth in the Schedule, further payment on account of the fixed fee shall be withheld until a reserve of either fifteen percent (15%) of the total fixed fee, or one hundred thousand dollars ($100,000), whichever is less, shall have been set aside.

(d) At any time or times prior to final payment under this contract ------* may have the invoices or vouchers and statements of cost audited. Each payment theretofore made shall be subject to reduction for amounts included in the related invoice or voucher which are found by ------*, on the basis of such audit, not to constitute allowable cost. Any payment may be reduced for overpayments, or increased for underpayments, on preceding invoices or vouchers.

(e) On receipt and approval of the invoice or voucher designated by the Contractor as the "completion invoice" or "completion voucher" and upon compliance by the Contractor with all the provisions of this contract (including, without limitation, the provisions relating to patents and the provisions of (f) below), the Government shall promptly pay to the Contractor any balance of allowable cost, and any part of the fixed fee, which has been withheld pursuant to (c) above or otherwise not paid to the Contractor. The completion invoice or voucher shall be submitted by the Contractor promptly following completion of the work under this contract but in no event later than one (1) year (or such longer period as the Contracting Officer may in his discretion approve in writing) from the date of such completion.

(f) The Contractor agrees that any refunds, rebates, credits, or other amounts (including any interest thereon) accruing to or received by the Contractor or any assignee under this contract shall be paid by the Contractor to the Government, to the extent that they are properly allocable to costs for which the Contractor has been reimbursed by the Government under this contract. Reasonable expenses incurred by the Contractor for the purpose of securing such refunds, rebates, credits, or other amounts shall be allowable costs hereunder when approved by the Contracting Officer. Prior to final payment under this contract, the Contractor and each assignee under this contract whose assignment is in effect at the time of final payment under this contract shall execute and deliver:

(i) An assignment to the Government, in form and substance satisfactory to the Contracting Officer, of refunds, rebates, credits, or other amounts (including any interest thereon) properly allocable to costs for which the Contractor has been reimbursed by the Government under this contract; and

(ii) A release discharging the Government, its officers, agents, and employees from all liabilities, obligations, and claims arising out of or under this contract, subject only to the following exceptions—

(A) Specified claims in stated amounts or in estimated amounts where the amounts are not susceptible of exact statement by the Contractor;

(B) Claims, together with reasonable expenses incidental thereto, based upon liabilities of the Contractor to third parties arising out of the performance of this contract: *Provided*, That such claims are not known to the Contractor on the date of the execution of the release; and *provided further* that the Contractor gives notice of such claims in writing to the Contracting Officer not more than six (6) years after the date of the release or the date of any notice to the Contractor that the Government is prepared to make final payment, whichever is earlier; and

(C) Claims for reimbursement of costs (other than expenses of the Contractor by reason of its indemnification of the Government against patent liability), including reasonable expenses incidental thereto, incurred by the Contractor under the provisions of this contract relating to patents.

(g) Any cost incurred by the Contractor under the terms of this contract which would constitute allowable cost under the provisions of this clause shall be included in determining the amount payable under this contract, notwithstanding any provisions contained in the specifications or other documents incorporated in this contract by reference, designating services to be performed or materials to be furnished by the Contractor at its expense or without cost to the Government.

(b) When, pursuant to § 3.404–4, incentive revision of the fee in a cost-reimbursement type supply contract is to be provided, the clause set forth below shall, except as provided in paragraph (c) (5) of this section, be included in the contract. Additional instructions for use of the clause are in paragraph (c) of this section.

ALLOWABLE COST, INCENTIVE FEE, AND PAYMENT

(a) (1) For the performance of this contract, the Government shall pay to the Contractor:

(i) The cost thereof (hereinafter referred to as "allowable cost") determined by -----* to be allowable in accordance with—

(A) Subpart B of Part 15 of this subchapter as in effect on the date of this contract; and

(B) The terms of this contract; and

(ii) A fee determined as provided in this contract.

(2) The target cost and target fee of this contract are set forth in the Schedule and shall be subject to adjustment in accordance with (h) and (i) below. As used throughout this contract the term:

(i) "Target cost" means the estimated cost of this contract initially negotiated, adjusted in accordance with (h) below; and

(ii) "Target fee" means the fee which was initially negotiated on the assumption that this contract would be performed for a cost equal to the estimated cost of this contract initially negotiated, adjusted in accordance with (h) below.

(b) Once each month (or at more frequent intervals, if approved by ------*) the Contractor may submit to an authorized representative of ------*, in such form and reasonable detail as such representative may require an invoice or voucher supported by a statement of cost incurred by the Contractor in the performance of this contract and claimed to constitute allowable cost. Each statement of cost shall be certified by an officer or other responsible official of the Contractor authorized by it to certify such statements.

(c) (1) Promptly after receipt of each invoice or voucher and statement of cost, the Government shall, except as otherwise provided in this contract, and subject to the provisions of paragraph (d) below, make payment thereon, to the extent of 80% thereof, as approved by ------*. The cumulative amount of such invoices or vouchers from time to time approved but not paid pursuant to the foregoing provisions (regardless of whether they are paid under the next sentence hereof) shall constitute a gross withheld payments amount. Upon acceptance and delivery of articles called for by item ------** of this contract, the Government shall pay to the contractor an amount which, when added to any amounts previously paid under this sentence, shall be the same percentage of the gross withheld payments amount as the cumulative number of articles accepted and delivered under item ------** of this contract is of the total number of articles called for by such item.

(2) Payment of fee shall be made to the Contractor as specified in the Schedule: *Provided, however,* That after payment of ninety-five percent (95%) of the minimum fee provided for in (i) below, further payment on account of the fee shall be withheld until a reserve of either fifteen percent (15%) of the target fee, or one hundred thousand dollars ($100,000), whichever is less, shall have been set aside.

(d) At any time or times prior to final payment under this contract, ------* may have the invoices or vouchers and statements of cost audited. Each payment theretofore made shall be subject to reduction for amounts included in the related invoice or voucher which are found by ------*, on the basis of such audit, not to constitute allowable cost. Any payment may be reduced for overpayments, or increased for underpayments, on preceding invoices or vouchers.

(e) On receipt and approval of the invoice or voucher designated by the Contractor as the "completion invoice" or "completion voucher" and upon compliance by the Contractor with all the provisions of this contract (including, without limitation, the provisions relating to patents and the provisions of (f) below), the Government shall promptly pay to the Contractor any balance of allowable cost, and any part of the fee, which has been withheld pursuant to (c) above or otherwise not paid to the Contractor. The completion invoice or voucher shall be submitted by the Contractor promptly following completion of the work under this contract but in no event later than one (1) year (or such longer period as the Contracting Officer may in his discretion approve in writing) from the date of such completion.

(f) The Contractor agrees that any refunds, rebates, credits, or other amounts (including any interest thereon) accruing to or received by the Contractor or any assignee under this contract shall be paid by the Contractor to the Government, to the extent that they are properly allocable to costs for which the Contractor has been reimbursed by the Government under this contract. Reasonable expenses incurred by the Contractor for the purpose of securing such refunds, rebates, credits, or other amounts shall be allowable costs hereunder when approved by the Contracting Officer. Prior to final payment under this contract, the Contractor and each assignee under this contract whose assignment is in effect at the time of final payment under this contract shall execute and deliver:

(i) An assignment to the Government, in form and substance satisfactory to the Contracting Officer, of refunds, rebates, credits, or other amounts (including any interest thereon) properly allocable to costs for which the Contractor has been reimbursed by the Government under this contract; and

(ii) A release discharging the Government, its officers, agents, and employees from all liabilities, obligations, and claims arising out of or under this contract, subject only to the following exceptions—

(A) Specified claims in stated amounts or in estimated amounts where the amounts are not susceptible of exact statement by the Contractor;

(B) Claims, together with reasonable expenses incidental thereto, based upon liabilities of the Contractor to third parties arising out of the performance of this contract: *Provided,* That such claims are not known to the Contractor on the date of the execution of the release; *And provided further,* That the Contractor gives notice of such claims in writing to the Contracting Officer not more than six (6) years after the date of the release or the date of any notice to the Contractor that the Government is prepared to make final payment, whichever is earlier; and

(C) Claims for reimbursement of costs (other than expenses of the Contractor by reason of its indemnification of the Government against patent liability), including reasonable expenses incidental thereto, incurred by the Contractor under the provisions of this contract relating to patents.

Payments under the assignment and the claims excepted from the release shall be subject to adjustment by reason of the adjustment of fee in accordance with (i) below.

(g) Any cost incurred by the Contractor under the terms of this contract which would constitute allowable cost under the provisions of this clause shall be included in determining the amount payable under this contract, notwithstanding any provisions contained in the specifications or other documents incorporated in this contract by reference, designating services to be performed or materials to be furnished by the Contractor at its expense or without cost to the Government.

(h) When the work under this contract (including any supplies or services which are ordered separately under, or otherwise added to, this contract) is increased or decreased by contract modification, appropriate adjustments in the target cost and target fee shall be set forth in an amendment or supplemental agreement to this contract.

(i) The fee payable hereunder shall be the target fee increased by (insert contractor's participation) cents for every dollar by which the total allowable cost is less than the target cost or decreased by (insert contractor's participation) cents for every dollar by which the total allowable cost exceeds the target cost. In no event shall the fee be greater than ------ percent, nor less than ------ percent, of the target cost; and within these limits such fee shall be subject to adjustment, by reason of increase or decrease of total allowable cost, on account of payments under the assignment required by (f) (i) above, and claims excepted from the release required by (f) (ii) above.

In the event the contract calls for spare parts or other supplies and services which are to be ordered under a provisioning document or Government option, the following provision (j) shall be included:

(j) Compensation for supplies (including spare parts) and services which are to be furnished under this contract pursuant to a provisioning document or Government option shall be determined in accordance with the provisions of this clause notwithstanding any inconsistent provision in such provisioning document or Government option.

(c) (1) In the foregoing clauses, insert, in contracts of the Department of the Army and the Department of the Air Force, the words, "the Contracting Officer," and insert, in contracts of the Department of the Navy the words "the Comptroller of the Navy (Contract Audit Division)" in the spaces designated by an asterisk (------*).

(2) In subparagraph (c) (1) of the foregoing clauses, insert the item number of the principal end item being procured under the contract in the space designated by a double asterisk (------**).

(3) In accordance with Departmental procedures, the following sentence may be substituted for the third sentence of subparagraph (c) (1) of the foregoing clauses:

Upon the completion of increments of work as specified in the Schedule, the Government shall pay to the Contractor an amount which, when added to any amounts previously paid under this sentence, shall be the same percentage of the gross withheld payments amount as the total of the completed increments is of the total increments of the work called for by this contract.

increments of work specified in the Schedule pursuant to the above provision may be stated in units, percentages of completion, stages of work, or in any other appropriate manner.

(4) In paragraph (f) (ii) (B) of the foregoing clauses, the period of years may be increased to correspond with any statutory period of limitation applicable to claims of third parties against the contractor: *Provided,* That a corresponding increase is made in the period for retention of records required in paragraph (a) (4) of the clause set forth in § 7.203–7.

(5) In all cost-reimbursement type supply contracts covered by any one of the exceptions listed in § 3.404–3 (d) (2), insert the appropriate one of the foregoing clauses modified as follows:

(i) If the clause set forth in paragraph (a) of this section is used, delete paragraph (c) thereof and substitute the following:

(c) Promptly after receipt of each invoice or voucher the Government shall, subject to the provisions of (d) below, make payment thereon as approved by ------*. Payment of the fixed fee, if any, shall be made to the Contractor as specified in the Schedule: *Provided, however,* That after payment of eighty-five percent (85%) of the fixed fee set forth in the Schedule, further payment on account of the fixed fee shall be withheld until a reserve of either fifteen percent (15%) of the total fixed fee, or one hundred thousand dollars ($100,000), whichever is less, shall have been set aside.

(ii) If the clause set forth in paragraph (b) of this section is used, delete paragraph (c) thereof and substitute the following:

(c) Promptly after receipt of each invoice or voucher, the Government shall, subject to the provisions of (d) below, make payment thereon as approved by ------*. Payment of fee shall be made to the Contractor as specified in the Schedule: *Provided, however,* That after payment of ninety-five percent (95%) of the minimum fee provided for in (i) below, further payment on account of the fee shall be withheld until a reserve of either fifteen percent (15%) of the target fee, or one hundred thousand dollars ($100,000), whichever is less, shall have been set aside.

(6) In subparagraph (c) (2) of the clauses set forth in paragraphs (a) and (b) of this section and in the (c) paragraphs set forth in subparagraph (5) of this paragraph, the percentages and amounts set forth therein may be varied in accordance with Departmental procedures, except that the percentage of minimum fee in the incentive fee clause shall not exceed 95 percent.

(7) The measure of the increase and the decrease in the fee, representing "the contractor's participation" as set forth in paragraph (i) of the incentive fee clause, shall normally be the same. Under some circumstances the use of a sliding scale may be appropriate (for example, $0.01 for the first $100, $0.02 for the next $100, etc.) in which case necessary changes in the wording of paragraph (i) of the incentive fee clause are authorized. The maximum and minimum fee shall normally be equidistant from the target fee.

(8) In the case of cost-reimbursement type supply contracts without fee:

(i) Insert the following sentence in lieu of the second sentence of paragraph (c) of the clause set forth in subparagraph (5) (i) of this paragraph—

After payment of an amount equal to eighty percent (80%) of the total estimated cost of performance of this contract set forth in the Schedule, further payment on account of allowable cost shall be withheld until a reserve of either one percent (1%) of such total estimated cost, or one hundred thousand dollars ($100,000), whichever is less, shall have been set aside.

and

(ii) Delete the words "and any part of the fixed fee" from paragraph (e) of the clauses set forth in paragraph (a) of this section.

2. A cross-reference to § 7.104–20 has been inserted in this new § 7.203–26.

§ 7.203–26 *Utilization of concerns in labor surplus areas.* Insert the contract clause set forth in § 7.104–20, except in those contracts entered into with foreign contractors which are to be performed outside of the United States, its Territories, its possessions, and Puerto Rico.

(R. S. 161, sec. 2202, 70A Stat. 120; 5 U. S. C. 22, 10 U. S. C. 2202)

PART 9—PATENTS, DATA, AND COPYRIGHTS

SUBPART B—DATA AND COPYRIGHTS

Section 9.204–1 has been revised to permit the provision which gives the contractor an exclusive copyright to specified data under certain conditions, to also be used in basic agreements with educational institutions and others. Section 9.204–1, as revised, reads as follows:

§ 9.204 *Contract clauses—special.*

§ 9.204–1 *Limitation on Government's right of publication for sale to the general public.* The paragraph set forth below may be added to the clause of § 9.203–1 when, in contracts for research, the contracting officer determines in accordance with Departmental procedures that public dissemination of the work or certain designated parts of the work specified to be delivered under contract is in the best interest of the Government and would be facilitated by the Government relinquishing its right to publish for sale or to have others publish for sale for it. This paragraph shall not be used otherwise.

(h) If, after final settlement of this contract, and within the period designated in the Schedule* for the purpose of this paragraph (h) or otherwise approved by the Contracting Officer, but in any event within a period no greater than 24 months, the Contractor publishes for sale any Subject Data which are (i) designated in the Schedule* as being subject to this paragraph (h) and (ii) delivered under this contract, the Government agrees not to publish such Data for sale or authorize others so to do. This limitation on the Government's right to publish for sale any such Data so published by the Contractor shall continue as long as the Data are protected by copyright. As to all such Data not so published by the Contractor, this paragraph shall be of no force or effect.

(Sec. 201, 55 Stat. 839, as amended, sec 2202, 70A Stat. 120; 50 U. S. C. App. 611, 10 U. S. C. 2202)

PART 12—LABOR

SUBPART H—NONDISCRIMINATION IN EMPLOYMENT

Sections 12.801 and 12.806 have been revised to provide a firmer approach in eliminating discrimination in the performance of Government contracts, to be adopted in cases where education, conciliation, mediation and persuasion do not achieve the desired results. This action is responsive to recommendations set forth by the President's Committee on Government Contracts.

§ 12.801 *Policy.* The President has stated that the policy of the Government is to promote equal employment opportunity for all qualified persons employed or seeking employment on Government contracts because such persons are entitled to fair and equitable treatment in all aspects of employment on work paid for from public funds, and that contracting agencies and Government contractors are obligated to insure compliance with, and successful execution of, the equal employment opportunity program of the Government. In stating this policy, the President has directed that the head of each contracting agency shall be primarily responsible for obtaining compliance by any contractor or subcontractor and shall take the appropriate measures to bring about compliance. The President's Committee on Government Contracts provides guidance to contracting agencies concerning the program. The Committee has announced that the objectives of the program can best be achieved through the processes of education, persuasion, mediation, and conciliation. (Executive Orders 8802 of June 25, 1941, 9346 of May 27, 1943, 10479 of August 13, 1953, and 10557 of September 3, 1954.) However, when those methods do not bring the proper results, a firmer approach should be adopted. Additional measures should include consideration, prior to an award, of whether a prospective contractor appears to be able to conform to the requirements of the standard nondiscrimination clause. (See §§ 1.307 (d) and 1.604–2 of this subchapter.)

§ 12.806 *Administration.*

§ 12.806–1 *General.* The President's Committee on Government Contracts has published "A Manual for the Guidance of Personnel Engaged in Obtaining Compliance with the National Equal Job Opportunity Program" which contains information for all who are engaged in obtaining compliance with the Federal nondiscrimination clause. This publication is to be employed as additional guidance in the overall administration of the nondiscrimination program.

§ 12.806–2 *Educational responsibility.* (a) Contracting officers and other personnel concerned with procurement shall, in accordance with Departmental procedures, be apprised of their respon-

*The word "Schedule" may be replaced by the words "Task Order," or other appropriate reference, in accordance with Departmental procedures.

sibility in obtaining compliance with the nondiscrimination clause.

(b) The Departments shall publicize the nondiscrimination policy to prospective contractors and shall make available to contractors information concerning their responsibilities under the nondiscrimination clause.

§ 12.806–3 *Posting of notices.* In all instances, except where the nondiscrimination clause may have been modified as authorized by § 12.803 (a) (2), contracting officers shall furnish to contractors copies of the notice entitled "Equal Economic Opportunity" (U. S. Government Printing Office: 1954 O–300378 or 1955 O–364036), which shall be obtained by contracting officers in accordance with Departmental procedures. Contractors shall obtain from the contracting officer copies for first-tier subcontractors.

§ 12.806–4 *Compliance reviews.* (a) Both routine and special compliance reviews shall be conducted in accordance with Departmental procedures to ascertain the extent to which contractors are complying with the provisions of the nondiscrimination clause and to furnish educational data in connection with the program.

(b) A routine compliance review consists of a brief review of the practices of the contractor to ascertain compliance with the requirements of the clause. This type of review shall include a verification that the notice is appropriately posted and that the clause is included in subcontracts where required. A routine compliance review shall be considered a normal part of contract administration.

(c) A special compliance review consists of a comprehensive review of the employment practices of the contractor with respect to the requirements of the nondiscrimination clause. In addition to discussions with management, personnel conducting special compliance reviews should, when appropriate, discuss the contractor's employment practices with employment sources, minority groups, and interested civic groups. Special compliance reviews shall be conducted (1) from time to time, (2) when special circumstances warrant, and (3) when requested by proper authority.

§ 12.806–5 *Complaints.* The Departments will promptly investigate complaints based upon alleged noncompliance with the provisions of the nondiscrimination clause, provided such complaints contain the following identifying information:

(a) The name and address of the contractor or subcontractor alleged to have violated the provisions of the nondiscrimination clause;

(b) A description of the acts believed to be in violation of the nondiscrimination clause, including, where known, names of contractor's personnel involved, and dates of alleged incidents;

(c) The name and address of each person who believes himself aggrieved by the alleged violation of the clause; and

(d) Other pertinent information which will assist investigation and resolution of the complaint.

§ 12.806–6 *Incomplete complaints.* To avoid unwarranted investigation of allegations which do not provide the essential information set forth in § 12.806–5, Departments may return such allegations to the originating source, specifying the additional information required.

§ 12.806–7 *Processing of complaints.* Complaints may be submitted to the President's Committee on Government Contracts, the Secretary of Defense, or the Military Departments. Complaints submitted to the Military Departments in accordance with § 12.806–5, and determined to involve a Government contract or subcontract, shall be processed in accordance with Departmental procedure which will assure:

(a) Prompt investigation of statements and allegations contained in the complaint. Such investigations should include, where necessary, (1) a review of the pertinent personnel practice of the contractor or subcontractor concerned, (2) the circumstance under which the discriminatory action is alleged to have taken place, and (3) such other factors which may determine whether the contractor or subcontractor in the particular case complied with the provisions of the nondiscrimination clause set forth in the contract concerned.

(b) Resolution of complaints by conciliatory means whenever possible.

(c) The preparation and submission, through prescribed channels, of a report to the President's Committee on Government Contracts setting forth (1) a copy of the complaint together with a summary of the investigative action performed by the Department concerned, (2) corrective action taken or recommended by the Department where investigation discloses a need for such action, (3) recommendations or comments in connection with the complaints which investigation disclosed as unfounded, and (4) information that the Department considers should be brought to the attention of the President's Committee.

§ 12.806–8 *Reporting channels.* Reports in connection with complaints shall be forwarded, in duplicate, through Departmental channels to the Assistant Secretary of Defense (Supply and Logistics) for transmittal to the President's Committee on Government Contracts.

(R. S. 161, sec. 2202, 70A Stat. 120; 5 U. S. C. 22, 10 U. S. C. 2202)

PART 13—GOVERNMENT PROPERTY

SUBPART E—CONTRACT CLAUSES

Paragraph (c) of the contract clause in § 13.502, and paragraph (c) of the contract clause in § 13.503 have been revised to provide that all applicable provisions of § 30.2 of this Subchapter A are incorporated in contracts by reference and not just the record-keeping provision. Paragraph (b) of the contract clause in § 13.503 has also been revised to reflect the codification of DoD Directive 7800.6, November 1, 1957. Sections 13.502 and 13.503, as revised, read as follows:

§ 13.502 *Government-furnished property clause for fixed-price contracts.* • • •

(c) Title to the Government-furnished Property shall remain in the Government. Title to Government-furnished Property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government, nor shall such Government-furnished Property, or any part thereof, be or become a fixture or lose its identity or personality by reason of affixation to any realty. The Contractor shall comply with the provisions of the "Manual for Control of Government Property in Possession of Contractors" (§ 30.2, Armed Services Procurement Regulation) as in effect on the date of the contract, which Manual is hereby incorporated by reference and made a part of this contract.

• • • • • •

§ 13.503 *Government property clause for cost-reimbursement type contracts.* • • •

(b) Title to all property furnished by the Government shall remain in the Government. Title to all property purchased by the Contractor, for the cost of which the Contractor is entitled to be reimbursed as a direct item of cost under this contract, shall pass to and vest in the Government upon delivery of such property by the vendor. Title to other property, the cost of which is reimbursable to the Contractor under the contract, shall pass to and vest in the Government upon (i) issuance for use of such property in the performance of this contract, or (ii) commencement of processing or use of such property in the performance of this contract, or (iii) reimbursement of the cost thereof by the Government, in whole or in the percentage prevailing by reason of the clause of the contract entitled "Allowable Cost, Fixed Fee and Payment," whichever first occurs. All Government-furnished Property, together with all property acquired by the Contractor, title to which vests in the Government under this paragraph, are subject to the provisions of this clause and are hereinafter collectively referred to as "Government Property."

(c) Title to the Government Property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government, nor shall such Government Property, or any part thereof, be or become a fixture or lose its identity as personalty by reason of affixation to any realty. The Contractor shall comply with the provisions of the "Manual for Control of Government Property in Possession of Contractors" (Part 30.2, Armed Services Procurement Regulation), as in effect on the date of the contract, which Manual is hereby incorporated by reference and made a part of this contract.

SUBPART F—USE OF GOVERNMENT-OWNED INDUSTRIAL FACILITIES ON WORK OTHER THAN FOR A MILITARY DEPARTMENT

Section 13.601–2 has been revised to include an example clarifying the age of equipment for the purpose of applying monthly rental rates. Section 13.601–3, as revised, reads as follows:

§ 13.601–2 *Minimum rent.* Except as provided in § 13.601–3, rental charged under § 13.601 for personal property and equipment constituting industrial facilities shall conform to the following rates, which rates have been determined to be fair and reasonable:

(a) As to metalworking equipment of the types referred to in § 31.2 of this subchapter, paragraph 401.2, or § 31.3, paragraph 401.2, or § 31.3 of this subchapter, paragraph 307.2, rent shall be at the appropriate rate set forth below regardless of the extent and value of any obligations undertaken by the user to provide maintenance or other services.

Age of equipment:	*Monthly rental rate (percent of acquisition cost)*
0 to 2 years	1¾
Over 2 to 6 years	1½
Over 6 to 10 years	1
Over 10 years	¾

The acquisition cost to be used in determining rental shall be the purchase price of the equipment charged the Government plus costs of transportation to, and installation in, the place where the equipment will be used under the contract or agreement, if such costs are borne by the Government. Transportation and installation costs may be estimated by the contracting officer where the actual costs are not known. When special tooling or accessories are rented with the equipment, equipment acquisition cost shall be increased to include the price charged the Government for such tooling or accessories. If the purchase price is not available or cannot be obtained from the manufacturer of the equipment, the Military Departments shall obtain an estimated purchase price from the Office of the Assistant Secretary of Defense (Supply and Logistics). On January 1 following the date of manufacture of each item of equipment, such item shall be considered one year old, and on each succeeding January 1 it shall become one year older; and contracts or agreements shall so provide. For example, if an item of equipment is manufactured on 15 July 1958, it will be considered to be one year old on 1 January 1959, two years old on 1 January 1960, three years old on 1 January 1961, etc. The item of equipment will be considered "over two years" old on and after 1 January 1960, "over six years" old on and after 1 January 1964, and "over ten years" old on and after 1 January 1968.

(b) As to personal property and equipment constituting industrial facilities other than metalworking equipment covered in paragraph (a) of this section, and with respect to which there are not prevailing commercial rates, a rent at the rate of not less than 1 percent per month of the original acquisition cost of such property or equipment shall be charged.

(R. S. 161, sec. 2202, 70A Stat. 120; 5 U. S. C. 22, 10 U. S. C. 2202)

PART 15—CONTRACT COST PRINCIPLES

Sections 15.201, 15.301 and 15.502 have been revised to include a definition of "incurred cost" for use in connection with cost-reimbursement type contracts. Sections 15.201, 15.301 and 15.502, as revised, read as follows:

SUBPART B—SUPPLY AND RESEARCH CONTRACTS WITH COMMERCIAL ORGANIZATIONS

§ 15.201 *General basis for determination of costs.* (a) The total cost of a cost-reimbursement type contract is the sum of the allowable direct costs incident to the performance of the contract, plus the properly allocable portion of allowable indirect costs, less applicable income and other credits. The tests used in determining the allowability of costs also include (1) reasonableness, (2) application of generally accepted accounting principles and practices, and (3) any limitations as to types or amounts of cost items set forth in this subpart B of this Part 15 or otherwise included in the contract. Failure to mention any item of cost in this subpart is not intended to imply that it is either allowable or not allowable. The use of normal or standard costs (with appropriate adjustments for variances, unallowable costs and the other provisions of this subpart) is acceptable in determining amounts of provisional or interim payments, but final allowable costs must represent actual costs. Income and other credits arising out of operations under the contract, where the related cost was reimbursed or accepted as an allowable cost, will be credited to the Government.

(b) If a cost is to be reimbursed, it must—in addition to meeting the tests stated in paragraph (a) of this section—be incurred by the contractor. Generally, costs will be considered as incurred when (1) the property or services represented by such costs have been received and accepted by or performed for the contractor, and (2) the costs have been properly recorded on the contractor's books. However, proof of prior payment by the contractor will not ordinarily be regarded as a prerequisite to approval for payment of such costs if the contractor, as a normal business practice, liquidates its liabilities promptly when due.

SUBPART C—RESEARCH CONTRACTS WITH NONPROFIT INSTITUTIONS

§ 15.301 *General basis for determination of costs.* (a) The total cost of a cost or cost-sharing contract for research and development with nonprofit institutions is the sum of the allowable direct costs incident to the performance of the contract, plus the properly allocable portion of allowable indirect costs. The tests used in determining the allowability of costs include (1) reasonableness, (2) application of generally accepted institutional accounting principles and practices, and (3) any limitations as to types or amounts of cost items set forth in this subpart or otherwise included in the contract. Failure to mention any item of cost in this subpart is not intended to imply that it is either allowable or not allowable.

(b) If a cost is to be reimbursed, it must—in addition to meeting the tests stated in paragraph (a) of this section—be incurred by the contractor. Generally, costs will be considered as incurred when (1) the property or services represented by such costs have been received and accepted by or performed for the contractor, and (2) the costs have been properly recorded on the contractor's books. However, proof of prior payment by the contractor will not ordinarily be regarded as a prerequisite to approval for payment of such costs if the contractor, as a normal business practice, liquidates its liabilities promptly when due.

§ 15.301–1 *Cost-sharing methods.* Cost-sharing may be accomplished by one of the following methods:

(a) By providing in the contract for the percentage of the total allowable cost of the project which will be borne by the Government;

(b) By agreeing that, for the purpose of the particular project, reimbursement for indirect expense of the institution will be limited to some rate or dollar amount less than the indirect expense otherwise applicable and computed in accordance with the principles set forth in this subpart;

(c) By providing in the contract that certain items of cost will not be considered reimbursable; or,

(d) By such other method as may be agreed upon.

SUBPART E—SUBJECTS AFFECTING COST WHICH MAY REQUIRE SPECIAL CONSIDERATION

§ 15.501 *Consideration required.* (a) It is important that contracting officers and their negotiators consider the subjects enumerated in § 15.502, and any other subjects not precluded by the provisions of subparts 2, 3 or 4 of this part (whichever subpart is applicable), for the purpose of (1) determining which subjects if any should be expressly provided for in a particular cost-reimbursement type contract, and (2) incorporating appropriate clauses in the contract. Action taken with respect to any such subjects shall be reflected either in the contract or in the record of contract negotiations.

(b) If a cost is to be reimbursed, it must—in addition to meeting the tests stated in (a) above—be incurred by the contractor. Generally, costs will be considered as incurred when (1) the property or services represented by such costs have been received and accepted by or performed for the contractor, and (2) the costs have been properly recorded on the contractor's books. However, proof of prior payment by the contractor will not ordinarily be regarded as a prerequisite to approval for payment of such costs if the contractor, as a normal business practice, liquidates its liabilities promptly when due.

(Sec. 201, 55 Stat. 839, as amended, sec. 2202, 70A Stat. 120; 50 U. S. C. App. 611, 10 U. S. C. 2202)

PART 16—PROCUREMENT FORMS

SUBPART B—FORMS FOR NEGOTIATED PROCUREMENT

Section 16.201, as revised, clarifies legal effect of quotations submitted on DD Form 747 (Request for Quotation) consistent with Comptroller General Decision B–131228, October 18, 1957. Issuance of purchase orders based upon such quotations does not result in binding contracts. Section 16.201, as revised, reads as follows:

§ 16.201 *Request for quotation (DD Form 747).*

§ 16.201–1 *General.* DD Form 747 is designed to obtain price, cost, delivery, or other information from suppliers.

§ 16.201–2 *Conditions for use.* DD Form 747 is authorized for use when it appears reasonably certain that the procurement will be consummated by (i) a fixed-price type contract involving extensive negotiation or, (ii) a cost-reimbursement type contract. Standard Form 36 (Continuation Sheet), DD Forms 351–1 (Schedule) or 1155c (Continuation Sheet) may be used as required. The form is intended primarily for negotiated procurements in excess of $2,500; however, it may be used for negotiated procurements of $2,500 or less (including purchase orders) when written solicitations of quotations are used (see § 3.603 of this subchapter). A quotation submitted on this form is not to be construed as an offer which can be accepted by the Government to form a binding contract. Therefore, issuance by the Government of a purchase order pursuant to a supplier's quotation does not constitute a contract, but the purchase order is an offer by the Government to the supplier to buy certain goods or services upon specified terms and conditions.

SUBPART H—MISCELLANEOUS FORMS

Section 16.812 has been revised to reflect the codification of DoD Directive 7800.6, November 1, 1957. Section 16.812, as revised, reads as follows:

§ 16.812 *Release and assignment forms.*

(a) The forms set forth below are approved for use in complying with the assignment and release provisions of paragraph (f) of the compensation clauses for cost-plus-fixed-fee and cost-plus-incentive-fee contracts set forth in § 7.203–4 (a) and (b) of this subchapter. Forms differing from the approved forms may be used if the contracting officer determines that such forms meet the applicable requirements of the clause. Checks received by Army and Air Force contracting officers pursuant to paragraph 2 of the assignments in paragraphs (d) and (e) of this section shall be forwarded to the finance officer named in the contract.

(b) Set forth below is an approved form for the contractor's release required by paragraph (f) of the clauses in § 7.203–4 (a) and (b) of this subchapter.

CONTRACTOR'S RELEASE

Contract No. ------

Pursuant to the terms of Contract No. ------ and in consideration of the sum of -------- Dollars ($------) which has been or is to be paid under the said contract to ------ ---------- (hereinafter called the Contractor) or its assignees, if any, the Contractor, upon payment of the said sum by the United States of America (hereinafter called the Government), does remise, release, and discharge the Government, its officers, agents, and employees, of and from all liabilities, obligations, claims, and demands whatsoever under or arising from the said contract, except:

1. Specified claims in stated amounts or in estimated amounts where the amounts are not susceptible of exact statement by the Contractor, as follows:

---

2. Claims, together with reasonable expenses incidental thereto, based upon the liabilities of the Contractor to third parties arising out of the performance of the said contract, which are not known to the Contractor on the date of the execution of this release and of which the Contractor gives notice in writing to the Contracting Officer within the period specified in the said contract.

3. Claims for reimbursement of costs (other than expenses of the Contractor by reason of its indemnification of the Government against patent liability), including reasonable expenses incidental thereto, incurred by the Contractor under the provisions of the said contract relating to patents.

The Contractor agrees, in connection with patent matters and with claims which are not released as set forth above, that it will comply with all of the provisions of the said contract, including without limitation those provisions relating to notification to the Contracting Officer and relating to the defense or prosecution of litigation.

In witness whereof, this release has been executed this ------ day of ---------- 19 ---

Chapter V—Department of the Army

Subchapter B—Claims and Accounts

PART 536—CLAIMS AGAINST THE UNITED STATES

ENLISTED MEN ABSENT WITHOUT LEAVE, DESERTERS AND ESCAPED MILITARY PRISONERS

Sections 536.30 and 536.40 are revised to read as follows:

§ 536.30 *Apprehension*—(a) *Military personnel.* Military personnel authorized by Manual for Courts Martial, 1951 (E. O. 10214, February 8, 1951, 16 F. R. 1303, February 10, 1951) may apprehend absentees and deserters.

(b) *Civilian personnel.* Any civil officer described in 10 U. S. C. 808 (Uniform Code of Military Justice, art. 8), and private citizens when authorized by a military officer may apprehend an absentee or deserter from the Army and deliver him into the custody of the Armed Forces. See paragraph 23, Manual for Courts Martial, 1951.

(c) *Absentees and deserters to be apprehended.* Except as indicated in paragraph (d) of this section, all absentees and deserters will be apprehended including those who absented themselves without leave or deserted during the periods December 7, 1941 to July 24, 1947 and June 25, 1950 to July 27, 1953, all dates inclusive.

(d) *Classes of absentees not to be apprehended or returned to military control.* Individuals who deserted from the Regular Army during the Spanish American War, those who deserted the Army during World War I, and peacetime deserters in whose cases trial by courts-martial on a charge of desertion is barred by the statute of limitations, 10 U. S. C. 843 (Uniform Code of Military Justice, art. 43) will not be apprehended or returned to military control.

(e) *Cooperation of State and local authorities.* (1) ZI army commanders and the Commanding General, Military District of Washington, U. S. Army, will take steps to secure the active cooperation of all local police authorities and of such other officials and organizations, except the Selective Service System or any of the branches thereof, as they deem useful to insure that wanted absentees and deserters are returned to military control. Agencies should be informed that action will not be taken to apprehend absentees and deserters unless the agency concerned is in receipt of DD Form 553, or has received notice from military officials or Federal law enforcement officials that the person is absent without leave and his return to military control is desired.

(2) All commanding officers will assure prompt, complete, and accurate replies to all inquiries received from civil law enforcement agents or agencies regarding absentees and deserters.

§ 536.40 *Property and personal effects*—(a) *Disposal.* (1) If the owner or his legal representative, or heir, or next of kin has been determined, the property will not be sold or otherwise disposed of prior to the expiration of a period of 120 days after written notice by registered mail, return receipt requested, has been sent to his last known address, giving time and place of intended sale or other disposition thereof. If the owner or his representative, his heir, or next of kin is not located, or fails to acknowledge such notice, the property may be disposed or by public or private sale, by donation, destruction, or otherwise, after the expiration of 1 year after date of receipt of the property at an Army installation; such property received by the Army Effects Office, Chicago Quartermaster Depot, Chicago, Illinois, may be disposed of upon the expiration of 1 year

for domestic mica, eliminates the requirement that participants under the hand cobbed program elect in advance the method of final settlement and payment for lots of hand cobbed mica; establishes an alternate method of final settlement and payment for hand cobbed mica; for hand cobbed mica meeting requirements under both payment methods, provides that the Government will pay participants by the method of final settlement which reflects maximum net return to the participants; and makes other miscellaneous changes.

1. Basis and purpose.
2. Definitions.
3. Duration of Programs A and B.
4. Program A.
5. Program B.
6. Access to books and records.

AUTHORITY: Sections 1 to 6 issued under sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. 2154. Interprets or applies sec. 303, 64 Stat. 801, as amended; 50 U. S. C. App. 2093, E. O. 10480, 18 F. R. 4939, 3 CFR, 1953 Supp.

SECTION 1. *Basis and purpose.* This regulation interprets and implements the authority of the Administrator of General Services, pursuant to Executive Order 10480, dated August 14, 1953 (18 F. R. 4939, 3 CFR, 1953 Supp.), to purchase hand cobbed muscovite ruby and nonruby crude mica and processed muscovite ruby and nonruby block and film mica, all of domestic origin. General Services Administration will buy domestically produced mica conforming to the requirements, at the prices and under the other terms and conditions of this regulation applicable to Programs "A" and "B" respectively.

SEC. 2. *Definitions.* As used in this regulation:

(a) "Government depot" means the Government purchase depots maintained

Region No.	Address	Government depot over which jurisdiction is exercised
1	Regional Commissioner, General Services Administration, 620 Post Office and Courthouse, Boston 9, Mass.	Franklin, N. H.
3	Regional Commissioner, General Services Administration, Regional Office Building, 7th and D Streets SW., Washington 25, D.C.	Spruce Pine, N. C.
8	Regional Commissioner, General Services Administration, 41 Denver Federal Center, Denver 2, Colo.	Custer, S. Dak.

SEC. 3. *Duration of Programs A and B.* Programs A and B shall terminate on, and be of no further force or effect, and deliveries thereunder will not be accepted after, the close of business June 30, 1962, or when the total block, film and hand cobbed mica delivered to and accepted by the Government under said programs reaches the equivalent of 25,000 short tons of hand cobbed mica, whichever first occurs. For the purpose of computing said 25,000 short tons of hand cobbed mica, 90 pounds of block or film mica shall be deemed to be the equivalent of one (1) short ton of hand cobbed mica.

SEC. 4. *Program A*—(a) *Participation in program.* Any person or firm wishing to participate in Program A shall give notice to a Regional Commissioner having jurisdiction over a Government depot. Such notice shall be in the form of a letter, postcard or telegram stating that participation in Program A is desired. The notice must be signed and a return address given. Upon receipt of such notice a certificate of participation will be issued to the applicant authorizing him to deliver block or film mica which conforms to the requirements set forth in paragraph (b) of this section as of the date of acceptance of such lot of nonruby block or film mica by the Government. The qualities for all block and film mica which will be accepted are Good Stained and Better, Stained and Heavy Stained.

(2) The following grades will be accepted:

Grades	Area of minimum rectangle	Minimum dimension of 1 side
	Square inches	*Inches*
No. 6	1	¾
No. 5½	2¼	1½
No. 5	3	1
No. 4	6	1½
No. 3 and larger	10	2

(3) All Good Stained and Better block and film mica must be full-trimmed; Stained and Heavy Stained will be accepted in half-trimmed or full-trimmed form.

(c) *Deliveries.* Block and film mica offered to the Government under Program A shall be delivered f. o. b. Government depot. Each lot must contain exclusively either ruby or nonruby mica; mixed lots will be rejected. Prior to delivery a participant must give the Superintendent of the Government depot to which he is shipping, reasonable advance notice with respect to the quantity to be delivered and the proposed delivery date. The Superintendent of the Government depot will then establish a delivery schedule with each participant. The Government reserves the right to reject any deliveries that have not been so scheduled.

(d) *Inspection and acceptance.* Each delivery will be inspected by the Government at the Government depot. Deliveries not conforming to the minimum requirements set forth in paragraph (b) of this section will be rejected, and all

from date of receipt at an Army installation, the property may be disposed of as provided in subparagraph (1) of this paragraph.

(4) Property which the board has determined to be unidentifiable as to ownership will be turned over to the property disposal officer on a consolidated inventory. The property disposal officer will dispose of this property by sale, donation, or by destruction in accordance with pertinent Army regulations.

(b) *Claims prior to disposal.* Any property identifiable as to ownership, in the hands of the property disposal officer, may be claimed at any time prior to disposition. If subject property is claimed by anyone other than the legal owner, the letter of transmittal will contain the following statement:

> The action of this office (headquarters) in transmitting the property does not vest title in the recipient. Such property is forwarded to you to be retained or disposed of as custodian, in accordance with the laws of the State of the owner's legal residence.

(c) *Disposition of funds.* Funds received by the property disposal officer from the sale of property will be turned over to a finance officer to be accounted for as prescribed in pertinent Army regulations.

(d) *Filing of claims.* Claims for the net proceeds, if any, of such property so disposed of may be filed with the Finance Center, U. S. Army, Indianapolis, Indiana, by the rightful owner, his heir, or next of kin, or his legal representative at any time prior to the expiration of 1 year after disposition of property. After 1 year and before 5 years from date of the disposal of the property, the claim should be filed with the General Accounting Office. If claims are not filed prior to the expiration of 5 years from the date of the disposal of the property, they shall be barred from being acted on by the courts or the General Accounting Office.

(e) *Deposits.* Money left by an absentee will be deposited with a finance and accounting officer whose receipt will

Scope. This section provides within the limitations indicated in paragraph (c) of this section, the procedures and method for the determination, assertion, and collection of claims for damage caused to Army property.

(b) *Definitions.* See § 536.1 of this chapter. The following terms as used in this section will have the meanings here indicated:

(1) *Claim.* The Government's right to compensation for damage caused to Army property.

(2) *Defendant.* An individual, partnership, association, corporation, or governmental body, foreign or domestic, other than an instrumentality of the United States, against whom the United States has a claim.

(3) *Damage.* A comprehensive term, including not only damage to but also loss or destruction of Army property.

(4) *Army property.* Real or personal property of the United States in the possession or under the control of the Army or any of its instrumentalities.

(5) *Judge advocate.* The staff judge advocate of any command or the legal officer of a division engineer.

(c) *Application.* Included within this section are claims in excess of $50 and in lesser amounts when the assertion thereof is deemed in the interest of the Government, except that:

(1) Claims cognizable under contracts or other regulations will be processed and disposed of under the pertinent provisions of such contracts and other regulations. In such cases, this section will be utilized only to the extent required for the enforcement of pecuniary liability upon a defendant and only after all administrative procedures authorized by pertinent regulations have been exhausted. Admiralty claims will be processed in accordance with § 537.7.

(2) Claims against individuals, who are serving as members of the Armed Forces or as civilian employees of the United States, and arising out of acts or omissions within the scope of their employment as such members or employees

cer appointing a claims officer, his superior commander, the judge advocate of any command, or any officer designated by them for that purpose, may, on request, execute and deliver to any defendant making payment in full or a payment as an offer of compromise settlement subject to the approval of the proper authority, a receipt on DA Form 2139 (Receipt for Payment for Damage to or Loss of Government Property).

(f) *Release.* Where a defendant, or his insurer, tenders payment in full and demands an executed standard form release, which may or may not form a part of the check or draft by which such tender is made, a judge advocate, or a designee of The Judge Advocate General of the Army, is authorized to accept the payment and execute such release; or upon tender of payment in full accompanied by a general request for a release, to execute a release on DA Form 2139 (General Release).

§ 537.3 *Definitions.* [Revoked]

§ 537.4 *Scope.* [Revoked]

§ 537.5 *Action by reviewing authority.* [Revoked]

[AR 25–105, June 20, 1958] (Sec. 3012, 70A Stat. 157; 10 U. S. C. 3012)

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter XIV—General Services Administration

[Rev. 5]

REG. 7—MICA REGULATION; PURCHASE PROGRAMS FOR DOMESTIC MICA

This revision of General Services Administration Regulation 7, which established open market purchase programs

Order 10480, dated August 14, 1953 (18 F. R. 4939, 3 CFR, 1953 Supp.), to purchase hand cobbed muscovite ruby and nonruby crude mica and processed muscovite ruby and nonruby block and film mica, all of domestic origin. General Services Administration will buy domestically produced mica conforming to the requirements, at the prices and under the other terms and conditions of this regulation applicable to Programs "A" and "B" respectively.

SEC. 2. *Definitions.* As used in this regulation:

(a) "Government depot" means the Government purchase depots maintained by General Services Administration at Franklin, New Hampshire, Spruce Pine, North Carolina, Custer, South Dakota, or any other such depots established hereafter.

(b) "Domestic origin" means mined within the United States (the forty-eight States and the District of Columbia).

(c) "Block mica" means processed muscovite ruby and nonruby block mica which conforms to the requirements of section 4 (b) of this regulation.

(d) "Film mica" means processed muscovite ruby and nonruby film mica which conforms to the requirements of section 4 (b) of this regulation.

(e) "Hand cobbed mica" means muscovite ruby and nonruby mica crystal which is free from dirt, rock and mine run scrap and which conforms to the requirements of section 5 (b) of this regulation.

(f) "Program A" means the program for purchase by the Government of processed block and film mica of domestic origin.

(g) "Program B" means the program for purchase by the Government of hand cobbed mica of domestic origin.

(h) "Regional Commissioner" means the Commissioner of any one of the following General Services Administration regional offices having jurisdiction as indicated below:

or film mica shall be deemed to be the equivalent of one (1) short ton of hand cobbed mica.

SEC. 4. *Program A*—(a) *Participation in program.* Any person or firm wishing to participate in Program A shall give notice to a Regional Commissioner having jurisdiction over a Government depot. Such notice shall be in the form of a letter, postcard or telegram stating that participation in Program A is desired. The notice must be signed and a return address given. Upon receipt of such notice a certificate of participation will be issued to the applicant authorizing him to deliver block or film mica which conforms to the requirements set forth in paragraph (b) of this section.

(b) *Requirements.* (1) Each lot of block and film mica purchased under Program A shall in every respect conform to the requirements of American Society for Testing Materials Specification D–351, latest revision as of the date of acceptance of such lot of block or film mica by the Government. Each lot of Good Stained and Better nonruby block and film mica purchased under Program A shall in addition conform in every respect to the requirements for Class C–1–BB of American Society for Testing Materials Specification D–748, latest re-

livery a participant must give the Superintendent of the Government depot to which he is shipping, reasonable advance notice with respect to the quantity to be delivered and the proposed delivery date. The Superintendent of the Government depot will then establish a delivery schedule with each participant. The Government reserves the right to reject any deliveries that have not been so scheduled.

(d) *Inspection and acceptance.* Each delivery will be inspected by the Government at the Government depot. Deliveries not conforming to the minimum requirements set forth in paragraph (b) of this section will be rejected, and all costs to the Government except inspection costs in connection therewith will be borne by the owner of the mica. The decision of the Government with regard to acceptance or rejection (including quality, grade and other requirements) will be final.

(e) *Price and payment.* (1) Payment for each lot of processed ruby and nonruby block and film mica containing at least eighteen percent (18%) Good Stained and Better quality, delivered f. o. b. Government depot, and accepted by the Government, shall be made on the basis of the following Price Schedule:

[Per pound]

Grades	RUBY				
	Qualities (full-trimmed)			Qualities (half-trimmed)	
	Good stained and better	Stained	Heavy stained	Stained	Heavy stained
No. 3 and larger	$70.00	$31.90	$14.80	$12.00	$8.00
No. 4 and No. 5	40.00	18.25	6.85	5.00	4.00
No. 6½ and No. 6	17.70	7.55	4.00	3.00	2.00
	NONRUBY				
No. 3 and larger	$70.00	$25.55	$11.85	$8.00	$6.40
No. 4 and No. 5	40.00	14.60	5.45	4.00	3.20
No. 6½ and No. 6	17.70	6.55	4.00	2.40	1.60

(2) Payment for each lot of processed ruby and nonruby block and film mica containing less than eighteen percent (18%) Good Stained or Better quality, delivered f. o. b. Government depot, and accepted by the Government, shall be made in an amount which shall be computed on the basis of the Price Schedule in subparagraph (1) of this paragraph, but reduced by one-eighteenth (1/18th) for each percent by which the portion of Good Stained or Better quality mica in the lot is less than eighteen percent (18%), fractions prorata.

(3) At the time of the Government's acceptance, as provided for in paragraph (d) of this section, the Government will make a preliminary payment. When the actual value of such mica has been determined, the amount of such actual value less the amount of the preliminary payment shall be paid to the participant. If the actual value is less than the preliminary payment, the excess of the preliminary payment over the actual value shall be repaid by the participant to the Government.

SEC. 5. *Program B—(a) Participation in program.* Any person or firm wishing to participate in Program B shall give notice to a Regional Commissioner having jurisdiction over a Government depot. Such notice shall be in the form of a letter, postcard or telegram stating that participation in Program B is desired. The notice must be signed and a return address given. Upon receipt of such notice a certificate of participation will be issued to the applicant authorizing him to deliver hand cobbed mica which conforms to the requirements set forth in paragraph (b) of this section.

(b) *Requirements.* (1) Each lot of block and film mica to be processed from hand cobbed mica shall conform in every respect to the requirements of American Society for Testing Materials Specification D–351, latest revision as of the date of acceptance of such lot of hand cobbed mica by the Government.

(2) Each lot of Good Stained and Better nonruby block and film mica to be processed from nonruby hand cobbed mica shall, in addition, conform in every respect to the requirements for Class C–1–BB of American Society for Testing Materials Specification D–748, latest revision as of the date of acceptance of such lot of nonruby hand cobbed mica by the Government.

(c) *Inspection and acceptance.* The participant shall give reasonable advance notice to the Superintendent of the Government depot to which he will ship the hand cobbed mica, stating the quantity he proposes to offer for sale to the Government under Program B. Upon such notification, the Government shall arrange for inspection of the hand cobbed mica offered at the point of production or at such other points as may be mutually agreed upon between the participant and the Government: *Provided, however,* That such inspection shall not be made beyond a three hundred (300) mile radius of the Government depot to which the participant will ship. After inspection by the Government the hand cobbed mica will be accepted by the Government if, in the judgment of the Government, the offered hand cobbed mica meets the definition of hand cobbed mica in section 2 (e) and if in its judgment it is of a quality sufficient to justify processing by the Government, or otherwise will be rejected by the Government. Such acceptance or rejection by the Government shall be final. The Government reserves the right to refuse to consider or accept further offerings of hand cobbed mica from participants whose previous lot or lots, after processing, revealed that the quality of the hand cobbed mica was not sufficient to warant processing.

(d) *Deliveries.* Hand cobbed mica accepted by the Government under Program B is to be delivered as follows: (1) If shipped by rail, f. o. b. common carrier's conveyance at a railroad delivery point designated by the Government which will be as close as possible to the Government depot; or (2) if shipped by motor truck, f. o. b. Government depot. Each lot must contain exclusively either ruby or nonruby mica; mixed lots will be rejected. Hand cobbed mica accepted by the Government under paragraph (c) of this section shall not be delivered in shipments of less than one thousand (1,000) pounds. Prior to shipment the shipper must give the Superintendent of the Government depot to which he is shipping reasonable advance notice with respect to the quantity to be shipped and the proposed shipping date. The Superintendent of the Government depot will then establish a shipping schedule with each shipper and will instruct the shipper how to prepare the hand cobbed mica for shipment. The Government reserves the right to reject any hand cobbed mica which has not been so scheduled and prepared.

(e) *Preliminary payment.* As to each lot of ruby and nonruby hand cobbed mica delivered to and accepted by the Government under Program B, the Government shall estimate the yield of Good Stained or Better block or film mica of a grade equal to or larger than No. 6. The Government shall thereupon make a preliminary payment to the participant based on such estimated yield at a rate of $37.037 per pound of block or film mica in the case of ruby mica, or of $33.333 per pound of block or film mica in the case of nonruby mica. In no event shall the preliminary payment to the participant exceed $600 per short ton of hand cobbed ruby mica, or $540 per short ton of hand cobbed nonruby mica.

(f) *Processing and classifying.* Each lot of ruby and nonruby hand cobbed mica delivered to and accepted by the Government under Program B shall be rifted and fully trimmed by the Government and the actual yield of block or film mica determined as herein provided. The determination of actual yield shall be with respect to the following qualities: Good Stained and Better; Stained; and Heavy Stained; and, for each such quality, with respect to the following grades: No. 3 and larger; No. 4 and No. 5; and No. 5½ and No. 6. The Government shall also determine its average cost per pound of rifting and trimming such lot of hand cobbed mica by dividing the total cost thereof by the number of pounds of actual yield of block or film mica.

(g) *Final payment.* (1) The Government shall make final payment to participants for each lot of hand cobbed mica delivered to and accepted by the Government under Program B in an amount which, when added to the preliminary payment for such lot, equals the value determined in accordance with subparagraph (2) of this paragraph or, if the actual yield of such lot as determined under paragraph (f) of this section contains forty and five-tenths (40.5) pounds or more of Stained or Better mica for each short ton of hand cobbed mica, an amount which, when so added to the preliminary payment, equals the higher of: (a) the value determined in accordance with subparagraph (2) of this paragraph, or (b) the applicable alternative value determined in accordance with subparagraph (3) of this paragraph. If such value or applicable alternative value, as so determined, is less than the amount of the preliminary payment with respect to such lot, the participant shall repay to the Government an amount equal to the difference between the preliminary payment and such value or applicable alternative value. Regardless of the amount of the payments to the participant or the method of valuing a lot of mica, all of the mica derived from the lot shall remain the property of the Government.

(2) Each lot of hand cobbed mica delivered to and accepted by the Government under Program B shall be valued in the following manner: For each pound of actual yield of Good Stained or Better quality mica of a grade specified in paragraph (f) of this section there shall be assigned a value of $37.037 in the case of ruby mica and a value of $33.333 in the case of nonruby mica. For each pound of actual yield of Stained quality mica of a grade specified in paragraph (f) of this section in excess of one and one-half (1½) times the actual yield by weight of such Good Stained or Better quality mica, there shall be assigned a value equal to the average value per pound of the entire actual yield of such Stained quality mica computed on the basis of the Price Schedule appearing in section 4 (e) (1) of this regulation but with a deduction for the average cost per pound to the Government of rifting and trimming such lot of mica, as determined pursuant to paragraph (f) of this section. For the purpose of this subparagraph, no value shall be assigned to any of the Heavy Stained mica or to an amount of Stained quality mica which is equal to one and one-half (1½) times the actual yield by weight of such Good Stained or Better quality mica. In no event shall the sum of the payment under this subparagraph and the preliminary payment under paragraph (e) of this section exceed $600 per short ton of hand cobbed ruby mica, or $540 per short ton of hand cobbed nonruby mica.

(3) If the actual yield of a lot of mica as determined under paragraph (f) of this section contains forty and five-tenths (40.5) pounds or more of Stained or Better mica for each short ton of hand cobbed mica, an alternate value shall be assigned under the applicable one of the following methods:

(i) If eighteen percent (18%) or more of such actual yield of mica is Good Stained or Better mica, such actual yield of mica of the qualities and grades specified in paragraph (f) of this section shall be valued on the basis of the Price Schedule appearing in section 4 (e) (1) of this regulation less a deduction of $4 a pound as representing the cost of rifting and trimming; or

(ii) If less than eighteen percent (18%) of such actual yield of mica is Good Stained or Better mica, such actual yield of mica of the qualities and grades specified in paragraph (f) of this section shall be valued on the basis of the Price Schedule appearing in section 4 (e) (1) of this regulation less a deduction of $4 a pound as representing the cost of rifting and trimming, except that to the extent that the Heavy Stained mica exceeds thirty percent (30%) of such actual yield of Heavy Stained or Better quality mica the least valuable quantities of Heavy Stained mica shall be disregarded for purposes of valuation and for purposes of deducting for the cost of rifting and trimming.

SEC. 6. *Access to books and records.* During the duration of the programs, and for a period of three (3) years thereafter, authorized representatives of the United States Government shall have access to and the right to examine any pertinent books, documents, papers and records of any seller involving transactions related to either program.

SEC. 7. *Effective date.* This revision shall become effective upon its publication in the FEDERAL REGISTER and shall apply to all lots of mica for which final payment shall not then have been made, as well as to all lots offered thereafter.

Dated: August 14, 1958.

FRANKLIN FLOETE,
Administrator of General Services.

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

Chapter III—Coast and Geodetic Survey, Department of Commerce

PART 303—CHARGES FOR CERTIFYING, SEARCHING, AND COPYING SERVICES

REPRODUCTION OF GEOPHYSICAL RECORDS

Insofar as the Administrative Procedure Act may be applicable: Because of the nature of this notice, I find, for good cause shown, that it would be impracticable and unnecessary, and no good reason would be served to give preliminary notice, engage in public rule-making procedure or postpone the effective date hereof.

Part 303 of Chapter III, Title 33, is amended by adding the following § 303.4 *Reproductions of geophysical records.*

SINCLAIR WEEKS,
Secretary of Commerce.

Dated: August 12, 1958.

§ 303.4 *Reproductions of geophysical records.* Charges for reproductions of geophysical records:

Form of record	Copies available	Unit cost	Group cost	Minimum charge
Film:				
35 mm	35-mm film [1]	$0.10/ft		[4] $2.50
	Continuous paper [2]	$0.08/ft		12.50
	Paper prints of individual frames:			
	7 x 9 inches	$0.35 ea		2.00
	8 x 10 inches	$0.40 ea		2.00
	11 x 14 inches	$0.50 ea		2.00
	17 x 21 inches	$1.25 ea		2.00
16 mm	35-mm film [1]	$0.10/ft		[4] 2.50
	Continuous paper [2]	$0.08/ft		12.50
	Paper prints of individual frames:			
	7 x 9 inches	$0.35 ea		2.00
	8 x 10 inches	$0.40 ea		2.00

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans Administration

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

MISCELLANEOUS AMENDMENTS

1. Section 21.203a is revised to read as follows:

§ 21.203a *Training establishment not operating full time.* (a) When full-time training on the job becomes unavailable for a Part VII trainee because the training establishment where he is pursuing training is operating on a part-time basis, or is shut down temporarily, it will be determined immediately whether full-time training in the establishment will be available within a period of time not to exceed leave approvable under § 21.262a. If it is determined that full-time training in the same establishment will be available within a period of time not to exceed leave approvable under § 21.262a, the veteran may be continued in training status in that establishment. When it is determined that full-time training will not be available within a period of time covered by leave approvable under § 21.262a, but it is reasonably certain the establishment will continue to operate on a part-time basis, action will be taken as follows:

(1) If it is determined that the particular establishment is operating less than the amount of time that similar establishments are operating in the general area, the veteran's training will be interrupted and every effort will be made to place him in a training facility which is operating the amount of time which is approximately the standard in the general area.

(2) If it is determined that the particular establishment is operating approximately the same number of days per month as other similar establishments in the general area and there would be no advantage in changing the veteran to another training facility, the veteran may be continued in the establishment.

part-time operation or temporary shutdown during the 4-year period the veteran was in training status.

2. In § 21.204a, the introductory paragraph preceding paragraph (a) is amended to read as follows:

§ 21.204a *Maximum duration of the course for a seriously handicapped veteran.* A course of training longer than is ordinarily required to qualify for employment in a particular occupation or training to a higher level than is usually required may be prescribed for a seriously handicapped veteran when the following conditions exist:

3. In § 21.212, paragraph (a) is amended to read as follows:

§ 21.212 *Preparation and content.* (a) Prior to or immediately upon the induction of the veteran into training the training officer, in collaboration with the training institution will prepare for the veteran a detailed course of training—the individual training program—which is designed to qualify the veteran for the selected occupation. It will be an individual training program written in such definite terms and consisting of elements so clearly appropriate to the chosen employment objective that its successful completion will establish the fact of satisfactory employability in the chosen objective. Where the requirements for amount of training necessary to qualify for employment in a specific objective vary from area to area within a State, the disabled veteran will be provided that amount of training which will render him satisfactorily employable in all areas of the State. For example, where the State requires training to a bachelor's degree for certification to be eligible to teach in high school, but some local school systems of that State require training to a master's degree in order to be employed as a high school teacher, it will be proper to train the disabled veteran to the master's degree.

4. Section 21.232 *Authority* is revoked.

5. Section 21.234 is revised to read as follows:

§ 21.234 *General limitations.* (a) All the supplies necessary for pursuit of a particular course of training will not be furnished at the beginning of the course. Rather the supplies will be furnished as their need becomes clearly evident and imminent. On the other hand, arrangements must be made whereby supplies will be available to the trainee when they are needed.

(b) The Veterans Administration will not replace at Government expense articles which have been issued to a trainee and which are lost, stolen, misplaced, or damaged beyond repair, when it is determined by the Manager that such loss or damage occurred through fault on the part of the trainee, including lack of due to effect the replacement, an advancement for this purpose may be made from the vocational rehabilitation revolving fund subject to the provisions of § 21.135. Where a trainee refuses to effect replacement of articles indispensable to further training after the Manager has determined that the loss was due to fault on the part of the trainee, it will be necessary to discontinue training for lack of cooperation.

(c) The Veterans Administration will not reimburse a trainee who personally buys supplies. Payment for supplies is made to the training institution or to the vendor from whom they are purchased by the Veterans Administration. If supplies were furnished by an institution and the institution chooses to return to the veteran the amounts charged him and paid by him so that the charges by the training institution stand as an unpaid obligation of the Veterans Administration to the institution, payment may be made if otherwise in order.

(d) When a particular article is furnished for use in more than one subject and the same article is required for use in other subjects or in another quarter or semester or school year, the article furnished will be made to serve for all such requirements and will not be duplicated for such purpose at Government expense. Also, the supplies which have been furnished for one part of a combination course will not be duplicated for the other part of the course.

6. In § 21.235, paragraph (a) is amended to read as follows;

§ 21.235 *Authority to furnish supplies to trainees in school training.* (a) Subject to the limitations contained in §§ 21.230 to 21.242, the Manager is authorized to furnish a veteran pursuing a course of vocational rehabilitation in a school with supplies required by the school to be personally owned by every other student pursuing the same course.

7. Section 21.236 is revised to read as follows:

§ 21.236 *Authority to furnish supplies to trainees in training on the job.* (a) Subject to the limitations contained in §§ 21.230 to 21.242, the Manager is authorized to furnish a veteran pursuing a course of vocational rehabilitation on the job with necessary supplies as required of all similarly circumstanced trainees in the establishment, but not to exceed in quality or amount such items as are ordinarily required to be in the personal possession of trainees pursuing training for the particular objective in establishments in the same general locality.

(b) The Manager may furnish a veteran pursuing a course of vocational rehabilitation training on the job with minimum necessary textbooks and other veteran's individual training program; and

(3) The use of the textbooks or other text material definitely is arranged for on the basis of study assignments, the completion of which by the trainee is checked and evaluated by the trainer and reported by the trainee on his monthly report of training.

8. Section 21.236a *Furnishing supplies to trainees in combination courses* is revoked.

9. Section 21.236b is revised to read as follows:

§ 21.236b *Furnishing supplies to trainees in institutional on-farm training.* Before a veteran may be induced into institutional on-farm training under Part VII, Veterans Regulation 1 (a), as amended, the farm on which he is to pursue the on-farm part of his course must be equipped with the kinds and amounts of supplies and equipment which are necessary to enable the trainee to pursue successfully that portion of the course. Accordingly, under no circumstances will the Veterans Administration furnish any equipment or supplies which may be required to operate the farm. Where organized group instruction in a school is a part of the veteran's course as provided in § 21.201a (a) (1), the Veterans Administration will furnish only those books and incidental consumable supplies required by the school to be personally owned by all students in the school portion of the course. Where all instruction is given on the veteran's farm by an individual instructor as provided in § 21.201a (a) (2), the Veterans Administration will furnish only those textbooks and incidental consumable supplies required by the instructor to be owned by the veteran as a part of his individual training program with the use of such textbooks definitely arranged for on the basis of study assignments, the completion of which is checked and evaluated by the instructor and reported by the veteran on his monthly report of training: *Provided*, That such special equipment as may be authorized under § 21.241 incident to the character of the veteran's disability may be furnished.

10. Section 21.237 *Furnishing supplies to veterans pursuing residency courses in hospitals* is revoked.

11. Section 21.237a is revised to read as follows:

§ 21.237a *Furnishing supplies to veterans pursuing training in the home.* (a) Subject to the limitations contained in §§ 21.230 to 21.242, the Manager is authorized to furnish a veteran pursuing vocational rehabilitation training in the home necessary supplies in quality and amount not to exceed supplies which are generally required to be in the personal possession of all students or trainees by schools or training establishments in the course of training because the veteran is pursuing it in his home. Equipment in this category consists of items which are ordinarily provided by the place of training, for example, shop equipment, which would be available to the veteran but for the limitations imposed by his disability which render him unable to travel to a place of training where such equipment is available. (Special equipment needed to compensate for the handicapping effects of his disability will be furnished the veteran training in his home under § 21.241.)

(c) The Manager may furnish a veteran pursuing a course of vocational rehabilitation training in the home with minimum necessary textbooks and other text material when the following conditions are met:

(1) When the instructor or the institution furnishing the training in the home certifies that the textbooks or other text material are required to be owned and used by the veteran as a part of his course; and

(2) The use of the textbooks or other text material is made a part of the veteran's individual training program; and

(3) The use of the textbooks or other text material definitely is arranged for on the basis of study assignment, the completion of which by the veteran is checked and evaluated by the instructor and reported by the veteran on his monthly report of training.

12. The following sections are revoked:

§ 21.237b *Furnishing supplies to veterans pursuing training on the job for combination objectives.* [Revoked]

§ 21.238 *Furnishing supplies for training on the job following school training.* [Revoked]

§ 21.239 *Furnishing tools.* [Revoked]

13. Section 21.241 is revised to read as follows:

§ 21.241 *Furnishing special equipment.* (a) In accordance with vocational rehabilitation and education procedures the Manager may authorize the furnishing of special equipment made up of items which, because of the nature of the veteran's handicap, are necessary to enable him to undertake and pursue successfully the prescribed course of training. That is, the equipment will enable the veteran to do and accomplish those things which persons not disabled are able to do without special equipment but which the particular veteran, because of his disability, cannot do and therefore cannot pursue the prescribed course satisfactorily. Equipment in this category ordinarily will be items not necessary to persons not disabled but may include such items modified in design and construction as, for example, a workbench with workseat especially designed and constructed to compensate 78th Congress, as amended.

(c) Managers are authorized to furnish Part VII trainees consumable supplies as needed for training purposes in the operation of special equipment, such as sound recorders and braille writers, authorized under paragraph (a) of this section or which would have been authorized except for the fact the equipment had already been issued under the provisions of Public Law 309, 78th Congress or under section 514 of Public Law 85–56. The amount, grade, quality, and cost of such consumable supplies that may be furnished to any trainee will be limited to those commensurate with the veteran's actual need for the supplies in his training. Managers are also authorized to arrange for the reconditioning of sound recording discs furnished to Part VII trainees when such reconditioning is to the economic advantage of the Government, and to reissue such reconditioned discs.

14. In § 21.243, paragraphs (g) and (h) are amended to read as follows:

§ 21.243 *Release of and repayment for training supplies.* * * *

(g) Where it is determined that the veteran is at fault and repayment for supplies is not excused under paragraphs (d) and (f) of this section, the veteran will be required to repay the Veterans Administration for the nonconsumable supplies furnished him at Veterans Administration expense. The amount to be repaid will be the value at which the supplies were issued to the veteran less a percentage equivalent to the percentage of the prescribed course (or term, where applicable in the case of school training) completed. For example, a veteran who has completed one-third of the prescribed course or term for which supplies were furnished will be required to repay two-thirds of the value at which the supplies were issued to the veteran. Under no circumstances will supplies be accepted in lieu of repayment, except as provided in § 21.252 (d) and paragraphs (d) and (h) of this section.

(h) If for any reason the veteran fails to complete the prescribed course of training in the home for which equipment has been furnished under § 21.237a (b), the veteran will be deemed to be at fault under this section with respect to such equipment only, and he will be required to return such equipment to the Veterans Administration or to pay the reasonable value thereof: *Provided, however*, That if the veteran has completed such part of the prescribed course of training that he is found to be employable and has been declared rehabilitated under § 21.281, he will not be deemed to be at fault and he will not be required to return such equipment to the Veterans Administration or to pay the reasonable value thereof. The veteran will be advised accordingly. With eran frequently requires the concurrent rendering of several types of professional and technical services throughout all or a major portion of his program of rehabilitation. Providing or arranging for and coordinating the professional and technical assistance needed by the veteran in connection with entering and pursuing vocational rehabilitation training and adjusting in employment is the responsibility of the training officer. The performance of these functions constitutes his supervision of the veteran's vocational rehabilitation. This supervision includes arranging for services and assistance such as needed medical and dental attention, assistance of the social worker, personal adjustment counseling, employment placement assistance by the State employment service and, in fact, everything possible to assure vocational rehabilitation in a complete and real sense. The immediate role of the training officer is to render technical and professional collaboration in the selection of a specific employment objective and, following counseling, to develop a suitable program of rehabilitation services, including planning of the veteran's training program, and arranging for an appropriate place of training for the particular employment objective. His ultimate role is the provision of technical and professional assistance to the trainee to insure his successful completion of the course of vocational rehabilitation, his vocational adjustment in suitable employment and the continuous coordination of all other services designed to effect his satisfactory vocational rehabilitation.

§ 21.246 *Purpose of supervision.* Through continuous, timely and accurate knowledge of the veteran's status and progress in his rehabilitation adjustment, his current problems or difficulties, and his motivation toward and qualifications for suitable employment, the purpose of supervision of a veteran trainee is to provide him with the professional and technical services needed to help him accomplish his vocational rehabilitation.

16. Section 21.247 *Records of supervision* is revoked.

17. Section 21.248 is revised to read as follows:

§ 21.248 *Activities of the training officer in supervision.* In carrying out the purpose of supervision, the training officer will provide or arrange for such professional and technical services as may be available and needed by the veteran to help him in accomplishing his vocational rehabilitation. These activities include:

(a) Understand the individual veteran as a person. This involves the ability to develop and maintain a sympathetic and helpful relationship through which the veteran can voice his problems and

think about them as objectively as possible.

(b) Utilize the resources available through the other members of the rehabilitation team and the community to provide services needed by the veteran.

(c) Be continuously aware of available established training opportunities and develop others in the locality as required to meet the needs of the disabled veteran.

(d) Explain to school, trainer, or employer the residual abilities of the disabled veteran and promote such change of the training or employment situation as may be necessary to render it suitable and effective for the particular veteran.

(e) Keep continuous check on compatibility of current demands and stresses of training program and practical requirements of prospective employment, and capabilities, abilities, and tolerances of the veteran.

(f) Determine whether the handicapping effects of the veteran's disability are such as to require the use of special rehabilitation procedures, e. g., assistance from Vocational Rehabilitation Board; reduced-time training; training in a special facility such as sheltered workshop, rehabilitation center, or agency for the blind; training in addition to usual amount; reader service; special equipment; assistance in obtaining employment.

(g) Give special care and attention in the case of the homebound veteran, to motivate him to undertake and accomplish his vocational rehabilitation, arrange for a well qualified instructor, plan a program of vocational rehabilitation, arrange for adequate space and suitable equipment for his training, and assist him in planning and developing a substantially remunerative outlet for his goods or services to the end that he may continue to be motivated to follow his selected occupation.

(h) Be sensitive to and understanding of the physical, mental, and emotional demands as well as the rewards and satisfaction to be derived from employment in individual occupations. Continue to discuss with the veteran throughout his training the realistic and practical aspects of his prospective employment in order that he may be soundly oriented and properly motivated toward his ultimate vocational adjustment and rehabilitation.

(i) Recognize the need for corrective action when all reasonable efforts, including referral for personal adjustment counseling when needed, fail to obtain cooperation from the veteran. Under these circumstances the training officer will warn the veteran that if his failure to cooperate continues he may forfeit his subsistence allowance for a period not to exceed 3 months, or his training may be discontinued. If the veteran fails to make the necessary improvements, the training officer will take action leading to forfeiture of subsistence allowance for not to exceed 3 months or to discontinuance of training.

(j) Maintain continuous liaison with representatives of the State employment service to the end that, through effective mutual cooperation, the veteran may be assisted in finding suitable employment and in accomplishing satisfactory vocational adjustment.

(k) Provide followup assistance, after the veteran obtains employment, until there is reasonable assurance that the veteran has made a satisfactory employment adjustment.

18. In § 21.261, paragraph (b) is amended to read as follows:

§ 21.261 *Ordinary leave.* • • •

(b) *Charging of ordinary leave.* Approved absences covering a period less than the standard school or workweek of the training institution or establishment will be charged at the rate of 1 day for each school or working day of absence from the institution. Approved absences covering a period of 1 calendar week or more will be charged at the rate of 5 days for each 7 consecutive days of absence. No charge against leave will be made for absences on those days within a period of training on which the school or training establishment grants total exemption from attendance to all students or trainees similarly circumstanced. For veterans enrolled in educational institutions, this will include school holidays and short intermissions between successive terms or periods of instruction within the ordinary school year: *Provided*, That the veteran was enrolled for the two successive terms. ("Ordinary school year" means a period of approximately 9 months which begins in the fall and ends in the spring.) For veterans pursuing on-the-job training no charge will be made for holidays established by Federal or State law but a charge will be made for periods during which vacations are granted to all employees at the same time; or periods during which the plant is shut down to undergo repairs or because of such things as fuel shortages, strikes, inclement weather, etc. (See §§ 21.254 and 21.262a.)

19. A new § 21.262a is added to read as follows:

§ 21.262a *Leave where training establishment not operating full time.* Ordinary leave approvable under § 21.261 (not in excess of the amount of leave accumulated to the credit of the trainee) and personal hardship leave approvable under § 21.262 (b) (1) may be granted for any period of time during which full-time training on the job is not available because the training establishment is operated on a part-time basis or is shut down temporarily: *Provided*, (a) It is determined that full-time training will be available within a period of time not to exceed leave approvable under §§ 21.261 and 21.262 (b) (1), or (b) it is determined that the training establishment is operating for approximately the same number of days per month as similar establishments in the general area. For the purpose of this section a 5-day week will be considered full time except that full-time training shall be not more than the number of days per week established as the standard workweek for the particular establishment through bona fide collective bargaining between the employers and employees. Also for purpose of this section leave will be charged for each day or fraction thereof on which the establishment is shut down during the standard workweek except that no leave will be charged for legal holidays. When leave under this section is exhausted, subsistence allowance will be deducted for those nonholidays on which the establishment is not operating during the standard workweek. Days for which subsistence allowance is deducted will not be charged against the veteran's time in training under Part VII.

20. In § 21.283, paragraph (a) (5) is amended to read as follows:

§ 21.283 *Status "discontinued."* (a) • • •

(5) When the trainee fails to avail himself properly of the training provided; or when his misconduct prevents progress toward his employment objective or ultimate placement in employment; or when he willfully violates the regulations of the institution or establishment in which placed for training or his conduct is insubordinate or disorderly at any place of training; or when he voluntarily withdraws from training for reasons other than physical condition or excused interruptions; or when he leaves the area and has his records transferred to another regional office without having made prior arrangements with the Veterans Administration for the continuation of his vocational rehabilitation training in the new area of jurisdiction.

21. In § 21.290, new paragraphs (c), (d), (e), and (f) are added to read as follows:

§ 21.290 *Veterans Administration responsibility under the law.* • • •

(c) The education and training activity will maintain liaison with the appropriate State employment agency and will utilize the services of that agency to the fullest extent possible in assisting rehabilitated veterans to obtain suitable employment upon completion of their prescribed courses. Not less than 60 days prior to the anticipated date of rehabilitation it will be ascertained whether the trainee needs and desires employment assistance. If he does need and desire such assistance, he will be referred to the appropriate employment agency. If the trainee does not desire assistance in obtaining employment, he will not be referred to the employment agency and his records will be documented accordingly.

(d) In addition to those veterans included under § 21.293, direct employment placement assistance will be provided personally by the training officer, in cooperation with the State employment agency, for those veterans who may be expected to encounter serious difficulty in finding and obtaining suitable employment because of the attitude of employers generally with respect to employing persons with the particular type of disability involved. If by the date of rehabilitation the veteran has not been employed or assured of employment, the training officer will make every reasonable effort to effect placement until the veteran is suitably placed or until it is determined by the chief, education and training activity, that all resources available to the regional office have been fully explored and developed and that there is little likelihood that continued efforts would result in placement.

(e) In order to assure that the vocational rehabilitation benefits afforded the disabled veteran are as effective as possible in assisting him in making a satisfactory employment adjustment, the training officer will provide followup assistance after the veteran obtains employment in each case where on the basis of knowledge of the veteran and understanding of his needs and problems he determines that such assistance is required. Such followup assistance will include the observing of the veteran's performance in competitive employment and will be continued for a period of time necessary to determine that there is reasonable assurance that the veteran has made a satisfactory employment adjustment.

(f) When the veteran has entered into suitable employment and has made a satisfactory employment adjustment, the purpose of vocational rehabilitation has been satisfied. Except as provided in § 21.293 (e), the Veterans Administration thereafter has no further responsibility in respect to the veteran's employment.

22. Section 21.291 *Referral of trainees for employment assistance* is revoked.

23. In § 21.293, paragraph (e) is amended to read as follows:

§ 21.293 *Assisting seriously handicapped veterans in obtaining employment.* • • •

(e) Where the seriously handicapped veteran who has been rehabilitated and suitably employed loses his employment through no fault on his part and requests further employment placement assistance, the training officer in cooperation with the State employment service will provide the assistance contemplated in paragraph (d) of this section, and § 21.290 (e).

24. Section 21.310 is revised to read as follows:

§ 21.310 *Definition.* As referred to in §§ 21.310 to 21.314, inclusive, the term "supplies" will include books, tools, supplies, equipment, etc.

25. Section 21.312 is revised to read as follows:

§ 21.312 *Authority.* Subject to the limitations set forth in § 21.314 and in accord with principles that apply in furnishing supplies under Part VII as set forth in §§ 21.230 to 21.240a, Managers are authorized to furnish, through the school or training establishment or through direct purchase in accordance with current regulations governing the procurement of and accounting for trainee's property, supplies of such kind and in such minimum amounts as are necessary to the satisfactory pursuit of a course of education or training in a particular institution.

26. Section 21.313 *Prevention of abuse* is revoked.

27. Section 21.314 is revised to read as follows:

§ 21.314 *General.* (a) The Veterans Administration will not replace at Government expense articles which have been issued to a trainee and which are lost, stolen, misplaced, or damaged beyond repair.

(b) The Veterans Administration will not reimburse a trainee who personally buys supplies except trainees in training under Part VIII in foreign countries as provided in § 21.150.

(c) Where a veteran at the time of enrolling in a course of training on the job does not have entitlement sufficient to pursue the course to completion, the Veterans Administration will not furnish supplies costing in excess of that amount which bears the same ratio to the cost of the supplies which the veteran is required by the establishment to own for the, total course as the veteran's remaining entitlement bears to the total length of the course.

(d) The Veterans Administration may furnish to an enrollee pursuing a noncredit course those supplies required by the school to be owned personally by all students in the same course when the enrollee is required to perform all of the work which all students enrolled for credit must perform in the course except taking credit examinations. Supplies may not be furnished to enrollees in "noncredit" courses which require only attendance and listening at class.

28. The following sections are revoked:

§ 21.315 *Authority to furnish supplies to trainees in school training.* [Revoked]

§ 21.316 *Authority to furnish supplies to trainees in training on the job.* [Revoked]

§ 21.316a *Furnishing supplies to trainees in combination courses.* [Revoked]

§ 21.317 *Furnishing supplies to veterans pursuing residency courses in hospitals.* [Revoked]

§ 21.318 *Furnishing supplies for training on the job following school training.* [Revoked]

§ 21.319 *Furnishing supplies in noncredit courses.* [Revoked]

§ 21.320 *Furnishing tools.* [Revoked]

§ 21.321 *Furnishing clothing.* [Revoked]

§ 21.322 *Furnishing special items.* [Revoked]

§ 21.323 *Furnishing supplies after completion of education or training.* [Revoked]

§ 21.323a *Furnishing supplies after expiration of entitlement.* [Revoked]

§ 21.324 *Furnishing books, supplies, and equipment to trainees in institutional on-farm training.* [Revoked]

§ 21.324a *Furnishing magazines and other periodicals.* [Revoked]

(Sec. 210, 71 Stat. 91; 38 U. S. C. 2210. Interpret or apply 57 Stat 43, as amended, secs. 400, 1501, 1502, 1503, 58 Stat. 287, as amended, 300, 301, as amended, sec. 10, 59 Stat. 631, 632, sec. 1003, 71 Stat. 123; 38 U. S. C. 697a, 697b, 697c, 697f, 697g, 3003, ch. 12A)

This regulation is effective August 19, 1958.

[SEAL] ROBERT J. LAMBERIE,
Acting Deputy Administrator.

PROPOSED RULE MAKING

DEPARTMENT OF THE TREASURY

Bureau of Narcotics

[21 CFR Ch. II]

ETHYL 1-(3-CYANO-3,3-DIPHENYLPROPYL)-4-PHENYL-4-PIPERIDINECARBOXYLATE

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given, pursuant to the provisions of the act of March 8, 1946 (60 Stat. 38; 26 U. S. C. 4731), section 4 of the Administrative Procedure Act (60 Stat. 238; 5 U. S. C. 1103), and by virtue of the authority vested in me by the Secretary of the Treasury (12 F. R. 1480), that a determination is proposed to be made that the following-named new drug has an addiction-forming or addiction-sustaining liability similar to morphine and is an opiate:

Ethyl 1-(3-cyano-3,3-diphenylpropyl)-4-phenyl-4-piperidinecarboxylate.

Consideration will be given to any written data, views or arguments, pertaining to the addiction-forming or addiction-sustaining liability of the above-named drug, which are received by the Commissioner of Narcotics prior to September 19, 1958. Any person desiring to be heard on the addiction-forming or addiction-sustaining liability of the above-named drug will be accorded the opportunity at a hearing in the office of the Commissioner of Narcotics, 1300 E Street NW., Washington 25, D. C., at 10:00 o'clock a. m., September 19, 1958, provided that such person furnishes written notice of his desire to be heard, to the Commissioner of Narcotics, Washington 25, D. C., not later than 20 days from the publication of this notice in the FEDERAL REGISTER. If no written notice of a desire to be heard shall be received within 20 days from the date of publication of this notice in the FEDERAL REGISTER, no hearing shall be held, but the Commissioner of Narcotics shall proceed to make a recommendation to the Secre-

tary of the Treasury for a finding under section 1 of the act of March 8, 1946.

(60 Stat. 36; 26 U. S. C. 4731)

[SEAL] G. W. CUNNINGHAM,
Acting Commissioner of Narcotics.

Internal Revenue Service

[26 CFR (1954) Parts 252, 253]

DRAWBACK ON LIQUORS EXPORTED; REMOVALS OF ALCOHOLIC LIQUORS, TOBACCO PRODUCTS, AND OTHER DOMESTIC ARTICLES TO FOREIGN-TRADE ZONES

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing, in duplicate, to the Director, Alcohol and Tobacco Tax Division, Internal Revenue Service, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U. S. C. 7805).

[SEAL] RUSSELL C. HARRINGTON,
Commissioner of Internal Revenue.

Treasury Department Order No. 165-9, effective January 1, 1959, transferred from the Commissioner of Internal Revenue and delegated to the Commissioner of Customs the function, authorized by section 313 (d) of the Tariff Act of 1930, as amended (19 U. S. C. 1313 (d)), of allowing the drawback of an amount equal to the internal revenue tax found to have been paid on domestic alcohol used in the manufacture or production in the United States of flavoring extracts and medicinal or toilet preparations (including perfumery) that have been exported.

In order to conform regulations in 26 CFR Parts 252 and 253 to the Treasury Department Order, such regulations are amended as follows:

PARAGRAPH 1. 26 CFR Part 252 is amended as follows:

(A) Section 252.1 is amended to read as follows:

§ 252.1 *Drawback on distilled spirits, wines, and beer.* The regulations in this part relate to the allowance of drawback of internal revenue tax on (a) distilled spirits and wines packaged or bottled especially for export and beer brewed and manufactured in the United States when exported or used as supplies on vessels or aircraft, and (b) distilled spirits exported in distiller's original packages containing not less than 20 wine gallons each. Regulations relating to drawback of tax on such articles deposited in foreign-trade zones are contained in Part 253 of this chapter.

(B) Subpart F, containing §§ 252.180 to 252.184, is revoked.

PAR. 2. 26 CFR Part 253 is amended as follows:

(A) Section 253.20 is amended by deleting "flavoring extracts, and medicinal or toilet preparations made with taxpaid alcohol;" from the definition of the word "articles".

(B) Sections 253.200 and 253.201 and the undesignated centerhead preceding the two sections are revoked.

Bureau of Customs

[T. D. 54660]

[Customs Delegation Order 13]

COLLECTORS OF CUSTOMS

DELEGATION OF AUTHORITY TO SETTLE CERTAIN CLAIMS

AUGUST 13, 1958.

By virtue of the authority vested in me by Treasury Department Order No. 145, Revision 1 (19 F. R. 775), I hereby delegate to the collectors of customs the authority to consider, ascertain, adjust, determine, settle and pay claims not in excess of $100 arising under 28 U. S. C. 2672 for injury, loss, or death caused by the negligent or wrongful act or omission of any employee of the Bureau of Customs.

[SEAL] RALPH KELLY,
Commissioner of Customs.

Office of the Secretary

[Treasury Dept. Order 165-9]

COMMISSIONER OF CUSTOMS

TRANSFER AND DELEGATION OF AUTHORITY TO ALLOW DRAWBACK OF INTERNAL REVENUE TAX ON DOMESTIC ALCOHOL

AUGUST 13, 1958.

By virtue of the authority vested in me by Reorganization Plan No. 26 of 1950 (3 CFR, 1950 Supp., Ch. III) there is hereby transferred from the Commissioner of Internal Revenue and delegated to the Commissioner of Customs the function, authorized by section 313 (d) of the Tariff Act of 1930, as amended (19 U. S. C. 1313 (d)), of allowing the drawback of an amount equal to the internal revenue tax found to have been paid on domestic alcohol used in the manufacture or production in the United States of flavoring extracts and medicinal or toilet preparations (including perfumery) that have been exported.

The function herein transferred and delegated may be delegated by the Commissioner of Customs to other officers or employees of the Customs Service in such manner as the Commissioner shall direct.

This order shall be effective January 1, 1959.

[SEAL] FRED C. SCRIBNER, Jr.,
Acting Secretary of the Treasury.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[79890]

MINNESOTA

NOTICE OF FILING OF PLAT OF SURVEY AND ORDER PROVIDING FOR OPENING OF PUBLIC LANDS

AUGUST 13, 1958.

Plat of Survey of the land described below, accepted March 19, 1958, will be officially filed in the Eastern States Land Office, Bureau of Land Management, Department of the Interior, Washington 25, D. C., effective 10:00 a. m., on September 23, 1958.

FOURTH PRINCIPAL MERIDIAN, MINNESOTA

T. 46 N., R. 26 W.,
Sec. 5, Lot 13 (Island).
Containing 0.37 acre.

This plat represents the survey of an island in Nord Lake which was not included in the original survey as shown by plat approved July 7, 1871.

This island is of sandy loam formation with some stone. A ridge in the form of a horseshoe lies along the East, South, and West sides and reaches approximately 10 feet above water level. Timber consists of birch, poplar, ash, elm, and spruce ranging in size from 4 to 18 inches diameter. There is a rim of alder around the island. The island is upland in character.

No application may be allowed under the homestead or small tract or any other nonmineral public land laws unless the lands have already been classified as valuable or suitable for such type of application or shall be so classified upon consideration of an application. Any application that is filed will be considered on its merit. The lands will not be subject to occupancy or disposition until they have been classified.

Applications and selections under nonmineral public land laws and applications and offers under the mineral leasing laws may be presented to the Manager, mentioned below, beginning on the date

of this order. Such applications, selections, and offers will be considered as filed on the hour and respective dates shown for the various classes enumerated in the following paragraphs:

1. Applications by persons having prior existing valid settlement rights, preference rights conferred by existing laws, or equitable claims subject to allowance and confirmation will be adjudicated on the facts presented in support of each claim or right. All applications presented by persons other than those referred to in this paragraph will be subject to the applications and claims mentioned in this paragraph.

2. All valid applications, under the Homestead and Small Tract Laws, by qualified veterans of World War II or of the Korean Conflict, and by others entitled to preference rights under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 274-284 as amended), presented prior to 10:00 a. m., on September 23, 1958, will be considered as simultaneously filed at that hour. Rights under such preference right applications filed after that hour and before 10:00 a. m., on December 23, 1958, will be governed by the time of filing.

3. All valid applications and selections under the nonmineral public land laws, other than those coming under paragraphs (1) and (2) above, and applications and offers under the mineral leasing laws, presented prior to 10:00 a. m., on December 23, 1958, will be considered filed simultaneously at that hour. Rights under such applications and selections filed after that hour will be governed by the time of filing.

All inquiries relating to the lands should be addressed to the Manager, Eastern States Land Office, Bureau of Land Management, Department of the Interior, Washington 25, D. C.

H. K. SCHOLL,
Manager.

[F. R. Doc. 58-6622; Filed, Aug. 18, 1958; 8:45 a. m.]

EAST ADDITION, TOWNSITE OF KODIAK, ALASKA

NOTICE OF SALE

AUGUST 1, 1958.

1. *Statutory authority.* The lots in the East Addition, Kodiak Townsite will be disposed of under section 2381, United States Revised Statutes (43 U. S. C. sec. 712). The townsite plat of the Dependent Resurvey of a Portion of U. S. Survey No. 2538A and Extension of U. S. Survey No. 2538B East Addition of Townsite of Kodiak, Alaska, was accepted on February 20, 1958 and officially filed on April 17, 1958.

2. *Lots and minimum prices.* The lots which will be offered for sale and minimum prices thereof are shown below.

3. *Public sale.* The lots will be offered for sale by the Operations Supervisor, Anchorage or his representative at public outcry to the highest bidder at the Elks Lodge, Kodiak, Alaska on August 26, 1958, beginning at 10:00 a. m. The sale will be continued from day to day as long as may be necessary until all the lots have been offered.

4. *Payments.* No lot shall be sold for less than the minimum price. Full payment may be made in cash on the date of the sale, or one-fourth of the purchasing price may be paid in cash at that time and the balance in not to exceed three equal annual installments, with interest at the rate of four per cent per annum to the date of payment. Payment on the date of that sale must be made to the officer conducting the sale. The deferred installments, with the interest, must be made to the Manager, Anchorage Land Office, 131 Fifth Avenue, Anchorage, Alaska.

5. *Citizenship requirements.* Every individual purchasing a lot will be required to furnish evidence that he is a citizen of the United States, or that he has declared his intention to become such a citizen, and every corporation purchasing a lot will be required to furnish evidence, including a certified copy of its articles of incorporation, showing that it was organized under the laws of the United States or of some State, Territory, or possession thereof, and that it is authorized to acquire and hold real estate in Alaska.

6. *Manner of sale.* Bids and payments may be made in person or by agent, but may not be made by mail nor at any time or place other than that fixed by these regulations. Any person may purchase any number of lots for which he is the successful bidder. No bids will be made in increments of less than $5.00.

7. *Authority of officer conducting the sale.* The officer conducting the sale is hereby authorized to reject any and all bids for any lot, and to suspend, adjourn, or postpone the sale of any lot or lots. After all the lots have been offered, the sale will be adjourned or closed, as the officer in charge may deem proper.

8. *Forfeitures for nonpayment.* If any person who has made partial payment on a lot fails to make any succeeding payment required under these regulations, at the date such payment becomes due, the money theretofore paid and his right to the lot will be forfeited.

9. *Removal of improvements.* Owners of buildings who do not purchase the lots on which the buildings are located will be allowed three months from the date of the sale in which to remove their improvements.

10. *Disposal of unsold lots after sale has been adjourned.* Lots remaining unsold upon adjournment of this sale will be held for future disposition at public sale at such time as a demand for the lots exists.

11. *Reservations.* Patents for the lots, when issued, will contain the reservations of rights-of-way for ditches and canals in accordance with the act of August 30, 1890 (26 Stat. 391), and for the construction of railroads and telegraph and telephone lines as provided by the act of March 12, 1914 (38 Stat. 305).

12. *Warning.* All persons are warned against forming any combination or agreement which will prevent any lot from selling advantageously or which will, in any way, hinder or embarrass the sale. Any person so offending will be prosecuted under section 59 of the Criminal Code of the United States (18 U. S. C. 113).

ALASKA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

The Alaska Railroad has filed an application, Serial Number 020500, for the withdrawal of the lands described below, from all forms of appropriation under the public land laws, including the mining laws, but excluding the mineral leasing laws and provisions of the Materials Act. The applicant desires the land for relocation of the main line of the Alaska Railroad, station grounds, and for gravel pits in construction and maintenance of the new rail line.

For a period of sixty days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, P. O. Box 1050, Fairbanks, Alaska.

If circumstances warrant it, a public hearing will be held at a convenient time and place which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

T. 8 S., R. 8 W., F. M.,
Sections 5 and 6.
T. 6 S., R. 9 W., F. M.,
Section 1 and that portion of Section 2 lying east of the Nenana River.

Containing approximately 2,140 acres.

RICHARD L. QUINTUS,
Operations Supervisor,
Fairbanks.

DEPARTMENT OF COMMERCE

Federal Maritime Board

NIPPON YUSEN KAISHA (N. Y. K. LINE) AND ALCOA STEAMSHIP CO., INC.

NOTICE OF AGREEMENTS FILED FOR APPROVAL

Notice is hereby given that the following described agreements have been filed with the Board for approval pursuant to section 15 of the Shipping Act, 1916 (39 Stat. 733, 46 U. S. C. 814):

(1) Agreement No. 7936-1, between Nippon Yusen Kaisha (N. Y. K. Line) and Alcoa Steamship Company, Inc., modifies approved transhipment Agreement No. 7936, covering the transportation of general cargo under through bills of lading from the Philippines and Japan to the Virgin Islands, with transhipment at New York; and

(2) Agreement No. 7937-1, between Nippon Yusen Kaisha (N. Y. K. Line) and Alcoa Steamship Company, Inc., modifies approved transhipment Agreement No. 7937, covering the transportation of general cargo under through bills of lading from the Philippines and Japan to Puerto Rico, with transhipment at New York.

Each of these modifications provides for the inclusion of Hong Kong as a port of loading, and Baltimore as a port of transhipment, in the respective agreements.

Interested parties may inspect these agreements and obtain copies thereof at the Regulation Office, Federal Maritime Board, Washington, D. C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to either of the agreements and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: August 14, 1958.

By order of the Federal Maritime Board.

[SEAL] GEO. A. VIEHMANN,
Assistant Secretary.

ATOMIC ENERGY COMMISSION

[Docket No. 50-2]

UNIVERSITY OF MICHIGAN

NOTICE OF ISSUANCE OF FACILITY LICENSE AMENDMENT

Please take notice that the Atomic Energy Commission has issued the following amendment (No. 2) to facility license No. R-28 authorizing the University of Michigan, as requested in its application for license amendment dated June 24, 1958, to increase the maximum power level from 100 kw to 1,000 kw and to observe new operating restrictions when operating the Ford Nuclear Reactor. The Commission has found that operation of the facility in accordance with the terms and conditions of the license as amended will not present any undue hazard to the health and safety of the public and will not be inimical to the common defense and security.

The Commission has found that prior public notice of proposed issuance of this amendment is not necessary in the public interest since the proposed operation of the reactor at the increased power level within the limits of the new operating restrictions does not present any substantial changes in the hazards to the health and safety of the public from those presented by the previously approved operation of the Ford Nuclear Reactor.

In accordance with the Commission's rules of practice (10 CFR Part 2) the Commission will direct the holding of a formal hearing on the matter of the issuance of the license amendment upon receipt of a request therefor from the licensee or an intervener within thirty (30) days after the issuance of the license amendment. For further details, see (1) the application for license amendment submitted by the University of Michigan and (2) a hazards analysis of the proposed operations prepared by the Division of Licensing and Regulation, both on file at the Commission's Public Document Room, 1717 H Street NW., Washington, D. C. A copy of item (2) may be obtained at the Commission's Public Document Room or upon request addressed to the Atomic Energy Commission, Washington 25, D. C., Attention: Director, Division of Licensing and Regulation.

Dated at Germantown, Md., this 11th day of August 1958.

For the Atomic Energy Commission.

H. L. PRICE,
Director, Division of
Licensing and Regulation.

[License No. R-28, Amdt. No. 2]

Subparagraph 4a. *Operating Restrictions* of License No. R-28 is hereby amended to read as follows:

a. *Operating Restrictions.*

(1) The University shall operate the facility in accordance with the procedures described in the application.

(2) The University shall not operate the facility at thermal power levels in excess of 1,000 kilowatts.

(3) The fast-acting electronic period safety channel shall be set to scram the reactor at a period no less than 5 seconds.

(4) The level safety channels shall be set to scram the reactor at 150 percent of the full power rating of 1,000 kilowatts.

(5) The sum of the absolute magnitude of the reactivity of all experiments shall not exceed 0.5 percent.

(6) The total excess reactivity above cold, clean critical shall not be greater than 2.68 percent.

(7) The University shall not by-pass any control mechanism during the operation of the facility; except that certain interlocks may be bypassed temporarily during the performance of safety rod calibration, provided the calibration is performed in accordance with the procedures set out in the University's license amendment request dated December 17, 1957.

This amendment is effective as of the date of issuance.

Date of issuance: August 11, 1958.

For the Atomic Energy Commission.

H. L. PRICE,
Director,
Division of Licensing and Regulation.

[F. R. Doc. 58-6619; Filed, Aug. 18, 1958; 8:45 a. m.]

[Docket No. 50-113]

UNIVERSITY OF ARIZONA

NOTICE OF APPLICATION FOR CONSTRUCTION PERMIT AND UTILIZATION FACILITY LICENSE

Please take notice that The University of Arizona, Tucson, Arizona, under section 104c of the Atomic Energy Act of 1954, filed an application dated July 2, 1958 for a construction permit and utilization facility license for an isotope production reactor (TRIGA) to be located on the University's campus. The reactor is designed to operate continuously at a power level of 10,000 watts and will be purchased from the General Atomic Division of General Dynamics Corporation. A copy of the application is on file in the AEC Public Document Room located at 1717 H Street NW., Washington, D. C.

Dated at Germantown, Md., this 12th day of August 1958.

For the Atomic Energy Commission.

H. L. PRICE,
Director, Division of
Licensing and Regulation.

FEDERAL POWER COMMISSION

[Docket No. G-15830]

GULF OIL CORP. ET AL.

ORDER FOR HEARING, SUSPENDING PROPOSED CHANGE IN RATE AND ALLOWING INCREASED RATE TO BECOME EFFECTIVE

AUGUST 12, 1958.

Gulf Oil Corporation (Operator) et al. (Respondent) on July 21, 1958, tendered for filing a proposed change in its presently effective rate schedule for the sale of natural gas subject to the jurisdiction of the Commission. The proposed change, which constitutes an increased rate and charge, is contained in the following designated filing:

Description: Notice of Change, July 18, 1958.

Purchaser: Texas Gas Transmission Corporation.

Rate schedule designation: Supplement No. 7 to Respondent's FPC Gas Rate Schedule No. 79.

Effective date: August 1, 1958 (effective date is the date proposed by Respondent).

The increased rate(s) and charge(s) so proposed is intended to reflect (in whole or in part) the additional "excise, license, or privilege tax" of one cent per Mcf levied by the State of Louisiana pursuant to Act No. 8 of 1958 (House Bill No. 303), as approved on June 16, 1958, amending Title 47 of the Louisiana Revised Statutes of 1950. The Commission is advised that litigation is being instituted to challenge the constitutionality of the said Act No. 8 of 1958. In consideration of this fact, and in order to assure appropriate refund in the event said Act No. 8 of 1958 should be declared unconstitutional or otherwise held invalid by final judicial decision, it is deemed advisable to suspend the said proposed increased rate and charge until August 2, 1958, and thereafter to permit it to become effective as of that date: *Provided,* That within 20 days from the date of this order Respondent shall file with the Secretary of the Commission an appropriate undertaking to assure such refund as may be ordered.

The Commission finds:

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed change, and that the above-designated supplement be suspended and the use thereof deferred as hereinafter ordered.

(2) It is necessary and proper in the public interest in carrying out the provisions of the Natural Gas Act that Respondent's proposed increased rate be made effective as hereinafter provided and that Respondent be required to file an undertaking as hereinafter ordered and conditioned.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly Sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rate and charge contained in the above-designated supplement to Respondent's FPC Gas Rate Schedule.

(B) Pending such hearing and decision thereon, said supplement be and it hereby is suspended and the use thereof deferred until August 2, 1958, and until such further time as it is made effective in the manner hereinafter prescribed.

(C) The rate(s), charge(s), and classification(s) set forth in the above-designated supplement to Respondent's FPC Gas Rate Schedule shall be effective as of August 2, 1958: *Provided, however,* That within 20 days from the date of this order, Respondent shall execute and file with the Secretary of the Commission the agreement and undertaking described in paragraph (E) below.

(D) Respondent shall refund at such times and in such amounts to the persons entitled thereto, and in such manner as may be required by final order of the Commission, the difference between the presently effective rate and charge and the proposed increased rate and charge hereby allowed to become effective in the event the additional tax of one cent per Mcf levied by the State of Louisiana is for any reason held to be invalid. Should such additional tax eventually be held invalid and the State of Louisiana makes refund, with interest, of the tax monies collected pursuant to the said Act No. 8 of 1958, then, and in that event, a proportionate part of the interest so received by the Respondent herein shall be passed on and paid to the persons entitled thereto at such times and in such amounts, and in such manner as may be required by final order of the Commission. Respondent shall bear all costs of any such refunding; shall keep accurate accounts in detail of all amounts received by reason of the increased rate or charge allowed by this order to become effective, for each billing period, specifying by whom and in whose behalf such amounts were paid; and shall report (original and four copies), in writing and under oath, to the Commission quarterly, or monthly if Respondent so elects, for each billing period, and for each purchaser, the billing determinants of natural gas sales to such purchasers and the revenues resulting therefrom, as computed under the rate in effect immediately prior to the date upon which the increased rate allowed by this order becomes effective, and under the rate allowed by this order to become effective, together with the differences in the revenues so computed.

(E) As a condition of this order, within 20 days from the date of issuance thereof, Respondent shall execute and file in triplicate with the Secretary of this Commission its written agreement

and undertaking to comply with the terms of paragraph (D) hereof, signed by a responsible officer of the corporation, evidenced by proper authority from the board of directors, and accompanied by a certificate showing service of copies thereof upon all purchasers under the rate schedule involved, as follows:

Agreement and Undertaking of ----------
To Comply With the Terms and Conditions of Paragraph (D) of Federal Power Commission's Order Making Effective Proposed Rate Changes

In conformity with the requirements of the order issued ----------, in Docket No. G-..., ---------- hereby agrees and undertakes to comply with the terms and conditions of paragraph (D) of said order, and has caused this agreement and undertaking to be executed and sealed in its name by its officers, thereupon duly authorized in accordance with the terms of the resolution of its board of directors, a certified copy of which is appended hereto this ------ day of ----------

---

By ----------

Attest:

(Secretary)

Unless Respondent is advised to the contrary within 15 days after the date of filing such agreement and undertaking, the agreement and undertaking shall be deemed to have been accepted.

(F) If Respondent shall, in conformity with the terms and conditions of paragraph (D) of this order, make the refunds as may be required by order of the Commission, the undertaking shall be discharged; otherwise, it shall remain in full force and effect.

(G) Neither the supplements hereby suspended nor the rate schedules sought to be altered thereby shall be changed until the period of suspension has expired, unless otherwise ordered by the Commission.

(H) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

By the Commission.

[SEAL] JOSEPH H. GUTRIDE, *Secretary.*

[Docket No. G-15831]

GULF OIL CORP.

ORDER FOR HEARING, SUSPENDING PROPOSED CHANGES IN RATES, AND ALLOWING INCREASED RATES TO BECOME EFFECTIVE

AUGUST 12, 1958.

Gulf Oil Corporation (Respondent) on July 21, 1958, tendered for filing proposed changes in its presently effective rate schedules for sales of natural gas subject to the jurisdiction of the Commission. The proposed changes, which constitute increased rates and charges, are contained in the following designated filings:

Description: Notices of Change, dated July 18, 1958.

Purchasers: (1) Hassie Hunt Trust, (2) Southern Natural Gas Company, (3 and 10) United Gas Pipe Line Company, (4, 5, 7, and 8) Arkansas Louisiana Gas Company, (6) Tennessee Gas Transmission Company, (9) Texas Gas Transmission Corporation.

Rate schedule designation: (1) Supplement No. 9 to Respondent's FPC Gas Rate Schedule No. 83. (2) Supplement No. 1 to Respondent's FPC Gas Rate Schedule No. 69. (3) Supplement No. 4 to Respondent's FPC Gas Rate Schedule No. 75. (4) Supplement No. 8 to Respondent's FPC Gas Rate Schedule No. 76. (5) Supplement No. 5 to Respondent's FPC Gas Rate Schedule No. 78. (6) Supplement No. 6 to Respondent's FPC Gas Rate Schedule No. 80. (7) Supplement No. 5 to Respondent's FPC Gas Rate Schedule No. 81. (8) Supplement No. 7 to Respondent's FPC Gas Rate Schedule No. 82. (9) Supplement No. 4 to Respondent's FPC Gas Rate Schedule No. 84. (10) Supplement No. 11 to Respondent's FPC Gas Rate Schedule No. 85.

Effective date: August 1, 1958 effective date is the date proposed by Respondent.

NOTE: The remaining text of this document is identical with that of F. R. Doc. 58-6623, *supra*.

NOTICE OF APPLICATION TO ABANDON SERVICE AND DATE OF HEARING

AUGUST 13, 1958.

Take notice that Phillips Chemical Company (Applicant), a Delaware corporation having its principal place of business at Bartlesville, Oklahoma, filed on May 21, 1958, an amendment to its certificate application (filed in this docket on December 20, 1954) pursuant to section 7 of the Natural Gas Act for authorization to abandon the service hereinafter described, subject to the jurisdiction of the Commission, all as more fully presented in the application which is on file with the Commission and open for public inspection.

Applicant seeks authorization to abandon a sale to La-Tex Petroleum Products Corporation (for resale to Tennessee Gas Transmission Company) of gas produced from the Chem-Thomson Lease, South Crowley Field, Acadia Parish, Louisiana. Applicant filed on December 20, 1954, an application for a certificate of public convenience and necessity authorizing this sale. A public hearing was set for September 13, 1956, but was postponed without date at Applicant's request. The Chem-Thomson "D" No. 1 Well, the only producing well on the property, had been plugged and abandoned prior to the date set for hearing. Applicant now states that there has been no further production and indicates none is anticipated and requests authorization to abandon the service.

This matter should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on September 17, 1958, at 9:30 a. m., e. d. s. t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before September 12, 1958. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] MICHAEL J. FARRELL, *Acting Secretary.*

[F. R. Doc. 58–6646; Filed, Aug. 18, 1958; 8:52 a. m.]

[Project No. 2230]

CITY OF SITKA, ALASKA

NOTICE OF APPLICATION FOR AMENDMENT OF LICENSE

AUGUST 13, 1958.

Public notice is hereby given that applicaton has been filed under the Federal Power Act (16 U. S. C. 791a–825r) by City of Sitka, Alaska, licensee for Project No. 2230 on Blue Lake and Medvetcha River on Baranof Island, Alaska, approximately five miles east of Sitka, affecting lands of the United States within Tongass National Forest, for amendment of its license for the project. Licensee requests that the license be amended to reflect the following changes in the project works: (a) A relocation of the proposed powerhouse to a location downstream on the Medvetcha River near tidewater; (b) addition of a lined and unlined tunnel of approximately 5518 feet and relocation of 337 feet of penstock; (c) installation of an 18-inch Howell-Bunger valve, in the 84-inch diameter pipeline crossing the Medvetcha River to permit the release of 50 cfs of water for the purpose of sustaining the downstream fisheries; (d) the initial construction of the single arch concrete dam to elevation 345 feet instead of 365 feet; (e) the addition of a water supply valve; (f) change in the turbine characteristics; and (g) addition of a surge tank.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure of the Commission (18 CFR 1.8 or 1.10). The last day upon which protests or petitions may be filed is September 30, 1958. The application is on file with the Commission for public inspection.

[SEAL] MICHAEL J. FARRELL, *Acting Secretary.*

SECURITIES AND EXCHANGE COMMISSION

[File No. 1–3074]

CORNUCOPIA GOLD MINES

ORDER SUMMARILY SUSPENDING TRADING

AUGUST 13, 1958.

I. The Common Stock, $0.05 par value, of Cornucopia Gold Mines being listed and registered on the American Stock Exchange; and

II. The Commission on July 25, 1958, issued its order and notice of hearing under section 19 (a) (2) of the Securities Exchange Act of 1934 (hereinafter called "the act") to determine at a hearing to be held September 2, 1958, whether it is necessary or appropriate for the protection of investors to suspend for a period not exceeding twelve months, or to withdraw, the registration of the common stock of Cornucopia Gold Mines (hereinafter called "registrant") on the American Stock Exchange for failure to comply with section 13 of the act and the rules and regulations adopted thereunder, and for failure to comply with the disclosure requirements of Regulation 14 adopted pursuant to section 14 (a) of the act.

On August 1, 1958, the Commission issued its order summarily suspending trading of said securities on the exchange pursuant to section 19 (a) (4) of the act for the reasons set forth in said order to prevent fraudulent, deceptive or manipulative acts or practices for a period of ten days from the date of the aforesaid order.

III. The Commission being of the opinion that the public interest requires the summary suspension of trading in such security on the American Stock Exchange and that such action is necessary and appropriate for the protection of investors; and

The Commission being of the opinion that such suspension is necessary in order to prevent fraudulent, deceptive, or manipulative acts or practices, with the result that it will be unlawful under section 15 (c) (2) of the Securities Exchange Act of 1934 and the Commission's Rule X–15C2–2 thereunder for any broker or dealer to make use of the mails or of any means or instrumentality of interstate commerce to effect any transaction in, or to induce or attempt to induce the purchase or sale of, such security otherwise than on a national securities exchange;

It is ordered, Pursuant to section 19 (a) (4) of the Securities Exchange Act of 1934, that trading in said securities on the American Stock Exchange be summarily suspended in order to prevent fraudulent, deceptive, or manipulative acts or practices for a period of ten (10) days, August 14 to August 23, 1958, inclusive.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 812–1170]

GAS INDUSTRIES FUND, INC.

NOTICE OF FILING OF APPLICATION FOR EXEMPTION OF PURCHASE OF SECURITIES DURING EXISTENCE OF UNDERWRITING SYNDICATE

AUGUST 13, 1958.

Notice is hereby given that Gas Industries Fund, Inc. ("Gas Industries"), registered under the Investment Company Act of 1940 ("act") as an open-end diversified management investment company, has filed an application, pursuant to section 10 (f) of the act for an order exempting from the provisions thereof the proposed purchase by Gas Industries of not to exceed 2,000 Units of securities of The Houston Corporation each Unit consisting of $100 principal amount of Subordinated Debentures, due August 1, 1968, of The Houston Corporation and five shares of common stock of The Houston Corporation or an aggregate of not to exceed $200,000 principal amount of such Subordinated Debentures and 10,000 shares of such common stock.

The Houston Corporation has filed a registration statement pursuant to the provisions of the Securities Act of 1933 with respect to the public offering of $36,188,000 of its Subordinated Debentures and 1,809,400 shares of its common stock. The offering is expected to be underwritten by a group which will include The First Boston Corporation and Kidder, Peabody & Co. James H. Orr, a director of Gas Industries, is also a director of The First Boston Corporation; Jean B. Webster, a limited partner of Gas Industries' investment adviser, is also a limited partner of Kidder, Peabody & Co.

Gas Industries states that the proposed purchase has been recommended by its investment adviser, Colonial Management Associates, has been authorized by its directors, and is consistent with its investment policy. The purchase is to be made from the underwriters or members of the selling group other than The First Boston Corporation or Kidder, Peabody & Co. If Gas Industries were to purchase the maximum amount of securities proposed, such acquisition would represent 0.6 percent of the total offering, and, assuming a price of $150 a Unit, the purchase would represent an investment of $300,000 or approximately 0.5 percent of the total assets of Gas Industries at June 30, 1958.

Section 10 (f) of the act provides, among other things, that no registered investment company shall knowingly purchase or otherwise acquire, during the existence of any underwriting or selling syndicate, any security (except a security of which such a company is the issuer) a principal underwriter of which is a person of which a director or investment adviser of such registered investment company is an affiliated person, unless the Commission by order grants an exemption therefrom as consistent with the protection of investors. Since Orr and Webster are affiliated persons of investment banking firms which may be part of the group underwriting the securities offering referred to above, the purchase of securities of The Houston Corporation by Gas Industries is subject to the provisions of section 10 (f) of the act.

Notice is further given that any interested person may, not later than August 22, 1958, at 3:30 p. m. submit to the Commission in writing any facts bearing upon the desirability of a hearing in such matter and may request that a hearing be held, such request stating the nature

OF MICHIGAN

of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing as to such matter. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date such application may be granted as provided in Rule N–5 of the rules and regulations promulgated under the act.

By the Commission.

[File No. 7–1929]

FIRSTAMERICA CORP.

NOTICE OF APPLICATION FOR UNLISTED TRADING PRIVILEGES, AND OF OPPORTUNITY FOR HEARING

AUGUST 13, 1958.

In the matter of application by the Midwest Stock Exchange for unlisted trading privileges in Firstamerica Corporation, Capital Stock, File No. 7–1929.

The above named stock exchange, pursuant to section 12 (f) (2) of the Securities Exchange Act of 1934 and Rule X–12F–1 promulgated thereunder, has made application for unlisted trading privileges in the specified security, which is listed and registered on the New York and Pacific Coast Stock Exchanges.

Upon receipt of a request, on or before August 29, 1958 from any interested person, the Commission will determine whether to set the matter down for hearing. Such request should state briefly the nature of the interest of the person making the request and the position he proposes to take at the hearing. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington 25, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application and other information contained in the official file of the Commission pertaining to the matter.

By the Commission.

SMALL BUSINESS ADMINISTRATION

[Delegation of Authority 30–IV–5 (Revision 3)]

BRANCH MANAGER, BALTIMORE OFFICE

DELEGATION OF AUTHORITY RELATING TO FINANCIAL ASSISTANCE, PROCUREMENT AND TECHNICAL ASSISTANCE AND ADMINISTRATIVE FUNCTIONS

I. Pursuant to the authority delegated to the Regional Director by Delegation No. 30 (Revision 4) as amended (22 F. R. 5811, 8197, 23 F. R. 557, 1768), there is hereby delegated to the Branch Manager, Baltimore Branch Office, Small Business Administration, the authority:

A. *Specific—Financial assistance.* To take the following actions in accordance with the limitations of such delegations set forth in SBA–500, Financial Assistance Manual:

1. To approve but not decline the following types of loans:

(a) Direct Business Loans in an amount not exceeding $20,000; and

(b) Participation Business Loans in an amount not exceeding $100,000.

2. To approve or decline Disaster Loans not exceeding $50,000.00.

3. To approve or decline Limited Loan Participation Loans.

4. To enter into Disaster Participation Agreements with Banks.

Procurement and technical assistance. To take the following actions in accordance with the limitations of such delegations as set forth in SBA–400, Agency Policy Manual, and SBA–600, Procurement and Technical Assistance Manual:

5. To develop with Government procurement agencies required local procedures for implementing established inter-agency policy agreements, including but not limited to steps such as determining set-asides and representation at procurement centers.

Administrative. 6. To administer oaths of office.

7. To approve annual and sick leave for employees under his supervision.

B. *Correspondence.* To sign all non-policy making correspondence, including Congressional correspondence, relating to the functions of the Branch Office.

II. The specific authority in I.A.1, 2, 3, 4, 6, and 7 and I.B may not be redelegated.

III. All authority delegated herein may be exercised by any SBA employee designated as Acting Branch Manager.

IV. All previous authority delegated by the Regional Director to the Branch Manager, Baltimore, Maryland, is hereby rescinded without prejudice to actions taken under all such delegations of authority prior to the date hereof.

Dated: August 5, 1958.

CLARENCE P. MOORE, *Regional Director.*

VOLUME 23 NUMBER 163

Washington, Wednesday, August 20, 1958

TITLE 3—THE PRESIDENT

PROCLAMATION 3254

ENLARGING THE FORT PULASKI NATIONAL MONUMENT, GEORGIA

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS the Fort Pulaski National Monument on Cockspur Island at the mouth of the Savannah River, Georgia, was established by Proclamation No. 1713 of October 15, 1924, upon the site of the old fortifications on that island, and, as enlarged by the act of June 26, 1936, 49 Stat. 1979, includes certain adjacent areas on the island formerly under the jurisdiction of the Secretary of War; and

WHEREAS the Cockspur Island Lighthouse Reservation, situated on a small island near the southeasterly shore of Cockspur Island, contains an old abandoned lighthouse which is contemporary with Fort Pulaski and should be preserved because of its historic interest; and

WHEREAS such reservation has been declared excess to the needs of the Department of the Treasury, and has been reported to the General Services Administration for disposition; and

WHEREAS the General Services Administration is agreeable to the transfer of such reservation to the Department of the Interior for inclusion in the Fort Pulaski National Monument; and

WHEREAS a small Federally owned island, known as Daymark Island, containing approximately 1.5 acres of land at high tide, situated close to the northeastern shore of Cockspur Island and gradually becoming an accretion thereto, is required for the proper care, protection, and management of the objects of historic interest situated within the area of the Fort Pulaski National Monument; and

WHEREAS it appears that it would be in the public interest to reserve the Cockspur Island Lighthouse Reservation and Daymark Island, as hereinafter described, as parts of the Fort Pulaski National Monument:

NOW, THEREFORE, I, DWIGHT D. EISENHOWER, President of the United States of America, by virtue of the authority vested in me by section 2 of the act of June 8, 1906, 34 Stat. 225 (16 U. S. C. 431), do proclaim that, subject to valid existing rights, the following-described lands are hereby added to, and reserved as parts of, the Fort Pulaski National Monument, and shall be subject to all laws, rules, and regulations applicable to that monument:

(1) That certain tract of land, about 1 acre in area, known as the Cockspur Island Lighthouse Reservation, situate near the south end of Cockspur Island at Latitude 32°01′ N., and Longitude 80°53′ W., and

(2) That certain tract of land, about 1.5 acres in area, known as Daymark Island and depicted on U. S. Coast and Geodetic Survey Chart C. & G. S. 440, Savannah River-Wassaw Sound, Revised 12/23/57, being an undesignated island in shoal water at Latitude 32°02′ N., and Longitude 80°53′ W. on the right bank of the Savannah River.

This proclamation shall become effective upon the effective date of the transfer of the Cockspur Island Lighthouse Reservation, as described herein, to the Department of the Interior.

Warning is hereby expressly given to all unauthorized persons not to appropriate, injure, destroy, or remove any feature of these lands and not to locate or settle upon any part thereof.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this fourteenth day of August in the year of our Lord nineteen hundred [SEAL] and fifty-eight, and of the Independence of the United States of America the one hundred and eighty-third.

DWIGHT D. EISENHOWER

PROCLAMATION 3255

RESTORATION OF TRADE AGREEMENT CONCESSION AND REDUCED RATE OF DUTY WITH RESPECT TO HATTERS' FUR—TERMINATION OF PROCLAMATION NO. 2960 [1]

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

1. WHEREAS, pursuant to the authority vested in him by the Constitution and the statutes, including section 350 (a) of the Tariff Act of 1930, as amended (19 U. S. C. 1351), the President, on October 30, 1947, entered into a trade agreement with certain foreign countries, which consists of the General Agreement on Tariffs and Trade and the related Protocol of Provisional Application thereof, together with the Final Act Adopted at the Conclusion of the Second Session of the Preparatory Committee of the United Nations Conference on Trade and Employment (61 Stat. (Parts 5 and 6) A 7, A 11, and A 2050), and by Proclamation No. 2761A of December 16, 1947 (3 CFR, 1943–1958 Comp., p. 139), proclaimed such modifications of existing duties and other import restrictions of the United States and such continuance of existing customs or excise treatment of articles imported into the United States as were then found to be required or appropriate to carry out such trade agreement on and after January 1, 1948;

2. WHEREAS item 1520 in Part I of Schedule XX (Geneva-1947) of the General Agreement on Tariffs and Trade read as follows:

Tariff Act of 1930, par. par.	Description of product	Rate of duty
1520	Hatters' furs, or furs not on the skin, prepared for hatters' use, including fur skins carroted.	15% ad val.

3. WHEREAS, after investigation and report to the President by the United States Tariff Commission pursuant to section 7 of the Trade Agreements Extension Act of 1951 (19 U. S. C. 1364), the President by Proclamation No. 2960 of January 5, 1952 (3 CFR, 1952 Supp., p. 18), invoked Article XIX of the General Agreement and modified the tariff concession therein with respect to the products described in the said item 1520 by substituting for the rate "15% ad val." the rate "47½¢ per lb., but not less than 15% nor more than 35% ad val.", effective February 9, 1952;

4. WHEREAS, pursuant to Proclamation No. 2960, since February 9, 1952, the products described in item 1520 have been subject to the rate of duty of 47½ cents per pound, but not less than 15 per cent nor more than 35 per cent ad valorem; and

5. WHEREAS, after investigation, including a hearing, pursuant to paragraph 2 of Executive Order No. 10401 of October 14, 1952 (3 CFR, 1952 Supp., p. 105), the United States Tariff Commission has reported to me its finding that the modification of the concession as set forth in the third recital of this proclamation by Proclamation No. 2960 no longer remains necessary in order to prevent or remedy serious injury or the threat thereof to the domestic industry producing products like or directly competitive with the products described in item 1520 and has recommended that the original concession, as set forth in the second recital of this proclamation, be restored in full:

NOW, THEREFORE, I, DWIGHT D. EISENHOWER, President of the United States of America, acting under the authority vested in me by section 350 of the Tariff Act of 1930, as amended, and in accordance with the provisions of section 7 of the Trade Agreements Extension Act of 1951, as amended, and of Article XIX of the General Agreement on Tariffs and Trade, do hereby terminate the said Proclamation No. 2960, effective at the close of business September 13, 1958, to the end that item 1520 as originally set forth in Part I of Schedule XX (Geneva-1947) of the General Agreement on Tariffs and Trade shall thereafter be applied in accordance with the provisions of the said Proclamation No. 2761A of December 16, 1947.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this fourteenth day of August in the year of our Lord nineteen hundred and fifty-eight, and of the Independence of the United States of America the one hundred and eighty-third.

LIMITATION OF HANDLING

Findings. 1. Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons as hereinafter provided will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication hereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended, is insufficient, and this amendment relieves restriction on the handling of lemons grown in California and Arizona.

Order, as amended. The provisions in paragraph (b) (1) (ii) of § 953.858 (Lemon Regulation 751, 23 F. R. 6101, 6317) are hereby amended to read as follows:

(ii) District 2: 441,750 cartons.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: August 15, 1958.

PART 958—IRISH POTATOES GROWN IN COLORADO

APPROVAL OF EXPENSES AND RATE OF ASSESSMENT

Notice of rule making regarding proposed expenses and rate of assessment, to be made effective under Marketing Agreement No. 97 and Order No. 58 (7 CFR Part 958), regulating the handling of Irish potatoes grown in the State of Colorado, was published in the FEDERAL REGISTER July 26, 1958 (23 F. R. 5672). This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.). After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, which proposals were adopted and submitted for approval by the area committee for Area No. 3 established pursuant to said marketing agreement and order, it is hereby found and determined that:

§ 958.228 *Expenses and rate of assessment.* (a) The reasonable expenses that are likely to be incurred by the area committee for Area No. 3 established pursuant to Marketing Agreement No. 97 and Order No. 58 (§§ 958.1 to 958.88), to enable such committee to perform its functions pursuant to the provisions of aforesaid marketing agreement and order, during the fiscal period ending May 31, 1959, will amount to $2,375.00.

(b) The rate of assessment to be paid by each handler, pursuant to Marketing Agreement No. 97 and Order No. 58, shall be $0.00095 per hundredweight of potatoes handled by him as the first handler thereof during said fiscal period.

(c) The terms used in this section shall have the same meaning as when used in Marketing Agreement No. 97 and Order No. 58.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: August 15, 1958, to become effective 30 days after publication in the FEDERAL REGISTER.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 58-6705; Filed, Aug 19, 1958; 8:54 a. m.]

PART 989—RAISINS PRODUCED FROM RAISIN VARIETY GRAPES GROWN IN CALIFORNIA

MODIFICATION OF MINIMUM GRADE AND CONDITION STANDARDS FOR NATURAL CONDITION LAYER MUSCAT RAISINS AND MINIMUM GRADE STANDARDS FOR PACKED LAYER MUSCAT RAISINS

Pursuant to Marketing Agreement No. 109, as amended, and Order No. 89, as amended (7 CFR Part 989), regulating the handling of raisins produced from raisin variety grapes grown in California, hereinafter referred to as the "order," effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of information supplied by the Raisin Administrative Committee, and other available information, it is hereby found that to modify the minimum grade and condition standards for natural condition raisins and the minimum grade standards for packed raisins as hereinafter provided will tend to effectuate the declared policy of the aforesaid act.

The requirements pertaining to the maximum permissible moisture content of 18 percent for natural condition Layer Muscat raisins and of 23 percent for packed Layer Muscat raisins, as prescribed in the aforesaid order, were eliminated for most of the 1955–56 crop year and for the 1956–57 and 1957–58 crop years because available data indicated that such requirements would unnecessarily restrict the marketing of such raisins. Inconclusive results have been obtained from a study of Layer Muscat moisture problems, and further study is necessary to determine whether or not there are appropriate moisture requirements which should be established for these raisins. In these circumstances, the relaxation of the moisture requirements for natural condition and packed Layer Muscat raisins should be continued in accordance with the unanimous recommendation of the Raisin Administrative Committee.

Therefore, it is hereby ordered, That, effective September 1, 1958:

1. Section 989.97B3 is, pursuant to the authority contained in § 989.58 (b) of the order, hereby modified so as to change the parenthetical phrase therein reading "(except Layer Muscats shall not exceed 18 percent)" to read "(except that there shall be no maximum permissible percentage for moisture content of Layer Muscats)" and by changing paragraph (d) of said section to read as follows:

(d) Of such quality and condition that, when processed in accordance with good commercial practice, will, except with respect to moisture content, meet "U. S. Grade B" or better grade as defined in the effective United States Standards for Grades of Processed Raisins.

2. The requirement set forth in § 989.59 (a) (2) (iii) that Layer Muscat raisins in packed form at least meet the minimum grade standards prescribed in "U. S. Grade B" as contained in effective United States Standards for Grades of Processed Raisins is, pursuant to the authority contained in § 989.59 (b) of the order, modified, insofar as operation under the order is concerned, to eliminate therefrom the moisture content restriction set forth in § 52.1847a (b) of this title.

It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in public rule making procedure, and that good cause exists for not postponing the effective date of this modification later than September 1, 1958 (5 U. S. C. 1001 et seq.), in that: (1) The maximum permissible moisture content restrictions for Layer Muscat raisins, as set forth in the effective standards, would unnecessarily restrict the marketing of such raisins; (2) the current freedom from restrictions as to the maximum permissible moisture content for Layer Muscat raisins will continue in effect only until September 1, 1958 (22 F. R. 6409), and it is necessary that such freedom from restrictions be continued beyond that date so that normal marketing of such raisins may proceed without change; and (3) handlers require no advance notice for preparation to comply with this modification and it relieves restrictions on the handling of raisins. In these circumstances, this modification should be made effective September 1, 1958.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: August 14, 1958.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

[Civil Air Regs., Amdt. 20-6]

PART 20—PILOT AND INSTRUCTOR CERTIFICATES

ISSUANCE OF U. S. PILOT CERTIFICATES TO HOLDERS OF FOREIGN PILOT CERTIFICATES

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 14th day of August 1958.

Part 20 of the Civil Air Regulations establishes, among other things, the requirements for the issuance of student, private, and commercial pilot certificates. Section 20.112 (a) provides that an applicant for a U. S. pilot certificate who holds a currently effective pilot certificate issued by a foreign government, may receive credit for his flight experience and for those examinations and tests completed in securing his foreign pilot certificate which the Administrator finds to be at least the equivalent of those required in the Civil Air Regulations for the issuance of a comparable United States pilot certificate.

The Administrator has advised that he has been unable to establish practical procedures for the recognition of the written and flight tests of those countries for which credit has been requested under § 20.112 (a). As a result of the difficulties already experienced with this section, the Administrator foresees that an evaluation of the various tests of the many countries for which requests can reasonably be expected would be an administrative impracticability. An example of the difficulties connected with administering this section is the fact that the pilot requirements in most countries are subject to change so that the Administrator would be required to make continued evaluations. In addition, the Administrator would have to determine that each applicant had in fact taken such a test and passed it.

Inasmuch as § 20.112 (a) imposes an undue administrative burden on the Administrator and its deletion would not adversely affect safety, the Board is of the opinion that this section should be rescinded. It should be noted, however, that any person may qualify for a U. S. pilot certificate under normal certification procedures.

In addition to the foregoing, § 20.112 (b) of Part 20 of the Civil Air Regulations provides that a pilot certificate for a specific purpose may be issued for not more than 90 days to a citizen of a foreign country who holds a currently effective pilot certificate issued by his government, upon submitting to the Administrator reliable evidence of his aeronautical experience and by passing an examination on the air traffic rules contained in Part 60 of the Civil Air Regulations. The Administrator's experience with the operation of this provision indicates that holders of certificates thereunder have not caused any difficulty and that such limited certificates have served a useful purpose. However, where the maximum period for which the Administrator may issue such a certificate does not meet the applicant's needs, the latter must requalify at least every 90 days. Thus, the qualifying procedures must be repeated, although not necessarily dictated by safety factors. It is the Board's view that, inasmuch as the 90-day limitation, in such instances, is burdensome on the CAA and since the CAA's experience in the administration of this section indicates that an extension of the maximum duration to 12 months would not adversely affect safety, § 20.112 (b) should be so amended.

Interested persons have been afforded an opportunity to participate in the making of this amendment (23 F. R. 1764), and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 20 of the Civil Air Regulations (14 CFR Part 20, as amended) effective September 18, 1958.

By amending § 20.112 by deleting paragraph (a) and by amending the last sentence of paragraph (b) by deleting the phrase "90 days" and inserting in lieu thereof the phrase "12 months".

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interprets or applies sections 601, 602, and 610, 52 Stat. 1007, 1008, 1012; 49 U. S. C. 551, 552, 560)

Effective: September 18, 1958.

Adopted: August 14, 1958.

By the Civil Aeronautics Board.

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 7082]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

JOSEPH BROWN WOOL CO., ET AL.

Subpart—*Invoicing products falsely:* § 13.1108 *Invoicing products falsely:* Wool Products Labeling Act. Subpart—*Misbranding or mislabeling:* § 13.1190 *Composition:* Wool Products Labeling Act. Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 13.1852 *Formal regulatory and statutory requirements:* Wool Products Labeling Act.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, secs. 2-6, 54 Stat. 1128-1130; 15 U. S. C. 45, 68-68 (c)) [Cease and desist order, Joseph A. Brown trading as Joseph Brown Wool Company, etc., Woonsocket, R. I., and Samuel Pearlman and Yale Goldberg trading as Yale Wool Waste Company, Boston, Mass., Docket 7082, July 2, 1958]

In the matter of Joseph A. Brown, an Individual Trading as the Joseph Brown Wool Company and the Joseph A. Brown Company, and Samuel Pearlman and Yale Goldberg, Individually and as Partners Trading as the Yale Wool Waste Company.

This proceeding was heard by a hearing examiner on the complaint of the Commission charging sellers in Woonsocket, R. I., with violating the Wool Products Labeling Act by labeling as "cashmere 70 percent wool 30 percent" and invoicing as "70 percent cashmere waste 30 percent wool" bales of stock which contained only reprocessed cashmere and reprocessed cashmere waste, respectively, and with failing in other respects to comply with the labeling requirements of the act.

Following acceptance of an agreement containing consent order, the hearing examiner made his initial decision and order to cease and desist which became on July 2 the decision of the Commission.

The order to cease and desist is as follows:

It is ordered, That the respondent, Joseph, A. Brown, individually, and doing business as the Joseph Brown Wool Company, and the Joseph A. Brown Company, or under any other name, and Samuel Pearlman and Yale Goldberg, individually, and as partners doing business as the Yale Wool Waste Company, or under any other name, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction or manufacture for introduction into commerce, or the offering for sale, sale, transportation or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act, and the Wool Products Labeling Act of 1939, of wool products, do forthwith cease and desist from misbranding such products by:

1. Falsely or deceptively stamping, tagging, labeling or otherwise identifying such products as to the character or amount of the constituent fibers contained therein;

2. Failing to securely affix to or place on each such product a stamp, tag, label or other means of identification showing in a clear and conspicuous manner:

(a) The percentage of the total fiber weight of such wool product, exclusive of ornamentation not exceeding five percentum of said total fiber weight, of (1) wool, (2) reprocessed wool, (3) reused wool, (4) each fiber other than wool where said percentage by weight of such fiber is five percentum or more, and (5) the aggregate of all other fibers;

(b) The maximum percentage of the total weight of such wool products, of any nonfibrous loading, filling, or adulterating matter;

(c) The name or the registered identification number of the manufacturer of such wool product or of one or more persons engaged in introducing such wool product into commerce, or in the offering for sale, sale, transportation, distribution or delivery for shipment thereof in commerce, as "commerce" is defined in the Wool Products Labeling Act of 1939.

It is further ordered, That respondent, Joseph A. Brown, individually, and doing business as the Joseph Brown Wool Company, and the Joseph A. Brown Company, or under any other name, and Samuel Pearlman and Yale Goldberg, individually, and as partners doing business as the Yale Wool Waste Company, or under any other name, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the sale of wool products, or any other textile fabrics in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from misrepresenting on invoices, or through other means, the character of the constituent fibers of said wool products, or other textile products.

By "Decision of the Commission", etc., report of compliance was required as follows:

It is ordered, That the respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: July 2, 1958.

By the Commission.

[SEAL] ROBERT M. PARRISH,
Secretary.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 8, 65 Stat. 179; 15 U. S. C. 45, 69f) [Cease and desist order, E. L. Brownhill, Inc. (Greensboro, N. C.), et al., Docket 7055, June 27, 1958]

In the Matter of E. L. Brownhill, Inc., a Corporation and Lewis Rosenberg, Individually and as an Officer of Said Corporation

This proceeding was heard by a hearing examiner on the complaint of the Commission charging a furrier in Greensboro, N. C., with violating the Fur Products Labeling Act by affixing to fur products labels carrying fictitious prices and misrepresenting regular prices; by misuse of the term "blended" in labeling, invoicing, and advertising; by advertising which failed to disclose the names of animals producing the fur in certain products or that certain furs were artificially colored, used the name of one animal to describe the fur of another, and represented prices as reduced from regular prices which were in fact fictitious, or as "below wholesale cost", or misrepresented percentage savings; and by failing to maintain adequate records disclosing the facts on which such pricing claims were based.

Following acceptance of an agreement containing consent order, the hearing examiner made his initial decision and order to cease and desist which became on June 27 the decision of the Commission.

The order to cease and desist is as follows:

It is ordered, That respondent E. L. Brownhill, Inc., a corporation, and its officers, and respondent's agents, representatives and employees, directly or through any corporate or other device, in connection with the introduction into commerce, or the sale; advertising, offering for sale, transportation or distribution of fur products, in commerce, or in connection with the sale, advertising, offering for sale, transportation or distribution of fur products which have been made in whole or in part of fur which has been shipped and received in commerce, as "commerce", "fur" and "fur product" are defined in the Fur Products Labeling Act, do forthwith cease and desist from:

A. Misbranding fur products by:

1. Representing on labels attached to fur products, or in any other manner, that certain amounts are the regular and usual prices of fur products when such amounts are in excess of the prices at which such products are usually and customarily sold by respondent in the recent regular course of its business.

2. Failing to affix labels to fur products showing:

(a) The name or names of the animal or animals producing the fur or furs contained in the fur product as set forth in the Fur Products Name Guide and as prescribed by the rules and regulations.

(b) That the fur product contains or is composed of used fur, when such is the fact.

(c) That the fur product contains or is composed of bleached, dyed, or otherwise artificially colored fur, when such is the fact.

(d) That the fur product is composed in whole or in substantial part of paws, tails, bellies, or waste fur, when such is the fact.

(e) The name, or other identification issued and registered by the Commission, of one or more persons who manufactured such fur product for introduction into commerce, introduced it into commerce, sold it in commerce, advertised or offered it for sale in commerce, or transported it in commerce.

(f) The name of the country of origin of any imported furs used in the fur product.

3. Setting forth on labels affixed to fur products the term "blended" as part of the information required under section 4 (2) of the Fur Products Labeling Act and the rules and regulations thereunder to describe the pointing, bleaching, dyeing, or tip-dyeing of furs.

B. Falsely or deceptively invoicing fur products by:

1. Failing to furnish invoices to purchasers of fur products showing:

(a) The name or names of the animal or animals producing the fur or furs contained in the fur product as set forth in the Fur Products Name Guide and as prescribed under the rules and regulations.

(b) That the fur product contains or is composed of used fur, when such is the fact.

(c) That the fur product contains or is composed of bleached, dyed, or otherwise artificially colored fur, when such is the fact.

(d) That the fur product is composed in whole or in substantial part of paws, tails, bellies, or waste fur, when such is the fact.

(e) The name and address of the person issuing such invoice.

(f) The name of the country of origin of any imported furs contained in the fur product.

2. Setting forth on invoices pertaining to fur products the term "Blended" as part of the information required under section 5 (b) of the Fur Products Labeling Act and the rules and regulations thereunder to describe the pointing, bleaching, dyeing or tip-dyeing of furs.

C. Falsely or deceptively advertising fur products through the use of any advertisement, representation, public announcement, or notice which is intended to aid, promote or assist, directly or indirectly, in the sale, or offering for sale of fur products which:

1. Fails to disclose:

(a) The name or names of the animal or animals producing the fur or furs contained in the fur product as set forth in the Fur Products Name Guide and as prescribed under the rules and regulations.

(b) That the fur products contain or are composed of bleached, dyed or otherwise artificially colored fur, when such is the fact.

2. Contains the name of an animal or animals other than the name or names of the animal or animals that produced the fur.

3. Contains the term "blended" as part of the information required under section 5 (a) of the Fur Products Labeling Act and the rules and regulations thereunder to describe the pointing, bleaching, dyeing or tip-dyeing of furs.

4. Represents directly or by implication that respondent's regular price of any fur product is any amount which is in excess of the price at which respondent has regularly or customarily sold such products in the recent regular course of its business.

5. Represents directly or by implication that the prices of fur products are "below wholesale cost", or words of similar import, when such is not the fact.

6. Represents directly or by implication through percentage savings claims that the regular or usual retail prices charged by respondent for fur products in the recent regular course of its business were reduced in direct proportion to the amount of savings stated, when contrary to the fact.

D. Makes claims and representations in advertisements respecting comparative prices, percentage savings claims or claims that prices are below wholesale cost or claims that prices are reduced from regular or usual prices, unless there are maintained by respondent full and adequate records disclosing the facts upon which such claims and representations are based.

It is further ordered, That the complaint be, and it hereby is, dismissed as to respondent Lewis Rosenberg, deceased.

By "Decision of the Commission", etc., report of compliance was required as follows:

It is ordered, That the respondent E. L. Brownhill, Inc., a corporation, shall within sixty (60) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist.

Issued: June 27, 1958.

By the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary.*

PART 13—DIGEST OF CEASE AND DESIST ORDERS

PRESENT TRADING CORPORATION ET AL.

Subpart—*Furnishing means and instrumentalities of misrepresentation or deception:* § 13.1056 *Preticketing merchandise misleadingly.* Subpart—*Misbranding or mislabeling:* §13.1280 *Price.* Subpart—*Misrepresenting oneself and goods*—Prices: § 13.1811 *Fictitious preticketing.*

(Sec. 6, 38 Stat. 721. 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Present Trading Corporation et al., New York, N. Y., Docket 7073, June 27, 1958]

In the Matter of Present Trading Corporation, a Corporation, and Ignatz Present, and David Mermelstein, Individually and as Officers of Said Corporation

This proceeding was heard by a hearing examiner on the complaint of the Commission charging a concern in New York City, engaged in distributing imported stainless steel table flatware to retail stores, house-to-house installment companies, and houseware jobbers for resale to the public, with misrepresenting regular retail prices by placing fictitious and exaggerated prices on packages of such products and on empty boxes and carbons which it sold to its customers for said flatware sets.

Following acceptance of an agreement containing consent order, the hearing examiner made his initial decision and order to cease and desist which became on June 27 the decision of the Commission.

The order to cease and desist is as follows:

It is ordered, That respondents Present Trading Corporation, a corporation, and its officers, and Ignatz Present and David Mermelstein, individually and as officers of said corporation, and respondents' agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution of stainless steel table flatware, or any other merchandise, in commerce, as "commerce" is defined in the Federal

Trade Commission Act, do forthwith cease and desist from:

1. Setting forth prices on the boxes or cartons in which their merchandise is packed for sale, or on boxes or cartons furnished in connection with their said merchandise, which are in excess of the prices at which said merchandise is usually and customarily sold at retail, or representing in any other manner that any price is the usual or regular retail price which is in excess of the price at which said merchandise is usually and customarily sold at retail.

2. Putting any plan in operation whereby retailers or others may misrepresent the usual and customary retail prices of merchandise.

By "Decision of the Commission", etc., report of compliance was required as follows:

It is ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: June 27, 1958.

By the Commission.

[Docket 6988]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

ASSOCIATED MAIL MERCHANDISERS

Subpart—*Advertising falsely or misleadingly:* § 13.15 *Business status, advantages, or connections:* Individual or private business as association or guild; personnel or staff; service; § 13.50 *Dealer or seller assistance;* § 13.60 *Earnings and profits* § 13.105 *Individual's special selection or situation.* Subpart—*Using misleading name*—Vendor: § 13.2395 *Individual or private business as association or guild.*

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Bernard W. Coates doing business as Associated Mail Merchandisers, Dorchester, Mass., Docket 6988, June 28, 1958]

In the Matter of Bernard W. Coates, Doing Business as Associated Mail Merchandisers

This proceeding was heard by a hearing examiner on the complaint of the Commission charging an individual in Dorchester, Mass., engaged in the sale and distribution of merchandise and supplies for use in a mail order business, with representing falsely through the use of various trade names and advertising material mailed to prospective purchasers that they offered limited and exclusive membership in a cooperative association operated for the profit of its members, that members were carefully selected and were assisted in the operation of their mail order enterprises by a large and experienced staff, that merchandise available for mail order sale by them had been selected after extensive research and trial tested for salability, and that members would earn large incomes.

Following acceptance of an agreement providing for entry of a consent order, the hearing examiner made his initial decision and order to cease and desist which became on June 28 the decision of the Commission.

The order to cease and desist is as follows:

It is ordered, That respondent Bernard W. Coates, an individual formerly trading as Associated Mail Merchandisers, now trading as National Mail Merchandisers, or under any other name, and respondent's agents, representatives and employees, directly or through any corporate or other device, in the offering for sale, sale or distribution of various articles of merchandise and various kinds of catalogs, order blanks, and other supplies and equipment used in the operation of a mail order merchandising business, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

A. Representing, directly or indirectly that:

1. Purchasers of respondent's aforesaid products are offered, sold or provided with a membership or other kind of association in or with a cooperative or mutually beneficial mail order buying and selling association or group operated in whole or in part for the profit or gain of its members or in any other kind of association or group.

2. Purchasers of respondent's aforesaid products are offered, sold or provided with a limited or exclusive membership or association in or with a cooperative or mutually beneficial mail order buying and selling association or group operated in whole or in part for the profit or gain of its members or in any other kind of association or group.

3. Purchasers of respondent's aforesaid products are carefully or otherwise selected to be members or associates of a cooperative or mutually beneficial mail order buying and selling association or group operated in whole or in part for the benefit of its members or of any other kind of association or group.

4. Purchasers of respondent's aforesaid products will be assisted and served in the operation of their respective mail order merchandising enterprises by a staff of persons or ogamizations who are competent, specialized and experienced in the operation of a mail order business and who are employed by respondent or are under his personal direction or control.

5. Merchandise made available for mail order offerings and sales by purchasers of respondent's aforesaid products has been selected on the basis of extensive research and study, has been trial tested for acceptance and salability on the general public or has proved that it will sell and be purchased by members of the buying public, unless such is in fact true.

6. Purchasers of respondent's aforesaid products will receive any amount of profits from the operation of a mail order merchandising business distributing the products offered by the respondent in excess of those which such purchasers may reasonably expect to receive.

B. Using the words "Association" or "Associated" as a part of his trade name or in any other manner representing that his business is other than a private commercial enterprise operated for profit.

By "Decision of the Commission", etc., report of compliance was required as follows:

It is ordered, That the respondent herein shall, with in sixty (60) days after service upon him of this order, file with the Commission a report in writing setting forth in detail the manner and form in which he has complied with the order to cease and desist.

Issued: June 27, 1958.

By the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary.*

TITLE 36—PARKS, FORESTS, AND MEMORIALS

Chapter III—Corps of Engineers, Department of the Army

PART 311—RULES AND REGULATIONS GOVERNING PUBLIC USE OF CERTAIN RESERVOIR AREAS

TABLE ROCK RESERVOIR AREA, WHITE RIVER, MISSOURI AND ARKANSAS

The Secretary of the Army having determined that the use of the Table Rock Reservoir Area, White River, Missouri and Arkansas, by the general public for boating, swimming, bathing, fishing and other recreational purposes will not be contrary to the public interest and will not be inconsistent with the operation and maintenance of the reservoir for its primary purposes, hereby prescribes rules and regulations for its public use, pursuant to the provisions of section 209 of the Flood Control Act of 1954 (68 Stat. 1266) as follows:

1. Add new paragraph (ooo) to § 311.1:

§ 311.1 *Areas covered.* • • •

(ooo) Table Rock Reservoir Area, White River, Missouri and Arkansas.

2. Add new subparagraph (17) to § 311.6 (b):

§ 311.6 *Hunting and fishing.* • • •

(b) • • •

(17) Table Rock Reservoir Area, White River, Missouri and Arkansas.

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

PART 43—DISCONTINUANCE OR CHANGE OF OPERATION OR SERVICE

At a general session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 14th day of August A. D. 1958.

There being under consideration the matter of rules and regulations with respect to the proposed discontinuance or change of the operation or service of any train or ferry pursuant to the provisions of section 13a of the Interstate Commerce Act, as amended, by carriers subject to part I of said act; and it appearing that, as the provisions of said section 13a became effective immediately upon approval by the President of the Transportation Act of 1958, and there is an immediate and urgent need for rules and regulations in respect of the matters which are the subject hereof, notice of proposed rule making and public procedure thereon are impracticable and would be contrary to the public interest:

It is ordered, That the following rules and regulations governing notices and petitions filed pursuant to the provisions of said section 13a be, and they are hereby, approved and prescribed, and that on and after August 29, 1958, carriers filing notices and petitions under the said provisions observe and comply with these rules and regulations:

Sec.
43.1 Scope of rules in this part.
43.2 Definitions.
43.3 Form and style of notice.
43.4 Contents of notice.
43.5 Information required with notice.
43.6 Petition.
43.7 Execution.
43.8 Filing; copies.

AUTHORITY: §§ 43.1 to 43.8 issued under sec. 12, 24 Stat. 383, as amended, Pub. Law 85–625; 49 U. S. C. 12.

§ 43.1 *Scope of rules in this part.* The rules in this part govern the procedure to be followed by carriers subject to part I of the Interstate Commerce Act which, under and pursuant to the provisions of section 13a of said act, file with the Commission a notice under paragraph (1) of said section or a petition under paragraph (2) thereof with respect to a proposed discontinuance or change, in whole or in part, of the operation or service of any train or ferry.

§ 43.2 *Definitions.* As used in this part:

(a) The term "act" means the Interstate Commerce Act, as amended.

(b) The term "notice" means a notice as provided for in paragraph (1) of seetion 13a.

(c) The term "petition" means a petition filed with the Commission under the provisions of paragraph (2) of section 13a for authority to effect a discontinuance or change.

§ 43.3 *Form and style of notice.* The notice shall be printed on paper not less than 8½ x 11 inches, with the words "Notice of proposed change (or discontinuance, if appropriate) of service" printed in large bold-face type near the top. The remaining contents of the notice shall be printed in not less than 12 point type.

§ 43.4 *Contents of notice.* A separate notice shall be given in respect of each train or ferry concerning which a discontinuance or change of operation or service is proposed. The notice shall set forth the following information:

(a) Exact corporate name and general office address of the carrier.

(b) The number and name or other description of the train or ferry with respect to which a discontinuance or change of operation or service is proposed, the name of each station, depot, or facility affected thereby, and the termini between which the train or ferry operates.

(c) The date on which the discontinuance or change of operation or service is proposed to become effective.

(d) Advice to the public that persons desiring to object to the proposed discontinuance or change should promptly notify the Interstate Commerce Commission, at Washington, D. C., of such objection and the reasons therefor.

§ 43.5 *Information required with notice.* With each notice of a proposed discontinuance or change of operation or service, there shall be filed with the Commission a "Statement in Relation to Proposed Discontinuance or Change of Train or Ferry Service" which, in the body thereof or in exhibits attached thereto and referred to therein, shall contain the following:

(a) Exact corporate name and general office address of the carrier proposing the discontinuance or change.

(b) Name, title, and post office address of counsel or officer to whom correspondence in regard to the notice should be addressed.

(c) Complete description of the present service of the train or ferry involved and of the discontinuance or change of operation or service proposed.

(d) Complete statement of the reasons for the proposed discontinuance or change of operation or service.

(e) The names of all railroads interchanging passengers or freight with the subject train or ferry, and the points of such interchange.

(f) Description of other common carrier service, if any, between or at the points described in the notice, and other common carrier service available in the immediate territory.

(g) The kind and amount (passenger and ton miles) of traffic transported on the train or ferry involved for each of the last 2 calendar years and for the part of the current year for which such information is available. If the proposed discontinuance or change involves less than all of the stations served by the train or ferry, segregation should be made of the traffic transported to and from the stations which will be affected.

(h) Financial results of operating the train or ferry involved for each of the last 2 calendar years and for the part of the current year for which such information is available, supported by basic data and a full explanation as to the methods used in computing such results.

(i) A certificate that a copy of the notice has been mailed to the Governor of each State in which the subject train or ferry is operated and has been posted in a conspicuous place in each station, depot, or other facility involved, including each ferry and each passenger car on trains affected, which certificate shall include information of the date or dates on which the notice was mailed and posted as aforesaid.

(j) Map showing the geographic situation of the line over which the train operates, or, if a ferry, the route traversed. The map should show the line or route clearly, by color or otherwise, and the stations thereon, on a sheet not smaller than 8½ x 11 inches. Three copies of the map should be submitted unbound for use of the Commission, in addition to those attached to the statement.

§ 43.6 *Petition.* Petitions for authority to effect a discontinuance or change of the operation or service of a train or ferry shall contain in the body thereof or in exhibits attached thereto and referred to therein, the information required by paragraph (b) of § 43.4, that required by § 43.5 excepting paragraph (i) thereof, and in addition the following:

(a) The date on which the petition or application for discontinuance or change in the operation or service of the train or ferry was filed with the appropriate State authority.

(b) Identification of the State authority with which such petition or application was filed.

(c) Description of the action, if any, taken by such State authority on the petition or application filed with it.

(d) To be filed only with the original of the petition to the Commission, copy of the record made before the State authority, including copies of the application or petition to it, transcript of any oral hearing, and decision and order, if any.

§ 43.7 *Execution.* The original copy of the statement required by § 43.5 and of a petition as described in § 43.6 shall be signed in ink by an executive officer of the carrier having knowledge of the matters and things therein set forth. Persons signing the statement or petition shall also sign a certificate in form as follows:

---------- hereby certifies that he is the
(Name)
---------- of the ----------
(Title)
---------- petitioner
(Corporate name of petitioner)

herein; that he has been authorized by proper corporate action on the part of said petitioner, or by the proper court, to execute and file with the Interstate Commerce Commission the foregoing statement (or petition); that he has carefully examined all of the statements referred to in said statement (or petition) and the exhibits attached thereto and made a part thereof; that he has knowledge of the matters set forth therein; and that all such statements made and matters set forth therein are true and correct to the best of his knowledge, information, and belief.

(Signature)

Dated this ------ day of ----------, 19---

NOTE: A false statement is punishable by law.

§ 43.8 *Filing; copies.* As applicable, 4 copies of the notice and an original and 5 copies of the accompanying statement, or an original and 5 copies of a petition for the use of the Commission shall be filed with the Secretary of the Commission, Washington, D. C. Each copy of the statement or petition shall bear the dates and signatures that appear in the original and shall be complete in itself; but the signatures in the copies may be stamped or typed.

It is further ordered, That the center heading preceding Parts 41–42 of Title 49 of the Code of Federal Regulations be, and it is hereby, changed to read: "Parts 41–43 Public Convenience and Necessity, Railroad Operations."

And it is further ordered, That notice of these regulations be given to the general public by posting copies in the office of the Secretary, Interstate Commerce Commission, Washington, D. C., and by filing with the Director, Federal Register Division, Washington, D. C.

NOTE: The reporting requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary.*

CAST IRON WING NUTS

NOTICE OF PROSPECTIVE CLASSIFICATION

AUGUST 13, 1958.

It appears probable that cast iron wing nuts made of nonmalleable iron are probably classifiable as castings wholly of cast iron, including all castings of iron which have been machined, but not made up into articles, or parts thereof, or finished machine parts, under paragraph 327, Tariff Act of 1930, and dutiable at the rate of 5 per centum ad valorem under that paragraph, as modified, and that cast iron wing nuts made of malleable iron are properly classifiable as nuts, of which metal is the component material of chief value, not specially provided for, not plated with platinum, gold, or silver, and not colored with gold lacquer, under paragraph 397, Tariff Act of 1930, as modified, and dutiable at the rate of 20 per centum ad valorem if having holes or threads over $^{24}/_{100}$ inch in diameter or at the rate of 22½ per centum ad valorem if having holes or threads not over $^{24}/_{100}$ inch in diameter.

Pursuant to § 16.10a (d) of the Customs Regulations, notice is hereby given that the existing uniform practice of classifying such merchandise as nuts of wrought iron or steel under paragraph 330, Tariff Act of 1930, and dutiable at the rate of 0.3 cents per pound under that paragraph, as modified, is under review in the Bureau of Customs.

Consideration will be given to any relevant data, views, or arguments pertaining to the correct classification of this merchandise which are submitted to the Bureau of Customs, Washington 25, D. C., in writing. To assure consideration, such communications must be received in the Bureau not later than 30 days from the date of publication of this notice. No hearings will be held.

[SEAL] RALPH KELLY, *Commissioner of Customs.*

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

IDAHO

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

AUGUST 11, 1958.

The Department of Agriculture has filed an application, Serial No. Idaho 09518, for the withdrawal of the lands

described below, from all forms of appropriation under the General Mining Laws subject to valid existing claims. The applicant desires the land for Ranger Station Sites.

For period of thirty days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

BOISE MERIDIAN, IDAHO

KANIKSU NATIONAL FOREST

Clark Fork Ranger Station

T. 55 N., R. 2 E.
Sec. 1; Lot 3 (NE¼NW¼), exclusive of patented claims in mineral surveys Nos. 2561A, 2561B.

Total area 33.75 acres.

Shiloh Ranger Station

T. 60 N., R. 1 E.,
Sec. 19, Lots 1 and 2.

Total area 79.53 acres.

Priest Lake Ranger Station

T. 61 N., R. 5 W.,
Sec. 14; S½SW¼;
Sec. 15; S½SE¼SE¼;
Sec. 22; NE¼NE¼;
Sec. 23; N½NW¼, N½N½SE¼NW¼, NW¼SW¼NE¼, S½NW¼NE¼.

Total area 260 acres.

The above aggregates a total of 373.28 acres in Bonner and Boundary Counties, Idaho.

J. R. PENNY,
State Supervisor.

[Fairbanks Classification No. 1]

ALASKA

ALASKA PUBLIC SALE ACT

AUGUST 13, 1958.

Pursuant to the authority delegated to me under section 2.5 of Order No. 541 of April 21, 1954, Bureau of Land Management, as amended, the following described land is classified for disposal under the Alaska Public Sale Act of August 30, 1949 (63 Stat. 679; 48 U. S. C. 364a-364e) for commercial, and/or industrial purposes:

TOK JUNCTION AREA

T. 18 N., R. 13 E., C. R. M.,
Sec. 19: Lot 6 and that portion of Lot 2 lying between Lot 6 and the center line of the Alaska Highway.

Containing approximately 4.42 acres.

The above land will be offered for sale in accordance with regulations contained in 43 CFR §§ 75.23 to 75.40. If no bid at the minimum acceptable price or above is made, the land may be held for future offering or the classification may be rescinded.

RICHARD L. QUINTUS,
Operations Supervisor.

Federal Maritime Board

AMERICAN PRESIDENT LINES, LTD., ET AL.

NOTICE OF AGREEMENT FILED FOR APPROVAL

Notice is hereby given that the following described agreement has been filed with the Board for approval pursuant to section 15 of the Shipping Act, 1916 (39 Stat. 733, 46 U. S. C. 814):

Agreement No. 8319, between American President Lines, Ltd., The Oceanic Steamship Company, Matson Navigation Company, and Railway Express Agency, Incorporated, covers an arrangement whereby the ocean carriers agree to transport express shipments for the Railway Express Agency in the trade between Pacific Coast ports and Hawaii at rates specified in the agreement. Agreement No. 8319, upon approval, will supersede and cancel the present agreement (No. 8091) between the same parties.

Interested parties may inspect this agreement and obtain copies thereof at the Regulation Office, Federal Maritime Board, Washington, D. C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to the agreement and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: August 15, 1958.

By order of the Federal Maritime Board.

ATOMIC ENERGY COMMISSION

[Docket No. 50-99]

BABCOCK & WILCOX CO.

NOTICE OF PROPOSED ISSUANCE OF CONSTRUCTION PERMIT AND FACILITY LICENSE

Please take notice that the Atomic Energy Commission proposes to issue to the Babcock & Wilcox Company a construction permit substantially as set forth below unless within fifteen (15) days after the filing of this notice with the Federal Register Division a request for a formal hearing is filed with the Commission as provided by the Commission's rules of practice (10 CFR Part 2). For further details see (1) the application submitted by the Babcock & Wilcox Company and amendments thereto, and (2) a memorandum by the Division of Licensing and Regulation which summarizes the principal factors considered in reviewing the application for license, both on file at the Commission's Public Document Room, 1717 H Street NW., Washington, D. C. A copy of item (2) above may be obtained at the Commission's Public Document Room or upon request addressed to the Atomic Energy Commission, Washington 25, D. C., Attention: Director, Division of Licensing and Regulation.

Notice is also hereby given that if the Commission issues the construction permit, the Commission may without further prior public notice convert the construction permit to a Class 104 license authorizing operation of the reactor by the Babcock & Wilcox Company at the company's facilities at Lynchburg, Virginia, if it is found that the reactor has been constructed in accordance with the specifications contained in the application, and in conformity with the provisions of the act and of the rules and regulations of the Commission, and in the absence of any good cause being shown to the Commission that the granting of such license would not be in accordance with the provisions of the act.

Dated at Germantown, Md., this 13th day of August 1958.

For the Atomic Energy Commission.

H. L. PRICE,
Director, Division of Licensing and Regulation.

PROPOSED CONSTRUCTION PERMIT

By application dated March 27, 1958, and amendments thereto dated April 22, 1958, May 5, 1958, May 26, 1958, June 26, 1958, and July 16, 1958, the Babcock & Wilcox Company requested a Class 104 license defined in § 50.21 of Part 50, "Licensing of Production and Utilization Facilities", Title 10, Chapter I, CFR, authorizing construction and operation of a swimming pool type nuclear reactor (hereinafter referred to as "the reactor") designed to operate at a steady thermal power of 10 kilowatts and at power levels up to 200 kilowatts for short periods. Reference to the application herein will be to the original application as amended.

The Atomic Energy Commission (hereinafter referred to as "the Commission") finds that:

A. The reactor will be a utilization facility as defined in the Commission's regulations contained in Title 10, Chapter I, CFR, Part 50, "Licensing of Production and Utilization Facilities".

B. The reactor will be useful in the conduct of research and development activities of the types specified in section 31 of the Atomic Energy Act of 1954, as amended, (hereinafter referred to as "the act").

C. The Babcock & Wilcox Company is financially qualified to construct and operate the reactor in accordance with the regulations contained in Title 10, Chapter I, CFR.

D. The Babcock & Wilcox Company is technically qualified to design and construct the reactor.

E. The Babcock & Wilcox Company has submitted sufficient information to provide reasonable assurance that the reactor can be constructed at the proposed location without undue risk to the health and safety of the public.

F. The issuance of a construction permit to the Babcock & Wilcox Company will not be inimical to the common defense and security or to the health and safety of the public.

G. The Babcock & Wilcox Company has filed with the Commission as proof of financial protection, pursuant to 10 CFR 140, a showing that it has adequate resources in the form specified to provide the financial protection required.

Pursuant to the act and Title 10, CFR, Chapter I, Part 50, "Licensing of Production and Utilization Facilities", the Commission hereby issues a construction permit to the Babcock & Wilcox Company to construct the reactor in accordance with the specifications contained in the application. This permit shall be deemed to contain and be subject to the conditions specified in §§ 50.54 and 50.55 of said regulations; is subject to all applicable provisions of the act and rules, regulations and orders of the Commission now or hereafter in effect; and is subject to the additional conditions specified below:

A. The earliest completion date of the reactor is August 30, 1958. The latest completion date of the reactor is September 30, 1958. The term "completion date" as used herein means the date on which construction of the reactor is completed except for the introduction of the fuel material.

B. The reactor shall be constructed and located at the location in Lynchburg, Virginia, specified in the application.

Upon completion of the construction of the reactor in accordance with the terms and conditions of this permit, and upon finding that the reactor authorized has been constructed in conformity with the application and in conformity with the provisions of the act and of the rules and regulations of the Commission, the Commission will issue a Class 104 license to the Babcock & Wilcox Company pursuant to section 104c of the act, which license shall expire 20 years after the date of this construction permit.

Date of issuance:

For the Atomic Energy Commission.

Director,
Division of Licensing and Regulation.

[F. R. Doc. 58-6669; Filed Aug. 19, 1958; 8:45 a. m.]

[Docket No. 50-107]

S. A. INNOCENTE MANGILI ADRIATICA, INC.

NOTICE OF ISSUANCE OF FACILITY EXPORT LICENSE

Please take notice that no request for formal hearing having been filed following filing of notice of proposed action with the Federal Register Division, the Atomic Energy Commission has this date issued License No. XR-22 to S. A. Innocente Mangili Adriatica, Incorporated, authorizing the export of a 50 kilowatt solution-type research reactor to Politecnico Di Milano, Milano, Italy. A notice of proposed issuance of this license was published in the FEDERAL REGISTER on June 24, 1958, 23 F. R. 4606.

Dated at Germantown, Md., this 13th day of August 1958.

For the Atomic Energy Commission.

H. L. PRICE,
Director, Division of Licensing and Regulation.

[F. R. Doc. 58-6689; Filed, Aug. 19, 1958; 8:50 a. m.]

[Docket No. 50-110]

AMERICAN INTERCONTINENTAL TRADE AND SERVICE CO. (AMITAS) INC.

NOTICE OF ISSUANCE OF FACILITY EXPORT LICENSE

Please take notice that the American Intercontinental Trade and Service Company (Amitas) Inc., 50 Broadway, New York 4, New York, has submitted an application dated July 1, 1958, for a license to export a 43,000 kilowatt (thermal) pressurized light water power reactor to Centre d'Etudes de l'Energie Nucleaire (CEN), Brussels, Belgium.

Pursuant to section 104 of the Atomic Energy Act of 1954 and 10 CFR, Chapter I, Part 50, "Licensing of Production and Utilization Facilities", and upon finding that (a) the reactor proposed to be exported is a utilization facility as defined by the act and regulations and (b) the issuance of a license for the export thereof is within the scope of and is consistent with the terms of an agreement for cooperation with the Kingdom of Belgium, the Commission may issue a facility export license authorizing the export of the reactor to Belgium.

In its review of applications for licenses sought solely to authorize the export of production or utilization facilities, the Commission does not evaluate the health and safety characteristics of the subject reactors.

In accordance with the procedures set forth in the Commission's rules of practice (10 CFR Part 2) a petition for leave to intervene in these proceedings must be served upon the parties and filed with the Atomic Energy Commission within 30 days after the filing of this notice with the Federal Register Division.

Dated at Germantown, Md., this 13th day of August 1958.

For the Atomic Energy, Commission.

H. L. PRICE,
Director, Division of Licensing and Regulation.

FEDERAL POWER COMMISSION

[Docket No. G-15846]

UNION OIL COMPANY OF CALIFORNIA

ORDER FOR HEARING, SUSPENDING PROPOSED CHANGES IN RATES, AND ALLOWING INCREASED RATES TO BECOME EFFECTIVE

AUGUST 14, 1958.

Union Oil Company of California (Respondent), on July 25, 1958, tendered for filing proposed changes in its presently effective rate schedules for sales of natural gas subject to the jurisdiction of the Commission. The proposed changes, which constitute increased rates and charges, are contained in the following designated filings:

Description: Notices of Change, dated July 25, 1958.

Purchasers: (1, 2, 3 and 8) Transcontinental Gas Pipe Line Corporation, (4) United Fuel Gas Company, (5) Tennessee Gas Transmission Company, (6 and 9) United Gas Pipe Line Company, (7) Texas Gas Transmission Corporation, (10) Arkansas Louisiana Gas Company.

Rate schedule designation: (1) Supplement No. 5 to Respondent's FPC Gas Rate Schedule No. 2. (2) Supplement No. 2 to Respondent's FPC Gas Rate Schedule No. 3. (3) Supplement No. 2 to Respondent's FPC Gas Rate Schedule No. 4. (4) Supplement No. 2 to Respondent's FPC Gas Rate Schedule No. 12. (5) Supplement No. 3 to Respondent's FPC Gas Rate Schedule No. 7. (6) Supplement No. 3 to Respondent's FPC Gas Rate Schedule No. 8. (7) Supplement No. 3 to Respondent's FPC Gas Rate Schedule No. 13. (8) Supplement No. 1 to Respondent's FPC Gas Rate Schedule No. 17. (9) Supplement No. 1 to Respondent's FPC Gas Rate Schedule No. 21. (10) Supplement No. 1 to Respondent's FPC Gas Rate Schedule No. 22.

Effective date: August 1, 1958 (effective date is the date proposed by Respondent).

The increased rate(s) and charge(s) so proposed are intended to reflect (in whole or in part) the additional "excise, license, or privilege tax" of one cent per Mcf levied by the State of Louisiana pursuant to Act No. 8 of 1958 (House Bill No. 303), as approved on June 16, 1958, amending Title 47 of the Louisiana Revised Statutes of 1950. The Commission is advised that litigation is being instituted to challenge the constitutionality of the said Act No. 8 of 1958. In consideration of

this fact, and in order to assure appropriate refund in the event said Act No. 8 of 1958 should be declared unconstitutional or otherwise held invalid by final judicial decision, it is deemed advisable to suspend the said proposed increased rates and charges until August 2, 1958, and thereafter to permit them to become effective as of that date: *Provided*, That within 20 days from the date of this order Respondent shall file with the Secretary of the Commission an appropriate undertaking to assure such refund as may be ordered.

The Commission finds:

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed changes, and that the above-designated supplements be suspended and the use thereof deferred as hereinafter ordered.

(2) It is necessary and proper in the public interest in carrying out the provisions of the Natural Gas Act that Respondent's proposed increased rates be made effective as hereinafter provided and that Respondent be required to file an undertaking as hereinafter ordered and conditioned.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rates and charges contained in the above-designated supplements to Respondent's FPC Gas Rate Schedules.

(B) Pending such hearing and decision thereon, said supplements are each hereby suspended and the use thereof deferred until August 2, 1958, and until such further time as each is made effective in the manner hereinafter prescribed.

(C) The rate(s), charge(s), and classification(s) set forth in the above-designated supplements to Respondent's FPC Gas Rate Schedules shall be effective as of August 2, 1958: *Provided, however*, That within 20 days from the date of this order, Respondent shall execute and file with the Secretary of the Commission the agreement and undertaking described in paragraph (E) below.

(D) Respondent shall refund at such times and in such amounts to the persons entitled thereto, and in such manner as may be required by final order of the Commission, the difference between the presently effective rates and charges and the proposed increased rates and charges hereby allowed to become effective in the event the additional tax of one cent per Mcf levied by the State of Louisiana is for any reason held to be invalid. Should such additional tax eventually be held invalid and the State of Louisiana makes refund, with interest, of the tax monies collected pursuant to the said Act No. 8 of 1958, then, and in that event, a proportionate part of the interest so received by the Respondent herein shall be passed on and paid to the persons entitled thereto at such times and in such amounts, and in such manner as may be required by final order of the Commission. Respondent shall bear all costs of any such refunding; shall keep accurate accounts in detail of all amounts received by reason of the increased rates or charges allowed by this order to become effective, for each billing period, specifying by whom and in whose behalf such amounts were paid; and shall report (original and four copies), in writing and under oath, to the Commission quarterly, or monthly if Respondent so elects, for each billing period, and for each purchaser, the billing determinants of natural gas sales to such purchasers and the revenues resulting therefrom, as computed under the rates in effect immediately prior to the date upon which the increased rates allowed by this order become effective, and under the rates allowed by this order to become effective, together with the differences in the revenues so computed.

(E) As a condition of this order, within 20 days from the date of issuance thereof, Respondent shall execute and file in triplicate with the Secretary of this Commission its written agreement and undertaking to comply with the terms of paragraph (D) hereof, signed by a responsible officer of the corporation, evidenced by proper authority from the board of directors, and accompanied by a certificate showing service of copies thereof upon all purchasers under the rate schedule involved, as follows:

Agreement and Undertaking of ----------
To Comply With the Terms and Conditions of Paragraph (D) of Federal Power Commission's Order Making Effective Proposed Rate Changes

In conformity with the requirements of the order issued ----------, in Docket No. G-__, ---------- hereby agrees and undertakes to comply with the terms and conditions of paragraph (D) of said order, and has caused this agreement and undertaking to be executed and sealed in its name by its officers, thereupon duly authorized in accordance with the terms of the resolution of its board of directors, a certified copy of which is appended hereto this ------ day of ---------.

By ----------

Attest:

(Secretary)

Unless Respondent is advised to the contrary within 15 days after the date of filing such agreement and undertaking, the agreement and undertaking shall be deemed to have been accepted.

(F) If Respondent shall, in conformity with the terms and conditions of paragraph (D) of this order, make the refunds as may be required by order of the Commission, the undertaking shall be discharged; otherwise, it shall remain in full force and effect.

(G) Neither the supplements hereby suspended nor the rate schedules sought to be altered thereby shall be changed until the period of suspension has expired, unless otherwise ordered by the Commission.

(H) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

By the Commission.

UNION OIL COMPANY OF CALIFORNIA ET AL.

ORDER FOR HEARING, SUSPENDING PROPOSED CHANGES IN RATES, AND ALLOWING INCREASED RATES TO BECOME EFFECTIVE

AUGUST 14, 1958.

Union Oil Company of California et al. (Respondent) on July 25, 1958, tendered for filing proposed changes in its presently effective rate schedules for sales of natural gas subject to the jurisdiction of the Commission. The proposed changes, which constitute increased rates and charges, are contained in the following designated filings:

Description: Notices of Change, dated July 25, 1958.

Purchaser: Transcontinental Gas Pipe Line Corporation.

Rate schedule designation: Supplement No. 3 to Respondent's FPC Gas Rate Schedule No. 5. Supplement No. 3 to Respondent's FPC Gas Rate Schedule No. 6.

Effective date: August 1, 1958 (effective date is the date proposed by Respondent).

NOTE: The remaining text of this document is identical with that of F. R. Doc. 58-6693, *supra*.

By the Commission.

[Docket Nos. G-14841, G-15068]

PHILLIPS PETROLEUM CO. AND EL PASO NATURAL GAS CO.

NOTICE OF APPLICATIONS

AUGUST 13, 1958.

In the matters of El Paso Natural Gas Company, Docket No. G-15068; Phillips Petroleum Company, Docket No. G-14841.

Take notice that on May 7, 1958, El Paso Natural Gas Company (El Paso) filed in Docket No. G-15068 an application pursuant to sections 7 (b) and (c) of the Natural Gas Act for permission to remove, salvage and abandon, and for a certificate of public convenience and necessity to construct, acquire, modify, and operate certain natural gas facilities in order to purchase, acquire, compress, transport and treat natural gas from the East Maljamar and Kemnitz Areas in Lea County, New Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

El Paso proposes to abandon the present line between Phillips' Lee Plant and Applicant's Monument Plant and to replace it with larger pipe to handle the additional amounts of gas proposed to be transported. Part of the pipe salvaged from the Lee-Monument line will be used to complete the looping of the Monument-Hobbs line.

The proposed facilities and their estimated costs are as follows:

(1) Acquisition of 3,520 horsepower compressor station, with appurtenances, from Tennessee Gas Transmission Company, to be known as Kemnitz Field Compressor Station	$1,207,000
(2) Installation of turbo-charging equipment to increase capacity of above Kemnitz Station to 4,480 horsepower	211,000
(3) Construction of new 1,650 horsepower East Maljamar Compressor Station	690,000
(4) Construction of new 3,000 horsepower Lee Compressor Station	933,000
(5) 5.6 miles of 4½-inch O. D. fuel pipeline from Lee Station	82,000
(6) 4.4 miles of 3½-inch O. D. fuel pipeline from terminus of (5) above to Kemnitz Station	56,000
(7) 6.7 miles of 2⅜-inch O. D. fuel pipeline from terminus of (5) above to East Maljamar Station	66,000
(8) 10.0 miles of 12¾-inch O. D. field pipeline from Kemnitz Station to Phillips' Lee Plant	$337,000
(9) 6.7 miles of 6⅝-inch O. D. pipeline from East Maljamar Station to junction with (8) above	122,000
(10) 17.2 miles of 10¾-inch O. D. pipeline from Lee Plant to Applicant's Monument Plant	499,000
(11) 5.4 miles of 8⅝-inch O. D. loop pipeline on line from Applicant's Hobbs Compressor Station to Monument Plant	117,000
(12) Metering facilities	13,000
(13) Miscellaneous overheads	479,000
Total estimated cost	4,812,000

The total estimated cost of the proposed facilities will be financed from current working funds and/or short term bank loans.

On April 7, 1958, Phillips Petroleum Company filed an application, pursuant to section 7 (c) of the Natural Gas Act, in Docket No. G-14841 for a certificate of public convenience and necessity authorizing the sale of natural gas from leases in the Kemnitz and East Maljamar Areas (the latter includes the Roberts and two other fields), Lea County, New Mexico, to El Paso under an amendatory agreement dated February 4, 1958 (Supplement No. 8 to Phillips FPC gas Rate Schedule No. 243). The gas is to be delivered to El Paso at central points in each area. Facilities involved will be ordinary well appurtenances and field lines. The amendatory agreement is to run for the same period as the basic contract dated September 20, 1949, i. e., for 30 years from the date of the first deliveries under the basic contract.

Phillips produces gas from its own leases or buys it from other producers in these areas under contracts of the percentage of proceeds type. Phillips lists the producers from which it purchases gas as: The Ohio Oil Company, Cities Service Oil Company, The Pure Oil Company, Sinclair Oil and Gas Company, Tennessee Gas Transmission Company, Skelly Oil Company, Neville G. Penrose Incorporated and W. D. Anderson & Sons, and Shell Oil Company.

Protests or petitions to intervene in these proceedings may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before September 5, 1958.

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

[F. R. Doc. 58-6673; Filed, Aug. 19, 1958; 8:46 a. m.]

[Docket No. G-11981]

TENNESSEE NATURAL GAS LINES, INC.

ORDER APPROVING PROPOSED SETTLEMENT, ALLOWING TARIFF REVISIONS TO TAKE EFFECT, AND PRESCRIBING REFUNDS

AUGUST 12, 1958.

This is a rate proceeding arising under the Natural Gas Act. It involves an increased rate and charge tendered by Tennessee Natural Gas Lines, Inc. (Tennessee Natural). The matter is before us now for consideration of a proposed settlement between Tennessee Natural and its sole interstate wholesale customer, Nashville Gas Company (Nashville Gas), a wholly-owned subsidiary, and of accompanying tariff revisions submitted on July 11, 1958. Upon consideration of the proposed settlement, and the data filed in support thereof, we approve the terms of the proposed settlement, will allow the tariff revisions to become effective, and will prescribe refunds, subject to the terms and conditions agreed to by the parties, as hereinafter set forth.

Tennessee Natural, on January 15, 1957, tendered certain revised tariff sheets to its FPC Gas Tariff, Original Volume No. 1.[1] By such revisions Tennessee Natural proposed an annual rate increase of $490,500, based on sales for the year 1956 to Nashville Gas under Tennessee Natural's Rate Schedule G-1. The proposed increase was in addition to increased rates then in effect, subject to refund, in Tennessee Natural Gas Lines, Inc., Docket No. G-5472, a proceeding recently terminated.[2] Tennessee Natural states that its increase was occasioned by an increase filed by its sole natural gas supplier, Tennessee Gas Transmission Company (Tennessee), which increase became effective July 14, 1957, subject to an undertaking to assure the refund of excess charges. Tennessee's increased rates and charges are the subject of the proceeding in Tennessee Gas Transmission Company, Docket No. G-11980, which is pending.

On February 13, 1957, pending a hearing and decision upon the question of the lawfulness of the rates and charges tendered by Tennessee Natural, we issued an order herein suspending the revised tariff sheets and deferring their use until July 14, 1957, and until such further time thereafter as such sheets might be made effective in the manner prescribed by the Natural Gas Act. No hearing has been held herein. Subsequently, upon the filing of Tennessee Natural of the statutory motion, the revised tariff sheets were permitted to become effective July 14, 1957, subject to an undertaking to assure the refund of such portion of the increased rates and charges found by the Commission to be not justified.

Still later, on November 21, 1957, Tennessee Natural filed other tariff sheets[3] to its gas tariff, comprising its Rate Schedule PS-G. This schedule provided for a peaking service rate of 90 cents per Mcf to be available for the period November 1, 1957 through April 30, 1958.[4] Tennessee Natural states that the 90 cents PS-G rate is identical to the price it pays to Tennessee for such peaking service under the latter's Rate Schedule PS-G, which was also permitted to become effective.[5]

[1] The sheets were designated Ninth Revised Sheet No. 4 and Fifth Revised Sheets Nos. 6 and 7.

[2] See order issued August 6, 1958, in Docket No. G-5472.

[3] The sheets were designated Second Revised Sheets Nos. 7-C, 7-D, 7-E and 22-A. We permitted these tariff sheets to go into effect, subject to the rate proceeding herein by order issued January 13, 1958 (unreported).

[4] On January 2, 1958, Tennessee Natural filed Third Revised Sheet No. 7-D to revise the minimum bill provision of the rate schedule. This sheet was allowed to take effect as of January 2, 1958. Order issued February 12, 1958 (unreported), in this proceeding.

[5] Order issued December 16, 1957 (unreported).

On June 16, 1958, at the request of Tennessee Natural, a conference was held between representatives of the company and of our staff for the purpose of exploring the possibilities of developing and agreeing upon a settlement of the matters presented and issues involved by Tennessee Natural's increased rate proposal. Nashville Gas, the City of Nashville, and the Tennessee Public Service Commission were invited to participate in the conference. At the conference a cost of service of Tennessee Natural's operations for the year 1957, adjusted, was developed.

Following such conference, Tennessee Natural, on July 11, 1958, submitted the proposed settlement agreement with Nashville Gas, which agreement is set forth below as Appendix A. Additionally, Tennessee Natural tendered three revised tariff sheets providing a lower rate under its Rate Schedule G-1, and proposing such rate to be effective as of July 14, 1957. The revised tariff sheets so tendered are designated as follows: Tenth Revised Sheet No. 4 (superseding Ninth Revised Sheet No. 4) and Sixth Revised Sheets Nos. 6 and 7 (superseding Fifth Revised Sheets Nos. 6 and 7) to Tennessee Natural's effective gas tariff. The substitute rates and charges would increase Tennessee Natural's revenues by $428,471 annually, based on sales for the year 1957, as adjusted, or $54,000 less than the estimated $482,471[6] annual increase based on the rates presently and contingently effective subject to refund herein.

Such revised tariff sheets provide for a monthly demand charge of $2.35 per Mcf for the first 50,000 Mcf of billing demand and $2.00 per Mcf for all additional billing demand, and a commodity charge of 19.48 cents per Mcf under Tennessee Natural's Rate Schedule G-1, in lieu of the current contingently effective rates, all as more fully shown in Appendix B, set forth below.

In support of the substitute rates and charges, Tennessee Natural submitted a total adjusted cost of service, including a 6 percent rate of return, of $5,161,395, the details of which are shown on page 1 of Appendix B. Of this amount, $4,040,438 has been allocated to jurisdictional sales. The costs are actual for the year 1957, adjusted for known changes. A comparison of the costs claimed in support of the increased rates and charges tendered in 1957 with the settlement costs agreed to shows, in capsule, the following:

	Claimed costs	Settlement costs	Reduction by settlement
Gas purchased	$4,872,073	$4,872,073	----------
Other operating expenses	76,640	70,941	$5,699
Taxes other than income	32,695	27,080	5,615
Depreciation	49,541	49,541	----------
Federal income tax	56,537	54,218	2,319
Return at 6 percent	90,142	90,142	----------
Effect of plant adjustment	----------	(2,870)	2,870
Total cost of service	5,177,898	5,161,395	16,503

Return was computed on the basis of average net gas plant of $1,506,868.

Total settlement costs were allocated to jurisdictional and non-jurisdictional sales on the basis of deliveries during (1) the 3-day system peak, winter 1957-1958 (February 16-18, 1958) for demand costs, and (2) annual sales in 1957 for commodity costs. The percentage of jurisdictional sale of the peak period was 100 percent; of annual sales, 67.02 percent. While the settlement reduction in total cost of service is but $16,503, the reduction in Tennessee Natural's charges to its one interstate wholesale customer will amount to $54,000 annually compared to the rates originally tendered.

The proposed settlement agreement provides that (1) Tennessee Natural will refund to Nashville Gas the difference between the charges actually collected by it under the rates contingently effective herein for service rendered on and after July 14, 1957, and the charges which would have been payable for such service under the settlement rates, together with simple interest at 6 percent per annum from the date of payment of such excess charges to Tennessee Natural to the date of refund; (2) in the event Tennessee is required, by any final order of the Commission in Docket Nos. G-11107[7] and G-11980, to reduce the demand charge, commodity charge, or minimum bill in its Rate Schedule G-1 and PS-G applicable to Tennessee Natural below the charges collected by Tennessee commencing July 14, 1957, then Tennessee Natural will revise the demand charge, commodity charge, and minimum bill in its corresponding rate schedules by the identical amount by which the charges under Tennessee's schedule are reduced; and (3) in the event Tennessee Natural receives any refunds from Tennessee as a result of proceedings in Docket Nos. G-5259,[8] G-11107, and G-11980 under Tennessee's Rate Schedules G-1 and PS-G during part or all of the period from and after December 15, 1954, Tennessee Natural agrees to refund to Nashville Gas an amount equal exactly to the same amount per Mcf of billing demand in the demand charge and the same amount per Mcf delivered in the commodity charge, as made by Tennessee, multiplied by the billing demands incurred and volumes of gas delivered to Nashville Gas under Tennessee Natural's corresponding rate schedules during the same period, together with simple interest at 6 percent per annum from the date of payment of the excess charges by Nashville Gas to the date the refund is received by Tennessee Natural from Tennessee, all as more fully described in Appendix A set forth below. Also, the settlement provides that no change shall be made in the charges for peaking service under Tennessee Natural's Rate Schedule PS-G, unless and until the Commission determines that Tennessee's Rate Schedule PS-G shall be revised.

The cost of service upon which the settlement is based agrees substantially with the cost of service computed by our staff on the basis of its investigation of the books and records of Tennessee Natural for the period, as adjusted. Also, by letter filed July 9, 1958, the Tennessee Public Service Commission expressed its agreement to the settlement.

The Commission finds:

(1) The settlement of this proceeding on the basis as proposed and as agreed to by the parties and submitted for our consideration on July 11, 1958, subject to the terms and conditions hereinafter ordered, is just and reasonable and in the public interest in carrying out the provisions of the Natural Gas Act, and such settlement should be approved and made effective, as hereinafter provided and ordered.

(2) The 30-day notice period provided in section 4 (d) of the Natural Gas Act and § 154.22 of our regulations thereunder (18 CFR 154.22) may be waived without prejudice to the interests of those who might be affected under the provisions of the act, and good cause exists that such notice period be waived with respect to the revised tariff sheets tendered by Tennessee Natural on July 11, 1958, and such sheets should be allowed to take effect as of July 14, 1957, as proposed.

(3) The increased rates and charges contained in Tennessee Natural's FPC Gas Tariff, Original Volume No. 1, as amended by Ninth Revised Sheet No. 4 and Fifth Revised Sheets Nos. 6 and 7 tendered on January 15, 1957, are not just and reasonable, or in the public interest, or otherwise lawful under the terms and provisions of the Natural Gas Act and they should be disallowed and denied as hereinafter provided and ordered.

The Commission orders:

(A) The settlement of this proceeding on the basis and terms proposed and agreed to between Tennessee Natural and its sole interstate utility customer, as set out in Appendix A below, is approved and made effective, subject to the terms and conditions hereinafter ordered.

[6] Or an increase of $490,500 based on sales for the year ending December 31, 1956, the test period used in Tennessee Natural's original filing herein.

[7] A proceeding upon an application of Tennessee for a certificate of public convenience and necessity for the construction and operation of natural-gas transmission facilities in which hearings have been held and a presiding examiner decision issued on June 9, 1958.

[8] A rate suspension proceeding involving Tennessee in which we adopted, as modified, a presiding examiner's decision, and prescribed rates for the period December 15, 1954, through July 13, 1957. Tennessee Gas Transmission Co., 18 FPC 428, 439.

(B) The increased rates and charges contained in Tennessee Natural's filings listed in paragraph (3) hereof are disallowed and denied.

(C) The 30-day notice period provided in section 4 (d) of the Natural Gas Act and our regulations thereunder is hereby waived with respect to Tenth Revised Sheet No. 4 and Sixth Revised Sheets Nos. 6 and 7 to Tennessee Natural's FPC Gas Tariff, Original Volume No. 1, submitted on July 11, 1958; each of such sheets is accepted for filing; and each is allowed to become effective as of July 14, 1957, as proposed, subject to the terms and conditions of this order and of the settlement agreement.

(D) Tennessee Natural shall refund, within 10 days from the date of issuance of this order, to Nashville Gas the difference between (a) the charges actually collected under the increased rates and charges filed herein on January 15, 1957, for service rendered on and after July 14, 1957, and (b) the charges which would have been payable for such service under the aforesaid revised tariff sheets tendered July 11, 1958, together with simple interest at the rate of 6 percent per annum thereon, computed from date of actual payment of such excess charges to Tennessee Natural to date of refund, all as provided in Article II of the settlement hereby approved. Within 10 days from the date of payment of such refund, Tennessee Natural shall report to the Commission, in writing and under oath, the amount of refund made to Nashville Gas, showing separately the amount of principal and interest so paid, and the billing determinants used for such determination, shall serve a copy of such report upon Nashville Gas, and file with the Commission a copy of a release from Nashville Gas with respect to such refund.

(E) Tennessee Natural shall file reduced rates and charges and shall make further refunds as, and if, required upon final disposition of the certificate and rate proceedings in Tennessee Gas Transmission Company, Docket Nos. G–5259, G–11107, and G–11980, all as provided in Articles III and IV of the settlement hereby approved and as described above.

(F) This order is without prejudice to any findings or orders which have been or may hereafter be issued by the Commission in any proceeding now pending or hereafter instituted by or against Tennessee Natural and its issuance shall not be construed that any party to this proceeding or to the settlement is to be considered as necessarily agreeing with any principles or methods of cost of service determination or allocation which have been used in arriving at the rates hereby allowed to be made effective.

(G) The proceeding herein is terminated, subject to the terms and conditions contained in this order and in the settlement agreement (Appendix A) set forth below.

By the Commission.

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

APPENDIX A

AGREEMENT OF SETTLEMENT AS TO RATES OF TENNESSEE NATURAL GAS LINES, INC. IN FPC DOCKET NO. G–11981

On January 15, 1957, Tennessee Natural Gas Lines, Inc. (Tennessee Natural) filed with the Federal Power Commission (Commission) Ninth Revised Sheet No. 4 and Fifth Revised Sheets Nos. 6 and 7 to its FPC Gas Tariff, Original Volume No. 1, to increase the rate charged under its Rate Schedule G–1 for firm service to the following amount:

Monthly Demand Charge:	
First 50,000 Mcf of billing demand	$2.44 per Mcf
All additional billing demand	$2.00 per Mcf
Commodity Charge—per Mcf delivered	19.48 cents.

By order issued February 13, 1957, the Commission ordered a hearing in Docket No. G–11981 concerning the lawfulness of the increased rates filed by Tennessee Natural and suspended the use thereof until July 14, 1957, and until such further time thereafter as they may be made effective in the manner prescribed by the Natural Gas Act. Subsequently, pursuant to a motion filed by Tennessee Natural, the Commission, by order issued July 18, 1957, permitted the increased rates to become effective on July 14, 1957, subject to the condition that Tennessee Natural will refund the portion of the increased rates and charges as might be found by the Commission in this proceeding to be not justified, together with interest at 6 percent per annum from date of payment to Tennessee Natural until refunded.

The aforesaid increase in Tennessee Natural's Rate Schedule G–1 was occasioned by an increase filed on January 15, 1957 by Tennessee Natural's sole gas supplier, Tennessee Gas Transmission Company (Tennessee Gas), in its Rate Schedule G–1 which latter increase became effective after suspension in Docket No. G–11980 on July 14, 1957, subject to the condition that Tennessee Gas will refund the portion of the increased rate and charges as might be found by the Commission in that proceeding to be not justified, together with interest at 6 percent per annum from date of payment to Tennessee Gas until refunded.

On November 21, 1957, Tennessee Natural filed Second Revised Sheets Nos. 7–C, 7–D, 7–E and 22–A to its FPC Gas Tariff, Original Volume No.1, comprising the Company's Rate Schedule PS–G, providing for a peaking service rate of 90¢ per Mcf to be available for the period November 1, 1957 through April 30, 1958.[1] By Commission order issued January 13, 1958, these tariff sheets were allowed to go into effect, subject to the rate proceedings in Docket No. G–11981.

The rate of 90¢ per Mcf charged by Tennessee Natural under Rate Schedule PS–G is identical to the price it pays for such peaking service to Tennessee Gas Transmission Company (Tennessee Gas) under the latter's Rate Schedule PS–G. The minimum bill charged by Tennessee Gas is, however, subject to reduction and refund as set forth in the Commission's order issued December 16, 1957 allowing such rate schedule to take effect.

[1] On January 2, 1958, Tennessee Natural filed Third Revised Sheet No. 7–D to revise the minimum bill provision of Rate Schedule PS–G and such revised tariff sheet was allowed by the Commission to go into effect, subject to the proceeding in Docket No. G–11981.

For the purpose of settling the issues involved and terminating the proceedings in Docket No. G–11981, the parties hereto agree as follows:

ARTICLE I

IMMEDIATE REDUCTION IN RATES

Tennessee Natural shall file Tenth Revised Sheet No. 4 and Sixth Revised Sheets Nos. 6 and 7 to its FPC Gas Tariff, Original Volume No. 1 (a copy of each of which is attached hereto), providing for the following charges for firm service under its Rate Schedule G–1, to be effective July 14, 1957:

Monthly Demand Charge:	
First 50,000 Mcf of billing demand	$2.35 per Mcf.
All additional billing demand	$2.00 per Mcf.
Commodity Charge—per Mcf delivered	19.48 cents.

Such charges in Rate Schedule G–1 are justified by a cost of service for the year 1957, including a 6 per cent return on the rate base, and adjusted to reflect known changes in cost, and an allocation of such cost of service, all in accordance with principles followed by the Federal Power Commission in determination of rates. A copy of such cost of service is attached hereto as Exhibit A.

No change shall be made in the now effective charges for peaking service under Tennessee Natural's Rate Schedule PS–G, unless and until the Commission determines that Tennessee Gas' Rate Schedule PS–G shall be revised.

ARTICLE II

IMMEDIATE REFUND

Within ten days of the issuance by the Commission of an order allowing revised Rate Schedule G–1 specified in Article I to become effective on July 14, 1957, Tennessee Natural shall refund to Nashville Gas Company the difference between the charges actually collected under Rate Schedule G–1 (Ninth Revised Sheet No. 4 and Fifth Revised Sheets Nos. 6 and 7) for service rendered on and after July 14, 1957 and the charges which would have been payable for such service under the rates specified for Rate Schedule G–1 in Article I (Tenth Revised Sheet No. 4 and Sixth Revised Sheets Nos. 6 and 7), together with simple interest at 6 percent per annum from the date of payment of such excess charges to Tennessee Natural to the date of refund.

Within ten days after payment of the refund, Tennessee Natural shall submit to the Commission the details of its calculation of the refund and a copy of a release from Nashville Gas Company with respect to such refund.

ARTICLE III

FUTURE RATE REDUCTION DEPENDING UPON RESULT OF PENDING PROCEEDINGS CONCERNING RATES OF TENNESSEE GAS IN DOCKET NOS. G–11107 AND G–11980

If Tennessee Gas is required, by any order or orders of the Commission in Docket Nos. G–11107 and G–11980 which are accepted by Tennessee Gas or become final after court review or otherwise, to reduce the demand charge, commodity charge, or minimum bill in its Rate Schedules G–1 and PS–G applicable to Tennessee Natural below the charges collected by Tennessee Gas beginning July 14, 1957, then Tennessee Natural shall revise the demand charge, commodity charge, and minimum bill in its Rate Schedules G–1 and PS–G by the identical amount by which the charges under the corresponding rate schedules of Tennessee Gas are reduced, so that Tennessee Natural does not gain or

lose as a result of the reduction in the rates of Tennessee Gas. Such reduced rates shall be filed by Tennessee Natural within ten days after the reduced rates of Tennessee Gas become effective and the reduced rates of Tennessee Natural shall be effective on the same date as the reduced rates of Tennessee Gas.

ARTICLE IV

FUTURE REFUNDS DEPENDING UPON RESULT OF PROCEEDINGS CONCERNING RATES OF TENNESSEE GAS

If, as a result of any court order, or as a final result of the proceedings in Docket Nos. G–5259, G–11107 and G–11980, Tennessee Gas makes refunds to Tennessee Natural for deliveries made under Tennessee Gas' Rate Schedules G–1 and PS–G during part or all of the period from and after December 15, 1954, Tennessee Natural will make refunds to Nashville Gas Company equal to exactly the same amount per Mcf of billing demand in the demand charge and the same amount per Mcf delivered in the commodity charge, as made by Tennessee Gas, multiplied by the billing demands incurred and volumes of gas delivered to Nashville Gas Company under Tennessee Natural's corresponding rate schedules during the same period, together with simple interest at 6 per cent per annum from date of payment of the excess charges by Nashville Gas Company to the date the refund is received by Tennessee Natural from Tennessee Gas.

Such refunds by Tennessee Natural shall be made within ten days of the receipt of the refund from Tennessee Gas. Within ten days thereafter, Tennessee Natural shall submit to the Commission the details of its calculations of the refund and a copy of a release from Nashville Gas Company with respect to such refund.

ARTICLE V

CONDITION

The agreement reached by the parties and set forth in this proposed settlement is expressly conditioned upon the Commission's acceptance of all the terms and conditions of this proposed settlement and the termination of the proceeding in Docket No. G–11981, subject to such terms and conditions.

ARTICLE VI

RESERVATION

By making this agreement neither party is to be considered as necessarily agreeing with any principles or methods of cost of service determination or allocation which have been used in arriving at the rates agreed to herein.

ARTICLE VII

The parties hereto, in agreeing that the attached revised tariff sheets shall be effective July 14, 1957, request that the Commission waive compliance with the requirements of its general rules and regulations, particularly Part 154 thereof, to the extent necessary to permit such revised sheets to become effective on such date.

Agreed to and executed by the parties hereto on July 7, 1958.

TENNESSEE NATURAL GAS LINES, INC.,
THOMAS W. GOODLOE,
President.

J. C. SCHUTT,
Secretary.

NASHVILLE GAS COMPANY,
W. H. LIGON,
President.

WM. C. TERRY,
Secretary.

[Docket No. G–15882]

SOUTHERN NATURAL GAS CO.

ORDER FOR HEARING, SUSPENDING PROPOSED CHANGES IN RATES, AND ALLOWING INCREASED RATES TO BECOME EFFECTIVE

AUGUST 13, 1958.

Southern Natural Gas Company (Southern) on July 14 and 21, 1958, tendered for filing two tariff sheets[1] to its FPC Gas Tariff, Volume No. 3, by which Southern proposes to increase its rates for the sale of natural gas so as to increase revenues by $1,140 for gas produced or gathered in the state of Louisiana and supplied to Mississippi River Fuel Corporation under Southern's

[1] Fourth Revised Sheet No. 48 to FPC Gas Tariff, Original Volume 3, (Rate Schedule F–2), tendered July 14, 1958; buyer Mississippi River Fuel Corporation.

First Revised Sheet No. 75A to FPC Gas Tariff, Original Volume 3, (Rate Schedule F–3), tendered July 21, 1958; buyer Texas Gas Gathering Corporation.

FPC Gas Rate Schedule F–2 and to Tensas Gas Gathering Corporation under Southern's FPC Gas Rate Schedule F–3. Southern proposes that the aforementioned tariff sheets become effective on August 1, 1958.

The increased rates and charges so proposed are intended to reflect (in whole or in part) the additional "excise, license, or privilege tax" of one cent per Mcf levied by the State of Louisiana pursuant to Act No. 8 of 1958 (House Bill No. 303), approved on June 16, 1958, amended Title 47 of the Louisiana Revised Statutes of 1950. The Commission is advised that litigation is being instituted to challenge the constitutionality of the said Act, No. 8 of 1958. In consideration of this fact, and in order to assure appropriate refund in the event said Act No. 8 of 1958 should be declared unconstitutional or otherwise held invalid by final judicial decision, it is deemed advisable that the Commission waive the requirements of § 154.63 of its regulations and suspend the said proposed increased rates and charges until August 2, 1958, and thereafter to permit them to become effective as of that date; provided, that within 20 days from the date of this order Southern shall file with the Secretary of the Commission an appropriate undertaking to assure such refund as may be ordered.

The Commission finds:

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed changes, and that the above-designated revised tariff sheets be suspended and the use thereof deferred as hereinafter ordered.

(2) It is necessary and proper in the public interest in carrying out the provisions of the Natural Gas Act that Southern's proposed increased rates be made effective as hereinafter provided and that Southern be required to file an undertaking as hereinafter ordered and conditioned.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rates and charges contained in the above-designated revised tariff sheets.

(B) Pending such hearing and decision thereon, said Fourth Revised Sheet No. 48 and First Revised Sheet No. 75A, all to Southern's FPC Gas Tariff, Original Volume 3 are each hereby suspended and the use thereof deferred until August 2, 1958, and until such further time as each is made effective in the manner hereinafter prescribed.

(C) The rates, charges, and classifications set forth in the above-designated filings shall be effective as of August 2, 1958: *Provided, however,* That within 20 days from the date of this order, Southern shall execute and file with the Secretary of the Commission the agreement and undertaking described in paragraph (E) below.

(D) Southern shall refund at such times and in such amounts to the persons entitled thereto, and in such manner as may be required by final order of the Commission, the difference between the presently effective rates and charges and the proposed increased rates and charges hereby allowed to become effective in the event the additional tax of one cent per Mcf levied by the State of Louisiana is for any reason held to be invalid. Should such additional tax eventually be held invalid and the State of Louisiana makes refunds, with interest, of the tax moneys collected pursuant to the said Act No. 8 of 1958, then, and in that event, a proportionate part of the interest so received by Southern herein shall be passed on and paid to the persons entitled thereto at such times and in such amounts, and in such manner as may be required by final order of the Commission. Southern shall bear all costs of any such refunding; shall keep accurate accounts in detail of all amounts received by reason of the increased rates or charges allowed by this order to become effective, for each billing period, specifying by whom and in whose behalf such amounts were paid; and shall report (original and four copies), in writing and under oath, to the Commission quarterly, or monthly if Southern so elects, for each billing period, and for each purchaser, the billing determinants of natural gas sales to such purchasers and the revenues resulting therefrom, as computed under the rates in effect immediately prior to the date upon which the increased rates allowed by this order become effective, and under the rates allowed by this order to become effective, together with the differences in the revenues so computed.

(E) As a condition of this order, within 20 days from the date of issuance thereof, Southern shall execute and file in triplicate with the Secretary of this Commission its written agreement and undertaking to comply with the terms of paragraph (D) hereof, signed by a responsible officer of the corporation, evidenced by proper authority from the board of directors, and accompanied by a certificate showing service of copies thereof upon all purchasers under the revised tariff sheets involved, as follows:

> Agreement and Undertaking of Southern Natural Gas Company To Comply With the Terms and Conditions of Paragraph (D) of Federal Power Commission's Order Making Effective Proposed Rate Charges
>
> In conformity with the requirements of the order issued ----------, in Docket No. G–15882, Southern Natural Gas Company hereby agrees and undertakes to comply with the terms and conditions of paragraph (D) of said order, and has caused the agreement and undertaking to be executed and sealed in its name by its officers, thereupon duly authorized in accordance with the terms of the resolution of its board of directors, a certified copy of which is appended hereto this ------ day of ----------
>
> SOUTHERN NATURAL GAS COMPANY
> By ----------
> Attest:
> ----------
> (Secretary)

Unless Southern is advised to the contrary within 15 days after the date of filing such agreement and undertaking, the agreement and undertaking shall be deemed to have been accepted.

(F) If Southern shall, in conformity with the terms and conditions of paragraph (D) of this order, make the refunds as may be required by order of the Commission, the undertaking shall be discharged; otherwise, it shall remain in full force and effect.

(G) The revised tariff sheets hereby suspended shall not be charged until the period of suspension has expired, unless otherwise ordered by the Commission.

(H) Interested State Commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

By the Commission.

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

TARIFF COMMISSION

[Investigations 9, 10]

CERTAIN TISSUE PAPER

NOTICE OF INVESTIGATIONS AND HEARING

Investigations No. 9 (tissue paper from Finland) and No. 10 (tissue paper from Norway) under section 201 (a), Antidumping Act, 1921, as amended.

Having received advices from the Treasury Department on August 13, 1958, that tissue paper, sulphite, machine glazed, bleached and unbleached, weighing less than 10 pounds per ream of 288,000 square inches, imported from Finland and Norway, respectively, is being, or is likely to be, sold in the United States at less than fair value, the United States Tariff Commission has instituted investigations under section 201 (a) of the Antidumping Act, 1921, as amended, to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

The investigations are being consolidated for the purposes of a public hearing to be held by the Commission in connection therewith beginning at 10:00 a. m., e. d. s. t., on September 23, 1958. Testimony will be taken first regarding the effect on domestic industry of imports from Finland, following which testimony will be taken with respect to imports from Norway. Interested parties desiring to appear and to be heard at such hearing shall notify the Secretary, United States Tariff Commission, Washington 25, D. C., at least three days before the date set for the hearing, indicating whether their testimony will relate to imports from Finland or Norway, or both.

Issued: August 15, 1958.

By order of the United States Tariff Commission this 14th day of August 1957.

[SEAL] DONN N. BENT,
Secretary.

INTERSTATE COMMERCE COMMISSION

[Notice 230]

MOTOR CARRIER APPLICATIONS

AUGUST 15, 1958.

The following applications are governed by the Interstate Commerce Commission's special rules governing notice of filing of applications by motor carriers of property or passengers and by brokers under sections 206, 209, and 211 of the Interstate Commerce Act and certain other procedural matters with respect thereto (49 CFR 1.241).

All hearings will be called at 9:30 o'clock a. m., United States standard time (or 9:30 o'clock a. m., local daylight saving time), unless otherwise specified.

APPLICATIONS ASSIGNED FOR ORAL HEARING OR PRE-HEARING CONFERENCE

MOTOR CARRIERS OF PROPERTY

No. MC 17012 (Sub No. 5), filed May 19, 1958. Applicant: STELZER TRANSPORTATION SERVICE, INC., 125 West Elm Street, Lima, Ohio. Applicant's attorney: Walter Shaeffer, 44 East Broad Street, Columbus 15, Ohio. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Allen County, Ohio, on the one hand, and, on the other, points in Ohio, Indiana, Michigan, Illinois, Kentucky, West Virginia, Pennsylvania, New Jersey, and New York. Applicant is authorized to conduct operations in Illinois, Indiana, Kentucky, Michigan, Missouri, New Jersey, New York, Ohio, Pennsylvania, West Virginia, and Wisconsin.

NOTE: Applicant requests that all duplicating authority be eliminated.

HEARING: September 30, 1958, at the New Post Office Building, Columbus, Ohio, before Examiner Herbert L. Hanback.

No. MC 17226 (Sub No. 15), filed July 30, 1958. Applicant: FRUIT BELT MOTOR SERVICE, INC., 3909 West Harrison Street, Chicago 24, Ill. Applicant's attorneys: Eugene L. Cohn, One North La Salle Street, Chicago 2, Ill., and Beverley S. Simms, 1624 Eye Street, NW., Washington, D. C. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery parts, materials, and supplies*, used in the manufacture, shipping or operation of refrigerators, freezers, refrigerator-freezers, ice cube makers, air conditioners, and dehumidifiers, (a) from Chicago, Danville, East Alton, and Rockford, Ill., Cynthiana, Henderson, and Louisville, Ky., Detroit, Tecumseh, Adrian, Grand Rapids, Grandville, Albion, Benton Harbor, St. Joseph, Middleville, Mich., Clinton and Waterloo, Iowa, St. Louis, Mo., Cleveland, Dayton, Cincinnati, Columbus, Toledo, Circleville, Sidney, Franklin, Middlefield, St. Marys, Middletown, Portsmouth, Sandusky, Fremont, and Warren, Ohio, to plant sites of The Whirlpool Corporation at Evansville, Ind., and those within 2 miles of Evansville. (b) between the plant sites of The Whirlpool Corporation at Evansville, Ind., on the one hand, and, on the other, the plant sites of The Whirlpool Corporation at Rock Island, Ill., Benton Harbor and St. Joseph, Mich., Clyde, Hamilton, and Marion, Ohio, and St. Paul, Minn. (2) *Skids, pallets and packing containers*, used in transporting the above-named commodities, from the plant sites of The Whirlpool Corporation at Evansville, Ind., and those within 2 miles of Evansville to the origin points specified in paragraph 1 (a) above. (3) *Refrigerators, freezers, refrigerator-freezers, ice cube makers, air conditioners and dehumidifiers, and parts and accessories thereof*, when transported with and intended for installation thereon, from the plant sites of The Whirlpool Corporation at Evansville, Ind., and those within 2 miles of Evansville, to Chicago, Peoria, Rockford, and Waukegan, Ill., Davenport, Iowa, Louisville, Ky., Detroit, Grand Rapids, Lansing, Flint, Benton Harbor, St. Joseph, and Saginaw, Mich., St. Louis, Mo., Cleveland, Cincinnati, Dayton, Akron, Columbus, Toledo, and Youngstown, Ohio, and Milwaukee, Wis. Applicant is authorized to conduct operations in Michigan, Indiana, Illinois, Ohio, Wisconsin, Iowa, Kentucky, and Missouri.

NOTE: Applicant states that the above described operations are limited to a transportation service to be performed under a continuing contract or contracts with Sears, Roebuck & Co. and/or The Whirlpool Corporation.

HEARING: October 17, 1958, in Room 852, U. S. Custom House, 610 South Canal Street, Chicago, Ill., before Examiner Harold P. Boss.

No. MC 25789 (Sub No. 2), filed July 28, 1958. Applicant: KENNETH HARVEY, Clarence, Mo. Applicant's attorney: Joseph R. Nacy, 117 West High Street, Jefferson City, Mo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Feed* and *fertilizer*, in bulk and in sacks, from East St. Louis, Ill., to Brookfield and Clarence, Mo., and points within 30 miles of Clarence. Applicant is authorized to conduct operations in Illinois, Iowa, and Missouri.

NOTE: Applicant states that it will transport ordinary livestock, exempt from regulation under section 203 (b) (6), Interstate Commerce Act, on return.

HEARING: September 30, 1958, at the Missouri Public Service Commission, Jefferson City, Mo., before Joint Board No. 135, or, if the Joint Board waives its right to participate, before Examiner Leo W. Cunningham.

No. MC 30697 (Sub No. 37), filed July 28, 1958. Applicant: DIECKBRADER EXPRESS, INC., 5391 Eastern Avenue, Cincinnati, Ohio. Applicant's attorneys: Charles W. Singer and Clarence D. Todd, 1825 Jefferson Place NW., Washington 6, D. C. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Liquid ammonia, cleansing, scouring and washing compounds; liquid bluing; sodium hypoclorite solution;* and *liquid cleansing compounds, Chemicals, supplies* and *machinery* used in the manufacture, sales and distribution of liquid ammonia, cleansing, scouring and washing compounds; liquid bluing; sodium hypochlorite solutions; and liquid cleansing compounds. Between Alliance, Ohio, on the one hand, and, on the other, points in the lower peninsula of Michigan on, east, and south of the following described highways, and Saginaw Bay: From the Michigan-Ohio State line over U. S. Highway 127 to Lansing, Mich., thence over U. S. Highway 27 to Mt. Pleasant, Mich., thence over Michigan Highway 20 to Bay City, Mich., and thence over Michigan Highway 47 to Saginaw Bay; those in New York, on and west of the following described highways: From Lake Ontario over New York Highway 78 to junction New York Highway 187, thence over New York Highway 187 to junction New York Highway 240, thence over New York Highway 240 to junction U. S. Highway 219 and thence over U. S. Highway 219 to the New York-Pennsylvania State line; those in Pennsylvania on and west of U. S. Highway 219; and those in West Virginia on and north of U. S. Highway 50. Applicant is authorized to conduct operations in Illinois, Indiana, Iowa, Kentucky, Michigan, Minnesota, Missouri, Ohio, Tennessee, West Virginia, and Wisconsin.

NOTE: A proceeding has been instituted under section 212 (c) of the Interstate Commerce Act to determine whether applicant's status is that of a contract or common carrier, assigned Docket No. MC 30697 (Sub No. 35).

HEARING: October 3, 1958, at the New Post Office Building, Columbus, Ohio, before Examiner Herbert L. Hanback.

No. MC 50069 (Sub No. 202), filed July 31, 1958. Applicant: REFINERS TRANSPORT & TERMINAL CORPORATION, 2111 Woodward Avenue, Detroit, Mich. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid latex*, in bulk, in tank vehicles, from Akron, Ohio, to Chicago, Ill. Applicant is authorized to conduct operations in Ohio, Michigan, Indiana, West Virginia, Kentucky, Pennsylvania, Wisconsin, New York, Iowa, Minnesota, Missouri, Connecticut, Delaware, Kansas, Nebraska, Oklahoma, Tennessee, North Dakota, South Dakota, Florida, Georgia, Maryland, Maine, Massachusetts, New Hampshire, New Jersey, Rhode Island, Vermont, and Virginia.

HEARING: October 10, 1958, at the New Post Office Building, Columbus,

Ohio, before Joint Board No. 58, or, if the Joint Board waives its right to participate, before Examiner, Herbert L. Hanback.

No. MC 59856 (Sub No. 13), filed July 24, 1958. Applicant: SALT CREEK FREIGHTWAYS, a Corporation, 408 Industrial Avenue, Casper, Wyo. Authority sought to operate as a *common carrier*, by motor vehicle, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, and commodities requiring special equipment, serving missile launching base sites located within 20 miles of Cheyenne, Wyo., as off-route points in connection with applicant's authorized regular route operations. Applicant is authorized to conduct operations in Montana, Colorado, and Wyoming.

NOTE: Applicant states that the above sites are located in Laramie or Albany County, Wyo., and Weld or Larimer County, Colo.

HEARING: September 26, 1958, at the New Customs House, Denver, Colo., before Joint Board No. 50, or, if the Joint Board waives its right to participate, before Examiner Leo A. Riegel.

No. MC 73675 (Sub No. 23), filed August 11, 1958. Applicant: GALLAGHER FREIGHT LINES, INC., 2424 Arapahoe Street, Denver, Colo. Applicant's attorney: Ward A. White, P. O. Box 332, 410 Bell Building, Cheyenne, Wyo. Authority sought to operate as a *common carrier*, by motor vehicle, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, serving the missile launching sites (now and to be) located near Cheyenne, Wyo., as off-route points in connection with applicant's authorized regular route operations to and from Cheyenne and Fort Francis E. Warren, Wyo. Applicant is authorized to conduct operations in Colorado, Utah, and Wyoming.

HEARING: September 26, 1958, at the New Customs House, Denver, Colo., before Joint Board No. 194, or, if the Joint Board waives its right to participate, before Examiner Leo A. Riegel.

No. MC 78062 (Sub No. 34), filed July 28, 1958. Applicant: BEATTY MOTOR EXPRESS, INC., Jefferson Avenue, Extension, Washington, Pa. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, canned, prepared or preserved, from Medina, Ohio, to points in Kentucky on and east of U. S. Highway 25 commencing at the Tennessee-Kentucky State line, and continuing along U. S. Highway 25 to the Kentucky-Ohio State line, and points in West Virginia on, north and west of U. S. Highway 219 commencing at the Virginia-West Virginia State line and continuing along U. S. Highway 219 to the West Virginia-Maryland State line; and *empty containers or other such incidental facilities* used in transporting the above-described commodities, on return. Applicant is authorized to conduct operations in Pennsylvania, West Virginia, Ohio, Maryland, Kentucky, Indiana, New Jersey, Delaware, Illinois, New York, the District of Columbia, and Virginia.

NOTE: A proceeding has been instituted under section 212 (c), No. MC 78062 (Sub No. 30), to determine whether applicant's status is that of a contract or common carrier.

HEARING: October 13, 1958, at the New Post Office Building, Columbus, Ohio, before Joint Board No. 62, or, if the Joint Board waives its right to participate, before Examiner Herbert L. Hanback.

No. MC 85934 (Sub No. 6), filed July 21, 1958. Applicant: MICHIGAN TRANSPORTATION COMPANY, a Corporation, 1650 Waterman, Detroit, Mich. Applicant's attorney: Robert A. Sullivan, 2606 Guardian Building, Detroit 26, Mich. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Building materials*, in flat bed equipment only, from L'Anse, Mich., to points in Ohio, Indiana, Pennsylvania, and New York, and *mill supplies and equipment*, on return; *building materials*, in flat bed equipment only, from Port Clinton, Ohio, to points in the upper Peninsula of Michigan, and points in Erie, Crawford, and Mercer Counties, Pa., and *paper* used in the manufacture of building materials, in flat bed equipment only, from Kalamazoo, Mich., to Port Clinton, Ohio; *building materials*, in flat bed equipment only, from Harding, Pa., to points in Ohio and Michigan, and *mill supplies*, on return; *roofing materials*, in flat bed equipment only, from Cleveland, Ohio, to points in Michigan north of Michigan Highway 21, and *mill supplies and equipment* on return; and *scrap paper*, in flat bed equipment only, from points in Michigan, to Avery, Ohio. Applicant is authorized to transport fly ash from specified points in Michigan to points in Illinois, Indiana, Wisconsin, Ohio, Pennsylvania, Kentucky, Missouri, Alabama, Mississippi, and Tennessee, in Certificate No. MC 85934 Sub No. 1; it is also authorized to conduct operations as a contract carrier in Permit No. MC 52978 and sub numbers thereunder; therefore, dual operations under section 210 may be involved.

NOTE: A proceeding has been instituted under section 212 (c) in No. MC 52978 Sub No. 15, to determine whether applicant's status is that of a contract or common carrier.

HEARING: October 7, 1958, at the Federal Building, Detroit, Mich., before Examiner Harold P. Boss.

No. MC 92983 (Sub No. 302), filed July 2, 1958. Applicant: ELDON MILLER, INC., 330 East Washington Street, Box 232, Iowa City, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Resins*, in bulk, in tank vehicles, from Tyler, Tex., and points within ten (10) miles thereof, to points in Alabama, Arkansas, Colorado, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Nebraska, North Dakota, Ohio, Oklahoma, South Dakota, Tennessee, and Wisconsin. Applicant is authorized to conduct operations throughout the United States, except Arizona, California, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, and Washington.

HEARING: October 10, 1958, in Room 852, U. S. Custom House, 610 South Canal Street, Chicago, Ill., before Examiner Harold P. Boss.

No. MC 95540 (Sub No. 291), filed July 1, 1958. Applicant: WATKINS MOTOR LINES, INC., Cassidy Road, P. O. Box 785, Thomasville, Ga. Applicant's attorney: Joseph H. Blackshear, Gainsville, Ga. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products, dairy products*, and *articles distributed by meat-packing houses*, as defined by the Commission, from Evansville, Ind., to points in Alabama, Florida, Georgia, and South Carolina. Applicant is authorized to conduct operations in Alabama, Arizona, Arkansas, California, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Virginia, West Virginia, Wisconsin, and the District of Columbia.

HEARING: October 13, 1958, in Room 852, U. S. Custom House, 610 South Canal Street, Chicago, Ill., before Examiner Harold P. Boss.

No. MC 101075 (Sub No. 54), filed August 11, 1958. Applicant: TRANSPORT, INC., 1215 Center Avenue, Moorhead, Minn. Applicant's attorney: Donald A. Morken, 1100 First National-Soo Line Building, Minneapolis 2, Minn. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum* and *petroleum products*, in bulk, in tank vehicles, from Mandan, N. Dak., to points in South Dakota, on, south and east of a line extending from the Wyoming-South Dakota line at U. S. Highway 14, along U. S. Highway 14, through Rapid City, Pierre and Wessington to junction U. S. Highway 281, and thence northerly along U. S. Highway 281 through Redfield and Aberdeen to the South Dakota-North Dakota State line. Applicant is authorized to conduct operations in Nebraska, Iowa, North Dakota, Minnesota, South Dakota, Wisconsin, Wyoming, and Montana.

NOTE: Any duplicating authority should be eliminated.

HEARING: September 25, 1958, at the North Dakota Public Service Commission, Bismarck, N. Dak., before Joint Board No. 158, or, if the Joint Board waives its right to participate, before Examiner Richard H. Roberts.

No. MC 101126 (Sub No. 110), filed June 20, 1958. Applicant: STILLPASS TRANSIT COMPANY, INC., 4967 Spring Grove Avenue, Cincinnati 32, Ohio. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Acids* and *chemicals*, in bulk in tank vehicles, from St. Bernard and Cincinnati, Ohio, to points in Michigan and Wisconsin, and *empty containers or other such incidental facilities* used in transporting the above-specified commodities, on return. Applicant is authorized to conduct operations in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Michigan, Minnesota, Missouri, Nebraska, New Jersey, New York, North Carolina, South Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia, and Wisconsin.

NOTE: A proceeding has been instituted under section 212 (c), No. MC 101126 Sub No. 86, to determine whether applicant's status is that of a contract or common carrier.

HEARING: October 14, 1958, in Room 712, Federal Building, Cincinnati, Ohio, before Examiner Herbert L. Hanback.

No. MC 101126 (Sub No. 111), filed July 24, 1958. Applicant: STILLPASS TRANSIT COMPANY, INC., 4967 Spring Grove Avenue, Cincinnati 32, Ohio. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Acids* and *chemicals*, in bulk, in tank vehicles, from St. Bernard and Cincinnati, Ohio, to points in Tennessee. Applicant is authorized to conduct operations in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Michigan, Minnesota, Missouri, Nebraska, New Jersey, New York, North Carolina, South Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia, and Wisconsin.

NOTE: A proceeding has been instituted under section 212 (c) of the Interstate Commerce Act, to determine whether applicant's status is that of a contract or common carrier, assigned Docket No. MC 101126 (Sub No. 86).

HEARING: October 14, 1958, in Room 712, Federal Building, Cincinnati, Ohio, before Examiner Herbert L. Hanback.

No. MC 102616 (Sub No. 658), filed August 4, 1958. Applicant: COASTAL TANK LINES, INC., Grantley Road, York, Pa. Applicant's attorney: Harold G. Hernly, 1624 Eye Street NW., Washington 6, D. C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Acids* and *chemicals*, in bulk, in tank vehicles, between points in Marshall, Pleasants, and Wetzel Counties, W. Va., on the one hand, and, on the other, points in Delaware, Indiana, Illinois, Iowa, Maryland, Michigan, Missouri, New Jersey, New York, Ohio (except points in Cuyahoga, Hamilton, Mahoning, Stark, Summit, and Trumbull Counties), Pennsylvania (except points in Allegheny, Beaver, Butler, Cambria, Fayette, and McKean Counties), and Virginia. Applicant is authorized to conduct operations in Maryland, District of Columbia, West Virginia, Virginia, Delaware, New Jersey, Pennsylvania, New York, Illinois, Tennessee, Wisconsin, and Rhode Island.

HEARING: September 25, 1958, at the Offices of the Interstate Commerce Commission, Washington, D. C., before Examiner William R. Tyers.

No. MC 103880 (Sub No. 189), filed July 14, 1958. Applicant: PRODUCERS TRANSPORT, INC., 224 Buffalo Street, New Buffalo, Mich. Applicant's attorney: David Axelrod, 39 South La Salle Street, Chicago 3, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum* and *petroleum products*, in bulk, in tank vehicles, from points in Warren and Butler Counties, Ohio, to points in Illinois, Indiana, Michigan, Pennsylvania, New York, West Virginia, and Kentucky. Applicant is authorized to conduct operations in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Mississippi, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia, West Virginia, and Wisconsin.

HEARING: October 16, 1958, in Room 852, U. S. Custom House, 610 South Canal Street, Chicago, Ill., before Examiner Harold P. Boss.

No. MC 103880 (Sub No. 190), filed July 14, 1958. Applicant: PRODUCERS TRANSPORT, INC., 224 Buffalo Street, New Buffalo, Mich. Applicant's attorney: David Axelrod, 39 South La Salle Street, Chicago 3, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum oils*, in bulk, in tank vehicles, from Mishawaka, Ind., to points in Minnesota, Iowa, Wisconsin, Illinois, Michigan, and Ohio. Applicant is authorized to conduct operations in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia, West Virginia, and Wisconsin.

NOTE: Duplication with present authority to be eliminated.

HEARING: October 16, 1958, in Room 852, U. S. Custom House, 610 South Canal Street, Chicago, Ill., before Examiner Harold P. Boss.

No. MC 105813 (Sub No. 32), filed July 7, 1958. Applicant: BELFORD TRUCKING CO., INC., 1299 North West 23d Street, Miami 42, Fla. Applicant's attorney: Sol H. Procter, Suite 713–17 Professional Building, Jacksonville 2, Fla. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products* and *meat by-products, dairy products* and *articles distributed by meat packinghouses*, as defined by the Commission in Appendix I to Ex Parte MC–45, Descriptions in Motor Carrier Certificates, 61 M. C. C. 209 (272), from Terre Haute, Ind., to points in Florida. Applicant is authorized to conduct operations in Delaware, Florida, Illinois, Indiana, Kansas, Maryland, Massachusetts, Missouri, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, South Carolina, Virginia, Wisconsin, and the District of Columbia.

HEARING: October 10, 1958, in Room 852, U. S. Custom House, 610 South Canal Street, Chicago, Ill., before Examiner Harold P. Boss.

No. MC 106760 (Sub No. 37), filed July 16, 1958. Applicant: WHITEHOUSE TRUCKING, INC., 2905 Wayne Street, Toledo 9, Ohio. Applicant's attorney: Robert W. Loser, 317 Chamber of Commerce Building, Indianapolis, Ind. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Prefabricated buildings*, including component parts of such buildings, when shipped therewith, from points in Illinois, Indiana, Kentucky, Massachusetts, Michigan, New York, Ohio, Pennsylvania, West Virginia, and Wisconsin to points in Maine, New Hampshire, Connecticut, Vermont, and Rhode Island. Applicant is authorized to transport similar commodities in Connecticut, Illinois, Indiana, Kentucky, Maine, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, West Virginia, and Wisconsin.

NOTE: Applicant states that the sole purpose of this application is to eliminate New Windsor, N. Y., as a gateway point, so that the most expeditious and economical route may be followed. Applicant further states that no duplications are intended, and upon granting of the applied for authority, Certificate No. MC 106760 (Sub No. 32) may be cancelled, and Certificate No. MC 106760 (Sub No. 26) may be modified so as to eliminate duplications.

HEARING: October 2, 1958, at the New Post Office Building, Columbus, Ohio, before Examiner Herbert L. Hanback.

No. MC 107403 (Sub No. 264), filed July 25, 1958. Applicant: E. BROOKE MATLACK, INC., 33d and Arch Streets, Philadelphia 4, Pa. Applicant's attorney: Paul F. Barnes, 225 South 15th Street, Philadelphia 2, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Acids* and *chemicals*, in bulk, in tank vehicles, between points in Licking County, Ohio, on the one hand, and, on the other, points in Michigan. Applicant is authorized to conduct operations in Maryland, Massachusetts, Minnesota, Michigan, Missouri, New Jersey, New Hampshire, New York, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, Alabama, Connecticut, Georgia, Delaware, Indiana, Illinois, Kentucky, Maine, North Carolina, Ohio, West Virginia, Wisconsin, and the District of Columbia.

HEARING: October 10, 1958, at the New Post Office Building, Columbus, Ohio, before Joint Board No. 57, or, if the Joint Board waives its right to participate, before Examiner Herbert L. Hanback.

No. MC 107403 (Sub No. 266), filed July 25, 1958. Applicant: E. BROOKE MATLACK, INC., 33d and Arch Streets, Philadelphia 4, Pa. Applicant's attorney: Paul F. Barnes, 811–819 Lewis Tower Building, 225 South 15th Street, Philadelphia 2, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cement*, (1) from Middlebranch, Ohio, to points in that part of Pennsylvania on and west of a line commencing at the New York-Pennsylvania State line at U. S. Highway 219, and continuing along U. S. Highway 219 to Du Bois, Pa., and thence along U. S. Highway 119 to

the Pennsylvania-West Virginia State line; and (2) from Middlebranch, Ohio, to points in that part of West Virginia on and west of a line commencing at the West Virginia-Pennsylvania State line at U. S. Highway 19, and continuing along U. S. Highway 19 to Weston, W. Va., and thence on, west and north of U. S. Highway 33 from Weston to the West Virginia-Ohio State line; and *empty containers or other such incidental facilities* used in transporting cement, on return. Applicant is authorized to conduct operations in Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, Alabama, Connecticut, Georgia, Delaware, Indiana, Illinois, Kentucky, Maine, North Carolina, Ohio, West Virginia, Wisconsin, and the District of Columbia.

HEARING: October 13, 1958, at the New Post Office Building, Columbus, Ohio, before Joint Board No. 59, or, if the Joint Board waives its right to participate, before Examiner Herbert L. Hanback.

No. MC 107403 (Sub No. 267), filed August 6, 1958. Applicant: E. BROOKE MATLACK, INC., 33d and Arch Streets, Philadelphia 4, Pa. Applicant's attorney: Paul F. Barnes, 811–819 Lewis Tower Building, 225 South 15th Street, Philadelphia 2, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum residuum*, in bulk, in tank vehicles, from Lima, Ohio to Toledo, Ohio. Applicant is authorized to conduct operations in Alabama, Connecticut, Delaware, Georgia, Illinois, Indiana, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia.

HEARING: September 24, 1958, at the New Post Office Building, Columbus, Ohio, before Joint Board No. 117.

No. MC 109385 (Sub No. 22), filed June 12, 1958. Applicant: SUBLER TRANSFER, INC., East Main Street, Versailles, Ohio. Applicant's attorney: Taylor C. Burneson, 3510 Le Veque-Lincoln Tower, Columbus 15, Ohio. Authority sought to operate as a *common or contract carrier*, by motor vehicle, over irregular routes, transporting: *Glass, glassware* and *glass containers*, from Clarksburg and Grafton, W. Va., to points in Wisconsin. Applicant is authorized to conduct operations in Connecticut, Delaware, District of Columbia, Illinois, Indiana, Kentucky, Maryland, Massachusetts, Michigan, Missouri, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Virginia, and West Virginia.

NOTE: A proceeding has been instituted under section 212 (c) to determine whether applicant's status is that of a contract or common carrier in No. MC 109385 (Sub No. 16).

HEARING: September 29, 1958, at the New Post Office Building, Columbus, Ohio, before Examiner Herbert L. Hanback.

No. MC 110325 (Sub No. 19), filed July 3, 1958. Applicant: TRANSCON LINES, a Corporation, 1206 South Maple Avenue, Los Angeles 15, Calif. Applicant's attorney: Lee Reeder, 10th Floor, 1012 Baltimore Building, Kansas City 5, Mo. Authority sought to operate as a *common carrier*, by motor vehicle, over an alternate route, transporting: (1) *Oil-well equipment and supplies*, (2) *Government-owned compressed gas trailers* loaded with compressed gas (other than liquefied petroleum gas) or empty, and (3) *general commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between Lordsburg, N. Mex., and Mesa, Ariz., over U. S. Highway 70, serving no intermediate points, and serving Lordsburg, N. Mex., and Mesa, Ariz., as points of joinder only, as an alternate route for operating convenience only, in connection with regular route operations between Oklahoma City, Okla., and Los Angeles, Calif., authorized to applicant in Certificate No. MC 110325 (Sub No. 6) and leased by applicant in Certificate No. MC 111122 from Cain's Truck Lines pursuant to MC–FC 31319–A. Applicant indicates, the proposed certificate may be limited in point of time to a period ending with the termination of applicant's presently held lease with Cain's Truck Lines pursuant to No. MC–FC 31319–A (the expiration date of which is April 1, 1961) for any reason other than the exercise by applicant of its option to purchase the rights now leased from said lessor. Applicant is authorized to conduct operations in Arizona, Arkansas, California, Illinois, Indiana, Kansas, Missouri, New Mexico, Oklahoma, Tennessee, and Texas.

HEARING: September 17, 1958, at the Arizona Corporation Commission, Phoenix, Ariz., before Joint Board No. 129, or, if the Joint Board waives its right to participate, before Examiner F. Roy Linn.

No. MC 110388 (Sub No. 11), filed August 11, 1958. Applicant: UNION PACIFIC MOTOR FREIGHT COMPANY, 1416 Dodge Street, Omaha 2, Nebr. Applicant's attorney: W. R. Rouse, same address as applicant. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities, including Class A and B explosives*, but excluding commodities of unusual value and household goods as defined by the Commission, between Cheyenne, Wyo., and Inter-Continental Ballistics Missile launching sites near Cheyenne, Wyo., over the following routes: (1) from Cheyenne over U. S. Highways 85–87 to junction U. S. Highways 85–87, thence over U. S. Highway 87 to junction unnumbered highway, thence over unnumbered highway to launching site located in Sections 2 and 11, Township 16 North, Range 68, West 6th P. M., in Laramie County, Wyo.; (2) from Cheyenne over U. S. Highways 85–87 to junction U. S. Highways 85–87, thence over U. S. Highway 85 to junction unnumbered highway, thence over unnumbered highway to launching site to be located approximately in the area of Section 34, Township 17 North, Range 65 West, and Section 3, Township 16 North, Range 66 West 6th P. M., in Laramie County, Wyo.; (3) from Cheyenne over U. S. Highway 30 to junction with unnumbered highway, thence over unnumbered highway to launching site to be located approximately in the area of Sections 1, 6, 7 and 12, Township 14 North, Range 69 West 6th P. M., in Laramie County, Wyo.; (4) from Cheyenne over U. S. Highways 85–87 to junction with unnumbered highway, thence over unnumbered highway to launching site to be located in approximate area of Sections 22, 23, 26 and 27, Township 13 North, Range 66 West 6th P. M., in Laramie County, Wyo., and return over the above routes, serving no intermediate points. Applicant is authorized to conduct operations in Wyoming, Idaho, Utah, Missouri, Colorado, Oregon, Nevada, Washington, and California.

NOTE: Applicant states that the authority sought is for the purpose of serving the above-mentioned sites near Cheyenne, Wyo., and any authority may be so restricted and be made subject to the following conditions: (1) Shipments transported shall be limited to those which are received from or delivered to a railroad under a through bill of lading covering, in addition to its movement by applicant, a prior or subsequent movement by rail; (2) All contractual arrangements between applicant and Union Pacific Railroad Company shall be reported to the Commission and shall be subject to revision by it if and as it may be found necessary in order that such arrangements shall be fair and equitable to the parties.

HEARING: September 26, 1958, at the New Customs House, Denver, Colo., before Joint Board No. 197, or, if the Joint Board waives its right to participate, before Examiner Leo A. Riegel.

No. MC 110420 (Sub No. 192), filed July 1, 1958. Applicant: QUALITY CARRIERS, INC., Calumet Street, Burlington, Wis. Applicant's attorney: Paul F. Sullivan, Sundial House, 1821 Jefferson Place NW., Washington 6, D. C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Paints, varnishes*, and *synthetic resins*, and *ingredients thereof*, between Kansas City, Mo., on the one hand, and, on the other, points in Iowa, Kansas, Michigan, Minnesota, Nebraska, Wisconsin, Tennessee, Illinois, Indiana, Kentucky, and Ohio; (2) *liquid chocolate* and *chocolate coating*, from Milwaukee, Wis., to points in Alabama, Georgia, Illinois, Indiana, North Carolina, Ohio, Pennsylvania, and South Carolina; and to Denver, Colo., Burlington, Iowa, Boston and North Abington, Mass., Fargo, N. Dak., New York, N. Y., and Rochester, N. Y.; (3) *latex emulsion*, from Ringwood, Ill., to Indianapolis, Ind., and St. Louis, Mo., (4) *ammonium thiosulphate*, from Ringwood, Ill., to St. Louis, Mo., (5) *blended oils*, from Mishawaka, Ind., to Cleveland, Ohio, Muskegon and Saginaw, Mich., and Duluth, Minn., (6) *wine*, from Harbert, Mich., to St. Louis, Mo. Applicant is authorized to conduct operations in Alabama, Arkansas, Florida, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New York, Ohio, Oklahoma, Pennsylvania, South Dakota, Tennessee, Texas, and Wisconsin.

HEARING: October 8, 1958, in Room 852, U. S. Custom House, 610 South Canal Street, Chicago, Ill., before Examiner Harold P. Boss.

No. MC 110478 (Sub No. 10), filed July 23, 1958. Applicant: WATKINS TRUCKING, INC., 207 Trenton Avenue, Uhrichsville, Ohio. Applicant's attorney: Ralph W. Sanborn, Hartman Building, Columbus 15, Ohio. Authority sought to operate as a *common or contract carrier*, by motor vehicle, over irregular routes, transporting: *Clay products* and *fire clay*, from points in Tuscarawas County, Jefferson County, Springfield Township, Summit County, Palmyra Township, Portage County, and Brown Township, Carroll County, Ohio, to points in Iowa, the Northern Peninsula of Michigan, Minnesota and Missouri, and *empty containers, pallets, cardboard and lumber* used in the manufacture, packing or shipping of clay products and fire clay on return. Applicant is authorized to conduct operations in Ohio, New York, Kentucky, Missouri, Illinois, Indiana, Pennsylvania, West Virginia, Maryland, and Wisconsin.

NOTE: A proceeding has been instituted under section 212 (c) to determine whether applicant's status is that of a contract or common carrier in No. MC 110478 (Sub No. 6). Applicant states that if such application to convert is not granted applicant requests an extension of its authority as a contract carrier, but if such application to convert is granted applicant requests an extension of its common carrier authority.

HEARING: October 7, 1958, at the New Post Office Building, Columbus, Ohio, before Examiner Herbert L. Hanback.

No. MC 110525 (Sub No. 363), filed July 28, 1958. Applicant: CHEMICAL TANK LINES, INC., 520 East Lancaster Avenue, Downingtown, Pa. Applicant's attorneys: Leonard A. Jaskiewicz and Gerald L. Phelps, Munsey Building, Washington 4, D. C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk, in tank vehicles, between Cleveland, Ohio, on the one hand, and, on the other, points in Indiana and Michigan. Applicant is authorized to conduct operations in Alabama, Arkansas, California, Connecticut, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia.

HEARING: October 10, 1958, at the New Post Office Building, Columbus, Ohio, before Joint Board No. 9, or, if the Joint Board waives its right to participate, before Examiner Herbert L. Hanback.

No. MC 111717 (Sub No. 16), filed July 7, 1958. Applicant: TRACTOR TRANSPORT, INC., 535 South 84th Street, Milwaukee, Wis. Applicant's attorney: Frank M. Coyne, Bank of Madison Building, 1 West Main Street, Madison 3, Wis. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Farm and industrial tractors* and *farm and industrial machinery*, from Milwaukee and West Allis, Wis., to points in Minnesota, Iowa, Illinois, Michigan, Indiana, Ohio, Pennsylvania, New York, West Virginia, Kentucky, Tennessee, Georgia, Alabama, Mississippi, Louisiana, Arkansas, Texas, Oklahoma, New Mexico, Colorado, Wyoming, Montana, North Dakota, South Dakota, Nebraska, Kansas, and Missouri, and *damaged, rejected, or returned shipments* of the above-described commodities on return. Applicant is authorized to conduct operations in Alabama, Arkansas, Colorado, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Mississippi, Missouri, Nebraska, North Dakota, Ohio, Pennsylvania, South Dakota, Tennessee, West Virginia, Wisconsin, and Wyoming.

NOTE: Duplication with present authority to be eliminated.

HEARING: October 15, 1958, in Room 852, U. S. Custom House, 610 South Canal Street, Chicago, Ill., before Examiner Harold P. Boss.

No. MC 113089 (Sub No. 1), filed July 17, 1958. Applicant: ED GALIGHER, Box 163, Bowerston, Ohio. Applicant's attorney: Richard H. Grandon, Hartman Building, Columbus 15, Ohio. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Clay drain tile*, from Bowerston, Ohio, to points in Michigan, New York, and West Virginia, and *empty containers or other such incidental facilities* (not specified) used in transporting clay drain tile on return. Applicant is authorized to conduct operations in Maryland, New York, Ohio, Pennsylvania, and West Virginia.

HEARING: October 7, 1958, at the New Post Office Building, Columbus, Ohio, before Examiner Herbert L. Hanback.

No. MC 113908 (Sub No. 38), (CORRECTION) filed June 25, 1958, published issue of FEDERAL REGISTER July 30, 1958 at page 5752. Applicant: ERICKSON TRANSPORT CORPORATION, MPO Box 706, Springfield, Mo. Applicant's attorney: Turner White III, 808 Woodruff Building, Springfield, Mo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid sugar*, in bulk, in tank vehicles, from Grimes, Iowa, to points in Illinois, Kansas, Nebraska, Minnesota, Missouri, and Wisconsin. Applicant is authorized to conduct operations in Illinois, Indiana, Ohio, Kentucky, South Dakota, Iowa, Missouri, Kansas, Minnesota, Nebraska, Texas, and Michigan.

NOTE: Applicant's attorney advises that the origin point of Des Moines, Iowa, for the proposed operation was in error, the proper origin point is Grimes, Iowa.

HEARING: Remains as assigned September 18, 1958, at the Federal Office Building, Fifth and Court Avenues, Des Moines, Iowa, before Examiner Gerald F. Colfer.

No. MC 114969 (Sub No. 11), filed May 21, 1958. Applicant: PROPANE TRANSPORT, INC., 27 Water Street, Milford, Ohio. Applicant's attorney: Leonard D. Slutz, 900 Tri-State Building, Cincinnati 2, Ohio. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, as described in Appendix XIII to the report in *Descriptions in Motor Carrier Certificates*, 61 M. C. C. 209, 294, in bulk, in tank vehicles, from points in Butler and Warren Counties, Ohio, to points in Indiana, Michigan, Kentucky, and West Virginia. Applicant is authorized to transport liquid petroleum gas in Illinois, Indiana, Kentucky, Michigan, Ohio, and Pennsylvania.

HEARING: September 29, 1958, at the New Post Office Building, Columbus, Ohio, before Examiner Herbert L. Hanback.

No. MC 115904 (Sub No. 2), (REPUBLICATION) filed April 14, 1958. Applicant: LOUIS GROVER, Route 5, West Broadway, Idaho Falls, Idaho. By application filed April 14, 1958, Louis Grover, an individual, of Idaho Falls, Idaho, seeks a certificate of public convenience and necessity authorizing operation, in interstate or foreign commerce, as a common carrier by motor vehicle, over irregular routes, (1) *of asphalt, roofing materials* or *tar* in containers, from the plant site of the Husky Refining Co., located approximately 4 miles north of Cody, Wyo., to points in Idaho south and east of the Salmon River, and (2) *of pumice, cinder* or *cement building blocks* from points in Bonneville County, Idaho, to points in Montana and Wyoming, except points in Teton County, Wyo. The record indicates that instant application is for permanent authority corresponding to the temporary authority presently held by applicant. With that in view, it appears that through inadvertence applicant has erroneously described that destination territory with respect to the authority sought in (1) above. With the wish to avoid further proceedings in the matter, the findings herein, with respect to (1) above, describes the entire destination territory set forth in applicant's temporary authority. However, it is possible that other parties, who have relied upon the notice of the application as published in the FEDERAL REGISTER, may have an interest in and would be prejudiced by the lack of proper notice of the authority actually sought herein. In the circumstances, this corrected notice of the authority actually sought is republished and issuance of a certificate herein will be withheld for a period of 30 days from the date of such republication, during which period any interested proper party may file an appropriate protest or other pleading. Authority to transport roofing materials includes the authority to transport tar. Accordingly, the application is duplicative to the extent that it seeks authority to transport tar. The joint board finds that the present and future public convenience and necessity require operation by applicant, over irregular routes, as a common carrier by motor vehicle, in interstate or foreign

commerce, (1) *of asphalt* and *roofing materials*, from the plant site of the Husky Refining Co., located approximately 4 miles north of Cody, Wyo., to points in Idaho south and west of a line beginning at the Oregon-Idaho State line and extending along the Salmon River to U. S. Highway 93, and thence along U. S. Highway 93 to the Montana-Idaho State line, including points on the indicated highway, and (2) *of pumice, cinder* or *cement building blocks*, from points in Bonneville County, Idaho to points in Montana and Wyoming, except points in Teton County, Wyo. The joint board further finds that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder; that an appropriate certificate authorizing such operation should be granted, subject to prior republication of a corrected notice in the FEDERAL REGISTER, as hereinbefore described; and that in all other respects the application should be denied.

No. MC 117344 (Sub No. 4) filed May 21, 1958. Applicant: THE MAXWELL CO., a Corporation, 2200 Glendale-Milford Road, Cincinnati 15, Ohio. Applicant's attorney: Herbert Baker, 50 West Broad Street, Columbus 15, Ohio. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fatty acids*, in bulk, in tank vehicles, from Dayton, Ohio, to points in Indiana and Kentucky, and *empty containers or other such incidental facilities* used in transporting fatty acids, on return. Applicant is authorized to conduct operations as a contract carrier in Permit No. MC 50404 and sub-numbers thereunder.

NOTE: A proceeding has been instituted under section 212 (c) in No. MC 50404 Sub 55 to determine whether applicant's status is that of a contract or common carrier.

HEARING: October 1, 1958, at the New Post Office Building, Columbus, Ohio, before Joint Board No. 208, or, if the Joint Board waives its right to participate, before Examiner Herbert L. Hanback.

No. MC 117344 (Sub No. 5), filed May 21, 1958. Applicant: THE MAXWELL CO., a Corporation, 2200 Glendale-Milford Road, Cincinnati 15, Ohio. Applicant's attorney: Herbert Baker, 50 West Broad Street, Columbus 15, Ohio. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Core compound*, in bulk, in tank vehicles, from Dayton, Ohio, to points in Illinois, Indiana, Kentucky, the Lower Peninsula of Michigan, New York, Pennsylvania, Tennessee, Virginia, and West Virginia, and *empty containers or other such incidental facilities* used in transporting core compound, on return. Applicant is authorized to conduct operations as a contract carrier in Permit No. MC 50404 and sub-numbers thereunder.

NOTE: A proceeding has been instituted under section 212 (c) in No. MC 50404 Sub No. 55, to determine whether applicant's status is that of a contract or common carrier.

HEARING: October 1, 1958, at the New Post Office Building, Columbus, Ohio, before Examiner Herbert L. Hanback.

No. MC 117344 (Sub No. 9), filed July 7, 1958. Applicant: THE MAXWELL CO., 2200 Glendale-Milford Road, Cincinnati 15, Ohio. Applicant's attorney: Herbert Baker, 50 West Broad Street, Columbus 15, Ohio. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum* and *petroleum products*, in bulk, in tank vehicles, from points in Butler County, Ohio, to points in Indiana, Kentucky, Pennsylvania, West Virginia, and the lower peninsula of Michigan, and *empty containers or other such incidental facilities* (not specified) used in transporting the above commodities on return. Applicant is authorized to conduct operations as a contract carrier in Alabama, Arkansas, Georgia, Illinois, Indiana, Kentucky, Maryland, Michigan, Mississippi, Missouri, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, West Virginia, and Wisconsin.

NOTE: A proceeding has been instituted under section 212 (c) to determine whether applicant's status is that of a contract or common carrier in MC 50404 (Sub 55).

HEARING: October 3, 1958, at the New Post Office Building, Columbus, Ohio, before Examiner Herbert L. Hanback.

No. MC 117374, filed May 1, 1958. Applicant: P & A REFRIGERATED EXPRESS, INC., 1011 S. E. Salmon Street, Portland, Oreg. Applicant's attorney: Stephen Parker, 705 Yeon Building, Portland 4, Oreg. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fresh, frozen prepared food stuffs, fruits* and *vegetables, poultry (including turkeys)*, eviscerated or prepared, *fish (including shell fish)*, *beverages, beverage preparations, fruit and vegetable juices and concentrates, meats, meat and packinghouse products, meat by-products*, and *dairy products*, and all other *food products* requiring refrigeration or temperature-control in transit, between points in Oregon, Washington, Idaho, and Utah, on the one hand, and, on the other, points in Colorado, Wyoming, Montana, North Dakota, South Dakota, Nebraska, Kansas, Minnesota, Iowa, Missouri, Wisconsin, Illinois, Michigan, Indiana, Ohio, Pennsylvania, Maryland, the District of Columbia, Delaware, New Jersey, New York, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, and Maine.

NOTE: The directors of applicant and the directors of Coast Transport, Inc., an Oregon corporation conducting contract carrier operations under Permit No. MC 114655 Sub 1, are the same, and are commonly owned; said Permit authorizes transportation of peat moss from United States-Canadian ports of entry at or near Blaine and Sumas, Wash., to points in California. Dual operations or common control under section 210 may be involved.

HEARING: October 20, 1958, in Room 852, U. S. Custom House, 610 South Canal Street, Chicago, Ill., before Examiner Harold P. Boss.

No. MC 117399 (Sub No. 1), filed August 4, 1958. Applicant: LEE E. CHAMP, 809 West 10th Street, Junction City, Kans. Applicant's attorney: John E. Jandera, 641 Harrison Street, Topeka, Kans. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages* in containers, and *advertising matter*, from Omaha, Nebr., to points in Kansas on and west of Kansas Highway 99, and on and north of U. S. Highway 40, and *empty containers or other such incidental facilities* (not specified) used in transporting the above-specified commodities on return.

HEARING: September 26, 1958, at the Hotel Kansan, Topeka, Kans., before Joint Board No. 19, or, if the Joint Board waives its right to participate, before Examiner Leo W. Cunningham.

No. MC 117399 (Sub No. 2), filed August 4, 1958. Applicant: LEE E. CHAMP, 809 West 10th Street, Junction City, Kans. Applicant's attorney: John E. Jandera, 641 Harrison Street, Topeka, Kans. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, in containers, and *advertising matter*, from Pueblo, Colo., to points in Kansas on and north of U. S. Highway 40 and on and west of U. S. Highway 75, and *empty containers or other such incidental facilities* (not specified) used in transporting the above-specified commodities on return.

HEARING: September 26, 1958, at the Hotel Kansan, Topeka, Kans., before Joint Board No. 19, or, if the Joint Board waives its right to participate, before Examiner Leo W. Cunningham.

No. MC 117399 (Sub No. 3), filed August 4, 1958. Applicant: LEE E. CHAMP, 809 West 10th Street, Junction City, Kans. Applicant's attorney: John E. Jandera, 641 Harrison Street, Topeka, Kans. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, in containers, and *advertising matter*, from Golden and Denver, Colo., to points in Kansas on and north of U. S. Highway 40 and on and west of U. S. Highway 75, and *empty containers or other such incidental facilities* (not specified) used on transporting the above-specified commodities on return.

HEARING: September 26, 1958, at the Hotel Kansan, Topeka, Kans., before Joint Board No. 43, or, if the Joint Board waives its right to participate, before Examiner Leo W. Cunningham.

No. MC 117527, filed July 17, 1958. Applicant: COMSTOCK STEEL COMPANY, a Corporation, 405 South Seventh Street, Phoenix, Ariz. Applicant's attorney: Earl H. Carroll, Eighth Floor, Title & Trust Building, Phoenix, Ariz. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Lumber* and *lumber products*, from Flagstaff and McNary, Ariz., to points in Imperial, Los Angeles, Orange, Riverside, San Bernardino, Santa Barbara, San Diego, and Ventura Counties, Calif.

HEARING: September 18, 1958, at the Arizona Corporation Commission, Phoenix, Ariz., before Joint Board No. 47, or, if the Joint Board waives its right to participate, before Examiner F. Roy Linn.

No. MC 117526, filed July 17, 1958. Applicant: CLARENCE GEIL AND MARIAN GEIL, doing business as GEIL TRUCKING, 9441 West 135th Street, Orland Park, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (a) *Fresh meat, frozen meat, smoked meat, salted meat, sausages* and *smoked sausages;* (b) *frozen produce* and *fresh produce;* (c) *fruit juices, citrus fruits, grapefruits* and *grapefruit juices, fresh grapes* and *frozen grape juices;* and (d) *fresh fish, frozen fish, live lobsters, frozen lobsters, fresh shrimps* and *frozen shrimps*, between Chicago, Ill., and points in Florida.

HEARING: October 17, 1958, in Room 852, U. S. Custom House, 610 South Canal Street, Chicago, Ill., before Examiner Harold P. Boss.

APPLICATIONS IN WHICH HANDLING WITHOUT ORAL HEARING IS REQUESTED

MOTOR CARRIERS OF PROPERTY

No. MC 29654 (Sub No. 35), filed August 7, 1958. Applicant: FURNITURE EXPRESS, INC., Fluvanna Road, R. D. No. 1, P. O. Box 585, Jamestown, N. Y. Applicant's attorney: Kenneth T. Johnson, Bank of Jamestown Building, Jamestown, N. Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Driver training* devices and accessories therefor, between Jamestown, N. Y., on the one hand, and, on the other, points in New York, Pennsylvania, New Jersey, Ohio, Maryland, Illinois, Indiana, Wisconsin, Michigan, Delaware, Virginia, West Virginia, Tennessee, New Hampshire, Vermont, South Carolina, North Carolina, Missouri, Kansas, Kentucky, and the District of Columbia. Applicant is authorized to conduct operations in Connecticut, Delaware, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia.

No. MC 60580 (Sub No. 23), filed August 8, 1958. Applicant: HIGHWAY EXPRESS LINES, INC., 236 North 23d Street, Philadelphia 3, Pa. Applicant's attorney: Raymond A. Thistle, Jr., 225 South 15th Street, Philadelphia 2, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, (1) Between State Road, Del., and Little Creek, Va., from State Road over U. S. Highway 13 to Cape Charles, Va., thence over Virginia Highway 186 to Kiptopeke, Va., thence via Ferry to Little Creek, and return over the same route, serving no intermediate points, as an alternate route for operating convenience only in connection with applicant's authorized regular route operations; and (2) Between Allentown, Pa., and Hazleton, Pa., over U. S. Highway 309, serving no intermediate points, as an alternate route for operating convenience only in connection with applicant's authorized regular route operations. Applicant is authorized to conduct operations in Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, Rhode Island, Virginia, and the District of Columbia.

No. MC 66562 (Sub No. 1441), filed August 4, 1958. Applicant: RAILWAY EXPRESS AGENCY, INCORPORATED, 219 East 42d Street, New York 17, N. Y. Applicant's attorney: James E. Thomas, 1220 The Citizens & Southern Nat'l. Bank Building, Atlanta 3, Ga. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities, including Class A and B explosives*, moving in express service, between Raleigh, N. C., and Charlotte, N. C.; from Raleigh over U. S. Highway 1 to junction U. S. Highways 15 and 501, thence over U. S. Highways 15 and 501 to Carthage, N. C., thence over North Carolina Highway 27 to junction North Carolina Highway 705, thence over North Carolina Highway 705 to Robbins, N. C., returning same route to junction North Carolina Highway 27 (also over North Carolina Highway 27 from junction North Carolina Highways 27 and 705 to junction North Carolina Highway 27 and U. S. Highway 220); thence over North Carolina Highway 705 to junction North Carolina Highway 211, thence over North Carolina Highway 211 to West End, N. C., returning same route to junction North Carolina Highway 705; thence over North Carolina Highway 211 to Candor, N. C., thence over U. S. Highway 220 to Biscoe, N. C., thence over U. S. Highway 220 to Star, N. C., returning same route to junction North Carolina Highway 27, thence over North Carolina Highway 27 to Troy, N. C., thence over North Carolina Highway 27 to junction North Carolina Highway 109 to Mt. Gilead, N. C. (also over North Carolina Highway 27 from junction North Carolina Highways 27 and 109 to junction North Carolina Highways 27 and 73); thence over North Carolina Highway 73 to junction North Carolina Highway 27, thence over North Carolina Highway 27 to junction North Carolina Highway 205, thence over North Carolina Highway 205 to Oakboro, N. C., returning same route to junction North Carolina Highway 27, thence over North Carolina Highway 27 to junction North Carolina Highway 200, thence over North Carolina Highway 200 to Stanfield, N. C., returning over same route to junction North Carolina Highway 27, thence over North Carolina Highway 27 to junction U. S. Highway 601, thence over U. S. Highway 601 to Midland, N. C., returning same route to junction North Carolina Highway 27, and thence over North Carolina Highway 27 to Charlotte, returning over the same route to Raleigh, serving the intermediate points of Carthage, Robbins, West End, Candor, Biscoe, Star, Troy, Mount Gilead, Oakboro, Stanfield, and Midland, N. C. RESTRICTIONS: The service to be performed by said carrier shall be limited to service which is auxiliary to or supplemental of express service. Shipments transported by said carrier shall be limited to those moving on a through bill of lading, or express receipt, covering, in addition to a movement by said carrier, an immediately prior or immediately subsequent movement by rail or air. Such further specific conditions as the Commission in the future may find it necessary to impose in order to restrict said carrier's operations to service which is auxiliary to or supplemental of express service, Applicant is authorized to conduct operations throughout the United States.

NOTE: Applicant states traffic will be interchanged between the proposed truck service and its other service at Raleigh and Charlotte, N. C.

No. MC 99574 (Sub No. 1), filed August 6, 1958. Applicant: ERVIN H. PEDERSON AND GORDON TWEDT, doing business as T-P TRUCK LINE, Maddock, N. Dak. Applicant's attorney: John S. Whittlesey, Suite 321, Gate City Building, Fargo, N. Dak. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities, including those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment*, between points in a territory described as follows: Starting at the junction of North Dakota Highway 3 in the Northern line of Township 154, Range 74, thence East along the North Boundary of Township 154 to the junction of U. S. Highway 281, thence South on U. S. Highway 281 to the junction of the Northern Boundary of Eddy County, thence west along said Boundary to the junction of the West Boundary of Eddy County South on the West Boundary of Eddy County to the junction of a county road leading West to Bremen, thence westward through Bremen and Hamberg to Harvey and the junction of North Dakota Highway 3, thence North along North Dakota Highway 3 to the junction of said highway in the North Boundary of Township 154, Range 74, on the one hand, and, on the other, points in Minnesota.

NOTE: Applicant is authorized to conduct interstate operations in North Dakota, under the second proviso of section 206 (a) (1), of the act.

No. MC 113779 (Sub No. 72), filed July 21, 1958. Applicant: YORK INTERSTATE TRUCKING, INC., 9020 Laporte Expressway, P. O. Box 12385, Houston 17, Tex. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Formaldehyde*, in bulk, in tank vehicles, from Sterlington, La., to points in Texas. Applicant is authorized to conduct operations in Texas, Louisiana, Arkansas, Mississippi, Oklahoma, New Mexico, Colorado, South Dakota, Nebraska, Kansas, Iowa, Arizona, Minnesota, Wisconsin, Kentucky, Illinois, Tennessee, Missouri, Wyoming, Alabama, North Carolina, Virginia, Georgia, California, Indiana, Utah, Montana, and Idaho.

No. MC 115273 (Sub No. 5), filed August 11, 1958. Applicant: ACME CARRIERS, INC., Route No. 1, South Kearny, N. J. Applicant's attorney: Edward M. Alfano, 36 West 44th Street, New York 36, N. Y. Authority sought to operate as a *common carrier*, by motor

vehicle, over irregular routes, transporting: *Butter, eggs,* and *dressed poultry,* from Omaha, Nebr., and points within 100 miles of Omaha, to New York, N. Y., Philadelphia, Pa., and Boston, Mass. Applicant is authorized to conduct operations in Illinois, Indiana, Iowa, Massachusetts, Nebraska, New Jersey, New York, and Pennsylvania.

NOTE: Applicant holds authority to transport the above-described commodities within the same territory subject to a restriction of minimum 16,000 pounds each from any consignor. Applicant states the purpose of the instant application is to remove the restriction on shipments less than 16,000 pounds and thereby enable applicant to furnish shippers with a complete service on both less-than-truckload and truckload shipments.

PETITIONS

No. MC 2482, PETITION DATED July 28, 1958, FOR REOPENING "GRANDFATHER" PROCEEDINGS AND/OR FOR CLARIFICATION OR MODIFICATION OF CERTIFICATE, THEODORE O. KUNTZ AND ALBERT C. JOYCE, a Partnership, doing business as KUNTZ & JOYCE, 206 Eleventh Street, Lorain, Ohio. Petitioner's representative: J. J. Kuhner, 145 Public Square, 735 Society For Savings Building, Cleveland 14, Ohio. Kuntz & Joyce, the above-captioned partnership, and petitioner herein, are holders of Certificate No. MC 2482 dated November 25, 1949, which authorizes, in part, the transportation of "heavy machinery and parts thereof" between Lorain, Ohio, on the one hand, and, on the other, points in New York, Pennsylvania, West Virginia, and the lower peninsula of Michigan. Petitioner states that it and its predecessors, since prior to June 1 1935 have been engaged in the independent transportation of both "heavy machinery" and "machinery parts" *each as separate shipments;* in other words the machinery parts were not necessarily parts of machinery accompanying a machine in connection with which they were to be utilized. Petitioner contends that the term "heavy machinery and parts thereof" as set forth in its certificate was clear to the parties, and contemplated the independent transportation of heavy machinery, as well as the independent movement of machinery parts. Wherefore, petitioner prays that the original "grandfather" application be reopened; that a determination be made by the Commission to clarify or modify petitioner's certificate to specifically authorize the transportation of "machinery parts" in addition to the transportation of "heavy machinery and parts thereof", between Lorain, Ohio, on the one hand, and, on the other, points in New York, Pennsylvania, West Virginia, and the lower peninsula of Michigan.

No. MC 59570, PETITIONS dated July 31, 1958 (1) TO WAIVE RULE 101 (e) AND ACCEPT FOR FILING AND CONSIDERATION (2) PETITION TO REOPEN AND REINSTATE A PORTION OF "GRANDFATHER" AUTHORITY, HECHT BROTHERS, INC., Toms River, N. J. Petitioner's attorney: Isadore H. Schwartz, 200 Penn Square Building, Juniper and Filbert Streets, Philadelphia 7, Pa. Hecht Brothers, Inc., petitioner, was issued a Certificate in No. MC 59570 on December 2, 1941 authorizing the transportation of general commodities, with exceptions between (1) Pinewald, N. J. and New York, N. Y., (2) Trenton, N. J. and New York, N. Y., and (3) Lakewood, N. J., and Philadelphia, Pa., over specified regular routes, serving all intermediate points, and over irregular routes between specified points in New York and Pennsylvania, and household goods between specified points in New Jersey, New York, and Pennsylvania. Pursuant to proceedings in No. MC-F-3932, *William Howard Bair—Purchase (portion)—Hecht Brothers, Inc.,* approved December 23, 1948, petitioner sold the following portion of its above-described regular route authority: "between Trenton, N. J., and New York, N. Y., over U. S. Highway 1, serving all intermediate points". By so doing, petitioner states that it was neither transferring nor selling, nor would it forfeit or be deprived of any portion of its certificate other than that sold in the purchase agreement; that by such agreement petitioner never intended to divest itself and maintains it never did divest itself of its regular route "grandfather" right to operate between Pinewald and New York and between all intermediate points on said route except service between any two points on the regular route segment on U. S. Highway 1 between New Bruswick, N. J., and New York, N. Y., this said excepted service being the only feasible duplication in the involved purchase transaction; and that subsequent to approval by the Commission of the said purchase transaction petitioner has continued to engage in the aforesaid remaining "grandfather" operations. Wherefore, petitioner prays that its petition be accepted, and that there be reinstated and restored to it a portion of its "grandfather" rights allegedly omitted from Certificate No. MC 59570 dated April 1, 1949, and to issue operating authority in lieu thereof as follows: "General commodities with identical exceptions, over same specified routes, between Pinewald, N. J., and New York, N. Y.; and between all intermediate points on said specified routes—and provided that no service shall be performed between any two intermediate points on the common segment on U. S. Highway 1 (i. e. between New York, N. Y., and junction of U. S. Highway 1 with New Jersey Highway S28)".

APPLICATIONS UNDER SECTIONS 5 AND 210a (b)

The following applications are governed by the Interstate Commerce Commission's special rules governing notice of filing of applications by motor carriers of property or passengers under sections 5 (a) and 210a (b) of the Interstate Commerce Act and certain other procedural matters with respect thereto (49 CFR 1.240).

MOTOR CARRIERS OF PROPERTY

[Notice 48]

MOTOR CARRIER ALTERNATE ROUTE DEVIATION NOTICES

AUGUST 15, 1958.

The following letter-notices of proposals to operate over deviation routes for operating convenience only with no service at intermediate points have been filed with the Interstate Commerce Commission, under the Commission's Special Rules Revised, 1957 (49 CFR 211.1 (c) (8)) and notice thereof to all interested persons is hereby given as provided in such rules (49 CFR 211.1 (d) (4)).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 CFR 211.1 (e)) at any time but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of publication.

Successively filed letter-notices of the same carrier under the Commission's Deviation Rules Revised, 1957, will be numbered consecutively for convenience in identification and protests if any should refer to such letter-notices by number.

MOTOR CARRIERS OF PROPERTY

No. MC 52629 (Deviation No. 2), HUBER & HUBER MOTOR EXPRESS, INC., 970 South Eighth Street, Louisville, Ky., filed August 11, 1958. Carrier proposes to operate as a *comon carrier* by motor vehicle of *general commodities*, with certain exceptions, over a deviation route, between Louisville, Ky., and Dalton, Ga., as follows: From Louisville over U. S. Highway 31-W to Nashville, Tenn., thence over U. S. Highway 41 to Dalton and return over the same route, for operating convenience only, serving no intermediate points. The notice indicates that the carrier is presently authorized to transport the same commodities between Louisville, Ky., and Dalton, Ga., over the following pertinent route: from Louisville over U. S. Highway 60 to junction Kentucky Highway 151, thence over Kentucky Highway 151 to junction Kentucky Highway 35, thence over Kentucky Highway 35 to junction Kentucky Highway 150, thence over Kentucky Highway 150 to junction U. S. Highway 25, thence over U. S. Highway 25 to junction U. S. Highway 25-W, thence over U. S. Highway 25-W to Knoxville, Tenn., thence over U. S. Highway 11 to junction Tennessee Highway 60, thence over Tennessee Highway 60 to the Tennessee-Georgia State line, thence over Georgia Highway 71 to Dalton.

By the Commission.

[F. R. Doc. 58-6686; Filed, Aug. 19, 1958; 8:49 a. m.]

PETITION TO REDEFINE COMMERCIAL ZONE LIMITS

AUGUST 15, 1958.

The following petition relative to the limits of the zone adjacent to and commercially a part of a municipality within the meaning of section 203 (6) (8) of the Interstate Commerce Act has been received and will be processed in the manner hereinafter indicated.

In Ex Parte No. MC-7, Washington, D. C., Commercial Zone, the petitions of the Rockville Chamber of Commerce, Inc., the Mayor and Council of Rockville, Md., the Economic and Industrial Development Committee of Fairfax County, the Bethesda-Chevy Chase Chamber of Commerce, the County Council for Montgomery County, Md., the Board of County Commissioners of Prince Georges County, Md., and the Industrial Development Committee of said county have been assigned for hearing on September 9, 1958, at Washington, D. C., before Examiner Thomas F. Kilroy. The above-named petitioners and the Washington Board of Trade filed, on August 7, 1958, a consolidated joint petition seeking redefinition of the limits of the commercial zone of Washington, D. C., in a manner to further expand said zone to include all of the areas involved in the various separate petitions previously filed, notices of which were published January 15, June 11, and August 13, 1958.

Attorney for petitioners is Albert E. May, Esq., 1625 K Street NW., Washington 6, D. C.

The limits of the commercial zone of Washington, D. C., as heretofore determined are specifically set forth in Ex Parte No. MC-7, *Washington, D. C., Commercial Zone*, 54 M. C. C. 797, 798 (Prior Reports: 3 M. C. C. 243, 48 M. C. C. 460) (49 CFR 1704).

The purpose of this petition is to consolidate in a single pleading all of the presently pending petitions so as to simplify the issues and the presentation of evidence at the hearing. The joint petition does not enlarge the issues or the territorial scope of the various separate petitions.

Oral hearing will be held on this petition and the other pending petitions, in a consolidated record, on September 9, 1958, at 8:30 o'clock a. m., United States standard time (9:30 o'clock a. m., District of Columbia daylight saving time) at the offices of the Interstate Commerce Commission, Washington, D. C., before Examiner Thomas F. Kilroy. Persons supporting or opposing the changes in the present zone limits proposed by these petitions and who desire to participate in future proceedings on these petitions or be notified of any action thereon, should notify the Commission and petitioners or their representative of their desire on or before 20 days from the date of the publication.

[SEAL] HAROLD D. McCOY, *Secretary.*

DEPARTMENT OF LABOR

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938 (52 Stat. 1060, as amended; 29 U. S. C. 201 et seq.), the regulations on employment of learners (29 CFR Part 522), and Administrative Order No. 485 (23 F. R. 200) and Administrative Order No. 507 (23 F. R. 2720), the firms listed in this notice have been issued special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates otherwise applicable under section 6 of the act. The effective and expiration dates, occupations, wage rates, number or proportion of learners, learning periods, and the principal product manufactured by the employer for certificates issued under general learner regulations (§§ 522.1 to 522.11) are as indicated below. Conditions provided in certificates issued under special industry regulations are as established in these regulations.

Apparel Industry Learner Regulations (29 CFR 522.1 to 522.11, as amended, and 29 CFR 522.20 to 522.24, as amended).

The following learner certificates were issued authorizing the employment of 10 percent of the total number of factory production workers for normal labor turnover purposes. The effective and expiration dates are indicated.

B. F. Davis Garment Co., Inc., 3000-2 Royal Street, New Orleans, La.; effective 8-11-58 to 8-10-59 (work pants and dungarees).

Jasper Brassiere Co., P. O. Box 852, Jasper, Ala.; effective 8-11-58 to 8-10-59 (brassieres).

Leitchfield Manufacturing Co., Leitchfield, Ky.; effective 8-8-58 to 8-7-59 (slacks and jackets).

McAlisterville Cutting and Pressing Plant, Fayette Township, Juniata County, McAlisterville, Pa., East Salem Sewing Plant, Delaware Township, Juniata County, Mifflintown, Pa., effective 8-6-58 to 12-27-58 (Replacement Certificate) (ladies' pajamas).

Somerset Shirt & Pajama Co., 221 South Pleasant Street, Somerset, Pa.; effective 8-18-58 to 8-17-59 (men's and boys' nightwear).

Stapleton Garment Co., Inc., Stapleton, Ga.; effective 8-20-58 to 8-19-59 (men's and boys' trousers).

The following learner certificates were issued for normal labor turnover purposes. The effective and expiration dates and the number of learners authorized are indicated.

Badger Outerwear Manufacturing Co., 209-211 Franklin Street, Port Washington, Wis.; effective 8-7-58 to 8-6-59; three learners (men's jackets).

Florida Garments, Inc., 3108 Jefferson Street, Tampa, Fla.; effective 8-8-58 to 8-7-59; 10 learners (trousers, dungarees, shorts).

Green Bay Specialty Co., 129 South Washington Street, Green Bay Wis.; effective 8-11-58 to 8-10-59; five learners (men's, women's, children's jeans, overalls, jackets, etc.).

Lehigh Garment Co., Inc., 201 Bridge Street, Jessup, Pa.; effective 8-7-58 to 8-6-59; 10 learners (children's outerwear).

Mortensen Apron Co., 40 West Main, Saint Anthony, Idaho; effective 8-8-58 to 8-7-59; three learners (women's aprons).

Rita's Sportswear, 242 North Main Street, Moscow, Pa.; effective 8-11-58 to 8-10-59; 10 learners (ladies' blouses and children's dresses).

The following learner certificates were issued for plant expansion purposes. The effective and expiration dates and the number of learners authorized are indicated.

Walter E. Allen Co., 812 East Broadway, Okemah, Oklahoma; effective 8-11-58 to 11-10-58; 25 learners (men's trousers and jackets).

Gary Co., Inc., Gallatin, Tenn.; effective 8-8-58 to 2-7-59; 15 learners (men's dress shirts).

McNeer Dillon Co., Statesville, N. C.; effective 8-6-58 to 2-5-59; 100 learners (shirts).

Southern Garment Co., Hillsboro, N. C., effective 8-6-58 to 2-5-59; 20 learners (women's cotton wash dresses).

Sunbright Manufacturing Co., Inc., Sunbright, Tenn.; effective 8-6-58 to 2-5-59; 10 learners (ladies' dresses and blouses).

Glove Industry Learner Regulations (29 CFR 522.1 to 522.11, as amended, and 29 CFR 522.60 to 522.65, as amended).

Haynesville Manufacturing Co., Inc., Haynesville, La.; effective 8-6-58 to 8-5-59; 10 learners for normal labor turnover purposes (work gloves).

Hosiery Industry Learner Regulations (29 CFR 522.1 to 522.11, as amended, and 29 CFR 522.40 to 522.43, as amended).

Ellis Hosiery Mills, Inc., P. O. Drawer 498-A, Hickory, N. C.; effective 8-5-58 to 8-4-59; 5 percent of the total number of factory production workers for normal labor turnover purposes (seamless hosiery).

Stanly Knitting Mills, Inc., Oakboro, N. C.; effective 8-6-58 to 8-5-59; five learners for normal labor turnover purposes (ladies' full-fashioned and seamless hosiery).

Webb Manufacturing Co., Inc., P. O. Box 87, Dandridge, Tenn.; effective 8-6-58 to 8-5-59; five learners for normal labor turnover purposes (seamless hosiery).

Knitted Wear Industry Learner Regulations (29 CFR 522.1 to 522.11, as amended, and 29 CFR 522.30 to 522.35, as amended).

Iredell Knitting Mills, Inc., 400 Park Drive, Statesville, N. C.; effective 8-7-58 to 8-6-59; five learners for normal labor turnover purposes (knitted and woven garments for men, women and children).

G. C. Lingerie Corp., of Alabama, Town Creek, Ala.; effective 8-8-58 to 8-7-59; five learners for normal labor turnover purposes (knit underwear).

Marion Rohr Corp., 18 North Main Street, Hornell, New York; effective 8-16-58 to 8-15-59; 5 percent of the total number of factory production workers for normal labor turnover purposes (ladies' underwear).

Selinsgrove Manufacturing Co., Inc., East Sherman Street, Selinsgrove, Pa.; effective 8-11-58 to 8-10-59; 5 percent of the total number of factory production workers for normal labor turnover purposes (ladies' sleepwear).

Selinsgrove Manufacturing Co., Inc., East Sherman Street, Selinsgrove, Pa.; effective 8-11-58 to 2-10-59; 30 learners for plant expansion purposes (ladies' sleepwear).

Shoe Industry Learner Regulations (29 CFR 522.1 to 522.11, as amended, and 29 CFR 522.50 to 522.55).

Maisak-Handler Shoe Co., Senath, Mo.; effective 8-6-58 to 8-5-59; 10 percent of the total number of factory production workers for normal labor turnover purposes (women's and children's shoes).

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.11, as amended).

Amboy Handkerchief Works, 235 New Brunswick Avenue, Perth Amboy, N. J.; effective 8-11-58 to 2-10-59; five learners for normal labor turnover purposes in the occupations of (1) sewing machine operator for a learning period of 320 hours, and (2) presser for a learning period of 240 hours, at the rates of at least 90 cents an hour for the first 160 hours, and not less than 95 cents an hour for the remaining 160 hours for sewing machine operator, and the remaining 80 hours for presser (men's handkerchiefs).

The following learner certificates were issued in Puerto Rico to the companies hereinafter named. The effective and expiration dates, learner rates, occupations, learning periods, and the number or proportion of learners authorized to be employed, are as indicated.

Abco Inc., P. O. Box 73, Hormigueros, P. R.; effective 7-23-58 to 1-22-59; authorizing the employment of 7 learners for plant expansion purposes in the occupations of, router operator, saws, drill press operator, jointers, drill press, sanding machine operator, hand sanding and polishing operators, and checkers, each for a learning period of 480 hours at the rates of 70 cents an hour for the first 240 hours and 80 cents an hour for the remaining 240 hours (drafting instruments).

Barca Knit Corp., P. O. Box 2945, Rio Piedras, P. R.; effective 7-22-58 to 1-21-59; authorizing the employment of 15 learners for plant expansion purposes in the occupations of, (1) power and hand knitting ma-

chine operators each for a learning period of 480 hours at the rates of 68 cents an hour for the first 240 hours and 80 cents an hour for the remaining 240 hours; (2) hand and machine sewing, and finishing each for a learning period of 320 hours at the rates of 68 cents an hour for the first 160 hours and 80 cents an hour for the remaining 160 hours (knitted outerwear (sweaters)).

Each learner certificate has been issued upon the representations of the employer which, among other things, were that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be annulled or withdrawn, as indicated therein, in the manner provided in Part 528 of Title 29 of the Code of Federal Regulations. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of 29 CFR 522.9.

Signed at Washington, D. C., this 12th day of August 1958.

MILTON BROOKE,
Authorized Representative of the Administrator.

PART I

FEDERAL REGISTER

VOLUME 23 NUMBER 164

Washington, Thursday, August 21, 1958

TITLE 24—HOUSING AND HOUSING CREDIT

Chapter I—Federal Home Loan Bank Board

Subchapter B—Federal Home Loan Bank System

[No. 11847]

PART 125—ADVANCES

UNSECURED ADVANCES FOR NOT MORE THAN THIRTY DAYS OR FOR NOT MORE THAN SIX MONTHS

AUGUST 15, 1958.

Resolved that, pursuant to Part 108 of the General Regulations of the Federal Home Loan Bank Board (24 CFR Part 108), the Federal Home Loan Bank Board, on the basis of consideration by it of the feasibility of increase in the maximum term of advances under § 125.32 of the Regulations for the Federal Home Loan Bank System (24 CFR 125.32) and for the purpose of liberalizing such maximum term, hereby amends said § 125.32 as follows, effective immediately:

Section 125.32 of the Regulations for the Federal Home Loan Bank System is hereby amended by amending the headnote of said section to read *"Advances for not more than thirty days or for not more than six months"* and by adding to said section, at the end thereof, the following two new sentences: "Advances under the foregoing provisions of this section may also be made with maturity of more than thirty days but not more than six months, provided the resulting aggregate of advances made under this sentence, together with the unpaid principal of any other advances having an unexpired maturity of more than thirty days, except advances made in accordance with or secured as provided in § 125.10, § 125.25, or § 125.26, does not exceed 5 per centum of the member's withdrawable accounts. The provisions of the second sentence of this section shall also apply to advances so made."

Resolved further that, as this amendment only relieves restriction, the Board hereby finds that notice and public procedure thereon are unnecessary under the provisions of § 108.12 of the General Regulations of the Federal Home Loan Bank Board (24 CFR 108.12) or section 4 (a) of the Administrative Procedure Act and, as such amendment relieves restriction, deferment of the effective date thereof is not required under section 4 (c) of said act.

(Secs. 11, 17, 47 Stat. 733, 736, as amended; 12 U. S. C. 1431, 1437)

By the Federal Home Loan Bank Board.

[SEAL] GRENVILLE L. MILLARD, Jr.,
Assistant Secretary.

Subchapter C—Federal Savings and Loan System

[No. 11848]

PART 145—OPERATIONS

LOANS ON PROPERTY FOR MORE THAN TWELVE FAMILIES

AUGUST 15, 1958.

Resolved that, pursuant to Part 108 of the General Regulations of the Federal Home Loan Bank Board (24 CFR Part 108) and § 142.1 of the Rules and Regulations for the Federal Savings and Loan System (24 CFR 142.1), the Federal Home Loan Bank Board, on the basis of consideration by it of the feasibility of increase in the maximum percentage of value and in the maximum term of loans by Federal savings and loan associations on the security of property designed or used primarily for residential purposes for more than twelve families, and for the purpose of liberalizing such maximum percentage and maximum term, hereby amends § 145.6–1 of the Rules and Regulations for the Federal Savings and

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements vary.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER, or the CODE OF FEDERAL REGULATIONS.

SEMIANNUAL CFR SUPPLEMENT

(As of July 1, 1958)

The following semiannual cumulative pocket supplement is now available:

Title 46, Parts 146–149, 1958 Supplement 1 ($1.00)

Order from Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Title 47

Chapter I:
- Part 16 — 6455

Loan System (24 CFR 145.6–1) as follows, effective August 21, 1958:

Section 145.6–1 of the Rules and Regulations for the Federal Savings and Loan System is hereby amended by inserting in said section, immediately after the semicolon following the first proviso of subdivision (iv) of subparagraph (1) of paragraph (b) of said section, the following language: "*Provided further*, That the foregoing limitations of 66⅔ percent and 15 years in this subdivision shall be 70 percent and 20 years in the case of such a loan on property designed or used primarily for residential purposes for more than twelve families;".

Resolved further that, as this amendment only relieves restriction, the Board hereby finds that notice and public procedure thereon are unnecessary under the provisions of § 108.12 of the General Regulations of the Federal Home Loan Bank Board (24 CFR 108.12) or section 4 (a) of the Administrative Procedure Act and, as such amendment relieves restriction, deferment of the effective date thereof is not required under section 4 (c) of said act.

(Sec. 5, 48 Stat. 132, as amended; 12 U. S. C. 1464)

By the Federal Home Loan Bank Board.

[SEAL] GRENVILLE L. MILLARD, JR.,
Assistant Secretary.

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

REPUBLICATION OF CERTAIN REGULATIONS

Because of numerous amendments certain regulations of Title 21, Chapter I, are republished for convenient reference as set forth below. This republication is made solely for editorial and codification purposes, and no change is made in the text of the regulations. This republication includes amendments and additions to and including August 8, 1958.

PART 120—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

DEFINITIONS, INTERPRETATIONS, AND EXEMPTIONS

Sec.
- 120.1 Definitions and interpretations.
- 120.2 Pesticide chemicals considered safe.
- 120.3 Tolerances for related pesticide chemicals.
- 120.4 Certification of usefulness and residue estimate.
- 120.5 Zero tolerances.
- 120.6 Exemptions from the requirement of a tolerance.

PROCEDURE FOR FILING PETITIONS

- 120.7 Petitions proposing tolerances or exemptions for pesticide residues in or on raw agricultural commodities.
- 120.8 Withdrawal of petitions without prejudice.
- 120.9 Substantive amendments to petitions.

ADVISORY COMMITTEES

- 120.10 Referral of petition to advisory committee.
- 120.11 Appointment of advisory committee.
- 120.12 Procedure for advisory committee.

PROCEDURE FOR FILING OBJECTIONS AND HOLDING A PUBLIC HEARING

- 120.13 Objections to regulations and requests for hearings.
- 120.14 Public hearing; notice.
- 120.15 Presiding officer.
- 120.16 Parties; burden of proof; appearances.
- 120.17 Prehearing and other conferences.
- 120.18 Submission of documentary evidence in advance.
- 120.19 Excerpts from documentary evidence.
- 120.20 Submission and receipt of evidence.
- 120.21 Transcript of the testimony.
- 120.22 Oral and written arguments.
- 120.23 Indexing of record.
- 120.24 Certification of record.
- 120.25 Filing the record of the hearing.
- 120.26 Copies of the record of the hearing.
- 120.27 Proposed order.
- 120.28 Final order.

ADOPTION OF TOLERANCE ON INITIATIVE OF SECRETARY OR ON REQUEST OF INTERESTED PERSONS; JUDICIAL REVIEW; TEMPORARY TOLERANCES; AMENDMENT AND REPEAL OF TOLERANCES; FEES

- 120.29 Adoption of tolerance on initiative of the Secretary or on request of an interested person.
- 120.30 Judicial review.
- 120.31 Temporary tolerances.
- 120.32 Procedure for amending and repealing tolerances or exemptions from tolerances.
- 120.33 Fees.
- 120.34 Tests on the amount of residue remaining.

TOLERANCES FOR RESIDUES

Sec.
- 120.101 Specific tolerances for pesticide residues in or on fresh fruits and vegetables.
- 120.102 Tolerances for residues of sesone.
- 120.103 Tolerances for residues of captan.
- 120.104 Tolerances for residues of heptachlor.
- 120.105 Tolerances for residues of Systox (*O,O*-diethyl (2-ethylmercaptoethyl) thiophosphate, a mixture of thiono and thiol isomers).
- 120.106 Tolerances for residues of diuron.
- 120.107 Tolerances for residues of Aramite.
- 120.108 Tolerances for residues of monuron (3-(*p*-chlorophenyl) -1,1-dimethylurea).
- 120.109 Tolerances for residues of Chlorobenzilate (ethyl 4,4'-dichlorobenzilate.
- 120.110 Tolerances for residues of maneb.
- 120.111 Tolerances for residues of malathion.
- 120.112 Tolerances for residues of Sulphenone (*p*-chlorophenyl phenyl sulfone).
- 120.113 Tolerances and exemptions from the requirement of a tolerance for residues of allethrin (allyl homolog of cinerin I).
- 120.114 Tolerance for residues of ferbam.
- 120.115 Tolerances for residues of zineb.
- 120.116 Tolerances for residues of ziram.
- 120.117 Tolerance for residues of chlortetracycline.
- 120.118 Tolerances for residues of dichlone.
- 120.119 Tolerances for residues of EPN (*O*-ethyl-*O*-*p*-nitrophenyl benzene thiophosphonate).
- 120.120 Tolerances for residues of methoxychlor.
- 120.121 Tolerances for residues of parathion.
- 120.122 Tolerance for residues of chlordane.
- 120.123 Tolerances for residues of inorganic bromides resulting from fumigation with methyl bromide.
- 120.124 Tolerance for residues of glyodin.
- 120.125 Tolerances for residues of calcium cyanide.
- 120.126 Tolerances for residues of inorganic bromides resulting from soil treatment with ethylene dibromide.
- 120.127 Tolerances for residues of piperonyl butoxide.
- 120.128 Tolerances for residues of pyrethrins.
- 120.129 Tolerances for residues of sodium o-phenylphenate.
- 120.130 Tolerances for residues of hydrogen cyanide.
- 120.131 Tolerances for residues of endrin.
- 120.132 Tolerances for residues of thiram.
- 120.133 Tolerance for residues of lindane.
- 120.134 Tolerances for residues of *p*-chlorophenyl - *p*-chlorobenzenesulfonate.
- 120.135 Tolerances for residues of aldrin.
- 120.136 Tolerance for residues of basic copper carbonate.
- 120.137 Tolerances for residues of dieldrin.
- 120.138 Tolerances for residues of toxaphene.
- 120.139 Tolerances for residues of 1,1-dichloro-2,2-bis (*p*-ethylphenyl) ethane.
- 120.140 Exemption from the requirement of a tolerance for residues of ammonia.
- 120.141 Tolerances for residues of diphenyl.
- 120.142 Exemption from the requirement of a tolerance for residues of carbon disulfide.
- 120.143 Exemption from the requirement of a tolerance for residues of carbon tetrachloride.
- 120.144 Exemption from the requirement of a tolerance for the organic bromide residues from ethylene dibromide.
- 120.145 Exemption from the requirement of a tolerance for residues of ethylene dichloride.
- 120.146 Tolerances for residues of inorganic bromides resulting from fumigation with ethylene dibromide.
- 120.147 Tolerances for residues of DDT.
- 120.148 Tolerance for residues of oxytetracycline.
- 120.149 Tolerances for residues of mineral oil.
- 120.150 Tolerances for residues of sodium 2,2-dichloropropionate.
- 120.151 Tolerances for residues of ethylene oxide.
- 120.152 Tolerance for residues of sodium dimethyldithiocarbamate.
- 120.153 Tolerances for residues of *O,O*-diethyl *O*-(2-isopropyl-4-methyl-6-pyrimidinyl) phosphorothioate.
- 120.154 Tolerances for residues of *O,O*-dimethyl *S*-(4-oxo-1,2,3-benzotriazinyl-3-methyl) phosphorodithioate.
- 120.155 Exemption from the requirement of a tolerance for residues of chloropicrin.
- 120.156 Tolerances for residues of *S*-(*p*-chlorophenylthio) methyl *O,O*-diethyl phosphorodithioate.
- 120.157 Tolerances for residues of 1-methoxycarbonyl - 1 - propen - 2 -yl-dimethylphosphate and its beta isomer.
- 120.158 Tolerances for residues of 2,4-dichloro-6-(*o*-chloroanilino) triazine.
- 120.159 Tolerance for residues of sodium dehydroacetate.
- 120.160 Tolerance for residues of mercaptobenzothiasole.
- 120.161 Tolerance for residues of manganous dimethyldithiocarbamate.
- 120.162 Tolerance for residues of tetraiodoethylene.
- 120.163 Tolerances for residues of 1,1-bis (*p*-chlorophenyl) -2,2,2-trichloroethanol.
- 120.164 Tolerances for residues of *O,O*-diethyl *S*-2-diethylaminoethyl phosphorothioate hydrogen oxalate.
- 120.165 Tolerance for residues of sodium 2,4-dichlorophenoxyacetate.

AUTHORITY: §§ 120.1 to 120.165 issued under sec. 701, 52 Stat. 1055, as amended; 21 U. S. C. 371. Interpret or apply sec. 408, 68 Stat. 511; 21 U. S. C. 346a.

DEFINITIONS, INTERPRETATIONS, AND EXEMPTIONS

§ 120.1 *Definitions and interpretations.* (a) Secretary, without qualification, means the Secretary of Health, Education, and Welfare.

(b) Department, without qualification, means the Department of Health, Education, and Welfare.

(c) Commissioner means the Commissioner of Food and Drugs.

(d) Pesticide Branch means the unit established within the Food and Drug Administration charged with administration of the Pesticide Residue amendment to the Federal Food, Drug, and Cosmetic Act (section 408).

(e) Raw agricultural commodities include, among other things, fresh fruits, whether or not they have been washed and colored or otherwise treated in their unpeeled natural form; vegetables in their raw or natural state, whether or not they have been stripped of their

outer leaves, waxed, prepared into fresh green salads, etc.; grains, nuts, eggs, raw milk, meats, and similar agricultural produce. It does not include foods that have been processed, fabricated, or manufactured by cooking, freezing, dehydrating, or milling.

(f) Where raw agricultural commodities bearing residues that have been exempted from the requirement of a tolerance, or which are within a tolerance permitted under section 408 are used, the processed foods will not be considered unsafe within the meaning of section 406 if:

(1) The poisonous or deleterious pesticide residues have been removed to the extent possible in good manufacturing practice; and

(2) The concentration of the pesticide in the preserved or processed food when ready to eat is not greater than the tolerance permitted on the raw agricultural commodity.

(g) For the purpose of computing fees as required by § 120.33, each group of crops listed in § 120.34 (e) is counted as a single raw agricultural commodity in a petition or request for tolerances or exemption from the requirement of a tolerance for a nonsystemic pesticide. As a general rule, when considering a petition or request with respect to a systemic pesticide (see § 120.34 (c)) crops shall not be grouped.

§ 120.2 *Pesticide chemicals considered safe.* (a) As a general rule, pesticide chemicals other than sulfur, lime, lime-sulfur, potassium polysulfide, sodium carbonate, and sodium polysulfide are not, for the purposes of section 408 (a) of the act, generally recognized as safe for use.

(b) Upon written request, the Pesticide Branch will advise interested persons whether a pesticide chemical should be considered as poisonous or deleterious, or one not generally recognized by qualified experts as safe.

(c) The training and experience necessary to qualify experts to evaluate the safety of pesticide chemicals for the purposes of section 408 (a) are essentially the same as training and experience necessary to qualify experts to serve on advisory committees prescribed by section 408 (g). (See § 120.11.)

§ 120.3 *Tolerances for related pesticide chemicals.* (a) Pesticide chemicals that cause related pharmacological effects will be regarded, in the absence of evidence to the contrary, as having an additive deleterious action. (For example, pesticide chemicals within each of the following groups have related pharmacological effects: Many chlorinated hydrocarbons, arsenic-containing chemicals, metallic dithiocarbamates, many organic phosphates.)

(b) Tolerances established for such related pesticide chemicals may limit the amount of a common component (such as As_2O_3) that may be present, or may limit the amount of biological activity (such as cholinesterase inhibition) that may be present, or may limit the total amount of related pesticide chemicals (such as chlorinated hydrocarbons) that may be present.

(c) Where tolerances for inorganic bromide in or on the same raw agricultural commodity are set in two or more sections in this part, the over-all quantity of inorganic bromide to be tolerated from use of two or more pesticide chemicals for which tolerances are established is the highest of the separate applicable tolerances. For example, where the bromide tolerance on lima beans from ethylene dibromide soil treatment is 5 parts per million and on lima beans from methyl bromide fumigation is 50 parts per million, the over-all inorganic bromide tolerance for lima beans grown on ethylene dibromide treated soil and also fumigated with methyl bromide after harvest is 50 parts per million.

(d) Where tolerances are established for both calcium cyanide and hydrogen cyanide on the same raw agricultural commodity, the total amount of such pesticides shall not yield more than 25 parts per million, calculated as hydrogen cyanide.

(e) Except as noted in subparagraphs (1) and (2) of this paragraph, where residues from two or more chemicals in the same class are present in or on a raw agricultural commodity the tolerance for the total of such residues shall be the same as that for the chemical having the lowest numerical tolerance in this class.

(1) Where residues from two or more chemicals in the same class are present in or on a raw agricultural commodity and there are available methods that permit quantitative determination of each residue, the quantity of combined residues that are within the tolerance may be determined as follows:

(i) Determine the quantity of each residue present.

(ii) Divide the quantity of each residue by the tolerance that would apply if it occurred alone, and multiply by 100 to determine the percentage of the permitted amount of residue present.

(iii) Add the percentages so obtained for all residues present.

(iv) The sum of the percentages shall not exceed 100 percent.

(2) Where residues from two or more chemicals in the same class are present in or on a raw agricultural commodity and there are available methods that permit quantitative determinations of one or more, but not all of the residues, the amounts of such residues as may be determinable shall be deducted from the total amount of residues present, and the remainder shall have the same tolerance as that for the chemical having the lowest numerical tolerance in that class. The quantity of combined residues that are within the tolerance may be determined as follows:

(i) Determine the quantity of each determinable residue present.

(ii) Deduct the amounts of such residues from the total amount of residues present and consider the remainder to have the same tolerance as that for the chemical having the lowest numerical tolerance in that class.

(iii) Divide the quantity of each determinable residue by the tolerance that would apply if it occurred alone and the quantity of the remaining residue by the tolerance for the chemical having the lowest numerical tolerance in that class and multiply by 100 to determine the percentage of the permitted amount of residue present.

(iv) Add the percentages so obtained for all residues present.

(v) The sum of the percentages shall not exceed 100 percent.

(3) The following compounds are members of the class of dithiocarbamates.

Ferbam.
Maneb.
Manganous dimethyldithiocarbamate.
Sodium dimethyldithiocarbamate.
Thiram.
Zineb.
Ziram.

(4) The following compounds are members of the class of chlorinated hydrocarbons:

Aldrin.
Benzene hexachloride.
1,1-bis(*p*-Chlorophenyl)-2,2,2-trichloroethanol.
Chlordane.
Chlorinated camphene (toxaphene).
Chlorobenzilate (ethyl 4,4'-dichlorobenzilate).
p-Chlorophenyl *p*-chlorobenzenesulfonate.
DDD (TDE).
DDT.
1,1-Dichloro-2,2-bis(*p*-ethylphenyl) ethane.
2,4-Dichlorophenoxyacetic acid.
Dieldrin.
Heptachlor.
Lindane.
Methoxychlor.
Sesone (sodium 2,4-dichlorophenoxyethyl sulfate, SES).
Sodium 2,4-dichlorophenoxyacetate.
Sulphenone (*p*-chlorophenyl phenyl sulfone).

(5) The following compounds are members of the class of organic phosphates:

S-(*p*-Chlorophenylthio) methyl *O,O*-diethyl phosphorodithioate.
O,O-Diethyl *S*-2-diethylaminoethyl phosphorothioate hydrogen oxalate.
O,O-Diethyl *O*-(2-isopropyl-4-methyl-6-pyrimidinyl) phosphorothioate.
O,O-Dimethyl *S*-(4-oxo-1,2,3-benzotriazin-3-yl-methyl) phosphorodithioate.
EPN.
Malathion.
1-Methoxycarbonyl-1-propen-2-yl-dimethyl phosphate and its beta isomer.
Methyl parathion.
Parathion.
Systox (*O,O*-diethyl (2-ethylmercaptoethyl) thiophosphate, a mixture of the thiono and thiol isomers).

(6) The following compounds are members of the class of dinitro compounds:

Dinitro-*o*-cyclohexylphenol.
Dicyclohexylamine salt of dinitro-*o*-cyclohexylphenol.

§ 120.4 *Certification of usefulness and residue estimate.* The time period for the Department's consideration of a petition will not begin to run until the Secretary of Agriculture certifies that the pesticide chemical involved is useful and gives an opinion whether the tolerance proposed by the petitioner reasonably reflects the amount of residue likely to result when the pesticide chemical is used in the manner proposed. The tolerance thereafter established ordinarily will not exceed that figure which the Secretary of Agriculture states, in his opinion, reasonably reflects the amounts of residue likely to result.

§ 120.5 *Zero tolerances.* A zero tolerance means that no amount of the pesticide chemical may remain on the raw agricultural commodity when it is offered for shipment. A zero tolerance for a pesticide chemical in or on a raw agricultural commodity may be established because, among other reasons:

(a) A safe level of the pesticide chemical in the diet of two different species of warm-blooded animals has not been reliably determined.

(b) The chemical is carcinogenic to or has other alarming physiological effects upon one or more of the species of the test animals used, when fed in the diet of such animals.

(c) The pesticide chemical is toxic, but is normally used at times when, or in such manner that, fruit, vegetables, or other raw agricultural commodities will not bear or contain it.

(d) All residue of the pesticide chemical is normally removed through good agricultural practice such as washing or brushing or through weathering or other changes in the chemical itself, prior to introduction of the raw agricultural commodity into interstate commerce.

§ 120.6 *Exemptions from the requirement of a tolerance.* (a) An exemption from a tolerance shall be granted when it appears that the total quantity of the pesticide chemical in or on all raw agricultural commodities for which it is useful under conditions of use currently prevailing or proposed will involve no hazard to the public health.

(b) When applied to growing crops, in accordance with good agricultural practice, the following pesticide chemicals are exempt from the requirement of a tolerance:

(1) The following copper compounds: Bordeaux mixture, copper acetate, basic copper carbonate (malachite), copper-lime mixtures, copper oxychloride, copper silicate, copper sulfate basic, copper-zinc chromate, cuprous oxide, tetra copper calcium oxychloride.

(2) *N*-Octylbicyclo-(2,2,1)-5-heptene-2,3-dicarboximide).

(3) Petroleum oils.

(4) Piperonyl butoxide.

(5) Piperonyl cyclonene.

(6) *N*-Propyl isome.

(7) Pyrethrum and pyrethrins.

(8) Rotenone or derris or cube roots.

(9) Ryania.

(10) Sabadilla.

These pesticides are not exempted from the requirement of a tolerance when applied to a crop at the time of or after harvest.

PROCEDURE FOR FILING PETITIONS

§ 120.7 *Petitions proposing tolerances or exemptions for pesticide residues in or on raw agricultural commodities.* (a) Petitions to be filed with the Department under the provisions of section 408 (d) shall be submitted in duplicate to the Pesticide Branch. If any part of the material submitted is in a foreign language, it shall be accompanied by an accurate and complete English translation. The petition shall be accompanied by an advance deposit for fees described in § 120.33. The petition shall state petitioner's mail address to which notice of objection under section 408 (d) (5) may be sent.

(b) Petitions shall include the following data and be submitted in the following form:

_____
(Date)

Pesticide Branch,
Food and Drug Administration,
Department of Health, Education, and Welfare,
Washington 25, D. C.

Dear Sirs:

The undersigned, _____, submits this petition pursuant to section 408 (d) (1) of the Federal Food, Drug, and Cosmetic Act with respect to the pesticide chemical _____

Attached hereto, in duplicate and constituting a part of this petition, are the following:

A. The name, chemical identity, and composition of the pesticide chemical. (If the pesticide chemical is an ingredient of an economic poison, the complete quantitative formula of the resulting economic poison should be submitted. The submission of this information does not restrict the application of any tolerance or exemption granted to the specific formula(s) submitted.)

B. The amount, frequency, and time of application of the pesticide chemical.

C. Full reports of investigations made with respect to the safety of the pesticide chemical. (These reports should include, where necessary, detailed data derived from appropriate animal or other biological experiments in which the methods used and the results obtained are clearly set forth.)

D. The results of tests on the amount of residue remaining, including a description of the analytical method used. (See § 120.34 for further information about residue tests.)

E. Practicable methods for removing residue that exceeds any proposed tolerance.

F. Proposed tolerances for the pesticide chemical if tolerances are proposed.

G. Reasonable grounds in support of the petition.

Enclosed is (money order, bank draft, or certified check) for $_____, payable to the Food and Drug Administration to cover clerical operations, initial administrative review, and the cost incurred in considering the petition after it has been filed.

Very truly yours,

_____
(Petitioner)
Per _____
_____
(Indicate authority)
Mail address _____

This petition must be signed by the petitioner or by his attorney or agent, or (if a corporation) by an authorized official.

The data specified under the several lettered headings should be on separate sheets or sets of sheets, suitably identified. If such data have already been submitted with an earlier application, the present petition may incorporate it by reference to the earlier one.

The petition shall be submitted in duplicate. The petitioner shall show that he has registered or has submitted an application for the registration of an economic poison containing the pesticide chemical under the Federal Insecticide, Fungicide, and Rodenticide Act.

(c) Except as noted in paragraph (d) of this section, a petition shall not be accepted for filing if any of the data prescribed by section 408 (d) are lacking or are not set forth so as to be readily understood. Data in a petition entitled to protection as a trade secret will be held confidential and not revealed unless it is necessary to do so in administrative or judicial proceedings under section 408.

(d) The Pesticide Branch shall notify the petitioner within 15 days after its receipt of acceptance or nonacceptance of a petition, and if not accepted the reasons therefor. Copy of the notice shall be sent to the Plant Pest Control Branch, Agricultural Research Service, Department of Agriculture. If accepted, the date of notification becomes the date of filing for the purposes of section 408 (d) (1). If petitioner desires, he may supplement a deficient petition after notification as to deficiencies. Each supplement shall be accompanied by a deposit of fees as specified in § 120.33 (e). If the supplementary material or explanation of petition is deemed acceptable, petitioner shall be notified, and date of such notification becomes the date of filing. If the petitioner does not wish to supplement or explain the petition and requests in writing that it be filed as submitted, the petition shall be filed and the petitioner so notified. The date of such notification becomes the date of filing. The Commissioner shall publish in the FEDERAL REGISTER within 30 days a notice of filing, name of petitioner, and a brief outline of the petition, including description of analytical method or reference to a publication in which it appears, if such publication is generally available.

(e) The Pesticide Branch may request a sample of the pesticide chemical at any time while a petition is under consideration. The Pesticide Branch shall specify in its request for a sample of the pesticide chemical, a quantity which it deems adequate to permit tests of analytical methods used to determine residues of the pesticide chemical and of methods proposed by the petitioner for removing any residues of the chemical that exceed the tolerance proposed. The date used for computing the 90-day limit for the purposes of section 408 (d) (2) shall be moved forward 1 day for each day in excess of 15 from the mailing date of the request taken by the petitioner to submit the sample. If the sample is not submitted within 180 days after mailing date of the request, the petition will be considered withdrawn without prejudice.

(f) The date of receipt from the Secretary of Agriculture of certification as to usefulness shall be the date used for computing the 90-day limit for the purposes of section 408 (d) (2).

(g) Unless the petition is referred to an advisory committee, the Commissioner shall publish in the FEDERAL REGISTER within 90 days after receipt of the certification of usefulness, a regulation establishing a tolerance for residues of of the pesticide chemical or exempting such residues from the necessity of a tolerance, as provided in section 408 (d) (2) of the act.

§ 120.8 *Withdrawal of petitions without prejudice.* In some cases the Pesticide Branch or an advisory committee to which the petition has been referred will

notify the petitioner that the petition, while technically complete, is inadequate to justify the establishment of a tolerance or the tolerance requested by petitioner. This may be due to the fact that the data are not sufficiently clear or complete. In such cases, the petitioner may withdraw the petition pending its clarification or the obtaining of additional data. This withdrawal may be without prejudice to a future filing. Upon refiling, the time limitation will begin to run anew from the date of refiling or the date of receipt of certification from the Secretary of Agriculture, whichever is later. A deposit for fees as specified in § 120.33 (f) shall accompany the resubmission of the petition.

§ 120.9 *Substantive amendments to petitions.* After a petition has been filed or referred to an advisory committee, the petitioner may submit additional information or data in support thereof, but in such cases the petition will be given a new filing date or a new initial date of consideration by the advisory committee, and the time limitation will begin to run anew. The additional data shall be accompanied by a deposit of fees as specified in § 120.33 (g).

ADVISORY COMMITTEES

§ 120.10 *Referral of petition to advisory committee.* (a) If within the prescribed period a person filing a petition requests that the petition be referred to an advisory committee, he shall make such request in writing to the Commissioner and forward with such request an advance deposit for fees prescribed by § 120.33 (i) (3).

(b) If further advance deposits are not made upon request of the Commissioner, as provided for in § 120.33 (i) (3), the request for referral of the petition to an advisory committee shall be considered withdrawn, and a tolerance shall be established within 90 days of the date on which the Commissioner requested the further advance deposit.

(c) In case the Commissioner on his own initiative deems it necessary to refer a petition to an advisory committee, he shall, in writing, so inform the person filing the petition.

§ 120.11 *Appointment of advisory committee.* (a) Whenever the referral of a petition or proposal to an advisory committee is requested or the Commissioner otherwise deems such referral necessary, the Commissioner will request the National Academy of Sciences to select qualified experts, including at least one representative from land-grant colleges, willing to serve on the advisory committee. All such experts shall have had sufficient training and experience in biology, medicine, physiology, toxicology, pharmacology, veterinary medicine, or other appropriate science to evaluate the safety of pesticide chemicals. The Commissioner will request the National Academy of Sciences, when it furnishes the names of such experts, to supply a biographical sketch showing the background of their experience and their connection, if any, with academic and commercial institutions.

(b) Each advisory committee shall consist of not less than three experts, at least one of whom is a representative from a land-grant college. The Commissioner may specify a larger number to serve. He shall appoint one member of the committee as chairman, and the chairman shall be the spokesman of the committee for receiving and forwarding reports, and other functions of the committee.

(c) The Commissioner shall appoint the experts so selected and fix their compensation at not to exceed $50.00 per day for each day or part thereof spent in committee meetings and in traveling to and from committee meetings held outside the city of their residence, plus necessary traveling and subsistence expenses while the experts are serving away from their places of residence. Subsistence expenses shall not exceed $25.00 per day.

§ 120.12 *Procedure for advisory committee.* (a) The Commissioner shall submit to the chairman of the committee the petition for tolerances, together with certification by the Secretary of Agriculture and such other relevant, reliable information as may be available. When the Commissioner submits a proposal to an advisory committee, he shall inform the petitioner and furnish him with copies of material other than the petition and certification that is furnished the committee. The chairman of the committee shall acknowledge receipt of the information and readiness of the committee to act. The date of receipt of such information shall be considered the beginning of the period allowed for consideration by the committee. Copy of this acknowledgment shall be forwarded to the petitioner by the chairman of the committee.

(b) A secretariat to advisory committees will be established by the Commissioner. The secretariat shall furnish members of the committee with copies of the proposal or petition, certification from the Secretary of Agriculture, and any data received by the chairman. If the chairman of the committee believes that a meeting of the committee is necessary before making a recommendation, he shall so advise the Commissioner. Such meetings shall be held in Washington, D. C., or such other place as the Commissioner may designate. The Commissioner shall furnish a suitable meeting place for the committee. If a meeting is held, the secretariat shall keep the minutes and provide clerical assistance.

(c) As soon as practicable, but not later than 60 days after receipt of proposal or petition (unless the time has been extended as provided in paragraph (d) of this section), the chairman shall certify to the Commissioner the report of the committee, including any minority report, and shall return the petition for tolerances and the certification by the Secretary of Agriculture. The report will include copies of all relevant material considered by the committee, except that in the case of scientific literature readily available in scientific libraries proper reference may be made to it instead of furnishing actual copies. The report of the advisory committee shall be available for inspection by any interested person after a tolerance or exemption resulting from the petition is published.

(d) If at any time within 60 days, the chairman believes that the advisory committee needs more time, he shall so inform the Commissioner in writing, in which case he shall make the certification contemplated by section 408 (d) (3) of the act within the additional 30 days.

(e) The date of receipt of the committee report will be the date for computing time for the Commissioner to act for the purposes of both sections 408 (d) (3) and (e).

(f) The chairman of the committee, after consultation with the committee members, will inform the National Academy of Sciences of the committee's opinion as to the member who may best represent the committee at a hearing, if one occurs.

(g) More than one petition or proposal may be handled by a committee concurrently.

(h) Persons authorized under section 408 (h) to discuss proposals or petitions with the committee shall notify the chairman and if practicable make appointments through him. The report of the committee shall show the names of persons other than committee members discussing proposals or petitions with the committee. Except for discussions with authorized persons the committee shall not disclose data originating with a petitioner prior to publication of a regulation.

PROCEDURE FOR FILING OBJECTIONS AND HOLDING A PUBLIC HEARING

§ 120.13 *Objections to regulations and requests for hearings.* (a) Objections under section 408 (d) (5) shall be submitted in quintuplicate to the hearing clerk of the Department and shall be accompanied by a filing fee as specified in § 120.33 (h). Each objection to a provision of the regulation shall be separately numbered.

(b) A statement of objections shall not be accepted for filing if:

(1) It fails to establish that the objector is adversely affected by the regulation; or

(2) It does not specify with particularity the provisions of the regulation to which objection is taken; or

(3) It does not state reasonable grounds for each objection raised. Grounds which it is reasonable to conclude are capable of being established by reliable evidence at the hearing and which if proved would call for changing the provisions specified in the objections will be deemed reasonable grounds.

(c) If the statement of objections may not be filed, the Commissioner shall inform the objector of the reasons.

(d) If objections to a regulation issued pursuant to a petition are filed by a person other than the petitioner, the Food and Drug Administration shall send a copy of the objections by registered mail, return receipt requested, to the petitioner at the address given in the petition. Petitioner shall have 2 weeks from the date of receipt of the objections to make written reply.

§ 120.14 *Public hearing; notice.* If the objections and statements filed by any person, when they are considered with the record in the proceeding (including any reply to the objections that the petitioner may have filed) show that the person filing the objections is adversely affected and that the grounds stated in support of the objections are reasonable, the Commissioner shall cause to be published in the FEDERAL REGISTER a notice reciting the objections and announcing a public hearing to receive evidence on them. The notice shall designate the place where the hearing will be held, specify the time within which appearances must be filed, and specify the time (not earlier than 30 days after the date of the notice) when the hearing will start. The hearing shall convene at the place and time announced in the notice but thereafter it may be moved to a different place and may be continued from day to day or recessed to a later day without other notice than announcement thereof by the presiding officer at the hearing.

§ 120.15 *Presiding officer.* The hearing shall be conducted by a presiding officer, who shall be a hearing examiner appointed as provided in the Administrative Procedure Act and designated by the Commissioner for conducting the hearing. Any such designation may be made or revoked by the Commissioner at any time. Hearings shall be conducted in an informal but orderly manner in accordance with these regulations and the requirements of the Administrative Procedure Act. The presiding officer shall have the power to administer oaths and affirmations; to request the member of an advisory committee designated as provided by section 408 (d) (5) to testify with respect to the report and recommendations of the committee; to rule upon offers of proof and admissibility of evidence; to receive relevant evidence; to examine witnesses; to regulate the course of the hearing; to hold conferences for the simplification of the issues, and to dispose of procedural requests; but he shall not have power to decide any motion that involves final determination of the merits of the proceeding.

§ 120.16 *Parties; burden of proof; appearances.* At the hearing, the person whose objections raised the issues to be determined shall be, within the meaning of section 7 (c) of the Administrative Procedure Act, the proponent of the order sought, and accordingly shall have the burden of proof. Any interested person shall be given an opportunity to appear at the hearing, either in person or by his authorized representative, and to be heard with respect to matters relevant to the issues raised by the objections. Any interested person who desires to be heard at the hearing in person or through a representative shall, within the time specified in the notice of hearing, file with the presiding officer a written notice of appearance setting forth his name, address, and employment. If such person desires to be heard through a representative, such person or such representative shall file with the presiding officer a written appearance setting forth the name, address, and employment of such person. Any person or representative shall state with particularity in the appearance his interest in the proceedings and shall set forth the specific provisions of the regulations concerning which objections have been made on which such person desires to be heard. The appearance shall also set forth with particularity the position to be taken concerning the objections on which he wishes to be heard. No person shall be heard if he failed to file his appearance within the time prescribed in the absence of a clear showing of good cause why the appearance was not filed. All present at the hearing shall conform to all reasonable standards of orderly and ethical conduct.

§ 120.17 *Prehearing and other conferences.* (a) The presiding officer, on his own motion, or on the motion of any party or his representative, may direct all parties or their representatives to appear at a specified time and place for a conference to consider:

(1) The simplification of the issues.

(2) The possibility of obtaining stipulations, admissions of facts and documents.

(3) The limitation of the number of expert witnesses.

(4) The scheduling of witnesses to be called.

(5) The advance submission of all documentary evidence.

(6) Such other matters as may aid in the disposition of the proceeding.

The presiding officer shall make an order which recites the action taken at the conference, the agreements made by the parties or their representatives, and the schedule of witnesses, and which limits the issues for hearing to those not disposed of by admissions or agreements. Such order shall control the subsequent course of the proceeding unless modified for good cause by subsequent order.

(b) The presiding officer may also direct all parties and their representatives to appear at conferences at any time during the hearing with a view to simplification, clarification, or shortening of the hearing.

§ 120.18 *Submission of documentary evidence in advance.* (a) All documentary evidence to be offered at the hearing shall be submitted to the presiding officer and to the parties sufficiently in advance of the offer of such documentary evidence for introduction into the record to permit study and preparation of cross-examination and rebuttal evidence.

(b) The presiding officer, after consultation with the parties at a conference called in accordance with § 120.17, shall make an order specifying the time at which documentary evidence shall be submitted. He shall also specify in his order the time within which objection to the authenticity of such documents must be made to comply with paragraph (d) of this section.

(c) Documentary evidence not submitted in advance in accordance with the requirements of paragraphs (a) and (b) of this section shall not be received in evidence in the absence of a clear showing that the offering party had good cause for his failure to produce the evidence sooner.

(d) The authenticity of all documents submitted in advance shall be deemed admitted unless written objection thereto is filed with the presiding officer upon notice to the other parties within the time specified by the presiding officer in accordance with paragraph (b) of this section, except that a party will be permitted to challenge such authenticity at a later time upon a clear showing of good cause for failure to have filed such written objection.

§ 120.19 *Excerpts from documentary evidence.* When portions only of a document are to be relied upon, the offering party shall prepare the pertinent excerpts, adequately identified, and shall supply copies of such excerpts, together with a statement indicating the purpose for which such materials will be offered, to the presiding officer and to the other parties. Only the excerpts, so prepared and submitted, shall be received in the record. However, the whole of the original document should be made available for examination and for use by opposing counsel for purposes of cross-examination.

§ 120.20 *Submission and receipt of evidence.* (a) Each witness shall, before proceeding to testify, be sworn or make affirmation.

(b) When necessary to prevent undue prolongation of the hearing, the presiding officer may limit the number of times any witness may testify, the repetitious examination and cross-examination of witnesses, or the amount of corroborative or cumulative evidence.

(c) The presiding officer shall admit only evidence which is relevant, material, and not unduly repetitious.

(d) Opinion evidence shall be admitted when the presiding officer is satisfied that the witness is properly qualified.

(e) The presiding officer shall file as exhibits the FEDERAL REGISTER promulgating the regulation to which objections were taken and any report, recommendations, underlying data, and reasons that were certified to the Secretary by an advisory committee pursuant to section 408 (d) (3). The report, recommendations, underlying data, and reasons shall be subject to section 7 (c) of the Administrative Procedure Act. All documents constituting the record accumulated up to the start of the hearing shall be open for inspection by interested persons during office hours in the office of the hearing clerk of the Department.

(f) The member of an advisory committee, if any, designated to testify, or any member requested to testify by the petitioner, the Department, or the presiding officer, or who upon his own initiative requests to be heard, shall appear and testify with respect to the report, recommendations, underlying data, and reasons of the committee. The designated member shall receive per diem and travel and subsistence expenses when incurred, as though he were attending a meeting of the advisory committee.

(g) If any person objects to the admission or rejection of any evidence or to other limitation of the scope of any

examination or cross-examination, he shall state briefly the grounds for such objection, and the transcript shall not include extended argument or debate thereon except as ordered by the presiding officer. A ruling of the presiding officer on any such objection shall be a part of the transcript, together with such offer of proof as has been made.

§ 120.21 *Transcript of the testimony.* Testimony given at a hearing shall be reported verbatim. All written statements, charts, tabulations, and similar data offered in evidence at the hearing shall be marked for identification and, upon a showing satisfactory to the presiding officer of their authenticity, relevancy, and materiality, shall be received in evidence subject to the Administrative Procedure Act (sec. 7 (c), 60 Stat. 238; 5 U. S. C. 1006 (c)). Exhibits shall, if practicable, be submitted in quintuplicate. In case the required number of copies are not made available, the presiding officer shall exercise his discretion as to whether said exhibit shall be read in evidence or whether additional copies shall be required to be submitted within a time to be specified by the presiding officer. Where the testimony of a witness refers to a statute or to a report or document, the presiding officer shall, after inquiry relating to the identification of such statute, report, or document, determine whether the same shall be produced at the hearing and physically be made a part of the evidence by reference. Where relevant and material matter offered in evidence is embraced in a report or document containing immaterial and irrelevant matter, such immaterial and irrelevant matter shall be excluded and shall be segregated insofar as practicable, subject to the direction of the presiding officer.

§ 120.22 *Oral and written arguments.* (a) Unless the presiding officer issues an announcement at the hearing authorizing oral argument before him, it shall not be permitted.

(b) The presiding officer shall announce at the hearing a reasonable period within which interested persons may file written arguments based solely upon the evidence received at the hearing, citing the pages of the transcript of the testimony or properly identified exhibits where such evidence occurs.

§ 120.23 *Indexing of record.* (a) Whenever it appears to the presiding officer that the record of hearing will be of such length that an index to the record will permit a more orderly presentation of the evidence and reduce delay, the presiding officer shall require counsel for the parties to prepare a daily topical index which will be available to the presiding officer and all parties. Preparation of such an index shall be apportioned among all counsel present in such manner as appears just and proper in the circumstances.

(b) The index should include each topic of testimony upon which evidence is taken, the name of each witness testifying upon the topic, the page of the record at which each portion of his testimony appeared, and the number of each exhibit relating to the topic. The index should also contain the name of each witness, followed by the topics upon which he testified and the page of the record at which such testimony appears.

§ 120.24 *Certification of record.* At the close of the hearing, the presiding officer shall afford interested persons a short time (not longer than 1 week, except in unusual cases) in which to point out errors that may have been made in transcribing the testimony. The presiding officer shall promptly thereafter order such corrections made as in his judgment are required to make the transcript conform to the testimony, and he shall certify the transcript of testimony and the exhibits to the Commissioner.

§ 120.25 *Filing the record of the hearing.* As soon as practicable after the close of the hearing, the complete record of the hearing shall be filed in the office of the Hearing Clerk. The record shall include the transcript of the testimony, and exhibits, and any written arguments that may have been filed.

§ 120.26 *Copies of the record of the hearing.* The Department will make provisions for a stenographic record of the testimony and for such copies of the transcript thereof as it requires for its own purposes. Any person desiring a copy of the record of the hearing or of any part thereof shall be entitled to the same upon payment of the costs thereof.

§ 120.27 *Proposed order.* As soon as practicable after the time for filing written arguments has ended the Commissioner shall prepare and cause to be published in the FEDERAL REGISTER a proposed order which shall incorporate findings of fact, recommend decisions on the objections which were the subject of the hearing and tentative regulations. The proposed order shall specify a reasonable time, ordinarily not to exceed 30 days, within which any interested person may file exceptions. The exceptions shall point out with particularity the alleged errors in said proposed order and shall contain a specific reference to the pages of the transcript of the testimony or to the exhibits on which each exception is based. Such exceptions may be accompanied by a memorandum brief.

§ 120.28 *Final order.* As soon as practicable after the time for filing exceptions has passed, the record and the exceptions shall be presented to the Secretary and he shall cause to be published in the FEDERAL REGISTER his final order promulgating the regulation.

ADOPTION OF TOLERANCE ON INITIATIVE OF SECRETARY OR ON REQUEST OF INTERESTED PERSONS; JUDICIAL REVIEW; TEMPORARY TOLERANCES; AMENDMENT AND REPEAL OF TOLERANCES; FEES

§ 120.29 *Adoption of tolerance on initiative of Secretary or on request of an interested person.* (a) Upon the request of an interested person (other than a person who has registered or who has submitted an application for the registration of an economic poison under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U. S. C. 135)) furnishing reasonable grounds therefor, and upon advance deposit to cover fees as prescribed in § 120.33, the Commissioner may propose the issuance of a regulation establishing a tolerance for a pesticide chemical or exempting it from the necessity of a tolerance. Reasonable grounds shall include an explanation showing wherein the person has a substantial interest in such a tolerance or exemption from tolerance; information, if available, as to why registrant of the pesticide chemical under the Federal Insecticide, Fungicide, and Rodenticide Act has not petitioned for a tolerance or exemption from a tolerance; and adequate data on subjects outlined in clauses (A), (B), (C), (D), (E), and (F) of section 408 (d) (1) of the Federal Food, Drug, and Cosmetic Act. If the Commissioner concludes upon studying the request that it does not warrant a proposal for the issuance of a regulation, he shall so inform the person making the request and state the reasons for his decision.

(b) The notice of the proposal shall show whether it is made on the initiative of the Commissioner or at the request of an interested person, naming such person.

(c) If within 30 days after publication of the proposal a person who has registered, or who has submitted an application for registration of an economic poison under the Federal Insecticide, Fungicide, and Rodenticide Act containing the pesticide chemical named in the proposal, requests in writing that the proposal be referred to an advisory committee and makes advance deposit as provided by § 120.33 (i) (3), the Commissioner shall appoint a committee as provided in § 120.11 and refer the proposal and relevant data to such committee. The Department and the committee shall proceed as prescribed in section 408 and this part.

(d) If further advance deposits are not made upon request of the Commissioner, as provided in § 120.33 (i) (3), the request for referral of the petition to an advisory committee shall be considered withdrawn, and a tolerance shall be established within 90 days from the date on which the Commissioner requested the further advance deposit.

§ 120.30 *Judicial review.* (a) The Secretary of Health, Education, and Welfare hereby designates the Assistant General Counsel for Food and Drugs of the Department of Health, Education, and Welfare as the officer upon whom copy of petition for judicial review shall be served. Such officer shall be responsible for filing in the court a transcript of proceedings and the record on which the order of the Secretary of Health, Education, and Welfare is based. The transcript and record shall be certified by the Secretary.

(b) Before forwarding the transcript and record to the court the Department shall advise the petitioner of costs of preparing it and as soon as payment to cover fees is made shall forward the transcript of proceeding and record to the court.

§ 120.31 *Temporary tolerances.* (a) A temporary tolerance (or exemption from a tolerance) established under authority of section 408 (j) of the act shall

be deemed to be a tolerance (or exemption from the requirement of a tolerance) for the purposes of section 408 (a) (1), or (2) of the act.

(b) (1) A request for a temporary tolerance or a temporary exemption from a tolerance by a person who has obtained an experimental permit for a pesticide chemical under the Federal Insecticide, Fungicide, and Rodenticide Act shall be accompanied by a copy of such experimental permit, such data as are available on subjects outlined in clauses (A), (B), (C), (D), (E), (F) and (G) of section 408 (d) (1), and an advance deposit to cover fees as provided in § 120.33 (d).

(2) Before an experimental permit has been obtained, the Pesticide Branch upon request of the Department of Agriculture or a person who proposes to apply for an experimental permit will consider available data and discuss its adequacy for the purpose of justifying a tolerance or exemption from a tolerance.

(c) A notice of the issuance of a temporary tolerance outlining any restrictions as to use of the chemical imposed under the experimental permit under the Federal Insecticide, Fungicide, and Rodenticide Act may be published in the FEDERAL REGISTER if the Commissioner deems such publication desirable.

(d) A temporary tolerance or exemption from a tolerance may be issued for a period designed to allow the orderly marketing of the raw agricultural commodities produced while testing a pesticide chemical under an experimental permit issued under authority of the Federal Insecticide, Fungicide, and Rodenticide Act when the Commissioner concludes that the public health can be adequately protected during such marketing. A temporary tolerance or exemption from a tolerance may be revoked if the experimental permit is revoked, or may be revoked at any time if it develops that the application for a temporary tolerance contains a misstatement of a material fact or that new scientific data or experience with the pesticide chemical indicates that it may be hazardous to the public health.

§ 120.32 *Procedure for amending and repealing tolerances or exemptions from tolerances.* (a) The Commissioner on his own initiative or on request from an interested person furnishing reasonable grounds therefor, may propose the issuance of a regulation amending or repealing a tolerance for a pesticide chemical on raw agricultural commodities or granting or repealing an exemption from tolerance for such chemical. Requests for such amendment or repeal shall be made in writing and accompanied by an advance deposit to cover fees as provided in § 120.33 (d).

(b) Reasonable grounds shall include an explanation showing wherein the person has a substantial interest in such tolerance or exemption from tolerance and an assertion of facts (supported by data if available) showing that new uses for the pesticide chemical have been developed or old uses abandoned, that new data are available as to toxicity of the chemical, or that experience with the application of the tolerance or exemption from tolerance may justify its amendment or repeal. Evidence that a person has registered or has submitted an application for the registration of an economic poison under the Federal Insecticide, Fungicide, and Rodenticide Act will be regarded as evidence that he has a substantial interest in a tolerance or exemption from the requirement of a tolerance for a pesticide chemical that consists in whole or in part of the economic poison. New data should be furnished in the form specified in § 120.7 (b) for submitting petitions.

(c) The notice announcing the proposal to amend or repeal a regulation shall show whether the proposal was made on the initiative of the Commissioner or at the request of an interested person, naming such person. From this point the proceedings shall be the same as prescribed by section 408 (e), beginning with the second sentence of that paragraph, and the regulations applicable to section 408 (d), (e), (f), and (g).

§ 120.33 *Fees.* (a) Except as noted in paragraphs (b) and (c) of this section, each petition or request for the establishment of a tolerance shall be accompanied by a deposit of $2,500, plus $250 for each raw agricultural commodity more than nine on which the establishment of a tolerance is requested.

(b) Except as noted in paragraph (c) of this section, a petition requesting two or more numerical tolerance levels shall be accompanied by a deposit of $3,750, plus $250 for each raw agricultural commodity more than 14 on which the establishment of a tolerance is requested.

(c) Each petition or request for the establishment of a tolerance at a lower numerical level or levels than a tolerance already established for the same pesticide chemical, or for the establishment of a tolerance on additional raw agricultural commodities at the same numerical level as a tolerance already established for the same pesticide chemical, shall be accompanied by a deposit of $250, plus $250 for each raw agricultural commodity on which a tolerance is requested.

(d) Each petition or request for an exemption or a temporary exemption from the requirement of a tolerance, a temporary tolerance, or the amendment or repeal of a tolerance or exemption shall be accompanied by a deposit of $2,500, unless it meets the requirements of subparagraph (1) or (2) of this paragraph.

(1) Such deposit is not required when, in connection with the change sought under this paragraph, a petition or request is filed for the establishment of new tolerances to take the place of those sought to be amended or repealed and a deposit is made as required by paragraph (a) or (b) of this section.

(2) A request for a temporary tolerance for a pesticide chemical which has a tolerance for other uses at the same numerical level shall be accompanied by a deposit of $250 for clerical handling and initial administrative review, plus $250 for each raw agricultural commodity on which the temporary tolerance is sought.

(e) If a petition or a request proposing the issuance of a regulation is not accepted for filing or processing because it is technically incomplete, the deposit, less a $250 fee for clerical handling and initial administrative review, shall be returned unless the petitioner indicates that he wishes to submit a supplement, in which case the deposit will be held by the Commissioner, and the supplement shall be accompanied by a nonreturnable fee of $250.

(f) When a petition is withdrawn after filing and resubmitted within 6 months, it shall be accompanied by a deposit of $750, or by a deposit equal to the one originally submitted, whichever is smaller. If resubmitted after 6 months, it shall be accompanied by the deposit that would be required if it were being submitted for the first time.

(g) After a petition has been filed, any additional information or data submitted in support of it (i. e., any substantive amendment) shall be accompanied by a deposit of $750 or by a deposit equal to the one originally submitted, whichever is smaller.

(h) Objections under section 408 (d) (5) of the act shall be accompanied by a filing fee of $250.00.

(i) (1) In the event of a referral of a petition or proposal under this section to an advisory committee, the costs shall be borne by the person who requests the referral of the data to the advisory committee.

(2) Cost of the advisory committee, including expenses of the secretariat, will not exceed $75.00 per member per day plus cost of duplicating documents referred to the committee, plus necessary traveling and subsistence expenses of the members while they are serving away from their places of residence.

(3) An advance deposit shall be made in the amount of $2,500 to cover the costs. Further advance deposits of $2,500 each shall be made upon request of the Commissioner when necessary to prevent arrears in the payment of such costs. Any deposits in excess of actual expenses will be refunded to the depositor.

(j) The person who files a petition for judicial review of an order under section 408 (d) (5) or (e) of the act shall pay the costs of preparing a transcript of the proceedings and the record on which the order is based.

(k) All deposits and fees required by the regulations in this part shall be paid by money order, bank draft, or certified check drawn to the order of the Food and Drug Administration, collectible at par at Washington, D. C. All deposits and fees shall be forwarded to the Food and Drug Administration, Department of Health, Education, and Welfare, Washington 25, D. C., whereupon after making appropriate record thereof they will be transmitted to the Treasurer of the United States, for deposit to the special account "Certification and Inspection Services, Food and Drug Administration."

(l) The Commissioner may waive or refund such fees in whole or in part when in his judgment such action will promote the public interest.

(m) Any person who believes that payment of these fees will work a hardship on him may petition the Commissioner to waive or refund the fees.

§ 120.34 *Tests on the amount of residue remaining.* (a) Data in a petition on the amount of residue remaining in or on a raw agricultural commodity should establish the residue that may remain when the pesticide chemcial is applied according to directions registered under the Federal Insecticide, Fungicide, and Rodenticide Act, or according to directions contained in an application for registration. These data should establish the residues that may remain under conditions most likely to result in high residues on the commodity.

(b) The petition should establish the reliability of the residue data reported in it. Sufficient information should be submitted about the analytical method to permit competent analysts to apply it successfully.

(c) If the pesticide chemical is absorbed into a living plant or animal when applied (is systemic), residue data may be needed on each plant or animal on which a tolerance or exemption is requested.

(d) If the pesticide chemical is not absorbed into the living plant or animal when applied (is not systemic), it may be possible to make a reliable estimate of the residues to be expected on each commodity in a group of related commodities on the basis of less data than would be required for each commodity in the group, considered separately.

(e) Each of the following groups of crops lists raw agricultural commodities that are considered to be related for the purpose of paragraph (d) of this section. Commodities not listed in this paragraph are not considered as related for the purpose of paragraph (d) of this section. This grouping of crops does not affect the certification of usefulness by the Secretary of Agriculture as contemplated by section 408 (l) of the act.

(1) Apples, crabapples, pears, quinces.
(2) Avocados, papayas.
(3) Blackberries, boysenberries, dewberries, loganberries, raspberries.
(4) Blueberries, currants, gooseberries, huckleberries.
(5) Cherries, plums, prunes.
(6) Oranges, citrus citron, grapefruit, kumquats, lemons, limes, tangelos, tangerines.
(7) Mangoes, persimmons.
(8) Peaches, apricots, nectarines.
(9) Beans, peas, soybeans (each in dry form).
(10) Beans, peas, soybeans (each in succulent form).
(11) Broccoli, brussels sprouts, cauliflower, kohlrabi.
(12) Cantaloups, honeydew melons, muskmelons, pumpkins, watermelons, winter squash.
(13) Carrots, garden beets, sugar beets, horseradish, parsnips, radishes, rutabagas, salsify roots, turnips.
(14) Celery, fennel.
(15) Cucumbers, summer squash.
(16) Lettuce, endive (escarole), Chinese cabbage, salsify tops.
(17) Onions, garlic, leeks, shallots (green, or in dry bulb form).
(18) Potatoes, Jerusalem-artichokes, sweetpotatoes, yams.
(19) Spinach, beet tops, collards, dandelion, kale, mustard greens, parsley, Swiss chard, turnip tops, watercress.
(20) Tomatoes, eggplants, peppers, pimentos.
(21) Pecans, almonds, brazil nuts, bush nuts, butternuts, chestnuts, filberts, hazelnuts, hickory nuts, walnuts.
(22) Field corn, popcorn, sweet corn (each in grain form).
(23) Milo, sorghum (each in grain form).
(24) Wheat, barley, oats, rice, rye (each in grain form).
(25) Clovers, alfalfa, cowpea hay, lespedeza, lupines, peanut hay, pea-vine hay, soybean hay, vetch.
(26) Corn forage, sorghum forage.
(27) Sugarcane, cane sorghum.

Name	*Refers to—*
Aldrin	A product consisting of 95 percent of the compound 1,2,3,4,10,10-hexachloro-1,4,4a,5,8,8a-hexahydro-1,4,5,8-dimethanonaphthalene and 5 percent chlorinated hydrocarbons.
Chlordane	1,2,4,5,6,7,8,8-octachloro-2,3,3a,4,7,7a-hexahydro-4,7-methanoindene.
DDT	A product consisting of a complex mixture of 1,1,1-trichloro-2,2-bis(parachlorophenyl) ethane and 1,1,1,-trichloro-2-(orthochlorophenyl)-2-(parachlorophenyl) ethane.
Dieldrin	1,2,3,4,10,10-hexachloro-6,7-epoxy 1,4,4a,5,6,7,8,8a-octahydro-1,4,5,8-dimethanonaphthalene.
EPN	*O*-ethyl *O*-paranitrophenyl benzene thiophosphonate.
Ferbam	Ferric dimethyl dithiocarbamate.
Fluorine compounds	Cryolite, synthetic cryolite (sodium aluminum fluoride).
Heptachlor	1,4,5,6,7,8,8-heptachloro-3a,4,7,7a-tetrahydro-4,7-methanoindene.
Lindane	The gamma isomer of benzene hexachloride.
Methoxychlor	2,2-bis(paramethoxyphenyl)-1,1,1-trichloroethane.
Nicotine compounds	Nicotine sulfate and other salts of nicotine; nicotine as the alkaloid.
Parathion	*O,O*-diethyl-*O*-paranitrophenyl thiophosphate.
TDE	1,1-dichloro-2,2-bis(parachlorophenyl) ethane.
TEPP	Tetraethyl pyrophosphate.
Toxaphene	Chlorinated camphene.
Zineb	Zinc ethylenebisdithiocarbamate.
Ziram	Zinc dimethyldithiocarbamate.

TOLERANCES FOR RESIDUES

§ 120.101 *Specific tolerances for pesticide residues in or on fresh fruits and vegetables.* (a) The tolerances established for poisonous or deleterious substances in this section apply only to residues resulting from their application prior to harvest. A tolerance in terms of parts by weight for the poisonous or deleterious substance, or poisonous or deleterious residue resulting from its addition, to 1 million parts by weight of the fruit or vegetable is set forth after the name of each of the substances.

(b) The poisonous and deleterious substances for which tolerances are established by this section are named by their common names wherever practicable, otherwise by their chemical names or by names assigned to them by the United States Department of Agriculture. For the purposes of this section, the substances for which common, group, or Department of Agriculture names are used are as follows:

(c) (1) Where a tolerance is established by this section for parathion, the methyl homolog of parathion may replace all or part of the parathion permitted by such tolerance.

(2) For the purposes of this section, where a tolerance of 5 parts per million for benzene hexachloride is set, it shall be deemed applicable to commercial benzene hexachloride, which is a mixture of several isomers. If the gamma isomer, known as lindane, is used exclusively of other isomers, the tolerance shall be 10 parts per million.

(3) For the purposes of this section, where a tolerance is established for more than one pesticide containing arsenic, found on a fruit or vegetable, the total amount of such pesticides shall not yield more than 3.5 parts per million of As_2O_3 on the fruit or vegetable to which added.

(d) Residues of the following poisonous or deleterious substances should not remain on fruits or vegetables as prepared for market:

Calcium cyanide.
Dinitro-o-sec butylphenol.
Dinitro-o-sec cresol.
Hexaethyl tetraphosphate.
Tetraethyl pyrophosphate.
Hydrocyanic acid.
Mercury-containing compounds.
Selenium and selenium compounds.

(e) Each subparagraph of this paragraph lists, under the names of the fresh fruits and vegetables specified, the substances found to be required in their production and the tolerances for the residues of these substances remaining in or on such fresh fruits or vegetables. The abbreviation "p. p. m." means parts per million.

Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Toxaphene	7 p. p. m.
Zineb	7 p. p. m.
Ziram	7 p. p. m.

VEGETABLES—continued

(39) *Carrots (with or without tops) or carrot tops.*

Pesticide	Tolerance
Calcium arsenate	3.5 p. p. m. of combined As_2O_5.
Chlordane	0.3 p. p. m.
Copper arsenate	3.5 p. p. m. of combined As_2O_5.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Toxaphene	7 p. p. m.
Zineb	7 p. p. m.
Ziram	7 p. p. m.

(40) *Cauliflower.* For tolerances established for pesticide residues on cauliflower, see subparagraph (38) of this paragraph.

(41) *Celery.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Calcium arsenate	3.5 p. p. m. of combined As_2O_5.
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
Dicyclohexylamine salt of dinitro-o-cyclohexylphenol.	1 p. p. m.
Ferbam	7 p. p. m.
Lead arsenate	7 p. p. m. of combined lead.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
Toxaphene	7 p. p. m.
Zineb	7 p. p. m.
Ziram	7 p. p. m.

(42) *Collards.* For tolerances established for pesticide residues on collards, see subparagraph (47) of this paragraph.

(43) *Corn.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Calcium arsenate	3.5 p. p. m. of combined As_2O_5.
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
EPN	3 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Toxaphene	7 p. p. m.
Zineb	7 p. p. m.

(44) *Cucumbers.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Calcium arsenate	3.5 p. p. m. of combined As_2O_5.
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Toxaphene	7 p. p. m.

VEGETABLES—continued

(44) *Cucumbers*—Continued

Pesticide	Tolerance
Zineb	7 p. p. m.
Ziram	7 p. p. m.

(45) *Eggplants.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Calcium arsenate	3.5 p. p. m. of combined As_2O_5.
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Lead arsenate	7 p. p. m. of combined lead.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Toxaphene	7 p. p. m.
Zineb	7 p. p. m.
Ziram	7 p. p. m.

(46) *Endive and escarole.*

Pesticide	Tolerance
DDT	7 p. p. m.
Parathion	1 p. p. m.

(47) *Kale and collards.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Calcium arsenate	3.5 p. p. m. of combined As_2O_5.
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
Ziram	7 p. p. m.

(48) *Kohlrabi.* For tolerances established for pesticide residues on kohlrabi, see subparagraph (38) of this paragraph.

(49) *Lettuce.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
EPN	3 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Toxaphene	7 p. p. m.
Ziram	7 p. p. m.

(50) *Lima beans.* For tolerances established for pesticide residues on lima beans, see subparagraph (33) of this paragraph.

(51) *Melons, including cantaloups, muskmelons, watermelons, and other melons.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Calcium arsenate	3.5 p. p. m. of combined As_2O_5.

VEGETABLES—continued

(51) *Melons, including cantaloups, muskmelons, watermelons, and other melons*—Continued

Pesticide	Tolerance
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Zineb	7 p. p. m.
Ziram	7 p. p. m.

(52) *Mushrooms.*

Pesticide	Tolerance
DDT	7 p. p. m.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.

(53) *Mustard greens.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.

(54) *Okra.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
Toxaphene	7 p. p. m.

(55) *Onions.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Chlordane	0.3 p. p. m.
Dieldrin	0.1 p. p. m.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
Tartar emetic	3.5 p. p. m. of combined antimony trioxide.
Toxaphene	7 p. p. m.
Zineb	7 p. p. m.
Ziram	7 p. p. m.

(56) *Parsley.*

Pesticide	Tolerance
Nicotine-containing compounds	2 p. p. m. of nicotine.
Zineb	7 p. p. m.

(57) *Parsnips (with or without tops) or parsnip greens alone.*

Pesticide	Tolerance
DDT	7 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.

VEGETABLES—continued

(58) *Peanuts.*

Pesticide	Tolerance
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Parathion	1 p. p. m.
Toxaphene	7 p. p. m.
Zineb	7 p. p. m.
Ziram	7 p. p. m.

(59) *Peas.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Toxaphene	7 p. p. m.
Zineb	7 p. p. m.
Ziram	7 p. p. m.

(60) *Peppers.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Calcium arsenate	3.5 p. p. m. of combined As_2O_5.
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Lead arsenate	7 p. p. m. of combined lead.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Zineb	7 p. p. m.
Ziram	7 p. p. m.

(61) *Potatoes.* Tolerances are not needed for those pesticides applied only to the foliage of potatoes and that are not translocated to the tubers.

Pesticide	Tolerance
Aldrin	0.1 p. p. m.
Chlordane	0.3 p. p. m.
Heptachlor	0.1 p. p. m.

(62) *Pumpkins.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Calcium arsenate	3.5 p. p. m. of combined As_2O_5.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.

Ziram	7 p. p. m.

VEGETABLES—continued

(70) *Tomatoes.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Calcium arsenate	3.5 p. p. m. of combined As_2O_3.
Chlordane	0.3 p. p. m.
Copper arsenate	3.5 p. p. m. of combined As_2O_3.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m. of combined fluorine.
Toxaphene	7 p. p. m.
Zineb	7 p. p. m.
Ziram	7 p. p. m.

(71) *Turnips or rutabagas (with or without tops) or turnip greens or rutabaga tops.*

Pesticide	Tolerance
Calcium arsenate	3.5 p. p. m. of combined As_2O_3.
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
EPN	3 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Ziram	7 p. p. m.

(f) In accordance with section 408 (k) of the Federal Food, Drug, and Cosmetic Act, these tolerances shall be deemed also tolerances under section 408.

§ 120.102 *Tolerances for residues of sesone.* The following tolerances are established for residues of sesone (sodium 2,4-dichlorophenoxyethyl sulfate) in or on the raw agricultural commodities indicated:

(a) 6 parts per million in or on potatoes, peanuts, peanut hulls, peanut hay.

(b) 2 parts per million in or on asparagus, strawberries.

§ 120.103 *Tolerances for residues of captan.* Tolerances of 100 parts per million are established for residues of captan (*N*-trichloromethyl mercapto-4-cyclohexene-1,2-dicarboximide) in or on the following raw agricultural commodities from preharvest or postharvest uses or combinations of such uses: Almonds, almond hulls, apples, apricots, avocados, beans (dry and succulent forms), beets (garden) roots, beets (sugar) roots, beets (sugar) tops, blackberries, blueberries (huckleberries), boysenberries, broccoli, brussels sprouts, cabbage, cantaloup, carrots (roots), cauliflower, celery, cherries, Chinese cabbage, citrus citron, collards, cottonseed, crabapples, cranberries, cucumbers, dandelion, dewberries, eggplants, endive (escarole), fennel, garlic, grapefruit, grapes, horseradish (roots), kale, kohlrabi, kumquats, leeks, lemons, lettuce, limes, loganberries, mangoes, honeydew melons, muskmelons, mustard greens, nectarines, onions (dry bulb), onions (green), oranges, parsley, parsnips (roots), peaches, pears, peas (dry and succulent forms), peppers, pimentos, pineapple, plums (fresh prunes), popcorn (grain form), potatoes, pumpkins, quinces, radishes (roots), raspberries, rhubarb, romaine, rutabagas (roots), salsify (roots) salsify (tops), shallots, soybeans (dry and succulent forms), spinach, strawberries, summer squash, sweet corn (kernels plus cob with husk removed), Swiss chard, tangelos, tangerines, tomatoes, turnips (roots), turnips (tops), watercress, watermelon, winter squash.

§ 120.104 *Tolerances for residues of heptachlor.* The tolerance of 0.1 part per million for residues of heptachlor (see § 120.101 (e) (61)) is extended to include the following raw agricultural commodities: Alfalfa, apples, barley, beets (including sugar beets), black-eyed peas, brussels sprouts, cabbage, carrots, cauliflower, cherries; clover, sweet clover; corn, cotton, cowpeas, grain sorghum (milo), grapes, kholrabi, oats, onions, pasture and range grass, peaches, peanuts, peas, pineapple, radishes, rye, sugarcane, sweetpotatoes, tomatoes, turnips with tops and rutabagas (yellow turnips) without tops, wheat.

§ 120.105 *Tolerances for residues of Systox (O,O-diethyl (2-ethylmercaptoethyl) thiophosphate, a mixture of thiono and thiol isomers).* Tolerances for residues of Systox (*O,O*-diethyl-(2-ethylmercaptoethyl) thiophosphate, a mixture of thiono and thiol isomers) and derived anticholinesterase products as determined by in vitro cholinesterase inhibition of pooled human plasma, using technical Systox as a standard (this standard effects 50-percent inhibition of pooled human plasma cholinesterase at a concentration of 0.3 ± 0.025 part per million in water as a medium) are established as follows:

(a) 12 parts per million in or on alfalfa hay, clover hay.

(b) 5 parts per million in or on almond hulls, fresh alfalfa, fresh clover.

(c) 1.25 parts per million in or on grapes, hops.

(d) 0.75 part per million in or on almonds, apples, broccoli, brussels sprouts, cabbage, cauliflower, grapefruit, lemons, lettuce, muskmelons, oranges, pears, pecans, potatoes, strawberries, walnuts.

(e) 0.3 part per million in or on beans.

§ 120.106 *Tolerances for residues of diuron.* Tolerances for residues of diuron (3-(3,4-dichlorophenyl)-1,1-dimethylurea) in or on raw agricultural commodities are established as follows:

(a) 1 part per million in or on cottonseed, grapes, pineapple, potatoes, and sugarcane.

(b) 2 parts per million in or on alfalfa, bird's-foot trefoil (hay, forage), and grass crops (grass hay).

§ 120.107 *Tolerances for residues of Aramite.* (a) A tolerance of 1 part per million is established for residues of Aramite (2-(*p-tert*-butylphenoxy)-isopropyl-2-chloroethyl sulfite) in or on the raw agricultural commodities: Apples, blueberries, cantaloups, celery, cucumbers, grapefruit, grapes, green beans, lemons, muskmelons, oranges, peaches, pears, plums, raspberries, strawberries, sweet corn (kernels) but not forage thereof, tomatoes, watermelons.

(b) A tolerance of zero is established for residues of Aramite in or on the raw agricultural commodities alfalfa and soybeans (whole plant).

VEGETABLES—continued

(72) *Radishes (with or without tops) or radish tops.*

Pesticide	Tolerance
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Toxaphene	7 p. p. m.
Zineb	7 p. p. m.
Ziram	7 p. p. m.

(73) *Rutabagas (with or without tops) or rutabaga tops.* For tolerances established for pesticide residues on rutabagas, see subparagraph (71) of this paragraph.

(74) *Salsify.*

Pesticide	Tolerance
Zineb	7 p. p. m.

(75) *Spinach.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Calcium arsenate	3.5 p. p. m. of combined As_2O_3.
DDT	7 p. p. m.
EPN	3 p. p. m.
Ferbam	7 p. p. m.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Ziram	7 p. p. m.

(76) *Squash, summer squash.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
Calcium arsenate	3.5 p. p. m. of combined As_2O_3.
Chlordane	0.3 p. p. m.
DDT	7 p. p. m.
Ferbam	7 p. p. m.
Fluorine compounds	7 p. p. m. of combined fluorine.
Methoxychlor	14 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.
Zineb	7 p. p. m.
Ziram	7 p. p. m.

(77) *Sweetpotatoes.* Tolerances are not needed for those pesticides applied only to foliage of sweetpotatoes and which are not translocated to the tubers.

Pesticide	Tolerance
Aldrin	0.1 p. p. m.

(78) *Swiss chard.*

Pesticide	Tolerance
Benzene hexachloride	5 p. p. m.
DDT	7 p. p. m.
Nicotine-containing compounds	2 p. p. m. of nicotine.
Parathion	1 p. p. m.
TDE	7 p. p. m.

§ 120.108 *Tolerances for residues of monuron (3-(p-chlorophenyl)-1,1-dimethylurea).* Tolerances for residues of monuron (3-(p-chlorophenyl)-1,1-dimethylurea) are established in or on raw agricultural commodities as follows:

(a) 7 parts per million in or on asparagus.

(b) 1 part per million in or on avocados, citrus citron, cottonseed, grapefruit, grapes, kumquats, lemons, limes, onions (dry bulbs only), oranges, pineapple, spinach, sugarcane, tangelos, tangerines.

§ 120.109 *Tolerances for residues of Chlorobenzilate (ethyl 4,4'-dichlorobenzilate).* A tolerance of 5 parts per million is established for residues of Chlorobenzilate (ethyl 4,4'-dichlorobenzilate) in or on each of the following raw agricultural commodities: Apples, cantaloups, lemons, oranges, and pears.

§ 120.110 *Tolerances for residues of maneb.* Tolerances for residues of maneb (manganous ethylenebisdithiocarbamate), calculated as zinc ethylenebisdithiocarbamate, are established in or on raw agricultural commodities, as follows:

(a) 10 parts per million in or on apricots, beans (succulent form), cabbage, celery, Chinese cabbage, collards, endive (escarole), kale, lettuce, mustard greens, nectarines, peaches, spinach, turnip tops.

(b) 7 parts per million in or on apples, beans (dry form), carrots (roots), carrots (tops), cranberries, cucumbers, eggplants, figs, grapes, melons, onions, peppers, summer squash, sweet corn (kernels plus cob with husk removed), tomatoes, turnip roots, winter squash.

(c) 0.1 part per million in or on almonds, potatoes.

§ 120.111 *Tolerances for residues of malathion.* Tolerances are established for residues of malathion (O,O-dimethyl dithiophosphate of diethyl mercaptosuccinate) in or on raw agricultural commodities as follows:

(a) (1) From preharvest application: 8 parts per million in or on alfalfa, apples, apricots, asparagus, avocados, barley, beans, beets (including tops), blackberries, blueberries, boysenberries, broccoli, brussels sprouts, cabbage, carrots, cauliflower, celery, cherries, clover, collards, corn forage, cranberries, cucumbers, currants, dandelions, dates, dewberries, eggplants, endive (escarole), garlic, gooseberries, grapefruit, grapes, guavas, horseradish, kale, kohlrabi, kumquats, leeks, lemons, lettuce, limes, loganberries, mangoes, melons, mushrooms, mustard greens, nectarines, oats, onions (including green onions), oranges, parsley, parsnips, passion fruit, peaches, pears, peas, pecans, peppermint, peppers, pineapples, plums, potatoes, prunes, pumpkins, quinces, radishes, raspberries, rice, rutabagas, rye, salsify (including tops), shallots, spearmint, spinach, squash (both summer and winter squash), strawberries, Swiss chard, tangelos, tangerines, tomatoes, turnips (including tops), walnuts, watercress, wheat.

(2) From postharvest application: 8 parts per million in or on peanuts and the following grains: Barley, corn, oats, rice, rye, sorghum, wheat.

(b) From preslaughter application: 4 parts per million in or on meat and meat byproducts from cattle, hogs, poultry. The tolerance level shall not be exceeded in any cut of meat or in any meat byproduct from cattle, hogs, or poultry.

(c) From preharvest application: 2 parts per million in or on corn (kernels plus cob with husk removed), cottonseed.

(d) Zero in eggs, milk.

§ 120.112 *Tolerances for residues of Sulphenone (p-chlorophenyl phenyl sulfone).* A tolerance of 8 parts per million for residues of Sulphenone (p-chlorophenyl phenyl sulfone) is established in or on each of the following raw agricultural commodities: Apples, peaches, pears.

§ 120.113 *Tolerances and exemptions from the requirement of a tolerance for residues of allethrin (allyl homolog of cinerin I).* (a) Allethrin is exempted from the requirement of a tolerance for residues when used before harvest in the production of beans, broccoli, brussels sprouts, cabbage, cauliflower, collards, horseradish, kale, kohlrabi, lettuce, mushrooms, mustard greens, radishes, rutabagas, turnips.

(b) Tolerances of 4 parts per million for residues of allethrin from postharvest use of such pesticide chemical are established in or on the following raw agricultural commodities: Apples, blackberries, blueberries (huckleberries), boysenberries, cherries, crabapples, currants, dewberries, figs, gooseberries, grapes, guavas, loganberries, mangoes, muskmelons, oranges, peaches, pears, pineapples, plums (fresh prunes), raspberries, tomatoes.

(c) Tolerances of 2 parts per million for residues of allethrin from postharvest use of such pesticide chemical are established in or on the following grains: Barley, corn, grain sorghum, milo, oats, rye, wheat.

§ 120.114 *Tolerance for residues of ferbam.* A tolerance of 0.1 part per million is established for residues of ferbam (ferric dimethyldithiocarbamate), calculated as zinc ethylenebisdithiocarbamate, in or on almonds.

§ 120.115 *Tolerances for residues of zineb.* Tolerances for residues of zineb (zinc ethylenebisdithiocarbamate) are established as follows:

(a) 60 parts per million in or on hops.

(b) 25 parts per million in or on beet tops, Chinese cabbage, collards, endive, kale, lettuce, mustard greens, romaine, spinach, Swiss chard.

(c) 7 parts per million in or on beets (garden), roots only; mushrooms.

(d) 1 part per million in or on wheat.

§ 120.116 *Tolerances for residues of ziram.* (a) A tolerance of 7 parts per million is established for residues of ziram (zinc dimethyldithiocarbamate), calculated as zinc ethylenebisdithiocarbamate, in or on strawberries.

(b) A tolerance of 0.1 part per million is established for residues of ziram (zinc dimethyldithiocarbamate), calculated as

zinc ethylenebisdithiocarbamate, in or on almonds and pecans.

§ 120.117 *Tolerance for residues of chlortetracycline.* A tolerance of 7 parts per million is established for residues of chlortetracycline in or on uncooked poultry. This tolerance level shall not be exceeded in any part of the poultry.

§ 120.118 *Tolerances for residues of dichlone.* A tolerance of 3 parts per million is established for residues of dichlone (2,3,-dichloro-1,4,-naphthoquinone) in or on each of the following raw agricultural commodities: Apples, celery, peaches, tomatoes.

§ 120.119 *Tolerances for residues of EPN (O-ethyl-O-p-nitrophenyl benzene thiophosphonate).* Tolerances for residues of EPN (*O*-ethyl-*O*-*p*-nitrophenyl benzene thiophosphonate) are established as follows:

(1) 3 parts per million in or on grapes, olives, sugar beets (but not sugar beet tops), tomatoes.

(2) 0.5 part per million in or on almonds, cottonseed, pecans, walnuts.

§ 120.120 *Tolerances for residues of methoxychlor.* Tolerances for residues of methoxychlor (2,2-bis-(*p*-methoxyphenyl)-1,1,1-trichloroethane) are established as follows:

(a) 100 parts per million in or on alfalfa, clover, cowpeas, grass for forage, peanut forage, soybean forage.

(b) 14 parts per million in or on carrots (with or without tops) or carrot tops, currants, gooseberries, peanuts.

(c) 3 parts per million in the fat of meat from cattle, sheep, or hogs.

(d) 2 parts per million in or on the following grains: Barley, corn, oats, rice, rye, sorghum grain, wheat.

(e) Zero part per million in milk.

§ 120.121 *Tolerances for residues of parathion.* A tolerance of 1 part per million is established for residues of parathion (*O,O*-diethyl *O*-*p*-nitrophenyl thiophosphate) in or on the following raw agricultural commodities: Alfalfa, barley, clover, corn forage, grass for forage, hops, oats, olives, pea forage, vetch, wheat.

§ 120.122 *Tolerance for residues of chlordane.* A tolerance of 0.3 part per million is established for residues of chlordane (1,2,4,5,6,7,8,8-octachloro-2,3,-3a,4,7,7a - hexahydro - 4,7 - methanoindene) in or on sweetpotatoes.

§ 120.123 *Tolerances for residues of inorganic bromides resulting from fumigation with methyl bromide.* Tolerances for residues of inorganic bromides (calculated as Br) in or on raw agricultural commodities that have been fumigated with methyl bromide are established as follows:

(a) 200 parts per million in or on almonds, brazil nuts, bush nuts, butternuts, cashew nuts, chestnuts, cottonseed, filberts (hazelnuts), hickory nuts, peanuts, pecans, pistachio nuts, walnuts.

(b) 100 parts per million in or on copra.

(c) 75 parts per million in or on potatoes, sweetpotatoes.

(d) 50 parts per million in or on alfalfa hay, barley, beans, beans (green), beans (lima), beans (snap), black-eyed peas, cipollini bulbs, cocoa beans, corn, garlic, grain sorghum (milo), oats, peas (with pods), rice, rye, sweet corn (determined on kernels plus cob with husk removed), wheat.

(e) 30 parts per million in or on beets, garden (roots), carrots (roots), citrus citron, cucumbers, grapefruit, horseradish, Jerusalem-artichokes, kumquats, lemons, limes, okra, oranges, parsnips (roots), peppers, pimentos, radishes, rutabagas, salsify roots, strawberries, sugar beets (roots), summer squash, tangelos, tangerines, turnips (roots), yams.

(f) 20 parts per million in or on apricots, cantaloups, cherries, eggplants, grapes, honeydew melons, mangoes, muskmelons, nectarines, onions, papayas, peaches, pineapples, plums (fresh prunes), pumpkins, tomatoes, watermelons, winter squash, zucchini squash.

(g) 5 parts per million in or on apples, pears, quinces.

§ 120.124 *Tolerance for residues of glyodin.* The tolerance for residues of glyodin (2-heptadecyl glyoxalidine acetate) in or on peaches is 5 parts per million.

§ 120.125 *Tolerances for residues of calcium cyanide.* A tolerance of 25 parts per million is established for residues of calcium cyanide, calculated as hydrogen cyanide, in or on each of the following grains: Barley, buckwheat, corn, oat, rice, rye, sorghum, wheat.

§ 120.126 *Tolerances for residues of inorganic bromides resulting from soil treatment with ethylene dibromide.* Tolerances for residues of inorganic bromides (calculated as Br) in or on raw agricultural commodities grown in soil treated with ethylene dibromide are established as follows:

(a) 75 parts per million in or on broccoli, carrots (with or without tops), melons, parsnips,

(b) 50 parts per million in or on eggplant, okra, summer squash, sweet corn, sweet corn forage, sweetpotatoes, tomatoes.

(c) 40 parts per million in or on pineapple.

(d) 30 parts per million in or on cucumbers, lettuce, peppers.

(e) 25 parts per million in or on cottonseed.

(f) 10 parts per million in or on asparagus, cauliflower.

(g) 5 parts per million in or on lima beans, strawberries.

§ 120.127 *Tolerances for residues of piperonyl butoxide.* Tolerances for residues of piperonyl butoxide ((butyl carbityl) (6-propyl piperonyl) ether) from postharvest use of such pesticide chemical are established in or on raw agricultural commodities, as follows:

(a) 20 parts per million in or on barley, buckwheat, corn (including popcorn), rice, rye, wheat.

(b) 8 parts per million in or on almonds, apples, beans, blackberries, blueberries (huckleberries), boysenberries, cherries, cocoa beans, copra, cottonseed, crabapples, currants, dewberries, figs, flaxseed, gooseberries, grain sorghum, grapes, guavas, loganberries, mangoes, muskmelons, oats, oranges, peaches, peanuts (determined on the nuts with shell removed), pears, peas, pineapples, plums (fresh prunes), raspberries, tomatoes, walnuts.

§ 120.128 *Tolerances for residues of pyrethrins.* Tolerances for residues of pyrethrins (insecticidally active principles of Chrysanthemum cinerariaefolium) from postharvest use of such pesticide chemical are established in or on raw agricultural commodities, as follows:

(a) 3 parts per million in or on barley, buckwheat, corn (including popcorn), rice, rye, wheat.

(b) 1 part per million in or on almonds, apples, beans, blackberries, blueberries (huckleberries), boysenberries, cherries, cocoa beans, copra, cottonseed, crabapples, currants, dewberries, figs, flaxseed, gooseberries, grain sorghum, grapes, guavas, loganberries, mangoes, muskmelons, oats, oranges, peaches, peanuts (determined on the nuts with shell removed), pears, peas, pineapples, plums (fresh prunes), raspberries, tomatoes, walnuts.

§ 120.129 *Tolerances for residues of sodium o-phenylphenate.* Tolerances are established as follows for residues from postharvest application of sodium o-phenylphenate, calculated as o-phenylphenol;

(a) 125 parts per million in or on cantaloups, of which not more than 10 parts per million shall be in the edible portion.

(b) 20 parts per million in or on peaches.

(c) 10 parts per million in or on citrus citron, grapefruit, kumquat, lemons, limes, oranges, pineapple, tangelos, tangerines.

(d) 5 parts per million in or on apples, pears.

§ 120.130 *Tolerances for residues of hydrogen cyanide.* Tolerances for residues of hydrogen cyanide from postharvest fumigation are established as follows:

(a) 250 parts per million in or on the following spices: Allspice, anise, basil, bay, black pepper, caraway, cassia, celery seed, chili, cinnamon, cloves, coriander, cumin, dill, ginger, mace, marjoram, nutmeg, oregano, paprika, poppy, red pepper, rosemary, sage, savory, thyme, turmeric, white pepper.

(b) 25 parts per million in or on almonds, barley, beans (dried), buckwheat, cashews, cocoa beans, corn, oats, peanuts, peas (dried), pecans, popcorn, rice, rye, sesame, sorghum, walnuts, wheat.

§ 120.131 *Tolerances for residues of endrin.* A tolerance of zero is established for endrin residues in or on each of the following raw agricultural commodities: Cabbage, cottonseed, cucumbers, eggplant, peppers, potatoes, sugar beets, sugar beet tops, summer squash, and tomatoes.

§ 120.132 *Tolerances for residues of thiram.* A tolerance of 7 parts per million is established for residues of thiram (tetramethyl thiuram disulfide) in or on apples and tomatoes.

§ 120.133 *Tolerance for residues of lindane.* A tolerance of 10 parts per million is established for residues of lindane (gamma isomer of benzene hexachloride) in or on mushrooms.

§ 120.134 *Tolerances for residues of p-chlorophenyl - p - chlorobenzenesulfonate.* Tolerances for residues of p-chlorophenyl-*p*-chlorobenzenesulfonate are established as follows:

(a) 5 parts per million in or on grapefruit, lemons, oranges, tangerines.

(b) 3 parts per million in or on apples, peaches, pears, plums (prunes).

§ 120.135 *Tolerances for residues of aldrin.* Tolerances for residues of aldrin in or on raw agricultural commodities are established, as follows:

(a) 0.75 part per million in or on barley straw, oat straw, rice straw, rye straw, wheat straw.

(b) 0.25 part per million in or on apples, apricots, beets (garden), garden beet tops, broccoli, brussels sprouts, cabbage, carrots, cauliflower, collards, cucumbers, endive (escarole), garlic, grapefruit, horseradish, kale, kohlrabi, leeks, lemons, lettuce, limes, mustard greens, onions, oranges, parsnips, peanuts, pears, quinces, radishes, rutabagas, salsify tops, salsify root, shallots, spinach, summer squash, Swiss chard, tangerines, turnips, turnip tops.

(c) 0.1 part per million in or on asparagus, barley grain, beets (sugar), sugar beet tops, cantaloup, celery, cherries, cranberries, eggplant, grapes, mangoes, muskmelons, nectarines, oat grain, peaches, peppers, pimentos, pineapple, plums and prunes, pumpkins, rice grain, rye grain, strawberries, tomatoes, watermelon, wheat grain, winter squash.

(d) Zero in or on alfalfa, beans, black-eyed peas, clover, corn grain, corn forage, cowpeas, cowpea hay, grain sorghum, grain sorghum forage, lespedeza, peas, pea hay, peanut hay, popcorn, soybeans, soybean hay.

§ 120.136 *Tolerance for residues of basic copper carbonate.* The tolerance for residues of basic copper carbonate in or on pears from post-harvest use of the chemical is 3 parts per million of combined copper.

§ 120.137 *Tolerances for residues of dieldrin.* Tolerances for residues of dieldrin in or on raw agricultural commodities are established, as follows:

(a) 0.75 part per million in or on barley straw, oat straw, rice straw, rye straw, wheat straw.

(b) 0.25 part per million in or on apples, beets (garden), garden beet tops, broccoli, brussels sprouts, cabbage, cauliflower, celery, cherries, collards, cucumbers, endive (escarole), grapefruit, kale, kohlrabi, lemons, lettuce, limes, mustard greens, oranges, pears, pineapple, quinces, rutabagas, salsify tops, spinach, summer squash, Swiss chard, tangerines, turnips, turnip tops.

(c) 0.1 part per million in or on asparagus, barley grain, carrots, cranberries, eggplant, grapes, horseradish, mangoes, oat grain, parsnips, peppers, pimentos, potatoes, plums and prunes, radishes, radish tops, rice grain, rye grain, salsify root, strawberries, sweetpotatoes, tomatoes, wheat grain.

(d) Zero in or on alfalfa, beans, black-eyed peas, cantaloups, clover, corn grain, corn forage, cowpeas, cowpea hay, grain sorghum, grain sorghum forage, lespedeza, muskmelons, peas, pea hay, popcorn, pumpkins, soybeans, soybean hay, watermelons, winter squash.

§ 120.138 *Tolerances for residues of toxaphene.* Tolerances are established for residues of toxaphene (chlorinated camphene containing 67 percent–69 percent chlorine) in or on raw agricultural commodities from preharvest or preslaughter application as follows:

(a) 7 parts per million in or on cranberries; fat of meat from cattle, goats, and sheep; hazelnuts; hickory nuts; horseradish; parsnips; pecans; peppers; pimentos; rutabagas; walnuts.

(b) 5 parts per million in or on barley, oats, rice, rye, wheat.

§ 120.139 *Tolerances for residues of 1,1 - dichloro - 2,2 - bis (p-ethylphenyl) ethane.* A tolerance of 15 parts per million is established for residues of 1,1-dichloro-2,2-bis(*p*-ethylphenyl) ethane in or on each of the following raw agricultural commodities: Broccoli, brussels sprouts, cabbage, cauliflower, cherries, kohlrabi, lettuce, spinach.

§ 120.140 *Exemption from the requirement of a tolerance for residues of ammonia.* Ammonia is exempted from the requirement of a tolerance when used after harvest on the raw agricultural commodities grapefruit, lemons, and oranges.

§ 120.141 *Tolerances for residues of diphenyl.* A tolerance of 110 parts per million for residues of diphenyl is established in or on each of the following raw agricultural commodities grapefruit, lemons, and oranges.

§ 120.142 *Exemption from the requirement of a tolerance for residues of carbon disulfide.* Carbon disulfide is exempted from the requirement of a tolerance for residues, when used as a fumigant for the following grains: Barley, corn, oats, popcorn, rice, rye, sorghum (milo), wheat.

§ 120.143 *Exemption from the requirement of a tolerance for residues of carbon tetrachloride.* Carbon tetrachloride is exempted from the requirement of a tolerance for residues, when used as a fumigant for the following grains: Barley, corn, oats, popcorn, rice, rye, sorghum (milo), wheat.

§ 120.144 *Exemption from the requirement of a tolerance for the organic bromide residues from ethylene dibromide.* The organic bromide residues are exempted from the requirement of a tolerance for residues when ethylene dibromide is used as a fumigant for the following grains: Barley, corn, oats, popcorn, rice, rye, sorghum (milo), wheat.

§ 120.145 *Exemption from the requirement of a tolerance for residues of ethylene dichloride.* Ethylene dichloride is exempted from the requirement of a tolerance for residues, when used as a fumigant for the following grains: Barley, corn, oats, popcorn, rice, rye, sorghum (milo), wheat.

§ 120.146 *Tolerances for residues of inorganic bromides resulting from fumigation with ethylene dibromide.* (a) Tolerances of 50 parts per million are established for residues of inorganic bromides (calculated as Br) in or on the following grains that have been fumigated with ethylene dibromide: Barley, corn, oats, popcorn, rice, rye, sorghum (milo), wheat.

(b) Tolerances are established for residues of inorganic bromides (calculated as Br) in or on the following raw agricultural commodities that have been fumigated with ethylene dibromide in accordance with the Mediterranean Fruit Fly Control Program or the Quarantine Program of the U. S. Department of Agriculture.

(1) 10 parts per million in or on: Beans (string), bitter melon (Mormodica charantia), cantaloups, Cavendish bananas, citrus fruits, cucumbers, guavas, litchi fruit, litchi nuts, mangoes, papayas, peppers (bell), pineapples, zucchini squash.

(2) 20 parts per million in or on plums.

§ 120.147 *Tolerances for residues of DDT.* Tolerances of 7 parts per million for residues of DDT (a mixture of 1,1,1-trichloro-2,2-bis (*p*-chlorophenyl) ethane and 1,1,1-trichloro-2-(*o*-chlorophenyl)-2-(*p*-chlorophenyl) ethane are established in or on the following raw agricultural commodities: The fat of meat from cattle, hogs, and sheep; sweetpotatoes (from postharvest use).

§ 120.148 *Tolerance for residues of oxytetracycline.* A tolerance of 7 parts per million is established for residues of oxytetracycline in or on uncooked poultry. This tolerance level shall not be exceeded in any part of the poultry.

§ 120.149 *Tolerances for residues of mineral oil.* (a) For the purposes of this section, mineral oil is defined as the refined petroleum fraction having the following characteristics:

(1) Minimum flashpoint of 300° F.

(2) Gravity of 27 to 34 by the American Petroleum Institute standard method.

(3) Pour point of 30° F. maximum.

(4) Color 2 maximum by standards of the American Society for Testing Materials.

(5) Boiling point between 480° F. and 960° F.

(6) Viscosity at 100° F. of 100 to 200 seconds Saybolt.

(7) Unsulfonated residue of 90-percent minimum.

(8) No sulfur compounds according to the United States Pharmacopeia test under Liquid Petrolatum.

(b) Tolerances of 200 parts per million for residues of mineral oil as specified in paragraph (a) of this section are established in or on the following grains from postharvest application: Shelled corn, grain sorghum.

§ 120.150 *Tolerances for residues of sodium 2,2-dichloropropionate.* Tolerances for residues of sodium 2,2-dichloropropionate, as 2,2-dichloropropionic acid, in or on raw agricultural commodities, are established as follows:

(a) 75 parts per million in or on flaxseed.

(b) 35 parts per million in or on cottonseed.

(c) 30 parts per million in or on asparagus.
(d) 10 parts per million in or on potatoes.
(e) 5 parts per million in or on sugar beets (roots) and sugar beets (tops).
(f) 3 parts per million in or on apples, grapes, pears, pineapples.
(g) 1 part per million in or on apricots, peaches, plums.

§ 120.151 *Tolerances for residues of ethylene oxide.* A tolerance of 50 parts per million is established for residues of ethylene oxide in or on each of the following raw agricultural commodities: Copra, whole spices.

§ 120.152 *Tolerance for residues of sodium dimethyldithiocarbamate.* A tolerance of 25 parts per million is established for residues of sodium dimethyldithiocarbamate, calculated as zinc ethylenebisdithiocarbamate, in or on melons.

§ 120.153 *Tolerances for residues of O,O-diethyl O-(2-isopropyl-4-methyl-6-pyrimidinyl) phosphorothioate.* Tolerances for residues of O,O-diethyl O-(2-isopropyl-4-methyl-6-pyrimidinyl) phosphorothioate in or on raw agricultural commodities are established as follows:
(a) 1.0 part per million in or on olives.
(b) 0.75 part per million in or on apples, apricots, beans (snap), beet roots, beet tops, broccoli, cabbage, cauliflower, celery, cherries, cucumbers, figs, hops, lemons, lettuce, nectarines, onions, oranges, peaches, pears, peppers, plums (fresh prunes), spinach, strawberries, tomatoes.

§ 120.154 *Tolerances for residues of O,O-dimethyl S-(4-oxo-1,2,3-benzotriazinyl-3-methyl) phosphorodithioate.* Tolerances for residues of O,O-dimethyl S-(4-oxo-1,2,3-benzotriazinyl-3-methyl) phosphorodithioate in or on raw agricultural commodities are established as follows:
(a) 2 parts per million on apples, apricots, crabapples, nectarines, peaches, pears, quinces.
(b) 0.5 part per million in or on cottonseed.

§ 120.155 *Exemption from the requirement of a tolerance for residues of chloropicrin.* Chloropicrin is exempted from the requirement of a tolerance for residues when used as a fumigant for the following grains: Barley, buckwheat, corn, oats, rice, rye, grain sorghum, wheat.

§ 120.156 *Tolerances for residues of S-(p-chlorophenylthio) methyl O,O-diethyl phosphorodithioate.* Tolerances for residues of S-(p-chlorophenylthio) methyl O,O-diethyl phosphorodithioate in or on raw agricultural products are established as follows:
(a) 5 parts per million in or on sugar beets (roots), sugar beets (tops).
(b) 2 parts per million in or on almond hulls, grapefruit, lemons, limes, oranges, tangelos, tangerines.
(c) 0.8 part per million in or on apples, apricots, beans, snap (succulent form); beans, lima (succulent form); beets, garden (roots); beets, garden (tops); cantaloups, cherries, crabapples, eggplants, grapes, nectarines, olives, peaches, pears, peas (succulent form), peppers, pimentos, plums (fresh prunes), quinces, soybeans (succulent form), spinach, strawberries, tomatoes, watermelons.

§ 120.157 *Tolerances for residues of 1-methoxycarbonyl-1-propen-2-yl-dimethylphosphate and its beta isomer.* Tolerances for residues of 1-methoxycarbonyl-1-propen-2-yl-dimethylphosphate and its beta isomer are established in or on raw agricultural commodities, as follows:
(a) 1.0 part per million in or on alfalfa, broccoli, brussels sprouts, cabbage, cauliflower, clover, collards, corn forage, kale, mustard greens, peaches, pea vines, plums, sorghum forage, sorghum grain, spinach, strawberries, turnip tops.
(b) 0.5 part per million in or on apples, lettuce, pears.
(c) 0.25 part per million in or on beans, corn grain (including field corn, popcorn, sweet corn), cucumbers, onions, (green), peas, potatoes, tomatoes, turnips.

§ 120.158 *Tolerances for residues of 2,4-dichloro-6-(o-chloroanilino) triazine.* Tolerances for residues of 2,4-dichloro-6-(o-chloroanilino) triazine in or on raw agricultural products are established as follows:
(a) 10 parts per million in or on tomatoes.
(b) 1 part per million in or on potatoes.

§ 120.159 *Tolerance for residues of sodium dehydroacetate.* A tolerance of 65 parts per million is established for residues of sodium dehydroacetate, as dehydroacetic acid, in or on strawberries from postharvest application.

§ 120.160 *Tolerance for residues of mercaptobenzothiazole.* A tolerance of 0.1 part per million is established for residues of mercaptobenzothiazole, calculated as 2,2'-dithiobisbenzothiazole, in or on apples.

§ 120.161 *Tolerance for residues of manganous dimethyldithiocarbamate.* A tolerance of 7 parts per million is established for residues of manganous dimethyldithiocarbamate, calculated as zinc ethylenebisdithiocarbamate, in or on apples.

§ 120.162 *Tolerance for residues of tetraiodoethylene.* A tolerance of 15 parts per million is established for residues of tetraiodoethylene on cantaloup from postharvest application.

§ 120.163 *Tolerances for residues of 1,1-bis(p-chlorophenyl)-2,2,2-trichloroethanol.* Tolerances for residues of 1,1-bis(p-chlorophenyl)-2,2,2-trichloroethanol are established as follows:
(a) 30 parts per million in or on hops.
(b) 10 parts per million in or on apricots, grapefruit, kumquats, lemons, limes, nectarines, oranges, peaches, tangelos, tangerines.
(c) 5 parts per million in or on apples, beans (dry form); beans, snap (succulent form); beans, lima (succulent form); blackberries, boysenberries, bushnuts, butternuts, cantaloups, cherries, chestnuts, crabapples, cucumbers, dewberries, eggplants, figs, filberts, grapes, hazelnuts, hickory nuts, loganberries, melons, muskmelons, pears, pecans, peppers, pimentos, plums (fresh prunes), pumpkins, quinces, raspberries, summer squash, strawberries, tomatoes, walnuts, watermelons, winter squash.
(d) 0.1 part per million in or on cottonseed.

§ 120.164 *Tolerances for residues of O,O-diethyl S-2-diethylaminoethyl phosphorothioate hydrogen oxalate.* A tolerance of 0.1 part per million is established for residues of O,O-diethyl S-2-diethylaminoethyl phosphorothioate hydrogen oxalate in or on undelinted cottonseed.

§ 120.165 *Tolerance for residues of sodium 2,4-dichlorophenoxyacetate.* A tolerance of 5 parts per million is established for residues of sodium 2,4-dichlorophenoxyacetate, calculated as 2,4-dichlorophenoxyacetic acid, in or on asparagus.

PART 141a—PENICILLIN AND PENICILLIN-CONTAINING DRUGS; TESTS AND METHODS OF ASSAY

§ 141a.86 *Procaine penicillin-streptomycin-polymyxin in oil; procaine penicillin - dihydrostreptomycin - polymyxin in oil; procaine penicillin-streptomycin-polymyxin ointment; procaine penicillin-dihydrostreptomycin - polymyxin ointment*—(a) *Potency.* (1) *Penicillin content.* Proceed as directed in § 141a.8 (a). Its content of penicillin is satisfactory if it contains not less than 85 percent of the number of units per milliliter or per gram that it is represented to contain.
(2) *Streptomycin content.* Proceed as directed in § 141b.129 (a) (1) of this chapter, except inactivate the penicillin in the combined extractives with sufficient penicillinase at 37° C. for 30 minutes. Its content of streptomycin is satisfactory if it contains not less than 85 percent of the number of milligrams per milliliter or per gram that it is represented to contain.
(3) *Dihydrostreptomycin content.* Proceed as directed in subparagraph (2) of this paragraph, using the dihydrostreptomycin working standard as a standard of comparison. Its content of dihydrostreptomycin is satisfactory if it contains not less than 85 percent of the number of milligrams per milliliter or per gram that it is represented to contain.
(4) *Polymyxin content.* Proceed as directed in § 141b.112 (b) (1) of this chapter, with the following exceptions:
(i) In lieu of the directions for the preparation of the sample described in § 141b.112 (b) (1) (vii) of this chapter, prepare the sample by one of the following techniques:
(a) *Extraction.* Place a convenient-sized representative quantity of the sample in a separatory funnel containing approximately 50 milliliters of peroxide-free ether. Shake the sample and ether until homogeneous. Add 25 milliliters of 10-percent potassium phosphate buffer (pH 6.0) and shake. Remove the buffer layer and repeat the extraction with 25-milliliter portions of buffer at least three times and any additional times that may be necessary to insure complete extraction of the antibiotic. Combine the extractives. Inactivate the penicillin with

sufficient penicillinase at 37° C. for 30 minutes. Make the proper estimated dilutions in 10-percent potassium phosphate buffer (pH 6.0) to give a concentration of 10 units per milliliter (estimated).
(b) *Blending.* Place a convenient-sized representative quantity of the sample in a blending jar containing 1.0 milliliter of a 10-percent aqueous solution of polysorbate 80 and sufficient 1-percent phosphate buffer (pH 6.0) to give a final volume of 200 milliliters. If the sample consists of substantially more than 1 gram, use sufficient buffer to give a final volume of 500 milliliters. If the concentration of polymyxin in the blend is less than 200 units per milliliter, 10-percent phosphate buffer (pH 6.0) should be used in lieu of 1-percent phosphate buffer (pH 6.0). Using a high-speed blender, blend the mixture for 2 minutes. Inactivate the penicillin with sufficient penicillinase at 37° C. for 30 minutes and make the proper estimated dilutions in 10-percent phosphate buffer (pH 6.0) to give a concentration of 10 units per milliliter (estimated).
(ii) The standard curve is prepared in the following concentrations: 6, 7, 8, 9, 10, 11, 12, 13, 14, and 15 units per milliliter in 10-percent potassium phosphate buffer, pH 6.0. The 10 units per milliliter concentration is used as the reference point. Its content of polymyxin is satisfactory if it contains not less than 85 percent of the number of units per milliliter or per gram that it is represented to contain.
(b) *Moisture.* Proceed as directed in § 141a.8 (b).

PART 146—GENERAL REGULATIONS FOR THE CERTIFICATION OF ANTIBIOTICS AND ANTIBIOTIC-CONTAINING DRUGS

§ 146.26 *Animal feed containing penicillin; animal feed containing streptomycin; animal feed containing dihydrostreptomycin; animal feed containing chlortetracycline; animal feed containing tetracycline; animal feed containing chloramphenicol; animal feed containing bacitracin; animal feed containing feed grade zinc bacitracin; animal feed containing bacitracin methylene disalicylate.* Animal feed containing penicillin, streptomycin, dihydrostreptomycin, chlortetracycline, tetracycline, chloramphenicol, bacitracin, feed grade zinc bacitracin, or bacitracin methylene disalicylate, or any combination of two or more of these, with or without added suitable vitamin substances, shall be exempt from the requirements of sections 502 (l) and 507 of the act under the conditions set forth in any one of the following paragraphs of this section:
(a) It is intended for use solely as an animal feeding supplement, it is conspicuously so labeled, and it is manufactured with or without one, but only one, of the following ingredients in a quantity, by weight of feed, as hereinafter indicated:
(1) Arsanilic acid: Not less than 0.005 percent and not more than 0.01 percent.
(2) Sodium arsanilate: Not less than 0.005 percent and not more than 0.01 percent.
(3) 3-Nitro-4-hydroxyphenol arsonic acid: Not less than 0.0025 percent and not more than 0.0075 percent.
(4) Furazolidone: 0.00083 percent.
(5) Furazolidone 0.00083 percent, 3-nitro-4-hydroxyphenol arsonic acid not less than 0.0025 percent and not more than 0.0075 percent, with or without nitrofurazone 0.0056 percent.
(b) It is intended for use in the conditions set forth in any one of the following subparagraphs of this paragraph:
(1) It is intended for use solely in the prevention of coccidiosis outbreaks in poultry flocks, its labeling bears adequate directions and warnings for such use, and it contains one, but only one, of the following ingredients in a quantity, by weight of feed, as hereinafter indicated:
(i) Sulfaquinoxaline: Not less than 0.0125 percent (or if it is intended solely for the prevention of the intestinal coccidia *E. acervalina* in poultry laying flocks, not less than 0.005 percent) and not more than 0.025 percent.
(ii) Nitrophenide: Not less than 0.0125 percent and not more than 0.025 percent.
(iii) Nitrofurazone: 0.0056 percent.
(iv) N'-acetyl-N'-(4-nitrophenyl) sulfanilamide 0.03 percent and 3-nitro-4-hydroxyphenylarsonic acid 0.009 percent.
(v) Furazolidone 0.00083 percent, 3-nitro-4-hydroxyphenol arsonic acid not less than 0.0025 percent and not more than 0.0075 percent, and nitrofurazone 0.0056 percent.
(2) It is intended for use solely in the control of coccidiosis outbreaks in poultry flocks, its labeling bears adequate directions and warnings for such use, and it contains one, but only one, of the following ingredients in a quantity, by weight of feed, as hereinafter indicated:
(i) Sulfaquinoxaline: Not less than 0.033 percent and not more than 0.10 percent.
(ii) Nitrophenide: 0.05 percent.
(iii) Nitrofurazone: 0.0112 percent.
(3) It is intended for use solely in the prevention of outbreaks of histomoniasis ("blackhead") in turkey flocks, its labeling bears adequate directions and warnings for such use, and it contains one, but only one, of the following ingredients in a quantity, by weight of feed, as hereinafter indicated:
(i) 2-Amino-5-nitrothiazole: 0.05 percent.
(ii) 4-Nitrophenylarsonic acid: 0.025 percent.
(4) It is intended for use solely in the control of outbreaks of histomoniasis ("blackhead") in turkey flocks, its labeling bears adequate directions and warnings for such use, and it contains 2-amino-5-nitrothiazole in a quantity, by weight of feed, of 0.10 percent.
(5) It is intended for use solely as an anthelmintic for poultry or swine, its labeling bears adequate directions and warnings for such use, and it contains one, but only one, of the following ingredients in a quantity, by weight of feed, as hereinafter indicated:
(i) di-*N*-Butyl tin dilaurate 0.07 percent, nicotine 0.03 percent, and phenothiazine 0.29 percent.
(ii) Nicotine 0.067 percent, phenothiazine 0.60 percent, and 2,2'dihydroxy-5,5'dichlorodiphenylmethane 0.28 percent.
(iii) Phenothiazine, not less than 0.3 percent and not more than 1.0 percent, and nicotine, not less than 0.03 percent and not more than 0.07 percent.
(iv) Phenothiazine, not less than 0.3 percent and not more than 1.0 percent.
(v) Nicotine, not less than 0.03 percent and not more than 0.07 percent.
(vi) Sodium fluoride 0.3 percent and sodium sulfate 2.0 percent.
(vii) Cadmium anthranilate, 0.044 percent.
(viii) Cadmium oxide, 0.015 percent.
(ix) Sodium fluoride, not less than 0.5 percent and not more than 1.0 percent.
(x) Piperazine dihydrochloride, not less than 0.18 percent and not more than 0.72 percent (piperazine base 0.1 percent to 0.4 percent).
(xi) Piperazine phosphate monohydrate, not less than 0.23 percent and not more than 0.92 percent (piperazine base 0.1 percent to 0.4 percent).
(xii) Piperazine sulfate, not less than 0.21 percent and not more than 0.85 percent (piperazine base 0.1 percent to 0.4 percent).
(xiii) Piperazine monohydrochloride, not less than 0.13 percent and not more than 0.52 percent (piperazine base 0.1 percent to 0.4 percent).
(xiv) di-*N*-Butyl tin dilaurate 0.07 percent, piperazine sulfate 0.12 percent, and phenothiazine 0.29 percent.
(6) It is intended for use solely in the prevention of chronic respiratory disease (air-sac infection) and hexamitiasis in poultry, bacterial swine enteritis, and/or bacterial calf diarrhea; its labeling bears adequate directions and warnings for such use, and it contains, per ton of feed, not less than 50 grams of chlortetracycline or oxytetracycline or a combination of such drugs; or, if it is intended for use solely as an aid in the prevention of bacterial swine enteritis, it contains a combination of 37.5 grams of streptomycin and 7.5 grams of penicillin per ton of feed. If it contains not less than 100 grams of chlortetracycline or oxytetracycline or a combination of such drugs per ton of feed, it may also be represented for use as an aid in the prevention of synovitis in poultry. When intended for the uses specified in this subparagraph, it may also contain, in the amount specified, one, but only one, of the ingredients prescribed by paragraph (a) of this section.
(7) It is intended for use solely as a treatment for chronic respiratory disease (air-sac infection), infectious sinusitis, blue comb (nonspecific infectious enteritis, mud fever), and hexamitiasis in poultry, and/or bacterial swine enteritis; its labeling bears adequate directions and warnings for such use; and it contains, per ton of feed, not less than 100 grams of chlortetracycline or oxytetracycline or a combination of such drugs or not less than 75 grams of streptomycin and 15 grams of penicillin. If it contains not less than 200 grams of chlortetracycline or oxytetracycline or a combination of such drugs per ton of feed, it may also be represented for use as an aid in the control of synovitis in poultry. When intended for the uses specified in this subparagraph, it may also contain, in the

amount specified, one, but only one, of the ingredients prescribed by paragraph (a) of this section. If it is intended for use solely in poultry, it may contain 0.1 percent of para-aminobenzoic acid or the sodium or potassium salt of para-aminobenzoic acid; or if it is intended for continuation of coccidiosis prevention it shall contain, in the amount specified, one of the ingredients prescribed by subparagraph (1) of this paragraph.

(8) It is intended for use solely in the prevention of coccidiosis and hexamitiasis outbreaks in turkey flocks, its labeling bears adequate directions and warnings for such use, and it contains di-*N*-butyl tin dilaurate in a quantity, by weight of feed, of 0.0375 percent.

(9) It is intended for use solely in the prevention of chronic respiratory disease (air-sac infection), infectious sinusitis, and blue comb (nonspecific infectious enteritis) in poultry and/or bacterial swine enteritis; its labeling bears adequate directions and warnings for such use, and it contains, per ton of feed, the equivalent of not less than 50 grams of bacitracin or 50 grams of penicillin (unless it is intended for bacterial swine enteritis) or 50 grams of a combination of the two drugs, except that if it contains the combination drug and it is intended for the prevention of bacterial swine enteritis it shall contain the equivalent of not less than 25 grams of bacitracin. When intended for the uses specified in this subparagraph, it may also contain, in the amount specified, one, but only one, of the ingredients prescribed by paragraph (a) of this section.

(10) It is intended for use solely in the treatment of chronic respiratory disease (air-sac infection), infectious sinusitis, and blue comb (nonspecific infectious enteritis) in poultry and/or bacterial swine enteritis; its labeling bears adequate directions and warnings for such use, and it contains, per ton of feed, the equivalent of not less than 100 grams of bacitracin or 100 grams of penicillin (unless it is intended for bacterial swine enteritis) or 100 grams of a combination of the two drugs, except that if it contains the combination drug and it is intended for the treatment of bacterial swine enteritis it shall contain the equivalent of not less than 50 grams of bacitracin. When intended for the uses specified in this subparagraph, it may also contain, in the amount specified, one, but only one, of the ingredients prescribed by paragraph (a) of this section.

(11) It is intended for use solely as a treatment for bacterial swine enteritis caused by Salmonella choleraesuis, its labeling bears adequate directions and warnings for such use, and it contains nitrofurazone in a quantity, by weight of feed, of 0.056 percent.

(12) It is intended for use solely in the prevention of coccidiosis, chronic respiratory disease (air-sac infection) and hexamitiasis in poultry; its labeling bears adequate directions and warnings for such use; and it contains, in the amount specified, one of the ingredients prescribed by subparagraph (1) of this paragraph and not less than 50 grams of chlortetracycline per ton of feed. When intended for such uses it may also contain oxytetracycline in a quantity not less than 50 grams per ton of feed.

(13) It is intended for use solely in the prevention or treatment of chronic respiratory disease (air-sac infection) and infectious sinusitis in poultry; its labeling bears adequate directions and warnings for such use; and it contains not less than 0.1 percent para-aminobenzoic acid or the sodium or potassium salt of para-aminobenzoic acid.

(14) It is intended solely as an aid in the prevention and control of losses due to low-grade bacterial enteritis in mink; its labeling bears adequate directions and warnings for such use; and it contains not less than 5.7 grams of chlortetracycline, 1.0 gram of bacitracin, and 0.75 gram of penicillin (with or without oxytetracycline) per ton of feed.

(15) It is intended for use solely as an aid in the prevention or treatment or to lessen the morbidity in poultry in outbreaks of fowl typhoid, pullorum, the paratyphoids, infectious arthritis due to a filterable agent, histomoniasis (blackhead), hexamitiasis, and quail disease (ulcerative enteritis), its labeling bears adequate directions and warnings for such use; and it contains the following quantities of furazolidone, by weight of feed, for the conditions indicated:

(i) For the prevention of fowl typhoid, pullorum, and the paratyphoids in birds older than 2 weeks: 0.0055 percent.

(ii) For the prevention of the diseases listed in subdivision (i) of this subparagraph in birds younger than 2 weeks, and for the treatment of these same conditions in birds regardless of age: 0.011 percent.

(iii) For the prevention of histomoniasis (blackhead) and infectious arthritis due to a filterable agent, and for the prevention and treatment of hexamitiasis, and quail disease (ulcerative enteritis): 0.011 percent.

(iv) For the treatment of histomoniasis (blackhead), and to lessen the morbidity in outbreaks of infectious arthritis due to a filterable agent: 0.022 percent.

(16) (i) It is intended for use solely in the prevention of chronic respiratory disease (air-sac infection); its labeling bears adequate directions and warnings for such use; and it contains not less than 50 grams of chlortetracycline or oxytetracycline or a combination of these two drugs per ton of feed. When intended for such use, it may also contain the equivalent of not less than 50 grams of bacitracin per ton of feed.

(ii) It is also intended for the prevention or treatment of the diseases of poultry specified in subparagraphs (6) and (7) and/or (9) and (10) or (16) and (17) of this paragraph, it contains one of the ingredients in the amount and under the conditions set forth in subdivision (i) of this subparagraph, and it contains the ingredients in the amounts specified in subparagraphs (6) and (7) and/or (9) and (10) or (16) and (17) of this paragraph, except that the coccidiostat shall be only one of those specified in subdivision (i) of this subparagraph.

(iii) It is intended for use in the diseases specified in subdivisions (i) and (ii) of this subparagraph, it contains ingredients in the amounts and under the conditions specified in those subdivisions, and it contains one, but only one, of the ingredients prescribed by paragraph (a) of this section and in the amounts specified in that paragraph.

(17) (i) It is intended for use solely as an aid in the treatment of chronic respiratory disease (air-sac infection), infectious sinusitis, blue comb (nonspecific infectious enteritis, mud fever) in poultry; its labeling bears adequate directions and warnings for such use; and it contains not less than 100 grams of chlortetracycline or oxytetracycline or a combination of these two drugs per ton of feed. When intended for such use, it may also contain the equivalent of not less than 100 grams of bacitracin per ton of feed.

(ii) It is also intended for the prevention or treatment of the diseases of poultry specified in subparagraph (16) of this paragraph; it contains one of the ingredients in the amount and under the conditions set forth in subdivision (i) of this subparagraph; and it contains furazolidone in the amount specified in subparagraph (15) of this paragraph.

(18) (i) It is intended for use solely in the prevention of outbreaks of coccidiosis in poultry flocks, and it contains nicarbazin (4,4'-dinitrocarbanilide complex with 2-hydroxy-4-6-dimethylpyrimidine) in a quantity, by weight of feed, of not less than 0.01 percent and not more than 0.02 percent, or arsenobenzene in a quantity, by weight of feed, of 0.002 percent, or 2,4-diamino-5-(*p*-chlorophenyl)-6-ethylpyrimidine in a quantity, by weight of feed, of 0.00075 percent and sulfaquinoxaline in a quantity, by weight of feed, of 0.0075 percent, or 2,2'dihydroxy-3,3',5,5'-tetrachlorodiphenyl sulfide (bithionol) 0.05 percent and 4,6-diamino-1-(4-methylmercaptophenyl)-1,2-dihydro-2,2-dimethyl-1,3,5-triazine hydrochloride (methiotriasmine) 0.01 percent; and there has been submitted to the Commissioner, in triplicate, adequate information of the kind described in § 146.7 to establish the safety and efficacy of the article and to guarantee its identity, strength, quality, and purity. The exemption shall expire at the beginning of any act changing the composition or labeling of such drug or the methods used in its manufacturing, processing, or packaging or the facilities and controls used for such manufacturing, processing, or packaging, unless the person who obtained the exemption has submitted to the Commissioner, in triplicate, amended information describing such proposed changes, and such amendment has been accepted by the Commissioner.

(ii) It is also intended for the prevention or treatment of the diseases of poultry specified in subparagraphs (6) and (7) and/or (9) and (10) or (16) and (17) of this paragraph, it contains one of the ingredients in the amount and under the conditions set forth in subdivision (i) of this subparagraph, and it contains the ingredients in the amounts specified in subparagraphs (6) and (7) and/or (9) and (10) or (16) and (17) of this paragraph, except that the coccidiostat shall be only one of those specified in subdivision (i) of this subparagraph.

(iii) It is intended for use in the diseases specified in subdivisions (i) and (ii) of this subparagraph, it contains ingredients in the amounts and under the conditions specified in those subdivisions, and it contains one, but only one, of the ingredients prescribed by paragraph (a) of this section and in the amounts specified in that paragraph.

(19) (i) It is intended for use solely in the prevention or control of outbreaks of histomoniasis ("blackhead") in turkey flocks, and it contains 2-acetylamino-5-nitrothiasole in a quantity, by weight of feed, of 0.015 percent if intended for the prevention of the disease, or 0.05 percent if intended for the control of the disease, and there has been submitted to the Commissioner, in triplicate, adequate information of the kind described in § 146.7 to establish the safety and efficacy of the article and to guarantee its identity, strength, quality, and purity. The exemption shall expire at the beginning of any act changing the composition of such drug, or the methods used in, and the facilities and controls used for its manufacturing, processing, and packaging, or in its labeling, unless the person who obtained the exemption has submitted to the Commissioner, in triplicate, amended information that describes such proposed changes, and such amendment has been accepted by the Commissioner.

(ii) It is intended for use in the disease specified in subdivision (i) of this subparagraph; it contains the ingredient in the amount and under the conditions specified in that subdivision; and it contains one, but only one, of the ingredients prescribed by paragraph (a) of this section and in the amounts specified in that paragraph.

(20) It is intended as an aid in stimulating growth, the prevention of coccidiosis, large roundworms and tapeworms in chickens and turkeys and the prevention of hexamitiasis in turkeys, and it contains in a quantity, by weight of feed, acetyl (*p*-nitrophenyl) sulfanilamide 0.03 percent, dibutyl tin dilaurate 0.02 percent, dinitrodiphenylsulfonylethylenediamine 0.02 percent, and 3-nitro-4-hydroxyphenylarsonic acid 0.0075 percent.

(21) (i) It is intended for promoting distribution of fat in chickens and turkeys, it contains dienestrol diacetate in a quantity, by weight of feed, of 0.007 percent, and there has been submitted to the Commissioner, in triplicate, adequate information of the kind described in § 146.7, to establish the safety and efficacy of the article and to guarantee its identity, strength, quality, and purity. The exemption shall expire at the beginning of any act changing the composition or labeling of such drug, or the methods used in its manufacturing, processing, or packaging, or the facilities and controls used for such manufacturing, processing, or packaging, unless the person who obtained the exemption has submitted to the Commissioner, in triplicate, amended information describing such proposed changes, and such amendment has been accepted by the Commissioner.

(ii) It is also intended for the prevention or treatment of the diseases of poultry specified in subparagraphs (6) and (7) of this paragraph, it contains dienestrol diacetate in the amounts and under the conditions set forth in subdivision (i) of this subparagraph, and it contains the antibiotics in the amounts specified in subparagraphs (6) and (7) of this paragraph.

(iii) It is also intended for continuation of coccidiosis prevention in poultry, it contains dienestrol diacetate in the amounts and under the conditions set forth in subdivision (i) of this subparagraph, and it contains one, but only one, of the ingredients prescribed by subparagraph (1) of this paragraph and in the amounts specified in that subparagraph, or it contains one, but only one, of the coccidiostats prescribed by subparagraph (18) of this paragraph, and in the amounts specified in that subparagraph.

(iv) It is also intended for use in the prevention of outbreaks of histomoniasis (blackhead) in turkey flocks, it contains dienestrol diacetate in the amounts and under the conditions set forth in subdivision (i) of this paragraph, and it contains one, but only one, of the ingredients prescribed by subparagraph (3) of this paragraph and in the amounts specified in that subparagraph.

(v) It is also intended for the prevention or treatment of the diseases of poultry specified in subparagraph (15) of this paragraph, it contains dienestrol diacetate in the amounts and under the conditions set forth in subdivision (i) of this subparagraph, and it contains furazolidone in the amounts specified in subparagraph (15) of this paragraph.

(vi) It is intended for use in the diseases specified in subdivisions (i), (ii), (iii), (iv) and (v), of this subparagraph, it contains ingredients in the amounts and under the conditions specified in those subdivisions, and it contains one, but only one, of the ingredients prescribed by paragraph (a) of this section, and in the amounts specified in that paragraph.

(22) (i) It is intended for use solely in the control of outbreaks of coccidiosis in poultry flocks and it contains in a quantity, by weight of feed, not less than 0.003 percent and not more than 0.006 percent of 2,4-diamino-5-(*p*-chlorophenyl)-6-ethylpyrimidine and not less than 0.01 percent and not more than 0.02 percent of sulfaquinoxaline, and there has been submitted to the Commissioner, in triplicate, the information referred to in § 146.7, as well as any additional information necessary to establish the safety and efficacy of the article and to guarantee its identity, strength, quality, and purity. The exemption shall expire at the beginning of any act changing the composition or labeling of such drug or the methods used in its manufacturing, processing, or repackaging, or the facilities and controls used for such manufacturing, processing, or repackaging, unless the person who obtains the exemption has submitted to the Commissioner, in triplicate, amended information describing such proposed changes and such amendment has been accepted by the Commissioner.

(ii) It is intended for use in the disease specified in subdivision (i) of this subparagraph, it contains the ingredients in the amounts and under the conditions specified in that subdivision, and it contains one, but only one, of the ingredients prescribed by paragraph (a) of this section and in the amounts specified in that paragraph.

(23) It is intended for use solely as an aid in the reduction of losses due to enterotoxemia in sheep; its labeling bears adequate directions and warnings for such use; and it contains not less than 20 grams of chlortetracycline per ton of feed.

(24) It is intended for use in the maintenance of weight gains of swine in the presence of atrophic rhinitis or as an aid in reducing the incidence of cervical abscesses in swine; its labeling bears adequate directions and warnings for such use; and it contains not less than 50 grams of chlortetracycline per ton of feed.

(25) It is intended for use as an aid in the reduction of bacterial diarrhea in beef cattle or as an aid in the prevention or treatment of bacterial pneumonia and shipping fever (hemorrhagic septicemia) or as an aid in reduction of losses due to respiratory infection (infectious rhinotracheitis-shipping fever complex) or as an aid in the prevention or treatment of foot rot in cattle or as an aid in the prevention of anaplasmosis in cattle or as an aid in the prevention of liver abscesses in feed-lot beef cattle; its labeling bears adequate directions and warnings for such uses; and it contains the following quantities of chlortetracycline, by weight of feed, for the conditions indicated:

(i) For the prevention of anaplasmosis: 0.5 milligram per pound of body weight per day.

(ii) For the prevention or treatment of foot rot in cattle: 0.1 milligram per pound of body weight per day.

(iii) As an aid in the reduction of bacterial diarrhea in beef cattle: 0.1 milligram per pound of body weight per day.

(iv) As an aid in the prevention or treatment of bacterial pneumonia and shipping fever (hemorrhagic septicemia) or as an aid in reduction of losses due to respiratory infection (infectious rhinotracheitis-shipping fever complex) in cattle: 350 milligrams per head per day, except that if it is intended for use for more than 30 days it may contain chlortetracycline, in a quantity by weight of feed to provide 70 milligrams per head per day.

(v) As an aid in the prevention of liver abscesses in feed-lot beef cattle: 70 milligrams per head per day.

(26) (i) It is intended for use solely for accelerating weight gains in beef cattle, and it contains a quantity of diethylstilbestrol adequate to provide not more than 10 milligrams per head per day when fed in accordance with the directions for use that accompany the feed, and there has been submitted to the Commissioner, in triplicate, adequate information of the kind described in § 146.7 to establish the safety and efficacy of the article and to guarantee its identity, strength, quality, and purity. The exemption shall expire at the beginning of any act changing the composition or labeling of such drug or the methods used in its manufacturing, processing, packaging, or in its labeling, unless the person who obtained the exemption has submitted to the Commissioner, in triplicate, amended information describing such proposed changes, and such amendment has been accepted by the Commissioner.

(ii) It is also intended for the prevention or treatment of the diseases specified in subparagraph (25) of this

paragraph, it contains diethylstilbestrol in the amount and under the conditions set forth in subdivision (i) of this subparagraph, and it contains the antibiotic in the amount specified in subparagraph (25) of this paragraph.

(27) It is intended for use as an aid in maintaining or increasing egg production, hatchability of eggs, prevention of early mortality of chicks when due to organisms that are sensitive to chlortetracycline, and for improving feed efficiency as related to egg production; its labeling bears adequate directions and warnings for such use; and it contains not less than 50 grams of chlortetracycline per ton of feed, except that if it is intended for use in the presence of disease outbreaks it shall contain not less than 100 grams of chlortetracycline per ton of feed.

(28) It is intended for use solely as an aid in the prevention or control of outbreaks of histomoniasis ("blackhead") in poultry flocks, and it contains carbasone in a quantity, by weight of feed, of not less than 0.05 percent and not more than 0.1 percent (except that if it is intended for prevention of histomoniasis in turkey flocks it contains not less than 0.0375 percent) and there has been submitted to the Commissioner, in triplicate, adequate information of the kind described in § 146.7 to establish the safety and efficacy of the article and to guarantee its identity, strength, quality, and purity. The exemption shall expire at the beginning of any act changing the composition of such drug, or the methods used in and the facilities and controls used for its manufacturing, processing, and packaging, or in its labeling, unless the person who obtained the exemption has submitted to the Commissioner, in triplicate, amended information that describes such proposed changes, and such amendment has been accepted by the Commissioner.

(29) It is intended for use solely as an aid in reducing the incidence of bacterial diarrhea in laboratory mice; its labeling bears adequate directions and warnings for such use; and it contains not less than 100 grams of chlortetracycline per ton of feed.

(30) It is intended for use as an aid in maintaining or increasing egg production of chickens, hatchability of eggs, prevention of early mortality of chicks when due to organisms that are sensitive to streptomycin and penicillin, and for improving feed efficiency of chickens or turkeys; its labeling bears adequate directions and warnings for such use; and it contains, per ton of feed, 18.75 grams of streptomycin and 3.75 grams of penicillin; except that if it is intended for use in the presence of disease, as an aid in maintaining or increasing hatchability of eggs, or for the prevention of early mortality of chicks, it contains 75 grams of streptomycin and 15 grams of penicillin per ton of feed.

(31) It is intended for use in nursing sows to stimulate milk flow; it contains 100 milligrams of iodinated casein per pound; and its labeling bears information that it is to be administered as the complete ration for 3 days before farrowing and for the first week of lactation. It may also be intended for use in the prevention or treatment of bacterial swine enteritis if it contains the antibiotics in the amounts prescribed by this section for that disease.

(32) It is intended for use as an aid in the control of infestation of large roundworms (Ascaris suis), nodular worm (Oesophagostemum dentatum), and whipworm (Trichuris suis) in swine; its labeling bears adequate directions and warnings for such use, including a warning that its use must be discontinued 48 hours before the treated swine are slaughtered for human consumption. If it is a complete feed it contains 6,000 units (6 milligrams) of hygromycin B (produced by the growth of Streptomyces hygrosoopicus) per pound, or if it is a hygromycin B feed supplement or premix it contains not more than 42,000 units (42 milligrams) of hygromycin B per pound. It contains less than 50 grams of antibiotics per ton of finished feed. If it is a hygromycin B feed supplement or premix and it contains more than 42,000 units of hygromycin B per pound, it shall be exempt from certification only if there has been submitted to the Commissioner, in triplicate, adequate information of the kind described in § 146.7 to establish the safety and efficacy of the article and to guarantee its identity, strength, quality, and purity. Such exemption shall expire at the beginning of any act changing the composition or labeling of such drug or the methods used in its manufacturing, processing, or packaging, or the facilities and controls used for such manufacturing, processing, or packaging, unless the person who obtained the exemption has submitted to the Commissioner (in triplicate) amended information describing such proposed changes, and such amendment has been accepted by the Commissioner. When intended for the uses specified in this subparagraph, it may also contain, in the amount specified, one, but only one, of the ingredients prescribed by paragraph (a) of this section. If it contains one of the arsenic compounds prescribed in such paragraph, its labeling must bear a warning that it must be discontinued 5 days (in lieu of 48 hours as required in this subparagraph) before the treated swine are slaughtered for human consumption.

(33) It is intended for use as an aid in reducing the incidence and severity of bloat in cattle on legume pastures; it contains a quantity of procaine penicillin that, when used as directed in the labeling, is sufficient to furnish each treated bovine animal not less than 75,000 units as a single daily dose; and, if the drug supplement used to prepare the medicated feed contains more than 2 percent moisture, its manufacturer has submitted to the Commissioner information adequate to prove its stability for 6 months under customary conditions of purchase and use.

(34) It is intended for use as an aid in the reduction of bacterial diarrhea in dairy cattle or as an aid in reduction of losses due to respiratory infection (infectious rhinotracheitis—shipping fever complex) or as an aid in the prevention or treatment of foot rot in cattle; its labeling bears adequate directions and warnings for such uses; and it contains the following quantities of chlortetracycline, by weight of feed, for the conditions indicated:

(i) For the prevention or treatment of foot rot and as an aid in the reduction of bacterial diarrhea in dairy cattle: 0.1 milligram per pound of body weight per day.

(ii) As an aid in reduction of losses due to respiratory infection (infectious rhinotracheitis—shipping fever complex) in dairy cattle: 0.1 milligram per pound of body weight per day, except that if it is intended for use for more than 30 days it may contain chlortetracycline, in a quantity by weight of feed to provide 70 milligrams per head per day.

(35) It is intended for use solely as an aid in the prevention of coccidiosis and as an aid in stimulating growth in chicken flocks; its labeling bears adequate directions and warnings for such use, including a warning against its use in laying hens and a warning that its use must be discontinued 5 days before the treated chickens are slaughtered for human consumption; and it contains in a quantity, by weight of feed, 0.03 percent acetyl (paranitrophenyl) sulfanilamide, 0.025 percent 3,5-dinitrobenzamide, and 0.005 percent 3-nitro-4-hydroxyphenylarsonic acid; it contains less than 50 grams of antibiotics per ton of feed; and there has been submitted to the Commissioner, in triplicate, adequate information of the kind described in § 146.7 to establish the safety and efficacy of the article and to guarantee its identity, strength, quality, and purity. The exemption shall expire at the beginning of any act changing the composition of such drug, or the methods used in, and the facilities and controls used for its manufacturing, processing, and packaging, or in its labeling, unless the person who obtained the exemption has submitted to the Commissioner, in triplicate, amended information that describes such proposed changes, and such amendment has been accepted by the Commissioner. When intended for the uses specified in this subparagraph, it may also contain, in the amount specified, one, but only one, of the ingredients prescribed by paragraph (a) of this section. If it contains one of the arsenic compounds prescribed in such paragraph, its labeling must bear a warning that it must be discontinued 5 days (in lieu of 48 hours as required in this subparagraph) before the treated swine are slaughtered for human consumption.

(36) It is intended for use solely as an aid in stimulating growth in chickens and turkeys and as an aid in the prevention of outbreaks of histomoniasis (blackhead) in chickens and turkeys and hexamitiasis in turkeys; its labeling bears adequate directions and warnings for such use, including a warning against its use in laying hens and a warning that its use must be discontinued 24 hours before the treated chickens or turkeys are slaughtered for human consumption; and it contains nithiazide (1-ethyl-3-(5-nitro-2-thiazolyl) urea) in a quantity, by weight of feed, of not less than 0.0125 percent and not more than 0.025 percent; it contains less than 50 grams of antibiotics per ton of feed; and there has been submitted to the Commissioner, in triplicate, adequate information of the kind described in § 146.7 to establish the safety and efficacy of the article and to guarantee its identity, strength, quality, and purity. The exemption shall expire at the beginning of any act changing the composition or labeling of such drug or the methods used in and the facilities and controls used for its manufacturing, processing, or packaging, or in its labeling, unless the person who obtained the exemption has submitted to the Commissioner, in triplicate, amended information describing such proposed changes, and such amendment has been accepted by the Commissioner. When intended for the uses specified in this subparagraph, it may also contain, in the amount specified, one, but only one, of the ingredients prescribed by paragraph (a) of this section. If it contains one of the arsenic compounds prescribed in such paragraph, its labeling shall bear a warning that it must be discontinued 5 days (in lieu of 4 days as required in this subparagraph) before the treated chickens are slaughtered for human consumption.

(37) It is intended for use solely in the prevention of outbreaks of coccidiosis and as an aid in stimulating growth in chicken flocks; its labeling bears adequate directions and warnings for such use, including a warning against its use in laying hens and a warning that its use must be discontinued 4 days before the treated chickens are slaughtered for human consumption; and it contains glycarbylamide (4,5-imidazole-dicarboxamide) in a quantity, by weight of feed, of not less than 0.002 percent and not more than 0.006 percent; it contains less than 50 grams of antibiotics per ton of feed; and there has been submitted to the Commissioner, in triplicate, adequate information of the kind described in § 146.7 to establish the safety and efficacy of the article and to guarantee its identity, strength, quality, and purity. The exemption shall expire at the beginning of any act changing the composition of such drug, or the methods used in, and the facilities and controls used for its manufacturing, processing, and packaging, or in its labeling, unless the person who obtained the exemption has submitted to the Commissioner, in triplicate, amended information that describes such proposed changes, and such amendment has been accepted by the Commissioner. When intended for the uses specified in this subparagraph, it may also contain, in the amount specified, one, but only one, of the ingredients prescribed by paragraph (a) of this section. If it contains one of the arsenic compounds prescribed in such paragraph, its labeling shall bear a warning that it must be discontinued 5 days (in lieu of 48 hours as required in this subparagraph) before the treated chickens or turkeys are slaughtered for human consumption.

(38) It is intended for use solely for accelerating weight gains in sheep; its labeling bears adequate directions and warnings for such use, including a warning that its use must be discontinued 48 hours before the treated animals are slaughtered for human consumption; it contains a quantity of diethylstilbestrol adequate to provide not more than 2 milligrams per head per day when fed in accordance with the directions for use that accompany the feed; it contains less than 50 grams of antibiotics per ton of feed; and there has been submitted to the Commissioner, in triplicate, adequate information of the kind described in § 146.7 to establish the safety and efficacy of the article and to guarantee its identity, strength, quality, and purity. The exemption shall expire at the beginning of any act changing the composition or labeling of such drug, or the methods used in its manufacturing, processing, and packaging, or in its labeling, unless the person who obtained the exemption has submitted to the Commissioner, in triplicate, amended information describing such proposed changes, and such amendment has been accepted by the Commissioner. When intended for the uses specified in this subparagraph, it may also contain, in the amount specified, one, but only one, of the ingredients prescribed by paragraph (a) of this section. If it contains one of the arsenic compounds prescribed in paragraph (a) of this section, its labeling must bear a warning that it must be discontinued 5 days (in lieu of 48 hours as required in this subparagraph) before the treated chickens or turkeys are slaughtered for human consumption.

(39) It is intended for use solely as an aid in the prevention or treatment of fowl typhoid, paratyphoid, and pullorum disease and as an aid in stimulating growth in poultry flocks; its labeling bears adequate directions and warnings for such use, including a warning against its use in laying hens and a warning that its use must be discontinued 48 hours before the treated animals are slaughtered for human consumption; and it contains 3,5-dinitrobenzamide in a quantity, by weight of feed, of not less than 0.075 percent and not more than 0.15 percent; it contains less than 50 grams of antibiotics per ton of feed; and there has been submitted to the Commissioner, in triplicate, adequate information of the kind described in § 146.7 to establish the safety and efficacy of the article and to guarantee its identity, strength, quality, and purity. The exemption shall expire at the beginning of any act changing the composition or labeling of such drug, or the methods used in its manufacturing, processing, and packaging, or in its labeling, unless the person who obtained the exemption has submitted to the Commissioner, in triplicate, amended information describing such proposed changes, and such amendment has been accepted by the Commissioner. When intended for the uses specified in this subparagraph, it may also contain, in the amount specified, one, but only one, of the ingredients prescribed by paragraph (a) of this section. If it contains one of the arsenic compounds prescribed in paragraph (a) of this section, its labeling must bear a warning that it must be discontinued 5 days (in lieu of 48 hours as required in this subparagraph) before the treated chickens or turkeys are slaughtered for human consumption.

(40) It is intended for use as an aid in maintaining or increasing egg production, hatchability of eggs, reduction of the effects of stress, prevention of early mortality of chicks, and reduction of the effects of diseases when due to organisms that are sensitive to bacitracin, for the stimulation of appetite, and for improving feed efficiency as related to egg production; its labeling bears adequate directions and warnings for such use; and it contains, per ton of feed, the equivalent of 50 grams of bacitracin when fed during the first 4 to 6 weeks of egg production, and not less than the equivalent of 10 grams of bacitracin when fed during the remainder of the laying period; except that if it is intended for use to increase egg hatchability or prevention of early mortality of chicks or for use in the presence of disease outbreaks or during periods of stress it shall contain the equivalent of 100 grams of bacitracin per ton of feed, and its labeling shall include a statement that at this level it shall be fed for not more than 15 days.

(c) [Reserved.]

(d) Fees: The fees for the services rendered with respect to each application for an exemption from certification under the regulations in paragraph (b) of this section, and for each amendment thereto, shall be:

(1) $5.00 for each medicated feed formula containing one or more new-drug substances described in an initial application.

(2) $5.00 for changes in one or more new-drug substances contained in a medicated feed formula described in an amendment to such application.

The fee prescribed by this paragraph shall accompany each application and each amendment to such application unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d).

PART 146a—CERTIFICATION OF PENICILLIN AND PENICILLIN-CONTAINING DRUGS

§ 146a.27 *Penicillin tablets.*—(a) *Standards of identity, strength, quality, and purity.* Penicillin tablets are tablets composed of sodium penicillin, calcium penicillin, potassium penicillin, crystalline penicillin O, crystalline penicillin V, crystalline potassium penicillin V, benzathine penicillin G, or procaine penicillin, with or without one or more suitable sympathomimetic agents, analgesic substances, antihistaminics, and caffeine and with or without one or more suitable and harmless vitamin substances, buffer substances, diluents, binders, lubricants, colorings, and flavorings. They may also contain probenecid or one or more suitable sulfonamides. The potency of each tablet is not less than 50,000 units, and if it is less than 100,000 units it is unscored. Its moisture content is not more than 1.0 percent if it contains sodium penicillin, calcium penicillin, potassium penicillin, or crystalline penicillin O; not more than 2.0 percent if it contains procaine penicillin; not more than 3.0 percent if it contains crystalline penicillin V; and not more than 8.0 percent if it contains benzathine penicillin G. If it contains crystalline potassium penicillin V, its moisture content is not more than 1.5 percent unless the person who requests certification has submitted to the Commissioner information adequate to prove that his drug is stable when it has a moisture content not exceeding 3 percent. The penicillin used conforms to the standards prescribed for such drug by the regulations in this chapter, except the standards for sterility and pyrogens. Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* Unless each penicillin tablet is enclosed in a foil or plastic film and such enclosure is a tight container as defined by the U. S. P., except the provision that it shall be capable of

tight reclosure, the immediate container shall be a tight container as so defined. The immediate container may also contain a desiccant separated from the tablets by a plug of cotton or other like material. The composition of the immediate container, or of the foil or film enclosure, shall be such as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused which are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded. If the penicillin tablets are freely soluble, each immediate container may be packaged in combination with one immediate container of a suitable and harmless aqueous vehicle with or without one or more suitable sulfonamides.

(c) *Labeling.* Each package of penicillin tablets shall bear, on its label or labeling as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark;

(ii) The number of units in each tablet of the batch;

(iii) If the batch contains, in addition to penicillin, one or more of the other active ingredients specified in paragraph (a) of this section, the name and quantity of each such other ingredient in each tablet.

(iv) If the batch contains buffer substances, the name of each such substance used in making the batch;

(v) If it is a packaged combination of penicillin tablets and a vehicle with or without sulfonamides, a statement giving the method of dissolving the penicillin; and

(vi) The statement "Expiration date ----------," the blank being filled in with one of the following dates after the month during which the batch was certified:

(*a*) If a crystalline penicillin is not used, 12 months.

(*b*) If a crystalline penicillin is used and it contains a vitamin substance, 18 months.

(*c*) If a penicillin V or potassium penicillin V is used, and it does not contain a vitamin substance, 24 months.

(*d*) If a crystalline penicillin other than a penicillin V is used and it does not contain a vitamin substance, 36 months.

(*e*) In lieu of the expiration date prescribed above for a drug, if the person who requests certification has submitted to the Commissioner results of tests and assays that show such drug as prepared by him is stable for 24 months, 36 months, 48 months, or 60 months, such date may be used for such drug:

Provided, however, That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container.

(2) On the outside wrapper or container:

(i) The statement "Caution: Federal law prohibits dispensing without prescription," unless it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled.

(ii) If it is packaged for dispensing and it is intended for use by man, a reference specifically identifying a readily available medical publication containing information (including contraindications and possible sensitization) adequate for the use of such drug by practitioners licensed by law to administer it; or a reference to a brochure or other printed matter containing such information, and a statement that such brochure or other printed matter will be sent on request: *Provided, however,* That this reference may be omitted if the information is contained in a circular or other labeling within or attached to the package.

(3) On the label and labeling, if it contains, in addition to penicillin, one or more of the other active ingredients specified in paragraph (a) of this section, after the name "penicillin tablets," wherever it appears, the words "with ------ (the blank being filled in with the common or usual name of each such other ingredient)" in juxtaposition with such name.

(4) On the circular or other labeling within or attached to the package, if it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled, adequate directions and warnings for the veterinary use of such drug by the laity. Such circular or other labeling may also bear a statement that a brochure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(d) *Requests for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch of penicillin tablets shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless it was previously submitted) the date on which the latest assay of the penicillin used in making such batch was completed, the number of units in each tablet, the quantity of each ingredient used in making the batch, the date on which the latest assay of the drug comprising such batch was completed, and a statement that each ingredient used in making the batch conforms to the requirements prescribed therefor, if any, by this section.

(2) Except as otherwise provided in subparagraph (4) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch; average potency per tablet and average moisture.

(ii) The penicillin used in making the batch; potency, toxicity, moisture, pH, penicillin K content (unless it is crystalline penicillin G, crystalline penicillin O, crystalline penicillin V, or crystalline potassium penicillin V), crystallinity if it is crystalline penicillin; heat stability if it is crystalline sodium penicillin, potassium penicillin, or crystalline penicillin O; the penicillin G content if it is a penicillin G or crystalline penicillin O; the penicillin V content if it is a penicillin V; and the penicillin O content if it is crystalline penicillin O.

(3) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch; one tablet for each 5,000 tablets in the batch, but in no case less than 30 tablets or more than 100 tablets, collected by taking single tablets at such intervals throughout the entire time of tableting that the quantities tableted during the intervals are approximately equal.

(ii) The penicillin used in making the batch; 6 packages, or in the case of crystalline penicillin 10 packages, each containing approximately equal portions of not less than 60 milligrams, except that if it is procaine penicillin, benzathine penicillin G, penicillin V, or potassium penicillin V each package shall contain not less than 300 milligrams, packaged in accordance with the requirements of § 146a.24 (b), 146a.44 (b), 146a.68 (b), or 146a.103 (b).

(iii) In case of an initial request, each other substance used in making the batch; one package of each, containing approximately 5 grams, and if the batch or any part thereof is to be packaged in combination with an aqueous vehicle, or when any change is made in the composition of such vehicle, five packages of the vehicle included in the combination.

(4) No result referred to in subparagraph (2) (ii) of this paragraph, and no sample referred to in subparagraph (3) (ii) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the service rendered with respect to each batch of penicillin tablets under the regulations in this part shall be:

(1) $0.75 for each tablet in the sample submitted in accordance with paragraph (d) (3) (i) of this section; $4.00 for each package in the samples submitted in accordance with paragraph (d) (3) (ii) and (iii) of this section; and

(2) If the Commissioner considers that investigations, other than examination of such tablets and packages, are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification, unless such fee is covered by an advance deposit maintained in accordance with § 146.3 (d) of this chapter.

(f) *Exemption of penicillin tablets from certification.* Penicillin tablets, with or without added vitamin substances and residues from streptomyces fermentation, shall be exempt from the requirements of sections 502 (l) and 507 of the act, if they comply with the following conditions:

(1) They contain not more than 1,000 units per tablet.

(2) The outside wrapper or container and the immediate container bear an expiration date that is not more than

24 months after the month during which the batch was last assayed and released by the manufacturer.

(3) They are intended to be administered only in the drinking water of poultry for use solely as a feed supplement and are conspicuously so labeled; they are not represented for the prevention or treatment of disease; and their labeling bears adequate directions for use by laymen.

§ 146a.47 *Procaine penicillin for aqueous injection—*(a) *Standards of identity, strength, quality, and purity.* Procaine penicillin for aqueous injection is a dry mixture of procaine penicillin and one or more suitable and harmless suspending or dispersing agents, with or without one or more suitable and harmless preservatives and buffer substances, or it is an aqueous suspension of procaine penicillin and one or more suitable and harmless suspending or dispersing agents, buffer substances, and preservatives, except that preservatives are not required if the immediate container is packaged to contain a single dose and is conspicuously so labeled. If it is an aqueous suspension of the drug, it may contain procaine hydrochloride in a concentration not exceeding 2.0 percent, one or more suitable and harmless stabilizing agents, and, if it is intended solely for veterinary use, it may contain cortisone or a suitable derivative of cortisone. It is so purified that:

(1) If it is an aqueous suspension of the drug, each container or each milliliter shall contain not less than 300,000 units;

(2) It is sterile;

(3) If it is the dry mixture of the drug, its moisture content is not more than 4.2 percent;

(4) It is nonpyrogenic;

(5) It is nontoxic; and

(6) Its pH in saturated aqueous solution is not less than 5.0 and not more than 7.5.

The procaine penicillin used conforms to the requirements of § 146a.44 (a). Each other substance, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* In all cases the immediate containers shall be tight containers as defined by the U. S. P., shall be sterile at the time of filling and closing, shall be so sealed that the contents cannot be used without destroying such seal, and shall be of such composition as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused which are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded. In case it is packaged for dispensing, it shall be in immediate containers of colorless, transpareht glass, closed by a substance through which a hypodermic needle may be introduced and withdrawn without removing the closure or destroying its effectiveness, unless it is the aqueous suspension of the drug and it is packaged to contain a single dose. If it is the dry mixture of the drug, each such container shall contain 300,000 units, 600,000 units, 900,000 units, 1,200,000 units, 1,500,000 units, or 3,000,000 units, unless it is intended solely for veterinary use and it is conspicuously so labeled. Each such container may be packaged in combination with a container of a suitable aqueous diluent. If it is the aqueous suspension of the drug, each such container shall contain not less than 1 milliliter (unless it is packaged to contain a single dose) and not more than 12 milliliters (unless it is intended solely for veterinary use and is conspicuously so labeled), and each shall be filled with a volume in excess of that designated, which excess shall be sufficient to permit the withdrawal and the administration of the volume indicated, whether administered in either single or multiple doses.

(c) *Labeling.* Each package shall bear on its label or labeling as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark;

(ii) The number of units in the immediate container;

(iii) The statement "Expiration date ------," the blank being filled in, if it is a dry mixture of the drug, with the date which is 36 months, or if it is the aqueous suspension of the drug, with the date which is 12 months after the month during which the batch was certified, except that the blank may be filled in with the date which is 48 months or 60 months, if it is the dry mixture of the drug, and 18 months or 24 months, if it is the aqueous suspension of the drug, after the month during which the batch was certified, if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section: *Provided, however,* That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container;

(iv) The statement "For intramuscular use only"; and

(v) If the drug contains preservatives or added procaine hydrochloride or cortisone or a derivative of cortisone, the name and quantity of each such added ingredient.

(2) On the immediate container, if it is a dry mixture of the drug, the conditions under which suspensions made from such drug should be stored, and the statement "Sterile suspension may be kept at room temperature for 1 week, or in a refrigerator for 3 weeks, without significant loss of potency," unless this information is contained in a circular or other labeling within or attached to the package.

(3) On the outside wrapper or container:

(i) The statement "Caution: Federal law prohibits dispensing without prescription," unless it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled.

(ii) If it is packaged for dispensing and it is intended for use by man, a reference specifically identifying a readily available medical publication containing information (including contraindications and possible sensitization) adequate for the use of such drug by practitioners licensed by law to administer it; or a reference to a brochure or other printed matter containing such information, and a statement that such brochure or other printed matter will be sent on request: *Provided, however,* That this reference may be omitted if the information is contained in a circular or other labeling within or attached to the package.

(iii) If it is intended solely for veterinary use and it contains cortisone or a derivative of cortisone, the statement "Caution: Federal law restricts this drug to sale by or on the order of a licensed veterinarian."

(iv) If it is the aqueous suspension of the drug, the statement "Store in refrigerator not above 15° C. (59° F.)" or "Store below 15° C. (59° F.)," unless the person who requests certification has submitted to the Commissioner results of tests and assays showing that such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section after having been stored at room temperature.

(4) On the circular or other labeling within or attached to the package, if it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled, adequate directions and warnings for the veterinary use of such drug by the laity, unless it contains cortisone or a derivative of cortisone. Such circular or other labeling may also bear a statement that a brochure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(5) On the circular or other labeling within or attached to the package, if it is intended solely for veterinary use and it contains cortisone or a derivative of cortisone, adequate directions and warnings for the veterinary use of such drug by a veterinarian licensed by law to administer it.

(6) On the label and labeling, if it contains cortisone or a derivative of cortisone, after the name "procaine penicillin for aqueous injection," wherever it appears, the words "with ------" in juxtaposition with such name, the blank being filled in with the common or usual name of each such ingredient.

(d) *Requests for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch of procaine penicillin for aqueous injection shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless it was previously submitted) the date on which the latest assay of the procaine penicillin used in making such batch was completed, the number of units in each of such packages, the quantity of each ingredient used in making the batch, the date on which the latest assay of the drug comprising such batch was completed, and a statement that each ingredient used in making the batch conforms to the requirements prescribed therefor, if any, by this section. If such batch, or any part thereof, is to

be packaged with a solvent, such request shall also be accompanied by a statement that such solvent conforms to the requirements prescribed therefor by this section.

(2) Except as otherwise provided by subparagraph (5) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch; potency, sterility, moisture, pyrogens, toxicity, pH.

(ii) The procaine penicillin used in making the batch; potency, crystallinity, penicillin K content (unless it is procaine penicillin G), and the penicillin G content if it is procaine penicillin G.

(3) Except as otherwise provided by subparagraph (5) of this paragraph, if such batch is packaged for dispensing, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch:

(*a*) For all tests except sterility; one immediate container for each 5,000 immediate containers in such batch, but in no case less than 10 or more than 17 immediate containers.

(*b*) For sterility testing; 10 immediate containers.

Such samples shall be collected by taking single immediate containers at such intervals throughout the entire time of packaging the batch that the quantities packaged during the intervals are approximately equal.

(ii) The procaine penicillin used in making the batch; 3 packages containing approximately equal portions of not less than 500 milligrams each, packaged in accordance with the requirements of § 146a.44 (b).

(iii) In case of an initial request for certification, each other ingredient used in making the batch; one package of each containing approximately 5 grams.

(iv) In case of an initial request for the certification of a batch of procaine penicillin for aqueous injection which is to be packaged in combination with an aqueous diluent which is not recognized by the U. S. P., or when any change is made in the composition of such diluent, five packages of the diluent included in the combination.

(4) If such batch is packaged for repacking, such person shall submit with his request a sample consisting of the following:

(i) For all tests except sterility; 10 packages.

(ii) For sterility testing; 10 packages.

Each such package shall contain not less than approximately 300 milligrams taken from different parts of such batch, and each shall be packaged in accordance with the requirements of paragraph (b) of this section.

(5) No result referred to in subparagraph (2) (ii) of this paragraph, and no sample referred to in subparagraph (3) (ii) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $4.00 for each immediate container in the samples submitted in accordance with paragraph (d) (3) (i) (*a*), (ii), (iii), (iv), and (4) (i) of this section.

(2) $10.00 for all containers submitted in accordance with paragraph (d) (3) (i) (*b*) and (4) (ii) of this section.

(3) If the Commissioner considers that investigations, other than examination of such immediate containers, are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

§ 146a.54 *Penicillin-streptomycin ointment (penicillin-streptomycin mineral oil suspension); penicillin-dihydrostreptomycin ointment (penicillin-dihydrostreptomycin mineral oil suspension.)* (a) Penicillin-streptomycin ointment and penicillin-dihydrostreptomycin ointment conform to all requirements prescribed by § 146a.26 for penicillin ointment, except paragraph (c) (2) (i) of that section, and are subject to all procedures prescribed by § 146a.26 for penicillin ointment, except that:

(1) It contains not less than 2,000 units of one or more kinds of penicillin salt per gram.

(2) It contains not less than 10 milligrams of streptomycin or dihydrostreptomycin per gram, unless it is intended solely for veterinary use and is conspicuously so labeled. If the ointment is intended for human use, the streptomycin or dihydrostreptomycin used conforms to the standards prescribed by § 146b.101 (a) or § 146b.103 of this chapter, except the standards for sterility, toxicity, pyrogens, and histamine. If the ointment is intended solely for veterinary use, the streptomycin or dihydrostreptomycin used may conform to the standards prescribed by § 146b.114 (a) of this chapter.

(3) If it is intended solely for veterinary use and is conspicuously so labeled, it may contain cortisone or a suitable derivative of cortisone, a suitable and harmless salt of cobalt, one or more sulfonamides, and one or more suitable and harmless preservatives; and if it is packaged and labeled solely for udder instillations of cattle it may contain papain.

(b) In lieu of the labeling prescribed for penicillin ointment by § 146a.26 (c) (1) (ii), each package shall bear on the outside wrapper or container and the immediate container the number of units of each salt of penicillin per gram and the number of milligrams of streptomycin or dihydrostreptomycin per gram, and if it contains cobalt, preservatives, sulfonamides or papain, the quantity of each.

(c) In addition to complying with the requirements of § 146a.26 (d), a person who requests certification of a batch shall submit with his request a statement showing the batch mark and (unless it was previously submitted) the results and date of the latest tests and assays of the streptomycin or dihydrostreptomycin used in making the batch for potency, moisture, pH, streptomycin content if it is dihydrostreptomycin, and crystallinity if it is crystalline dihydrostreptomycin sulfate. He shall also submit in connection with his request a sample consisting of not less than six packages, or if it contains two or more kinds of penicillin salt, seven packages, of such ointment and (unless it was previously submitted) a sample consisting of six packages containing approximately equal portions of not less than 0.5 gram each of the streptomycin or dihydrostreptomycin used in making the batch, packaged in accordance with the requirements of § 146b.101 (b) of this chapter.

(d) The fees for the services rendered with respect to the samples submitted in accordance with paragraph (c) of this section shall be:

(1) $5.00 for each immediate container of the ointment.

(2) $4.00 for each immediate container of streptomycin or dihydrostreptomycin.

§ 146a.57 *Procaine penicillin and streptomycin in oil; procaine penicillin and dihydrostreptomycin in oil.* (a) Procaine penicillin and streptomycin in oil and procaine penicillin and dihydrostreptomycin in oil conform to all requirements and to all procedures prescribed in § 146a.45 for procaine penicillin in oil for udder instillations of cattle or subcutaneous injection in fowl, except that:

(1) It contains not less than 2.0 milligrams of streptomycin or dihydrostreptomycin per milliliter. The streptomycin or dihydrostreptomycin used conforms to the standards prescribed by § 146b.101 (a) or § 146b.103 of this chapter, except the standards for sterility, pyrogens, and histamine, or by § 146b.114 (a) of this chapter, except that if it is intended for udder instillations of cattle the streptomycin or dihydrostreptomycin used conforms to the standards prescribed by § 146b.101 (a) or § 146b.106 of this chapter, except the standards for sterility, toxicity, pyrogens, and histamine, or by § 146b.114 (a) of this chapter, except the standard for toxicity.

(2) It may contain cortisone or a suitable derivative of cortisone, a suitable and harmless salt of cobalt and/or one or more suitable sulfonamides and papain, if it is intended solely for udder instillations of cattle, each of which, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(3) In lieu of the labeling prescribed for procaine penicillin in oil by § 146a.45 (c) (1) (ii) and (iv), each package shall bear on the outside wrapper or container and the immediate container the number of units of penicillin and the number of milligrams of streptomycin or dihydrostreptomycin per milliliter or prescribed dose; if it contains one or more of the active ingredients specified in subparagraph (2) of this paragraph, the name and quantity of each; the statement "For udder instillations of cattle only" or the statement "For subcutaneous injection in fowl only"; and if it is a multiple-dose container, the statement "Shake well." Each package shall also bear on its label and labeling, if it contains one or more of the other active ingredients specified in subparagraph (2) of this paragraph, after the name "Procaine penicillin and streptomycin in oil" or "Procaine penicillin and dihydrostreptomycin in oil," wherever it appears, the words "with ---------- (the blank being filled in with the common or usual name of each such other ingredient)," in juxtaposition with such name.

(4) In addition to complying with the requirements of § 146a.45 (d), a person who requests certification of a batch of procaine penicillin and streptomycin in oil or procaine penicillin and dihydrostreptomycin in oil shall submit with his request a statement showing the batch mark and (unless it was previously submitted) the results and the date of the latest tests and assays of the streptomycin or dihydrostreptomycin used in making the batch for potency, toxicity, (if it is intended for subcutaneous injection in fowl), moisture, pH, streptomycin content if it is dihydrostreptomycin, and crystallinity if it is crystalline dihydrostreptomycin; the number of units of penicillin and the number of milligrams of streptomycin or dihydrostreptomycin in each milliliter of the batch or in each prescribed dose. He shall also submit in connection with his request a sample consisting of not less than six immediate containers of the batch and (unless it was previously submitted) a sample consisting of six packages containing approximately equal portions of not less than 0.5 gram each of the streptomycin or dihydrostreptomycin used in making the batch, packaged in accordance with the requirements of § 146b.101 (b) of this chapter.

(b) The fees for the services rendered in accordance with the requirements of paragraph (a) (4) of this section shall be:

(1) $5.00 for each immediate container of the procaine penicillin and streptomycin or dihydrostreptomycin in oil submitted.

(2) $4.00 for each immediate container of streptomycin or dihydrostreptomycin used in making the batch.

§ 146a.58 *Penicillin-streptomycin; penicillin - dihydrostreptomycin* — (a) *Standards of identity, strength, quality, and purity.* Penicillin-streptomycin and penicillin-dihydrostreptomycin are procaine penicillin, crystalline sodium penicillin, potassium penicillin, *l*-ephenamine penicillin G, or diethylaminoethyl ester penicillin G hydriodide (if intended solely for veterinary use and conspicuously so labeled) or a mixture of two or more such salts and streptomycin sulfate or dihydrostreptomycin sulfate, with or without suitable and harmless buffer substances and suspending or dispersing agents. Each drug is sterile, nontoxic, and nonpyrogenic. Its moisture content is not more than 3.5 percent, except if it contains procaine penicillin its moisture content is not more than 4.2 percent. When prepared for injection as directed in its labeling, its pH is not less than 5.0 and not more than 7.5. The penicillin used conforms to the requirements of § 146a.24 (a), § 146a.44 (a), § 146a.64 (a), or § 146a.74 (a). The streptomycin sulfate used conforms to the requirements prescribed for streptomycin sulfate by § 146b.101 (a) of this chapter. The dihydrostreptomycin sulfate used conforms to the requirements prescribed for dihydrostreptomycin sulfate by § 146b.103 of this chapter. Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* In all cases the immediate containers shall be tight containers as defined by the U. S. P., shall be sterile at the time of filling and closing, shall be so sealed that the contents cannot be used without destroying such seal, and shall be of such composition as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused that are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded. In case it is packaged for dispensing it shall be in immediate containers of colorless (unless it is intended solely for veterinary use), transparent glass, closed by a substance through which a hypodermic needle may be introduced and withdrawn without removing the closure or destroying its effectiveness. Unless it is intended solely for veterinary use and is conspicuously so labeled or it is a single-dose container that contains not less than 300,000 units, each such container shall contain 300,000 units, 600,000 units, 900,000 units, 1,500,000 units, or 3,000,000 units of procaine penicillin, crystalline sodium penicillin, potassium penicillin, or *l*-ephenamine penicillin G and not less than 0.25 gram of streptomycin or dihydrostreptomycin for each 300,000 units of penicillin, except that if it is a mixture of two salts of penicillin it shall contain not less than 100,000 units of crystalline sodium penicillin or potassium penicillin for each 300,000 units of procaine penicillin. Each such container may be packaged in combination with a container of a solvent consisting of water for injection U. S. P., dextrose injection U. S. P., or sodium chloride injection U. S. P.

(c) *Labeling.* Each package shall bear on its label or labeling as hereinafter indicated the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark;

(ii) The number of units of each salt of penicillin in the immediate container;

(iii) The number of grams of streptomycin or dihydrostreptomycin in the immediate container;

(iv) The statement "Expiration date ------," the blank being filled in with the date that is 48 months after the month in which the batch was certified, except that the blank may be filled in with the date that is 60 months after the month during which the batch was certified if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section, and except that in no case shall the blank be filled in with the date that is more than 24 months after the month in which the batch was certified if it contains diethylaminoethyl ester penicillin G hydriodide: *Provided, however,* That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container;

(v) The statement "For intramuscular use only"; if it contains diethylaminoethyl penicillin G hydriodide, the statement "For veterinary use only"; and

(vi) The statement "For manufacturing use," "For repacking," or "For manufacturing use or repacking," when packaged for repacking or for use as an ingredient in the manufacture of another drug, as the case may be.

(2) On the outside wrapper or container the statement "Caution: Federal law prohibits dispensing without prescription," unless it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled.

(3) On the circular or other labeling within or attached to the package, if it is packaged for dispensing:

(i) If it is intended for use by man, adequate directions and warnings for its use by practitioners licensed by law to administer such drug.

(ii) If it is intended solely for veterinary use and is conspicuously so labeled, adequate directions and warnings for the veterinary use of such drug by the laity. Such circular or other labeling may also bear a statement that a brochure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(d) *Request for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch of penicillin and streptomycin or penicillin and dihydrostreptomycin shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the number of units of each salt of penicillin, and the number of grams of streptomycin or dihydrostreptomycin in each package, the batch marks, and (unless they were previously submitted) the dates on which the latest assays of the penicillin and streptomycin or dihydrostreptomycin used in making such batch were completed, the date on which the latest assay of the drug comprising such batch was completed, the quantity of each ingredient used in making the batch and a statement that each such ingredient conforms to the requirements prescribed therefor by this section. If such batch, or any part thereof, is to be packaged with a solvent, such request shall also be accompanied by a statement that such solvent conforms to the requirements prescribed therefor by this section.

(2) Except as otherwise provided by subparagraph (5) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch; potency, sterility, toxicity, pyrogens, moisture, pH.

(ii) The procaine penicillin used in making the batch; potency, crystallinity, penicillin K content (unless it is procaine penicillin G), and the penicillin G content if it is procaine penicillin G.

(iii) The crystalline sodium or potassium penicillin used in making the batch; potency, crystallinity, heat stability, penicillin K content (unless it is crystalline penicillin G), and the penicillin G content if it is crystalline penicillin G.

(iv) The *l*-ephenamine penicillin G used in making the batch; potency, crystallinity, heat stability, penicillin G content, and specific rotation.

(v) The diethylaminoethyl ester penicillin G hydriodide used in making the batch; potency, crystallinity, and penicillin G content.

(vi) The streptomycin or dihydrostreptomycin used in making the batch; potency, histamine content, streptomycin content if it is dihydrostreptomycin, and crystallinity if it is crystalline dihydrostreptomycin.

(3) Except as otherwise provided by subparagraph (5) of this paragraph, if such batch is packaged for dispensing, such person shall submit in connection with his request in the quantities hereinafter indicated accurately representative samples of the following:

(i) The batch:

(*a*) For all tests except sterility; one immediate container for each 5,000 immediate containers in such batch, but in no case less than 12 or more than 19 immediate containers.

(*b*) For sterility testing; 10 immediate containers.

Such samples shall be collected by taking single immediate containers at such intervals throughout the entire time of packaging the batch that the quantities packaged during the intervals are approximately equal.

(ii) The procaine penicillin used in making the batch; 3 packages containing approximately equal portions of not less than 0.5 gram each packaged in accordance with the requirements of § 146a.44 (b).

(iii) The crystalline penicillin used in making the batch; 3 packages containing approximately equal portions of not less than 250 milligrams each packaged in accordance with the requirements of § 146a.24 (b).

(iv) The *l*-ephenamine penicillin G used in making the batch; 3 packages containing approximately equal portions of not less than 0.5 gram each packaged in accordance with the requirements of § 146a.64 (b).

(v) The diethylaminoethyl ester penicillin G hydriodide used in making the batch; 3 packages containing approximately equal portions of not less than 0.5 gram each, packaged in accordance with § 146a.74 (b).

(vi) The streptomycin or dihydrostreptomycin used in making the batch; 6 packages containing approximately equal portions of not less than 0.5 gram each, packaged in accordance with the requirements of § 146b.101 (b) of this chapter.

(vii) In case of an initial request for certification, each other ingredient used in making the batch; one package of each containing approximately 5 grams.

(4) If such batch is packaged for repacking, such person shall submit with his request a sample consisting of the following:

(i) For all tests except sterility; 12 approximately equal portions of at least 2 grams.

(ii) For sterility testing; 10 approximately equal portions of at least 0.5 gram.

Each such portion shall be taken from a different part of such batch, and each shall be packaged in a separate container and in accordance with the requirements of paragraph (b) of this section.

(5) No result referred to in subparagraph (2) (ii), (iii), (iv), (v), and (vi) of this paragraph and no samples referred to in subparagraph (3) (ii), (iii), (iv), (v), and (vii) of this paragraph are required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $4.00 for each immediate container in the samples submitted in accordance with paragraph (d) (3) (ii), (iii), (iv), (v), (vi), and (vii) of this section; $5.00 for each immediate container submitted in accordance with paragraph (d) (3) (i) (*a*) and (4) (i) of this section; $10.00 for all immediate containers submitted in accordance with paragraph (d) (3) (i) (*b*) and (d) (4) (ii) of this section.

(2) If the Commissioner considers that investigations other than examination of such immediate containers are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

§ 146a.70 *Penicillin-streptomycin bacitracin ointment; penicillin-dihydrostreptomycin-bacitracin ointment; penicillin-streptomycin-bacitracin methylene disalicylate ointment; penicillin-dihydrostreptomycin-bacitracin methylene disalicylate ointment*—(a) *Penicillin-streptomycin-bacitracin ointment, penicillin-dihydrostreptomycin-bacitracin ointment, penicillin-streptomycin-bacitracin methylene disalicylate ointment, and penicillin-dihydrostreptomycin-bacitracin methylene disalicylate ointment conform to all requirements prescribed by § 146a.54 for penicillin-streptomycin ointment and penicillin-dihydrostreptomycin ointment, except that:*

(1) It contains the equivalent of not less than 500 units of bacitracin per gram, except if it is intended for paste instillation in cattle each dose, as recommended in its labeling, shall contain not less than the equivalent of 5,000 units of bacitracin. The bacitracin used conforms to the standards prescribed therefor by § 146e.401 (a) of this chapter except paragraph (a) (2), (3), (4), and (8) of that section. The bacitracin methylene disalicylate used conforms to the requirements of § 146e.416 (a) of this chapter.

(2) In addition to the labeling prescribed by § 146a.54 (b), each package shall bear on the outside wrapper or container and the immediate container the number of units of bacitracin or bacitracin methylene disalicylate per gram of ointment.

(3) In addition to complying with requirements of § 146a.54 (c), a person who requests certification of a batch shall submit with his request a statement showing the batch mark and (unless previously submitted) the results and the date of the latest tests and assays of the bacitracin or bacitracin methylene disalicylate used in making the batch for potency, moisture, pH, and ash content. He shall also submit in connection with his request a sample consisting of not less than 7 packages of such ointment and (unless it was previously submitted) a sample consisting of 6 packages containing approximately equal portions of not less than 0.5 gram each of the bacitracin or bacitracin methylene disalicylate used in making the batch, packaged in accordance with the requirements of § 146e.401 (b) of this chapter.

(b) The fees for the services rendered with respect to the samples submitted in accordance with paragraph (a) (3) of this section shall be:

(1) $6.00 for each immediate container of ointment submitted.

(2) $4.00 for each immediate container of bacitracin or bacitracin methylene disalicylate submitted.

§ 146a.84 *Penicillin and dihydrostreptomycin-streptomycin sulfates, procaine penicillin in dihydrostreptomycin-streptomycin sulfates solution*—(a) *Standards of identity, strength, quality, and purity.* Penicillin and dihydrostreptomycin-streptomycin sulfates and procaine penicillin in dihydrostreptomycin-streptomycin sulfates solution conform to the standards prescribed by § 146b.113 (a) of this chapter for dihydrostreptomycin - streptomycin sulfates, except that:

(1) It contains dry procaine penicillin, benzathine penicillin G, crystalline penicillin O, chloroprocaine penicillin O, crystalline sodium penicillin or potassium penicillin, or a mixture of any combination of such salts, or it contains procaine penicillin suspended in an aqueous solution of dihydrostreptomycin-streptomycin sulfates. The procaine penicillin used conforms to the requirements prescribed by § 146a.44 (a). The crystalline penicillin used conforms to the requirements prescribed for crystalline penicillin by § 146a.24 (a). The benzathine penicillin G used conforms to the requirement prescribed by § 146a.68 (a).

The crystalline penicillin O used conforms to the requirements prescribed by § 146a.24 (a). The chloroprocaine penicillin O used conforms to the requirements prescribed by § 146a.79 (a).

(2) It may contain suitable and harmless buffer substances, preservatives, suspending, dispersing, and stabilizing agents. Each such substance, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(3) The moisture content of the dry mixture is not more than 3.5 percent, except if it contains procaine penicillin or chloroprocaine penicillin O, its moisture content is not more than 4.2 percent, and if it contains benzathine penicillin G its moisture content is not more than 4 percent.

(4) The pH of a solution or a suspension prepared as directed in its labeling is not less than 5.0 and not more than 7.5.

(b) *Packaging.* It shall be packaged in accordance with the requirements prescribed by § 146b.113 (b) of this chapter, except that each immediate container or each milliliter shall contain not less than 300,000 units of penicillin, 0.15 gram dihydrostreptomycin, and 0.15 gram streptomycin.

(c) *Labeling.* If it is the dry mixture, it shall be labeled in accordance with the requirements prescribed by § 146a.58 (c), except that each package shall bear on the outside wrapper or container and the immediate container the number of units of each salt of penicillin, the number of grams of dihydrostreptomycin, and the number of grams of streptomycin in the immediate container. If it is the suspension of the drug, it shall be labeled in accordance with the requirements prescribed by § 146a.67 (c), except that each package shall bear on the outside wrapper or container and the immediate container the number of units of procaine penicillin, the number of grams of dihydrostreptomycin, and the number of grams of streptomycin in each milliliter in the immediate container.

(d) *Request for certification; samples.* (1) In addition to complying with the requirements of § 146b.113 (d) (1) of this chapter, a person who requests certification of a batch shall submit a statement showing the dates on which the latest assays of the penicillin used in making the batch were completed (unless they were previously submitted), the batch marks, and the content of each salt of penicillin in each container.

(2) Except as otherwise provided by subparagraph (5) of this paragraph, such person shall submit in connection with his request, results of the tests and assays listed after each of the following made by him on an accurately representative sample of:

(i) The batch; content of each salt of penicillin, content of dihydrostreptomycin and streptomycin, sterility, toxicity, pyrogens, moisture (if it is the dry mixture), and pH.

(ii) The procaine penicillin used in making the batch; potency, crystallinity, penicillin K content (unless it is penicillin G) and the penicillin G content if it is procaine penicillin G.

(iii) The crystalline sodium or potassium penicillin used in making the batch; potency, crystallinity, heat stability, penicillin K content (unless it is crystalline penicillin G), and the penicillin G content if it is crystalline penicillin G.

(iv) The benzathine penicillin G used in making the batch; potency, crystallinity, and penicillin G content.

(v) The crystalline penicillin O used in making the batch; potency, crystallinity, heat stability, penicillin O content, and penicillin G content.

(vi) The chloroprocaine penicillin O used in making the batch; potency, crystallinity, chloroprocaine penicillin O content, and chloroprocaine penicillin G content.

(vii) The dihydrostreptomycin and streptomycin used in making the batch; potency, histamine content, and crystallinity if it is crystalline dihydrostreptomycin.

(3) Except as otherwise provided by subparagraph (5) of this paragraph, if such batch is packaged for dispensing such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch:

(*a*) For all tests except sterility; one immediate container for each 5,000 immediate containers in such batch, but in no case less than 13 (14, if it contains benzathine penicillin G) or more than 19 immediate containers.

(*b*) For sterility testing: 10 immediate containers.

Such samples shall be collected by taking single immediate containers at such intervals throughout the entire time of packaging the batch that the quantities packaged during the intervals are approximately equal.

(ii) The procaine penicillin used in making the batch; 3 packages containing approximately equal portions of not less than 0.5 gram, each packaged in accordance with the requirements of § 146a.44 (b).

(iii) The crystalline penicillin used in making the batch; 3 packages containing approximately equal portions of not less than 250 milligrams, each packaged in accordance with the requirements of § 146a.24 (b).

(iv) The benzathine penicillin G used in making the batch; 3 packages containing approximately equal portions of not less than 0.5 gram each, packaged in accordance with the requirements of § 146a.68 (b).

(v) The crystalline penicillin O and the chloroprocaine penicillin O used in making the batch; 3 packages of each, containing approximately equal portions of not less than 300 milligrams each, packaged in accordance with the requirements of § 146a.24 (b) and § 146a.79 (b).

(vi) The dihydrostreptomycin and streptomycin used in making the batch; 6 packages of each salt containing approximately equal portions of not less than 0.5 gram, each packaged in accordance with the requirements of § 146b.101 (b) of this chapter.

(vii) In case of an initial request for certification, each other ingredient used in making the batch; one package of each containing approximately 5.0 grams.

(4) If such batch is packaged for repacking such person shall submit with his request a sample consisting of the following:

(i) For all tests except sterility; 13 (14, if it contains benzathine penicillin G) approximately equal portions of at least 2.0 grams.

(ii) For sterility testing; 10 approximately equal portions of at least 0.5 gram.

Each such portion shall be taken from a different part of such batch and each shall be packaged in a separate container and in accordance with the requirements of paragraph (b) of this section.

(5) No result referred to in subparagraph (2) (ii), (iii), (iv), (v), (vi), and (vii) of this paragraph, and no sample referred to in subparagraph (3) (ii), (iii), (iv), (v), and (vi) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $4.00 for each immediate container submitted in accordance with paragraph (d) (3) (ii), (iii), (iv), (v), (vi), and (vii) of this section; $6.00 for each immediate container submitted in accordance with paragraph (d) (3) (i) (*a*) and (4) (i) of this section; $10.00 for all containers submitted in accordance with paragraph (d) (3) (i) (*b*) of this section; $10.00 for all containers submitted in accordance with paragraph (d) (4) (ii) of this section.

(2) If the Commissioner considers that investigations other than examination of such immediate containers are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigation.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

§ 146a.108 *Procaine penicillin-streptomycin-polymyxin in oil; procaine penicillin -dihydrostreptomycin - polymyxin in oil; procaine penicillin-streptomycin-polymyxin ointment; procaine penicillin-dihydrostreptomycin-polymyxin ointment.* Procaine penicillin-streptomycin-polymyxin in oil, procaine penicillin-dihydrostreptomycin-polymyxin in oil, procaine penicillin-streptomycin-polymyxin ointment, and procaine penicillin - dihydrostreptomycin - polymyxin ointment conform to all requirements and are subject to all procedures prescribed by § 146a.54 for procaine penicillin-streptomycin ointment or procaine penicillin-dihydrostreptomycin ointment or by § 146a.57 for procaine penicillin and streptomycin in oil or procaine penicillin and dihydrostreptomycin in oil, except that:

(a) They contain not less than 50,000 units of polymyxin B per single-dose container. The polymyxin B used con-

forms to the requirements prescribed for polymyxin B by § 146b.107 (a) of this chapter, except the standard prescribed for toxicity (unless it is intended for subcutaneous injection in fowl).

(b) In lieu of the labeling prescribed by § 146a.54 (b) or § 146a.57 (a) (3), each package shall bear on the outside wrapper or container and the immediate container the number of units of penicillin, the number of milligrams of streptomycin or dihydrostreptomycin, and the number of units of polymyxin B per milliliter or per gram or per prescribed dose; if it contains one or more of the active ingredients specified in § 146a.54 (a) (3) or § 146a.57 (a) (2), the name and quantity of each; the statement "For udder instillation of cattle only"; and the statement "Expiration date _____," the blank being filled in with the date that is 12 months after the month during which the batch was certified. Each package shall also bear on its label and labeling, if it contains one or more of the active ingredients specified in § 146a.54 (a) (3) or § 146a.57 (a) (2), after the name "procaine penicillin-streptomycin-polymyxin in oil," "procaine penicillin-dihydrostreptomycin-polymyxin in oil," "procaine penicillin-streptomycin-polymyxin ointment," or "procaine penicillin-dihydrostreptomycin-polymyxin ointment," wherever it appears, the words "with _____ (the blank being filled in with the common or usual name of each such ingredient)," in juxtaposition with such name.

(c) In addition to complying with the requirements of § 146a.54 (c) or § 146a.57 (a) (4), a person who requests certification of a batch shall submit with his request a statement showing the batch mark and (unless it was previously submitted) the results and date of the latest tests and assays of the polymyxin used in making the batch for potency and toxicity. He shall also submit in connection with his request a sample consisting of not less than 7 immediate containers of the batch and (unless it was previously submitted) a sample consisting of 5 packages containing equal portions of not less than 0.5 gram each of the polymyxin used in making the batch.

(d) The fees for the services rendered with respect to the samples submitted in accordance with the requirements of paragraph (c) of this section shall be:

(1) $6.00 for each immediate container of the batch.

(2) $4.00 for each immediate container of the polymyxin used in making the batch.

PART 146b—CERTIFICATION OF STREPTOMYCIN (OR DIHYDROSTREPTOMYCIN) AND STREPTOMYCIN- (OR DIHYDROSTREPTOMYCIN-) CONTAINING DRUGS

§ 146b.112 *Streptomycin for inhalation therapy; dihydrostreptomycin for inhalation therapy*—(a) *Standards of identity, strength, quality, and purity.* Streptomycin for inhalation therapy and dihydrostreptomycin for inhalation therapy are streptomycin or dihydrostreptomycin, with or without one or more suitable and harmless diluents. If it is intended for human use, the streptomycin or dihydrostreptomycin used conforms to the standards prescribed by § 146b.101 (a) or § 146b.103, except the standards for sterility and pyrogens, and except that if it is packaged with inert gases its moisture content is not more than 0.5 percent. If it is intended solely for veterinary use, the streptomycin or dihydrostreptomycin used may conform to the standards prescribed by § 146b.114 (a), except that if it is packaged with inert gases its moisture content is not more than 0.5 percent. Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* The immediate container of streptomycin for inhalation therapy and dihydrostreptomycin for inhalation therapy shall be a tight container as defined by the U. S. P.; its closure shall be one through which a hypodermic needle cannot be introduced; and the container shall be of such composition as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused which are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded. Each such container shall contain not less than 50 milligrams, and may contain one or more suitable and harmless inert gases or each may be packaged in combination with a container of a suitable and harmless solvent.

(c) *Labeling.* Each package shall bear on its label or labeling as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark.

(ii) The number of milligrams in the immediate container, or (if it is packaged with one or more inert gases), the number of grams that shall be ejected when used as directed in the labeling.

(iii) The statement "Expiration date _____," the blank being filled in with the date which is 24 months if it is packaged with inert gases, or 48 months after the month during which the batch was certified; except that if it is packaged with inert gases the blank may be filled in with the date that is 36 months after the month during which the batch was certified if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section: *Provided, however,* That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container.

(iv) The statement "Warning—Not for injection."

(2) On the outside wrapper or container:

(i) The statement "Caution: Federal law prohibits dispensing without prescription," unless it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled.

(ii) If it is packaged for dispensing, and it is intended for use by man, a reference specifically identifying a readily available medical publication containing information (including contraindications and possible sensitization) adequate for the use of such drug by practitioners licensed by law to administer it; or a reference to a brochure or other printed matter containing such information, and a statement that such brochure or other printed matter will be sent on request: *Provided, however,* That this reference may be omitted if the information is contained in a circular or other labeling within or attached to the package.

(3) On the circular or other labeling within or attached to the package, if it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled, adequate directions and warnings for the veterinary use of such drug by the laity. Such circular or other labeling may also bear a statement that a brochure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(d) *Request for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch of streptomycin for inhalation therapy or dihydrostreptomycin for inhalation therapy shall submit with his request a statement showing the batch mark, the number of packages of each size in the batch, the number of milligrams in each package, and (unless it was previously submitted) the date on which the latest assay of the drug comprising such batch was completed. Such request shall be accompanied or followed by the results of tests and assays made by him on the batch for potency and moisture if the streptomycin or dihydrostreptomycin has been previously submitted, or for potency, toxicity, moisture, pH, histamine content (unless it is intended solely for veterinary use), streptomycin content if it is dihydrostreptomycin, and crystallinity if it is crystalline dihydrostreptomycin, if the streptomycin or dihydrostreptomycin has not been previously submitted. If such batch, or any part thereof, is to be packaged in combination with a container of a solvent, such request shall also be accompanied by a statement that such solvent conforms to the requirements prescribed therefor by this section.

(2) Such person shall submit with his request accurately representative samples of the following:

(i) The batch:

(a) If the streptomycin or dihydrostreptomycin used has been previously submitted; one immediate container for each 5,000 immediate containers in the batch, but in no case less than 5 immediate containers (or if it is packaged with inert gases, not less than 7 immediate containers and not more than 12 immediate containers), or more than 12 immediate containers.

(b) If the streptomycin or dihydrostreptomycin used has not been previously submitted; one immediate container for each 5,000 immediate containers in the batch, but in no case less than 12 immediate containers or more than 25 immediate containers.

Such sample shall be collected by taking single immediate containers at such intervals throughout the entire time of packaging the batch that the quantities packaged during the intervals are approximately equal.

(ii) If it is packaged with inert gases and the streptomycin or dihydrostreptomycin used has not been previously submitted; 5 packages containing approximately equal portions of not less than 0.5 gram each, packaged in accordance with the requirements of § 146b.101 (b).

(iii) In case of an initial request for the certification of a batch which is to be packaged in combination with a solvent which is not recognized by the U. S. P., or when any change is made in the composition of such solvent, five packages of the solvent included in the combination.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $4.00 for each immediate container in the samples submitted in accordance with paragraph (d) (2) (i) and (ii) of this section.

(2) If the Commissioner considers that investigations other than examination of such immediate containers are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

(f) *Exemption of streptomycin for inhalation therapy and dihydrostreptomycin for inhalation therapy for veterinary use from certification.* Streptomycin for inhalation therapy and dihydrostreptomycin for inhalation therapy that conform to the requirements of paragraphs (a), (b), and (c) of this section shall be exempt from the requirements of section 502 (l) and 507 of the act, if they comply with all the following conditions:

(1) They are intended solely for veterinary use and are conspicuously so labeled.

(2) The labels bear an expiration date that is not more than 48 months after the month during which the batch was last assayed and released by the manufacturer, except that such date is not more than 36 months if it is packaged with inert gases.

(3) The circular or other labeling within or attached to the package bears information that the antibiotics are for use only in the prevention or treatment of chronic respiratory disease (air-sac infection) in chickens and bears directions and warnings adequate for such use.

§ 146b.115 *Streptomycin sulfate powder oral veterinary; streptomycin sulfate granules oral veterinary; dihydrostreptomycin sulfate powder oral veterinary; dihydrostreptomycin sulfate granules oral veterinary; dihydrostreptomycin hydrochloride powder oral veterinary; dihydrostreptomycin hydrochloride granules oral veterinary*—(a) *Standards of identity, strength, quality, and purity.* Streptomycin sulfate powder oral veterinary, streptomycin sulfate granules oral veterinary, dihydrostreptomycin sulfate powder oral veterinary, dihydrostreptomycin sulfate granules oral veterinary, dihydrostreptomycin hydrochloride powder oral veterinary, and dihydrostreptomycin hydrochloride granules oral veterinary are streptomycin sulfate veterinary, dihydrostreptomycin sulfate veterinary, or dihydrostreptomycin hydrochloride veterinary, with or without one or more suitable and harmless diluents and stabilizing agents and with or without one or more suitable sulfonamides. Its potency is not less than 3.75 grams per pound. Its moisture content is not more than 7.0 percent. The streptomycin or dihydrostreptomycin used conforms to the standards prescribed by § 146b.114 (a). Each other ingredient used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* In all cases the immediate containers shall be tight containers as defined by the U. S. P. The composition of the immediate containers shall be such as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused which are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded.

(c) *Labeling.* Each package shall bear on its label or labeling as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark.

(ii) The number of milligrams of streptomycin or dihydrostreptomycin per gram and the number of grams in the immediate container.

(iii) If it contains one or more sulfonamides, the name and quantity of each such ingredient.

(iv) The statement "Expiration date _____," the blank being filled in with the date which is 36 months after the month during which the batch was certified, except that the blank may be filled in with the date that is 48 months after the month during which the batch was certified if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section and except that if the potency of the batch is less than 150 grams per pound the blank is filled in with the date that is 12 months after the month during which the batch was certified: *Provided, however,* That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container.

(v) The statement "For oral veterinary use only."

(vi) The statement "For manufacturing use," "For repacking," or "For manufacturing use or repacking," when packaged for repacking or for use as an ingredient in the manufacture of another drug, as the case may be.

(2) On the label and labeling, if it contains one or more sulfonamides, after the name "streptomycin sulfate powder oral veterinary," "streptomycin sulfate granules oral veterinary," "dihydrostreptomycin sulfate powder oral veterinary," "dihydrostreptomycin sulfate granules oral veterinary," "dihydrostreptomycin hydrochloride powder oral veterinary," or "dihydrostreptomycin hydrochloride granules oral veterinary," wherever such name appears, the words "with sulfonamide(s)," in juxtaposition with such name.

(3) On the circular or other labeling within or attached to the package, adequate directions and warnings for the veterinary use of such drug by the laity. Such circular or other labeling may also bear a statement that a bronchure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(d) *Request for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless it was previously submitted) the date on which the latest assay of the streptomycin or dihydrostreptomycin used in making such batch was completed, the quantity of each ingredient used in making the batch, the date on which the latest assay of the drug comprising such batch was completed, and a statement that each other ingredient used conforms to the requirements prescribed therefor, if any, by this section.

(2) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch; potency and moisture.

(ii) The streptomycin or dihydrostreptomycin used in making the batch; potency, toxicity, moisture, pH, and streptomycin content if it is dihydrostreptomycin.

(3) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch; one immediate container for each 5,000 immediate con-

tainers in the batch, but in no case less than 5 immediate containers or more than 12 immediate containers, unless each such container is packaged to contain more than 15 grams, in which case the sample shall consist of 15 grams for each 5,000 immediate containers in the batch, but in no case less than five 15-gram portions or more than twelve 15-gram portions. Such samples shall be collected by taking single immediate containers or 15-gram portions at such intervals throughout the entire time of packaging the batch that the quantities packaged during the intervals are approximately equal.

(ii) The streptomycin or dihydrostreptomycin used in making the batch; 6 packages containing approximately equal portions of not less than 1.0 gram each, packaged in accordance with the requirements of § 146b.114 (b).

(iii) In case of an initial request for certification, the other ingredients used in making the batch; one package of each containing approximately 5 grams.

(4) No result referred to in subparagraph (2) (ii) of this paragraph, and no sample referred to in subparagraph (3) (ii) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $4.00 for each immediate container in the samples submitted in accordance with paragraph (d) (3) (i), (ii), and (iii) of this section; and

(2) If the Commissioner considers that investigations other than the examination of such immediate containers are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

(f) *Exemption of streptomycin sulfate powder oral veterinary, streptomycin sulfate granules oral veterinary; dihydrostreptomycin sulfate powder oral veterinary, dihydrostreptomycin sulfate granules oral veterinary, dihydrostreptomycin hydrochloride powder oral veterinary, and dihydrostreptomycin hydrochloride granules oral veterinary from certification.* Streptomycin sulfate powder oral veterinary, streptomycin sulfate granules oral veterinary, dihydrostreptomycin sulfate powder oral veterinary, dihydrostreptomycin sulfate granules oral veterinary, dihydrostreptomycin hydrochloride powder oral veterinary, and dihydrostreptomycin hydrochloride granules oral veterinary that conform to the requirements of paragraphs (a) (except that they may contain one or more essential vitamin and mineral substances for nutritive purposes), (b), and (c) of this section shall be exempt from the requirements of sections 502 (l) and 507 of the act, if they comply with all the following conditions:

(1) The labels bear an expiration date that is not more than 48 months after the month during which the batch was last assayed and released by the manufacturer.

(2) If they contain added vitamins or minerals, the labels bear the name and quantity of each such substance and a statement that such substances are present only for furnishing additional vitamins and minerals while animals are eating less feed.

(3) The labels bear a statement that solutions prepared with the drugs are stable for not more than 24 hours.

(4) The circular or other labeling within or attached to the package bears information that only the antibiotics are intended for the prevention or treatment of the following conditions, and further, bears directions and warnings adequate for such use:

(i) Bacterial enteritis in swine.

(ii) Bacterial calf scours.

(iii) Chronic respiratory disease (air-sac infection) in chickens.

(iv) Blue comb (mud fever, nonspecific infectious enteritis) in poultry.

§ 146b.124 *Streptomycin-polymyxin-neomycin ointment; dihydrostreptomycin-polymyxin-neomycin ointment*—(a) *Standards of identity, strength, quality, and purity.* Streptomycin-polymyxin-neomycin ointment and dihydrostreptomycin-polymyxin-neomycin ointment are streptomycin or dihydrostreptomycin, polymyxin, and neomycin in a suitable and harmless ointment base, with or without one or more suitable sulfonamides, and with or without suitable and harmless dispersing and suspending agents. Their moisture content is not more than 1 percent. Their potency is such that when used as directed in their labeling each dose shall contain not less than 250 milligrams of streptomycin or dihydrostreptomycin, 100,000 units of polymyxin B, and 150 milligrams of neomycin. The streptomycin used conforms to the requirements of § 146b.101 (a), except § 146b.101 (a) (2), (3), (4), and (5). The dihydrostreptomycin used conforms to the requirements of § 146b.103, except the standards for sterility, toxicity, pyrogens, and histamine. The polymyxin B used conforms to the requirements prescribed for polymyxin B by § 146b.107 (a), except the standard for toxicity. The neomycin used conforms to the requirements prescribed for neomycin by § 146e.410 (a) (2) of this chapter, except the standard for toxicity. Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* Each batch of ointment shall be packaged in collapsible tubes which shall be well-closed containers as defined by the U. S. P. The composition of the immediate container shall be such as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused that are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded.

(c) *Labeling.* Each package shall bear on its label or labeling, as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark.

(ii) The number of milligrams of streptomycin or dihydrostreptomycin, the number of milligrams of neomycin, and the number of units of polymyxin B in each gram of the batch.

(iii) If the batch contains one or more sulfonamides, the name and quantity of each such ingredient per gram of the batch.

(iv) The statement "For veterinary use only."

(v) The statement "Expiration date _____," the blank being filled in with the date that is 18 months after the month during which the batch was certified: *Provided, however,* That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container.

(2) On the circular or other labeling within or attached to the package, adequate directions and warnings for the veterinary use of such drug by the laity. Such circular or other labeling may also bear a statement that a brochure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(d) *Requests for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch shall submit with his request a statement showing the batch mark and (unless they were previously submitted) the dates on which the latest assays of the streptomycin or dihydrostreptomycin, polymyxin B, and neomycin used in making such batch were completed; the quantity of each such ingredient used in making the batch, the date on which the latest assay of the drug comprising such batch was completed, and a statement that each ingredient used in making the batch conforms to the requirements prescribed therefor by this section.

(2) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following made by him on an accurately representative sample of:

(i) The batch: Potency and moisture.

(ii) The streptomycin or dihydrostreptomycin used in making the batch: Potency, pH, streptomycin content if it is dihydrostreptomycin, and crystallinity if it is crystalline dihydrostreptomycin sulfate.

(iii) The polymyxin B used in making the batch: Potency.

(iv) The neomycin used in making the batch: Potency, moisture, and pH.

(3) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch: 1 immediate container for each 5,000 immediate containers in the batch, but in no case less than 7 immediate containers or more than 12 immediate containers, collected by taking single immediate containers at such intervals throughout the entire time of packaging the batch that the quantities packaged during the intervals are approximately equal.

(ii) The streptomycin or dihydrostreptomycin used in making the batch: 6 packages containing approximately equal portions of not less than 0.5 gram each, packaged in accordance with the requirements of § 146b.101 (b).

(iii) The polymyxin B used in making the batch: 5 packages containing approximately equal portions of not less than 0.5 gram each.

(iv) In case of an initial request for certification, the ingredients used in making the batch: 1 package of each ointment-base ingredient, containing approximately 200 grams; 1 package of each suspending or dispersing agent used, containing approximately 5 grams; 1 package of each sulfonamide used, containing approximately 5 grams.

(4) The results referred to in subparagraph (2) (ii), (iii), and (iv) of this paragraph and the samples referred to in subparagraph (3) (ii), (iii), and (iv) of this paragraph are not required if such results or samples have been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $4.00 for each immediate container in the samples submitted in accordance with paragraph (d) (3) (ii), (iii), (iv), and (v) of this section; $6.00 for each immediate container submitted in accordance with paragraph (d) (3) (i) of this section.

(2) If the Commissioner considers that investigations other than examination of such packages are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigation. The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

PART 146c—CERTIFICATION OF CHLORTETRACYCLINE (OR TETRACYCLINE) AND CHLORTETRACYCLINE- (OR TETRACYCLINE-CONTAINING DRUGS

§ 146c.202 *Chlortetracycline hydrochloride ointment; chlortetracycline calcium ointment; chlortetracycline calcium cream; tetracycline hydrochloride ointment (tetracycline hydrochloride in oil suspension); tetracycline ointment (tetracycline cream)*—(a) *Standards of identity, strength, quality and purity.* Chlortetracycline hydrochloride ointment, tetracycline hydrochloride ointment, and tetracycline ointment are crystalline chlortetracycline hydrochloride, chlortetracycline calcium, tetracycline hydrochloride, or tetracycline, in a suitable and harmless ointment base. It may contain a suitable local anesthetic, cortisone, hydrocortisone, or a suitable ester of cortisone or hydrocortisone, and one or more suitable and harmless preservatives and stabilizing agents. Its moisture content is not more than 1 percent if it is chlortetracycline hydrochloride or tetracycline hydrochloride ointment. Its potency is not less than 1 milligram per gram. The chlortetracycline hydrochloride used in making the chlortetracycline hydrochloride ointment and in preparing the chlortetracycline calcium used in making the chlortetracycline calcium ointment conforms to the requirements of § 146c.201 (a), except § 146c.201 (a) (1), (2), (3), (4), and (5), but its potency is not less than 750 μg. per milligram. The tetracycline hydrochloride used conforms to the requirements of § 146c.218 (a), except § 146c.218 (a) (2), (3), (4), and (5). The tetracycline used conforms to the requirements of § 146c.220 (a). Each other ingredient used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* The ointment shall be packaged in collapsible tubes which are well-closed containers as defined by the U. S. P., or in containers of glass or plastic that are tight containers as defined by the U. S. P. Unless it is labeled solely for hospital use, each such container shall contain not more than 2 ounces, except if it is intended for ophthalmic use each such container shall contain not more than ⅛-ounce, if it is a collapsible tube, or more than ½-ounce if it is a tight container. Each such container shall be of such composition as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused that are normal and unavoidable in good packaging, storage, and distribution practices shall be disregarded.

(c) *Labeling.* Each package of ointment shall bear on its label or labeling as hereinafter indicated:

(1) On the outside wrapper or container and the immediate container of the package:

(i) The batch mark;

(ii) The potency per gram, expressed in terms of its equivalency of chlortetracycline hydrochloride or as tetracycline hydrochloride;

(iii) If it contains preservatives, cortisone, hydrocortisone, or an ester of cortisone or hydrocortisone, or a local anesthetic, the name and quantity of each such substance;

(iv) The statement "Expiration date _____," the blank being filled in with the date that is 48 months if it is chlortetracycline hydrochloride ointment, or if it is chlortetracycline calcium ointment or tetracycline hydrochloride ointment the blank is filled in with the date that is 24 months after the month during which the batch was certified, except that the blank may be filled in with the date that is 36 months or 48 months after the month during which the batch was certified if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section: *Provided, however,* That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container.

(2) On the outside wrapper or container, if it is packaged for ophthalmic use by man or if it contains cortisone, hydrocortisone, or an ester of cortisone or hydrocortisone, the statement "Caution: Federal law prohibits dispensing without prescription," and a reference specifically identifying a readily available medical publication containing information (including contraindications and possible sensitization) adequate for the use of such ointment by practitioners licensed by law to administer such drug; or a reference to a brochure or other printed matter containing such information, and a statement that such brochure or printed matter will be sent on request: *Provided, however,* That this reference may be omitted if the information is contained in a circular or other labeling within or attached to the package.

(3) On the label and labeling, if it contains one or more of the active ingredients specified in paragraph (a) of this section, after the name "chlortetracycline ointment," "chlortetracycline calcium ointment," "chlortetracycline calcium cream," "tetracycline hydrochloride ointment," or "tetracycline ointment" wherever it appears, the words "with _____," in juxtaposition with such name, the blank being filled in with the common or usual name of each such ingredient used.

(4) If it is not packaged for ophthalmic use by man or it does not contain cortisone, hydrocortisone, or an ester of cortisone or hydrocortisone, a circular or other labeling within or attached to the package bearing adequate directions and warnings for prophylactic use by man, or for the veterinary use of such ointment. Such circular or other labeling may also bear a statement that a brochure or other printed matter containing information for other uses of such ointment by practitioners licensed by law to administer such drug will be sent on request to such a practitioner.

(d) *Requests for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch of ointment shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless it was previously submitted) the date on which the latest assay of the chlortetracycline, tetracycline hydrochloride or tetracycline used in making such batch was completed, the quantity of each ingredient used in making the batch, the date on which the latest assay of the drug comprising such batch was completed, and that each component of the ointment base used conforms to the

requirements prescribed therefor by this section.

(2) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch; potency and moisture.

(ii) The chlortetracycline hydrochloride or tetracycline hydrochloride or tetracycline used in making the batch; potency, moisture, pH, crystallinity, and extinction coefficient, if it is tetracycline hydrochloride or tetracycline.

(3) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch; one package for each 5,000 packages in the batch, but in no case less than five packages or more than 12 packages, collected by taking single packages at such intervals throughout the entire time of packaging the batch that the quantities packaged during the intervals are approximately equal.

(ii) The chlortetracycline, tetracycline hydrochloride or tetracycline used in making the batch; ten packages, containing approximately equal portions of not less than 60 milligrams each, packaged in accordance with the requirements of § 146c.201 (b).

(iii) In case of an initial request for certification, each other ingredient used in making the batch: 1 package of each component of the ointment base, each containing approximately 200 grams; 1 package of each preservative used, each containing approximately 5 grams; and if cortisone, hydrocortisone, or an ester of cortisone or hydrocortisone is used, 1 package of such ingredient, containing approximately 100 milligrams.

(4) No result referred to in subparagraph (2) (ii) of this paragraph, and no sample referred to in subparagraph (3) (ii) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch of ointment under the regulations in this part shall be:

(1) $4.00 for each package in the samples submitted in accordance with paragraph (d) (3) (i), (ii), and (iii) of this section; and

(2) If the Commissioner considers that investigations, other than examination of such packages, are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigations. The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

§ 146c.204 *Chlortetracycline hydrochloride capsules; tetracycline hydrochloride capsules; tetracycline capsules; tetracycline phosphate complex capsules*—(a) *Standards of identity, strength, quality, and purity.* Chlortetracycline hydrochloride capsules, tetracycline hydrochloride capsules, tetracycline capsules and tetracycline phosphate complex capsules are capsules composed of crystalline chlortetracycline hydrochloride, tetracycline hydrochloride, tetracycline, or tetracycline phosphate complex, with or without one or more suitable sulfonamides, analgesic substances, antihistaminics, and with or without one or more suitable and harmless vitamin substances, buffer substances, vegetable oils, preservatives, diluents, binders, lubricants, colorings, and flavorings and glucosamine hydrochloride, enclosed in a gelatin capsule. Each capsule shall contain not less than 50 milligrams of chlortetracycline hydrochloride, tetracycline hydrochloride, tetracycline, or tetracycline phosphate complex, unless it is intended solely for veterinary use and is conspicuously so labeled. Its moisture content is not more than 2 percent if it contains chlortetracycline hydrochloride, not more than 3 percent if it contains tetracycline (not more than 9 percent if it contains sodium metaphosphate as a buffer substance), not more than 4 percent if it contains tetracycline hydrochloride, and not more than 9 percent if it contains tetracycline phosphate complex, except that in no case shall it be more than 3 percent if it contains vitamins. The chlortetracycline hydrochloride used conforms to the requirements of § 146c.201 (a), except § 146c.201 (a) (2), (4), and (5). The tetracycline hydrochloride used conforms to the requirements of § 146c.218 (a), except § 146c.218 (a) (2), (4), and (5). The tetracycline used conforms to the requirements of § 146c.220 (a). The tetracycline phosphate complex used conforms to the requirements of § 146c.232. Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* Unless each capsule is enclosed in a foil or plastic film and such enclosure is a tight container as defined by the U. S. P., except the provision that it shall be capable of tight reclosure, the immediate container shall be a tight container as so defined. The immediate container may also contain a desiccant separated from the capsules by a plug of cotton or other like material. The composition of the immediate container, or of the foil or film enclosure, shall be such as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused which are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded.

(c) *Labeling.* Each package shall bear, on its label or labeling as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark;

(ii) The number of milligrams in each capsule of the batch;

(iii) If the batch contains, in addition to chlortetracycline hydrochloride, tetracycline hydrochloride, tetracycline, or tetracycline phosphate complex, one or more of the other active ingredients specified in paragraph (a) of this section, the name and quantity of each such ingredient in each capsule;

(iv) The statement "Expiration date _____," the blank being filled in with one of the following dates after the month during which the batch was certified:

(*a*) If chlortetracycline hydrochloride is used, 60 months;

(*b*) If tetracycline hydrochloride is used, 48 months;

(*c*) If tetracycline is used, 36 months;

(*d*) If tetracycline phosphate complex is used, or if it contains one or more vitamin substances, analgesic substances, antihistaminics, or caffeine, and it does not contain sodium metaphosphate, 24 months;

(*e*) If it contains sodium metaphosphate, 18 months.

Provided, however, That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container.

(2) On the outside wrapper or container:

(i) The statement: "Caution: Federal law prohibits dispensing without prescription," unless it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled.

(ii) If it is packaged for dispensing and it is intended for use by man, a reference specifically identifying a readily available medical publication containing information (including contraindications and possible sensitization) adequate for the use of such drug by practitioners licensed by law to administer it; or a reference to a brochure or other printed matter containing such information, and a statement that such brochure or other printed matter will be sent on request: *Provided, however,* That this reference may be omitted if the information is contained in a circular or other labeling within or attached to the package.

(3) On the label and labeling, if it contains, in addition to chlortetracycline hydrochloride, tetracycline hydrochloride, tetracycline, or tetracycline phosphate complex, one or more of the active ingredients specified in paragraph (a) of this section, after the name "chlortetracycline hydrochloride capsules" or "tetracycline hydrochloride capsules" or "tetracycline capsules" or "tetracycline phosphate complex capsules," wherever it appears, the words "with _____ (the blank being filled in with the common or usual name of each other ingredient)," in juxtaposition with such name.

(4) On a circular or other labeling within or attached to the package, if it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled, adequate directions and warnings for the veterinary use of such drug by the laity. Such circular or other labeling may also bear a statement that a brochure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(d) *Requests for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless it was previously submitted) the date on which the latest assay of the chlortetracycline, tetracycline hydrochloride, tetracycline or tetracycline phosphate complex used in making such batch was completed, the number of milligrams in each capsule, the quantity of each ingredient used in making the batch, the date on which the latest assay of the drug comprising such batch was completed, and a statement that each ingredient used in making the batch conforms to the requirements prescribed therefor, if any, by this section.

(2) Except as otherwise provided in subparagraph (4) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch; average potency per capsule and average moisture.

(ii) The chlortetracycline, tetracycline hydrochloride, tetracycline, or tetracycline phosphate complex used in making the batch; potency, toxicity, moisture, pH, crystallinity and extinction coefficient if it is chlortetracycline hydrochloride, tetracycline, or tetracycline phosphate complex, and solubility if it is tetracycline phosphate complex.

(3) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch; one capsule for each 5,000 capsules in the batch, but in no case less than 30 capsules or more than 100 capsules, collected by taking single capsules at such intervals throughout the entire time of preparation that the quantities encapsulated during the intervals are approximately equal.

(ii) The chlortetracycline, tetracycline hydrochloride, tetracycline, or tetracycline phosphate complex used in making the batch; 10 packages, each containing approximately equal portions of not less than 60 milligrams, packaged in accordance with the requirements of § 146c.201 (b).

(iii) In case of an initial request for certification, each other ingredient used in making the batch; one package of each containing approximately 5 grams.

(4) No result referred to in subparagraph (2) (ii) of this paragraph, and no sample referred to in subparagraph (3) (ii) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $0.75 for each capsule in the sample submitted in accordance with paragraph (d) (3) (i) of this section, $4.00 for each package in the samples submitted in accordance with paragraph (d) (3) (ii), and (iii) of this section; and

(2) If the Commissioner considers that investigations, other than examination of such capsules and packages, are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification, unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

§ 146c.205 *Chlortetracycline powder (chlortetracycline hydrochloride powder); tetracycline hydrochloride powder; tetracycline powder*—(a) *Standards of identity, strength, quality, and purity.* Chlortetracycline powder, tetracycline hydrochloride powder, and tetracycline powder are crystalline chlortetracycline hydrochloride, tetracycline hydrochloride, or tetracycline, with or without glucosamine hydrochloride and one or more suitable and harmless vitamin substances, and with or without suitable and harmless buffer substances, preservatives, diluents, colorings, and flavorings. The content of chlortetracycline or tetracycline hydrochloride or tetracycline is not less than 15 milligrams per gram of powder. The moisture content of chlortetracycline powder or tetracycline hydrochloride powder is not more than 2 percent. The moisture content of tetracycline powder is not more than 7.5 percent. The chlortetracycline used conforms to the requirements of § 146c.201 (a), except § 146c.201 (a) (2), (4), and (5). The tetracycline hydrochloride used conforms to the requirements of § 146c.218 (a), except subparagraphs (2), (4), and (5) of that paragraph. The tetracycline used conforms to the requirements of § 146c.220 (a). Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* In all cases the immediate container shall be a tight container as defined by the U. S. P. The composition of the immediate container shall be such as will not cause any change in the strength, quality, or purity of the contents beyond any limits therefor in applicable standards, except that minor changes so caused which are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded.

(c) *Labeling.* Each package shall bear on its label or labeling as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark;

(ii) The number of milligrams of chlortetracycline or tetracycline hydrochloride or tetracycline (expressed in terms of equivalency of tetracycline hydrochloride) per gram; or, if it is intended for use solely as an ingredient in the drinking water of animals and is conspicuously so labeled, the number of grams of drug per pound in the immediate container;

(iii) The statement "Expiration date _____," the blank being filled in with the date that is 60 months after the month during which the batch was certified if it is chlortetracycline hydrochloride powder, or if it is tetracycline hydrochloride powder or tetracycline powder the blank is filled in with the date that is 24 months after the month during which the batch was certified, except that the blank may be filled in with the date that is 36 months or 48 months after the month during which the batch was certified if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section, except if it contains one or more vitamin substances the blank is filled in with the date that is 24 months after the month during which the batch was certified: *Provided, however,* That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container;

(iv) If it contains a preservative or vitamin substance, the name and quantity of each such ingredient, and if it contains glucosamine hydrochloride, the name of that ingredient.

(2) On the outside wrapper or container:

(i) The statement "Caution: Federal law prohibits dispensing without prescription," unless it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled.

(ii) If it is packaged for dispensing and it is intended for use by man, a reference specifically identifying a readily available medical publication containing information (including contraindications and possible sensitization) adequate for the use of such drug by practitioners licensed by law to administer it; or a reference to a brochure or other printed matter containing such information, and a statement that such brochure or other printed matter will be sent on request: *Provided, however,* That this reference may be omitted if the information is contained in a circular or other labeling within or attached to the package.

(3) On the label and labeling, if it contains one or more vitamin substances, after the name "chlortetracycline powder," "tetracycline hydrochloride powder," or "tetracycline powder," wherever such name appears, the words "with vitamin _____" (the blank being filled in with the name of the vitamin ingredient used), or "with vitamins" (if it contains more than one vitamin ingredient), in juxtaposition with such name.

(4) On the circular or other labeling within or attached to the package, if it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled, adequate directions and warnings for the veterinary use of such drug by the laity. Such circular or other labeling may also

bear a statement that a brochure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(d) *Request for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless it was previously submitted) the date on which the latest assay of the chlortetracycline, tetracycline hydrochloride or tetracycline used in making such batch was completed, the number of milligrams in each immediate container, the quantity of each ingredient used in making the batch, the date on which the latest assay of the drug comprising such batch was completed, and a statement that each ingredient used in making the batch conforms to the requirements prescribed therefor, if any, by this section.

(2) Except as otherwise provided in subparagraph (4) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch; potency and moisture.

(ii) The chlortetracycline, tetracycline hydrochloride, or tetracycline used in making the batch; potency, toxicity, moisture, pH, crystallinity, and extinction coefficient if it is tetracycline hydrochloride or tetracycline.

(3) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch; one immediate container for each 5,000 containers in the batch, but in no case less than 5 or more than 12 immediate containers, unless each such container is packaged to contain more than 1.0 gram, in which case the sample shall consist of 1.0 gram for each 5,000 immediate containers in the batch, but in no case less than five 1.0-gram portions or more than twelve 1.0-gram portions, except if it is intended for use as an ingredient in the drinking water of animals, each portion in the sample submitted shall consist of 1 ounce in lieu of 1.0 gram. Such sample shall be collected by taking single immediate containers, 1.0-gram portions, or 1-ounce portions at such intervals throughout the entire time the containers are being filled that the quantities filled during the intervals are approximately equal.

(ii) The chlortetracycline, tetracycline hydrochloride, or tetracycline used in making the batch; 10 packages, each containing approximately equal portions of not less than 60 milligrams, packaged in accordance with the requirements of § 146c.201 (b).

(iii) In case of an initial request for certification, each other ingredient used in making the batch; one package of each containing approximately 5 grams.

(4) No result referred to in subparagraph (2) (ii) of this paragraph, and no sample referred to in subparagraph (3) (ii) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $4.00 for each immediate container in the samples submitted in accordance with paragraph (d) (3) (i), (ii), and (iii) of this section.

(2) If the Commissioner considers that investigations, other than examination of such immediate containers, are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

(f) *Exemption of chlortetracycline powder for veterinary use, tetracycline hydrochloride powder for veterinary use, and tetracycline powder for veterinary use from certification.* Chlortetracycline powder, tetracycline hydrochloride powder, and tetracycline powder that conform to the requirements of paragraphs (a) (except that if they contain one or more added vitamin substances such substances are essential for nutritive purposes, and except that they may contain one or more added mineral substances essential for nutritive purposes), (b), and (c) of this section shall be exempt from the requirements of sections 502 (l) and 507 of the act, if they comply with all the following conditions:

(1) They are intended solely for veterinary use and are conspicuously so labeled.

(2) If they contain added vitamins or minerals, the labels bear the name and quantity of each such substance and a statement that such substances are present only for furnishing additional vitamins and minerals while animals are eating less feed.

(3) The labels bear an expiration date that is not more than 48 months, or 24 months if it contains a vitamin substance or it is tetracycline hydrochloride powder or tetracycline powder, after the month during which the batch was last assayed and released by the manufacturer.

(4) The labels bear a statement that solutions prepared with the drugs are stable for not more than 24 hours.

(5) The circular or other labeling within or attached to the package bears information that only the antibiotics are intended for the prevention or treatment of the following conditions, and further, bears directions and warnings adequate for such use:

(i) Pinkeye and superficial cuts and abrasions.

(ii) Bacterial enteritis in swine.

(iii) Bacterial pneumonia in swine.

(iv) Chronic respiratory disease (airsac infection), hexamitiasis, blue comb (mud fever, nonspecific infectious enteritis) in poultry.

(v) Infectious sinusitis in poultry.

(vi) Synovitis in poultry.

(vii) Bacterial pneumonia in calves.

(viii) Shipping fever (hemorrhagic septicemia) in calves.

§ 146c.217 *Chlortetracycline calcium syrup (chlortetracycline calcium oral drops); tetracycline syrup (tetracycline oral drops); tetracycline magnesium syrup (tetracycline magnesium oral drops)*—(a) *Standards of identity, strength, quality, and purity.* Chlortetracycline calcium syrup, tetracycline syrup, and tetracycline magnesium syrup are syrups that contain chlortetracycline calcium prepared from crystalline chlortetracycline hydrochloride, tetracycline, or tetracycline magnesium prepared from tetracycline, with or without one or more suitable sulfonamides, analgesic substances, antihistaminics, caffeine, glucosamine hydrochloride, and one or more suitable and harmless buffer substances, suspending and stabilizing agents, and preservatives, suspended in a suitable and harmless vehicle. Each milliliter shall contain a quantity of chlortetracycline calcium or tetracycline or tetracycline magnesium equivalent to not less than 25 milligrams of chlortetracycline hydrochloride or tetracycline hydrochloride. The pH is not less than 6.5 nor more than 9.0, except if it is tetracycline syrup the pH is not less than 3.5 nor more than 6.0. The crystalline chlortetracycline hydrochloride used conforms to the requirements of § 146c.201 (a), except § 146c.201 (a) (2), (4), and (5). The crystalline tetracycline used conforms to the requirements of § 146c.220. Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* In all cases the immediate container shall be a tight container as defined by the U. S. P. and shall be of such composition as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused which are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded.

(c) *Labeling.* Each package shall bear on its label or labeling, as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark.

(ii) The potency per milliliter expressed in terms of its equivalency of chlortetracycline hydrochloride or tetracycline hydrochloride.

(iii) If the batch contains, in addition to chlortetracycline calcium, tetracycline, or tetracycline magnesium, one or more of the other active ingredients specified in paragraph (a) of this section, the name and quantity of each such ingredient used in making the batch.

(iv) The statements "Warning—Not for injection" and "Shake well."

(v) The statement "Expiration date ----------," the blank being filled in with the date which is 12 months after the month during which the batch was certified, except that the blank may be filled in with the date that is 18 months, 24 months, 36 months, or 48 months after the month during which the batch was certified if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section: *Provided, however,* That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container.

(2) On the outside wrapper or container, if it is intended for use by humans, the statement "Caution: Federal law prohibits dispensing without prescription" and a reference specifically identifying a readily available medical publication containing information (including contraindications and possible sensitization) adequate for the use of such drug by practitioners licensed by law to administer such drug; or a reference to a brochure or other printed matter containing such information, and a statement that such brochure or printed matter will be sent on request: *Provided, however,* That this reference may be omitted if the information is contained in a circular or other labeling within or attached to the package.

(3) On the label and labeling, if it contains, in addition to chlortetracycline calcium, tetracycline, or tetracycline magnesium, one or more of the active ingredients specified in paragraph (a) of this section, after the name "chlortetracycline calcium syrup" or "tetracycline syrup" or "tetracycline magnesium syrup," wherever it appears, the words "with ---------- (the blank being filled in with the common or usual name of each such other ingredient)," in juxtaposition with such name.

(4) On a circular or other labeling within or attached to the package, if it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled, adequate directions and warnings for the veterinary use of such drug by the laity. Such circular or other labeling may also bear a statement that a brochure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(d) *Request for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless it was previously submitted) the date on which the latest assay of the chlortetracycline hydrochloride or tetracycline used in making such batch was completed, the date on which the latest assay of the drug comprising such batch was completed, the quantity of each ingredient used in making the batch, and a statement that each such ingredient conforms to the requirements prescribed therefor by this section.

(2) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch; average potency per milliliter, toxicity, pH.

(ii) The chlortetracycline hydrochloride or tetracycline used in making the batch; potency, toxicity, moisture, pH, crystallinity, and extinction coefficient if it is tetracycline.

(3) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch; one package for each 5,000 packages in the batch, but in no case less than 5 or more than 12 packages, collected by taking single packages at such intervals throughout the entire time of packaging the batch that the quantities packaged during the intervals are approximately equal.

(ii) The chlortetracycline hydrochloride or tetracycline used in making the batch; 10 packages each containing approximately equal portions of not less than 60 milligrams, packaged in accordance with the requirements of § 146c.201 (b).

(iii) In case of an initial request for certification, each other ingredient used in making the batch; one package of each containing approximately 5 grams.

(4) No result referred to in subparagraph (2) (ii) of this paragraph, and no sample referred to in subparagraph (3) (ii) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $4.00 for each package in the samples submitted in accordance with paragraph (d) (3) (i), (ii), and (iii) of this section.

(2) If the Commissioner considers that investigations other than examination of such packages are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

§ 146c.218 *Tetracycline hydrochloride*—(a) *Standards of identity, strength, quality, and purity.* Tetracycline hydrochloride is the crystalline hydrochloride salt of the deschloro derivative of a kind of chlortetracycline or a mixture of two or more such salts, with or without one or more suitable and harmless stabilizing agents. It is so purified and dried that:

(1) Its potency, and the potency of the tetracycline hydrochloride used in the manufacture of tetracycline hydrochloride intended for use by injection, is not less than 900 micrograms per milligram.

(2) It is sterile.

(3) It is nontoxic.

(4) It is nonpyrogenic.

(5) It contains no histamine nor histamine-like substance.

(6) Its moisture content is not more than 2 percent.

(7) Its pH in an aqueous solution containing 10 milligrams per milliliter is not less than 1.8 and not more than 2.8, except if it it intended for use by injection its pH is not less than 2.0 and not more than 3.0.

(8) Its extinction coefficient $E^{1\%}_{1cm}$, and the extinction coefficient of the tetracycline hydrochloride used in the manufacture of tetracycline hydrochloride intended for use by injection, is 372±15 at 380 millimicrons.

(b) *Packaging; labeling; request for certification, check tests and assays, samples; fees.* Tetracycline hydrochloride conforms to all requirements and procedures prescribed for chlortetracycline hydrochloride by § 146c.201 (b), (c), (d), and (e), except that:

(1) It shall be labeled with an expiration date that is 36 months after the month during which the batch was certified, except that it may be labeled with the date that is 48 months after the month during which the batch was certified if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section.

(2) The person who requests certification of a batch of tetracycline hydrochloride that contains stabilizing agents and is intended for use by injection shall submit with his request (unless they were previously submitted) the results of the latest tests and assays made on the batch of the tetracycline hydrochloride used in making such batch for potency and extinction coefficient and a sample consisting of two packages each containing approximately 500 milligrams of the tetracycline hydrochloride used in making such batch for potency and extinction coefficient.

(3) The fee for the services rendered with respect to each immediate container of the tetracycline hydrochloride used in the manufacture of a batch of tetracycline hydrochloride intended for use by injection submitted in accordance with the requirements prescribed therefor by subparagraph (2) of this paragraph shall be $4.00.

§ 146c.221 *Tetracycline hydrochloride for intramuscular use; tetracycline phosphate complex for intramuscular use*—(a) *Standards of identity, strength, quality, and purity.* Tetracycline hydrochloride or tetracycline phosphate complex for intramuscular use is a dry mixture of tetracycline hydrochloride or tetracycline phosphate complex, magnesium chloride, and one or more suitable buffer substances, with or without one or more suitable preservatives and anesthetic agents, and with or without one or more suitable and harmless vita-

min substances. It is sterile. It is nonpyrogenic. Its moisture content is not more than 5 percent. Its pH in an aqueous solution containing 10 milligrams per milliliter is not less than 2.0 and not more than 3.0. The tetracycline hydrochloride used conforms to the requirements of § 146c.218 (a). The tetracycline phosphate complex used conforms to the requirements of § 146c.232 (a) and it contains no histamine or histamine-like substance. Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* In all cases the immediate containers shall be tight containers as defined by the U. S. P., shall be sterile at the time of filling and closing, shall be so sealed that the contents cannot be used without destroying the seal, and shall be of such composition as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused that are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded. The immediate containers shall be of colorless transparent glass, closed by a substance through which a hypodermic needle may be introduced and withdrawn without removing the closure or destroying its effectiveness. Each such container shall contain not less than the equivalent of 100 milligrams of tetracycline hydrochloride, and each may be packaged in combination with a container of a suitable and harmless diluent.

(c) *Labeling.* Each package shall bear on its label or labeling, as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark.

(ii) The number of milligrams in the immediate container expressed in terms of its equivalency of tetracycline hydrochloride.

(iii) The name and quantity of each other ingredient in the immediate container.

(iv) The statement "Expiration date ------," the blank being filled in with the date that is 36 months after the month during which the batch was certified, except that if it contains tetracycline phosphate complex or one or more vitamin substances the blank is filled in with the date that is 12 months after the month during which the batch was certified: *Provided, however,* That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container.

(v) The statement "For intramuscular use only."

(2) On the outside wrapper or container, the statement "Caution: Federal law prohibits dispensing without prescription," unless it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled.

(3) On the label and labeling, if it contains one or more vitamin substances, after the name "tetracycline hydrochloride for intramuscular use" or "tetracycline phosphate complex for intramuscular use", the words "with vitamin ---" (the blank being filled in with the name of the vitamin ingredient used), or "with vitamins" (if it contains more than one vitamin ingredient), in juxtaposition with such name.

(4) On the circular or other labeling within or attached to the package, if it is packaged for dispensing:

(i) If it is intended for use by man, adequate directions and warnings for its use by practitioners licensed by law to administer such drug.

(ii) If it is intended solely for veterinary use and is conspicuously so labeled, adequate directions and warnings for the veterinary use of such drug by the laity. Such circular or other labeling may also bear a statement that a brochure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(iii) A statement of the conditions under which solutions prepared from the drug should be stored and the statement "Sterile solutions may be stored at room temperature for 24 hours without significant loss of potency," except that if it contains one or more vitamin substances it shall bear the statement "Inject immediately after the solution is prepared from the drug."

(d) *Request for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless it was previously submitted) the date on which the latest assay of the tetracycline hydrochloride or tetracycline phosphate complex used in making such batch was completed, the equivalent number of milligrams of tetracycline hydrochloride in each package, the date on which the latest assay of the drug comprising the batch was completed, the quantity of each other ingredient used in making the batch, and a statement that each such ingredient conforms to the requirements prescribed therefor by this section. If such batch or any part thereof is to be packaged with a diluent, such request shall also be accompanied by a statement that such diluent conforms to the requirements prescribed therefor by this section.

(2) Except as otherwise provided by subparagraph (5) of this paragraph, such person shall submit in connection with his request the results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch: Potency, sterility, pyrogens, moisture, pH.

(ii) The tetracycline hydrochloride or tetracycline phosphate complex used in making the batch: Potency, toxicity, histamine, extinction coefficient, crystallinity, and solubility if it is tetracycline phosphate complex.

(3) Except as otherwise provided by subparagraph (5) of this paragraph, if such batch is packaged for dispensing, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch;

(a) For all tests except sterility: 1 immediate container for each 5,000 immediate containers in the batch, but in no case less than 10 or more than 17 immediate containers.

(b) For sterility testing: 10 immediate containers.

Such samples shall be collected by taking single immediate containers at such intervals throughout the entire time of packaging the batch that the quantities packaged during the intervals are approximately equal.

(ii) The tetracycline hydrochloride or tetracycline phosphate complex used in making the batch: 10 packages containing approximately equal portions of not less than 250 milligrams, packaged in accordance with the requirements of § 146c.201 (b).

(iii) In case of an initial request for certification, each other ingredient used in making the batch: 1 package of each, containing approximately 5 grams.

(iv) In case of an initial request for the certification of a batch which is to be packaged in combination with a diluent that is not recognized by the U. S. P. or when any change is made in the composition of such diluent: 5 packages of the diluent included in the combination.

(4) If such batch is packaged for repacking, such person shall submit with his request a sample consisting of the following:

(i) For all tests except sterility: 10 packages, each containing approximately 0.25 gram.

(ii) For sterility testing: 10 packages, each containing approximately 40 milligrams of tetracycline hydrochloride or tetracycline phosphate complex.

Each such package shall be packaged in accordance with the requirements of paragraph (b) of this section.

(5) No result referred to in subparagraph (2) (ii) of this paragraph, and no sample referred to in subparagraph (3) (ii) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $4.00 for each immediate container in the samples submitted in accordance with paragraph (d) (3) (i) (*a*), (ii), (iii), (iv), and (4) (i) of this section; $10.00 for all containers submitted in accordance with paragraph (d) (3) (i) (*b*) and (4) (ii) of this section.

(2) If the Commissioner considers that investigations other than examination of such packages are necessary to determine whether or not such batch complies with the requirements of § 146.2 of this chapter for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

§ 146c.222 *Tetracycline hydrochloride oral suspension (tetracycline hydrochloride homogenized mixture); tetracycline phosphate complex oral suspension (tetracycline phosphate complex oral drops); tetracycline hydrochloride oral solution; tetracycline calcium oral suspension; tetracycline oral suspension—*(a) *Standards of identity, strength, quality, and purity.* Tetracycline hydrochloride oral suspension, tetracycline hydrochloride oral solution, and tetracycline calcium oral suspension are tetracycline hydrochloride or tetracycline calcium prepared from tetracycline hydrochloride. Tetracycline oral suspension and tetracycline phosphate complex oral suspension are prepared from tetracycline or tetracycline phosphate complex. Each drug contains one or more suitable and harmless suspending and dispersing agents (unless it is tetracycline hydrochloride oral solution), with or without one or more suitable sulfonamides, and with or without one or more suitable and harmless colorings, flavorings, buffer substances, and preservatives, suspended or dissolved in a suitable and harmless vehicle. If it is tetracycline hydrochloride oral suspension, tetracycline oral suspension, or tetracycline phosphate complex oral suspension, it may contain one or more suitable and harmless vitamin substances. Each milliliter shall contain not less than the equivalent of 25 milligrams of tetracycline hydrochloride. Its moisture content is not more than 2 percent if it is tetracycline hydrochloride oral suspension, tetracycline phosphate complex oral suspension, or tetracycline oral suspension and not more than 7 percent if it is tetracycline hydrochloride oral solution. Its pH is not less than 2.0 and not more than 3.5 if it is tetracycline hydrochloride oral solution and not less than 7.0 and not more than 8.0 if it is tetracycline calcium oral suspension. The tetracycline hydrochloride used conforms to the standards prescribed by § 146c.218 (a), except § 146c.218 (a) (2), (4), and (5). The tetracycline phosphate complex used conforms to the standards prescribed by § 146c.232 (a). The tetracycline used conforms to the standards prescribed by § 146c.220 (a). Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* The immediate container shall be a tight container as defined by the U. S. P., and shall be of such composition as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused that are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded.

(c) *Labeling.* Each package shall bear on its label or labeling as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark.

(ii) The potency per milliliter expressed in milligrams of tetracycline hydrochloride or its equivalency of tetracycline hydrochloride.

(iii) The statement "Shake well."

(iv) The name and quantity of each sulfonamide, preservative, and vitamin substance used in making the batch.

(v) The statement "Expiration date ------," the blank being filled in with the date that is 18 months after the month during which the batch was certified, except that the blank may be filled in with the date that is 24 months after the month during which the batch was certified if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section, except that if it contains tetracycline phosphate complex or one or more vitamin substances the blank is filled in with the date that is 12 months after the month during which the batch was certified: *Provided, however,* That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container.

(2) On the outside wrapper or container:

(i) The statement "Caution: Federal law prohibits dispensing without prescription," unless it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled.

(ii) If it is packaged for dispensing and it is intended for use by man, a reference specifically identifying a readily available medical publication containing information (including contraindications and possible sensitization) adequate for the use of such drug by practitioners licensed by law to administer it; or a reference to a brochure or other printed matter containing such information, and a statement that such brochure or other printed matter will be sent on request: *Provided, however,* That this reference may be omitted if the information is contained in a circular or other labeling within or attached to the package.

(3) On the label and labeling:

(i) If it is tetracycline hydrochloride oral suspension or tetracycline oral suspension or tetracycline phosphate complex oral suspension, and it contains one or more vitamin substances or sulfonamides, after the name "tetracycline hydrochloride oral suspension," "tetracycline oral suspension," or "tetracycline phosphate complex oral suspension," wherever it appears, the words "with sulfonamide(s)" or "with vitamin ----," the blank being filled with the name of the vitamin ingredient used, or "with vitamins," if it contains more than one vitamin ingredient, in juxtaposition with such name.

(ii) If it is tetracycline hydrochloride oral solution or tetracycline calcium oral suspension and it contains one or more sulfonamides, after the name "tetracycline hydrochloride oral solution" or "tetracycline calcium oral suspension," wherever it appears, the words "with sulfonamide(s)," in juxtaposition with such name.

(4) On the circular or other labeling within or attached to the package, if it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled, adequate directions and warnings for the veterinary use of such drug by the laity. Such circular or other labeling may also bear a statement that a brochure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(d) *Request for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless it was previously submitted) the date on which the latest assay of the tetracycline hydrochloride, tetracycline, or tetracycline phosphate complex used in making such batch was completed, the potency per milliliter of the batch, the date on which the latest assay of the drug comprising such batch was completed, the quantity of each ingredient used in making the batch, and a statement that each such ingredient conforms to the requirements prescribed therefor by this section.

(2) Except as otherwise provided in subparagraph (4) of this paragraph, each person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch: Average potency per milliliter, average moisture if it is tetracycline hydrochloride oral suspension, tetracycline oral suspension, tetracycline phosphate complex oral suspension, or tetracycline hydrochloride oral solution, and pH if it is tetracycline hydrochloride oral solution or tetracycline calcium oral suspension.

(ii) The tetracycline hydrochloride, tetracycline, or tetracycline phosphate complex used in making the batch: Potency, toxicity, moisture, pH, crystallinity, and extinction coefficient; and if it is tetracycline phosphate complex, solubility.

(3) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch: 1 immediate container for each 5,000 immediate containers in the batch, but in no case less than 5 or more than 12 immediate containers, collected by taking single immediate containers at such intervals throughout the entire time of packaging the batch that the quantities packaged during the intervals are approximately equal.

(ii) The tetracycline hydrochloride, tetracycline, or tetracycline phosphate complex used in making the batch: 10

packages, each containing approximately equal portions of not less than 60 milligrams, packaged in accordance with the requirements of § 146c.201 (b).

(iii) In the case of an initial request for certification, each other ingredient used in making the batch: 1 package of each containing approximately 5.0 grams.

(4) No result referred to in subparagraph (2) (ii) of this paragraph, and no sample referred to in subparagraph (3) (ii) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $4.00 for each package in the samples submitted in accordance with paragraph (d) (3) (i), (ii), and (iii) of this section.

(2) If the Commissioner considers that investigations other than the examination of such packages are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

§ 146c.224 *Tetracycline hydrochloride-nystatin capsules; tetracycline phosphate complex-nystatin capsules.* Tetracycline hydrochloride-nystatin capsules and tetracycline phosphate complex-nystatin capsules are capsules that conform to all the requirements and procedures prescribed by § 146c.204 for tetracycline hydrochloride capsules and tetracycline phosphate complex capsules, except that:

(a) Each capsule contains not less than 100,000 units of nystatin. The nystatin used is produced by the growth of Streptomyces noursei. It is a white to yellow to light-tan powder. It is very slightly soluble in water, moderately soluble in methanol, butanol, or propanol. Its potency is not less than 2,000 units per milligram. It is nontoxic. Its pH in a 3-percent aqueous suspension is not less than 6.5 and not more than 8.0. Its moisture content is not more than 5 percent. It exhibits absorption maxima at 291, 305, and 319 mμ when dissolved in methanol, and its specific rotation in dimethyl formamide at 20° C. is not more than ±25°.

(b) In addition to the labeling prescribed for tetracycline hydrochloride capsules or tetracycline phosphate complex capsules, each package shall bear on its label or labeling the number of units of nystatin in each capsule of the batch. Its expiration date shall be the date that is 18 months after the month during which the batch was certified if it is tetracycline phosphate complex-nystatin capsules.

(c) In addition to complying with the requirements of § 146c.204 (d), a person who requests certification of a batch shall submit with his request a statement showing the batch mark and (unless they were previously submitted) the results and the date of the latest tests and assays of the nystatin used in making the batch for potency, toxicity, pH, moisture, and specific rotation. He shall also submit in connection with his request (unless it was previously submitted) a sample consisting of 10 packages, each containing approximately equal portions of not less than 300 milligrams of the nystatin used in making the batch.

(d) The fees for the services rendered with respect to the samples submitted in accordance with the requirements of paragraph (c) of this section shall be:

(1) $1.00 for each capsule.

(2) $4.00 for each immediate container of nystatin.

PART 146e—CERTIFICATION OF BACITRACIN AND BACITRACIN-CONTAINING DRUGS

§ 146e.403 *Bacitracin tablets; zinc bacitracin tablets; bacitracin methylene disalicylate tablets; bacitracin suppositories; zinc bacitracin suppositories (if they are represented for vaginal use); bacitracin implantation pellets; zinc bacitracin implantation pellets (if they are represented for use by implanting under the skin of animals).*—(a) *Standards of identity, strength, quality, and purity.* Bacitracin tablets, zinc bacitracin tablets, and bacitracin methylene disalicylate tablets are tablets composed of bacitracin, zinc bacitracin, or bacitracin methylene disalicylate, with or without kaolin and pectin and with or without one or more suitable and harmless buffer substances, diluents, binders, lubricants, colorings, and flavorings. The potency of each tablet is not less than 1,000 units nor more than 10,000 units. Its moisture content is not more than 5 percent. The bacitracin used conforms to the standards prescribed therefor by § 146e.401 (a), except § 146e.401 (a) (2), (4), and (8). The zinc bacitracin used conforms to the requirements of § 146e.418 (a). The bacitracin methylene disalicylate used conforms to the requirements of § 146e.416 (a). Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

(b) *Packaging.* Unless each tablet is enclosed in a foil or plastic film and such enclosure is a tight container as defined by the U. S. P., except the provision that it shall be capable of tight reclosure, the immediate container shall be a tight container as so defined. The immediate container may also contain a desiccant separated from the tablets by a plug of cotton or other like material. The composition of the immediate container, or of the foil or film enclosure, shall be such as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused which are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded.

(c) *Labeling.* Each package shall bear, on its label or labeling as hereinafter indicated, the following:

(1) On the outside wrapper or container and the immediate container:

(i) The batch mark;

(ii) The number of units in each tablet of the batch;

(iii) The statement "Expiration date ----------," the blank being filled in with the date which is 12 months after the month during which the batch was certified, except that the blank may be filled in with the date which is 18 months or 24 months or 36 months after the month during which the batch was certified if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section: *Provided, however,* That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container;

(iv) If it is implantation pellets or bacitracin methylene disalicylate tablets, the statement "For veterinary use only."

(v) If the batch contains, in addition to bacitracin, zinc bacitracin, or bacitracin methylene disalicylate, one or more of the other active ingredients specified in paragraph (a) of this section, the name and quantity of each such other ingredient in each tablet.

(2) On the outside wrapper or container:

(i) The statement "Caution: Federal law prohibits dispensing without prescription," unless it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled.

(ii) If it is packaged for dispensing and it is intended for use by man, a reference specifically identifying a readily available medical publication containing information (including contraindications and possible sensitization) adequate for the use of such drug by practitioners licensed by law to administer it; or a reference to a brochure or other printed matter containing such information, and a statement that such brochure or other printed matter will be sent on request: *Provided, however,* That this reference may be omitted if the information is contained in a circular or other labeling within or attached to the package.

(3) On the label and labeling, if it contains kaolin or pectin, after the name "bacitracin tablets," "zinc bacitracin tablets," or "bacitracin methylene disalicylate tablets," wherever it appears, the words "with ---------- (the blank being filled in with the word "kaolin" or "pectin" or the words "kaolin and pectin," in juxtaposition with such name)."

(4) On the circular or other labeling within or attached to the package, if it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled, adequate directions and warnings for the veterinary use of such drug by the laity. Such circular or other labeling may also bear a statement that a brochure of other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(d) *Requests for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch shall submit with his request a statement showing the batch mark, the number of packages of each size in such batch, the batch mark and (unless it was previously submitted) the date on which the latest assay of the bacitracin, zinc bacitracin, or bacitracin methylene disalicylate used in making such batch was completed, the number of units in each tablet, the quantity of each ingredient used in making the batch, the date on which the latest assay of the drug comprising such batch was completed, and a statement that each ingredient used in making the batch conforms to the requirements prescribed therefor, if any, by this section.

(2) Except as otherwise provided in subparagraph (4) of this paragraph, such person shall submit in connection with his request results of the tests and assays listed after each of the following, made by him on an accurately representative sample of:

(i) The batch; average potency per tablet and average moisture.

(ii) The bacitracin, zinc bacitracin, or bacitracin methylene disalicylate used in making the batch; potency, toxicity, moisture, pH, ash content if it is bacitracin, and zinc content if it is zinc bacitracin.

(3) Except as otherwise provided by subparagraph (4) of this paragraph, such person shall submit in connection with his request, in the quantities hereinafter indicated, accurately representative samples of the following:

(i) The batch; one tablet for each 5,000 tablets in the batch, but in no case less than 30 tablets or more than 100 tablets, collected by taking single tablets at such intervals throughout the entire time of tableting that the quantities tableted during the intervals are approximately equal.

(ii) The bacitracin used in making the batch; six packages, each containing approximately equal portions of not less than 500 milligrams each, packaged in accordance with the requirements of § 146e.401 (b).

(iii) The zinc bacitracin used in making the batch; 6 packages, each containing approximately equal portions of not less than 1.0 gram, packaged in accordance with the requirements of § 146e.418 (b).

(iv) The bacitracin methylene disalicylate used in making the batch; 5 packages containing approximately equal portions of not less than 5 grams each, packaged in accordance with the requirements of § 146e.416 (b).

(v) In case of an initial request for certification, each other substance used in making the batch; 1 package of each containing approximately 5 grams.

(4) No result referred to in subparagraph (2) (ii) of this paragraph, and no sample referred to in subparagraph (3) (ii), (iii), or (iv) of this paragraph, is required if such result or sample has been previously submitted.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $0.75 for each tablet in the sample submitted in accordance with paragraph (d) (3) (i) of this section; $4.00 for each package in the samples submitted in accordance with paragraph (d) (3) (ii), (iii), (iv), and (v) of this section; and

(2) If the Commissioner considers that investigations, other than examination of such tablets and packages, are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

§ 146e.409 *Bacitracin-polymyxin ointment; zinc bacitracin-polymyxin ointment.* (a) Bacitracin-polymyxin ointment and zinc bacitracin-polymyxin ointment conform to all requirements and are subject to all procedures prescribed by § 146e.402 for bacitracin ointment and zinc bacitracin ointment, except paragraph (f) of that section, and except that:

(1) Its content of bacitracin or zinc bacitracin is not less than 200 units per gram.

(2) It contains not less than 4,000 units of polymyxin B per gram. The polymyxin B used conforms to the requirements prescribed for polymyxin B by § 146b.107 (a) of this chapter, except the standard for toxicity.

(3) Its moisture content is not more than 0.5 percent.

(4) If it is in liquid form, it shall be packaged in immediate containers of transparent glass which meet the test for tight containers as defined by the U. S. P.

(5) In lieu of the labeling prescribed by § 146e.402 (c) (1) (ii) and (iv), each package shall bear on the outside wrapper or container and the immediate container the number of units of bacitracin or zinc bacitracin and the number of units of polymyxin B in each gram of the batch and the statement "Expiration date ------," the blank being filled in with the date which is 12 months after the month during which the batch was certified, except that if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for 18 months or 24 months or 36 months at room temperature such drug as prepared by him complies with the standards of identity, strength, quality, and purity prescribed for the drug, the blank shall be filled in with the date which is 18 months or 24 months or 36 months after the month during which the batch was certified: *Provided, however,* That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container.

(6) In addition to complying with the requirements of § 146e.402 (c), if it is in liquid form, each package shall bear on the outside wrapper or container and the immediate container, the statements "Shake well" and "Not for injection."

(7) In addition to complying with the requirements of § 146e.402 (d), a person who requests certification of a batch shall submit with his request a statement showing the batch mark and (unless it was previously submitted) the results and date of the latest tests and assays of the polymyxin used in making the batch for potency. He shall also submit in connection with his request a sample consisting of not less than 6 packages of ointment and (unless it was previously submitted) a sample consisting of 5 packages containing equal portions of not less than 0.5 gram each of the polymyxin used in making the batch.

(b) The fees for the services rendered with respect to the samples submitted in accordance with the requirements of paragraph (a) (7) of this section shall be:

(1) $5.00 for each tube of ointment.

(2) $4.00 for each immediate container of the polymyxin used in making the batch.

§ 146e.410 *Bacitracin-neomycin tablets; zinc bacitracin-neomycin tablets; bacitracin methylene disalicylate-neomycin tablets.* (a) Bacitracin-neomycin tablets, zinc bacitracin-neomycin tablets, and bacitracin methylene disalicylate-neomycin tablets conform to all requirements and are subject to all procedures prescribed for bacitracin tablets, zinc bacitracin tablets, and bacitracin methylene disalicylate tablets, except that:

(1) Each tablet contains not less than 2,500 units of bacitracin, zinc bacitracin, or bacitracin methylene disalicylate.

(2) Each tablet contains not less than 25 milligrams of neomycin. The neomycin used is produced by the growth of Streptomyces fradiae, has a potency of not less than 330 micrograms (one Waksman unit is equivalent to 3.3 micrograms of the base) per milligram, is nontoxic, has a moisture content of not more than 8 percent, and its pH in an aqueous solution 33 milligrams per milliliter is not less than 5.0 and not more than 7.5.

(3) In lieu of the labeling prescribed by § 146e.403 (c) (1) (ii), each package shall bear on the outside wrapper or container and the immediate container the number of units of bacitracin, zinc bacitracin, or bacitracin methylene disalicylate and the number of milligrams of neomycin in each tablet of the batch.

(4) In addition to complying with the requirements of § 146e.403 (d), a person who requests certification of a batch shall submit with his request a statement showing the number of units of bacitracin, zinc bacitracin, or bacitracin methylene disalicylate and the number of milligrams of neomycin in each tablet of the batch, the batch mark, and (unless it was previously submitted) the results and the date of the latest tests and assays of the neomycin used in making the batch for potency, toxicity, moisture, and pH. He shall also submit in connection with his request (unless it was previously submitted) a sample consisting of 5

packages containing approximately equal portions of not less than 0.5 gram each of the neomycin used in making such batch.

(b) The fees for the services rendered with respect to the samples submitted in accordance with the requirements of this section shall be:

(1) $1.00 for each tablet.

(2) $4.00 for each immediate container in the sample of neomycin submitted.

(Sec. 701, 52 Stat. 1055, as amended; 2 U. S. C. 371)

Dated: August 14, 1958.

[SEAL] GEO. P. LARRICK,
Commissioner of Food and Drugs.

TITLE 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

PART 909—ALMONDS GROWN IN CALIFORNIA

ORDER FIXING SALABLE AND SURPLUS PERCENTAGES FOR ALMONDS DURING CROP YEAR BEGINNING JULY 1, 1958

Pursuant to the provisions of Marketing Agreement No. 119, as amended, and Order No. 9, as amended (7 CFR Part 909), regulating the handling of almonds grown in California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), the Almond Control Board, on July 30, 1958, adopted estimates and recommendations relative to the establishment of the salable and surplus percentages applicable to almonds grown in California during the 1958–59 crop year. The percentages hereinafter set forth are based on the Board's estimates and recommendations, and other information.

It is estimated that 1958 production of California almonds will approximate 27 million pounds kernel weight, and nearly 11 million pounds of 1957 crop almonds were carried over for use during the 1958 crop year. Allowing for a June 30, 1959 carryover of approximately 6 million pounds, which is now considered desirable, there will be approximately 32 million pounds of California almonds available for disposition during the 1958 crop year. Total domestic trade acquisitions of almonds are estimated to approximate 39 million pounds, of which about 7 million will probably be imported. Consequently, no surplus is indicated.

Further, it is estimated that prices of almonds received by growers during the 1958–59 crop year are likely to exceed their season average parity without use of the volume regulation provisions of the aforesaid amended agreement and order.

After consideration of all relevant information available, it is hereby found that to establish the salable and surplus percentages hereinafter set forth, applicable to California almonds during the 1958–59 crop year, will tend to effectuate the declared policy of the act.

Therefore, it is ordered, That the salable and surplus percentages for almonds received by handlers for their own accounts during the 1958–59 crop year shall be as follows:

§ 909.208 *Salable and surplus percentages for almonds during the crop year beginning July 1, 1958.* The salable and surplus percentages during the crop year beginning July 1, 1958, applicable to the total kernel weight of almonds received by handlers for their own accounts shall be 100 percent and 0 percent, respectively.

It is hereby determined that good cause exists for making this Order effective upon publication in the FEDERAL REGISTER rather than 30 days or any lesser period thereafter for the reasons that (1) the 1958–59 crop year has already begun, and establishment of these percentages provides a basis for trading between growers and handlers, and (2) compliance with the percentages herein established will require no special preparation on the part of handlers since the effect of this action is to relieve restrictions on handlers.

(Sec. 5, 49 Stat. 753, as amended, 7 U. S. C. 608c)

Dated: August 15, 1958, to become effective upon publication in the FEDERAL REGISTER.

[SEAL] S. R. SMITH,
Director,
Fruit and Vegetable Division.

[F. R. Doc. 58-6754; Filed, Aug. 20, 1958; 8:55 a. m.]

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 6546]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

Subpart—*Advertising falsely or misleadingly:* § 13.15 *Business status, advantages, or connections:* Concealed subsidiary or interest; Government connection; § 13.85 *Government approval, action, connection or standards:* Civil Service Commission connections or recognition; § 13.115 *Jobs and employment service:* Government; § 13.205 *Scientific or other relevant facts.* Subpart—*Misrepresenting oneself and goods*—Business status, advantages or connections: § 13.1425 *Government connections; [Misrepresenting oneself and goods]*—Goods: § 13.1670 *Jobs and employment;* § 13.1725 Refunds; § 13.1740 *Scientific or other relevant facts;* § 13.1760 *Terms and conditions.* Subpart—*Using misleading name*—Vendor: § 13.2365 *Concealed subsidiary or "alter ego":* Fictitious collection agency.

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Intrepret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S C. 45) [Cease and desist order, Edward J. Keenan et al. trading as Franklin Institute, Rochester, N. Y., Docket 6546, July 3, 1958]

In the Matter of Edward J. Keenan, Jo L. Keenan, Jr., Richard M. Keen and Edward J. Keenan, and John Keenan, Jr., as Trustees of Thomas Keenan; Copartners Trading Franklin Institute

This proceeding was heard by a he ing examiner on the complaint of t Commission charging sellers in Roch ter, N. Y., of correspondence courses signed to prepare purchasers for U. Civil Service positions, with represent falsely by advertisements in newspap and magazines, booklets, circulars, e that they were connected with the U. Government, that specific vacancies e isted in the federal Civil Service in s cified areas based on official Gove ment estimates for which examinatio would be held, and that their adverti ments of "U. S. Govt. Jobs" were fficial Government announcements; w making such false representations, alo with a variety of others, through sale men calling on prospects who answe aforesaid advertisements; and with us a fictitious trade name for the purpo of collecting delinquent accounts.

After acceptance of an agreement co taining a consent order, the hearing e aminer made his initial decision a order to cease and desist which beca on July 3 the decision of the Co mission.

The order to cease and desist is follows:

It is ordered, That respondents, E ward J. Keenan and John L. Keenan, J formerly copartners trading as Frankl Institute, or trading under any oth name; their agents, representatives, a employees, directly or through any co porate or other device, in connection wi the offering for sale, sale, or distributi of courses of instruction, in commerce, "commerce" is defined in the Feder Trade Commission Act, to forthwi cease and desist from representing d rectly or by implication:

1. That specific vacancies in the Fe eral Civil Service exist, or will exist the immediate future, or that said v cancies exist or will exist in designat areas, or that Federal Civil Service e aminations will be held for said vaca cies, unless such are the facts.

2. That a specified number or type Federal Civil Service vacancies which e ist or will exist in a specified metropol tan or any other geographical area a based upon official United States Go ernment estimates.

3. That advertisements utilized to s licit business or inquiries are an offici announcement of, are sponsored by, are inserted by the Federal Governmen

4. That respondents have an offici relationship with, or are connected wit or are endorsed by the United State Civil Service Commission.

5. That persons purchasing courses instruction will receive a position in th Federal Civil Service.

6. That persons purchasing courses instruction may cancel their contracts any time or that said purchasers will re ceive a refund of the money they hav paid, unless such is the fact.

7. That purchasers of respondent courses of instruction will not have

pay for said courses unless or until they obtain positions in the Federal Civil Service.

8. That the persons being solicited will have no other opportunity to purchase respondents' courses of instruction.

9. That persons being solicited satisfy the physical requirements of the Federal Civil Service position they are seeking, unless such is the fact.

10. That a position in the Federal Civil Service cannot be obtained unless one of respondents' courses of instruction is purchased.

11. That any corporation, firm, or agency owned or controlled by respondents, or either of them, and used by them, or either of them, to collect past due accounts, is a separate or independent collection agency or an independent organization engaged in the business of collecting past due accounts.

It is further ordered, That the aforesaid respondents, in connection with the offering for sale, sale, or distribution of courses of instruction in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from distributing, mailing, or otherwise disseminating reproductions of official forms, notices, or any other official documents of the United States Civil Service Commission.

It is further ordered, That the amended complaint, in so far as it relates to respondents Richard M. Keenan and Thomas A. Keenan be, and the same hereby is, dismissed without prejudice and that the allegations set out in subparagraphs 5, 8, and 10 of Paragraph Nine of the amended complaint and the allegations concerning the use of the word "age" in subparagraph 9 of Paragraph Nine of the amended complaint be, and the same hereby are, dismissed without prejudice.

By "Decision of the Commission", etc., report of compliance was required as follows:

It is ordered, That respondents Edward J. Keenan and John L. Keenan, Jr., formerly copartners trading as Franklin Institute, shall within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: July 3, 1958.

By the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary.*

[Docket 7021]

PART 13—DIGEST OF CEASE AND DESIST ORDERS

WARD'S COVE PACKING CO., ET AL.

Subpart—*Discriminating in price under section 2, Clayton Act, as amended*—Payment or acceptance of commission, brokerage, or other compensation under 2 (c): § 13.820 *Direct buyers;* § 13.822 *Lowered price to buyers.*

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 2, 38 Stat. 730, as amended; 15 U. S. C. 13) [Cease and desist order, Ward's Cove Packing Company et al., Seattle, Wash., Docket 7021, July 3, 1958]

In the Matter of Ward's Cove Packing Company, a Corporation, Frank B. Peterson Company, a Partnership, and A. Winn Brindle and Harold A. Brindle, Individually and as Officers of Said Corporation, and as Copartners in the Frank B. Peterson Company

This proceeding was heard by a hearing examiner on the complaint of the Commission charging a sea food packer and its affiliated selling agent at the same address in Seattle, Wash., with violating section 2 (c) of the Clayton Act by such practices as reducing the prices on direct sales to favored customers by the 2½ percent which would ordinarily be paid as brokerage fees, and on transactions handled through field brokers, allowing favored customers discounts under the guise of advertising allowances, accomplished by cutting the brokers' normal commission.

Following acceptance of an agreement containing consent order, the hearing examiner made his initial decision and order to cease and desist which became on July 3 the decision of the Commission.

The order to cease and desist is as follows:

It is ordered, That Ward's Cove Packing Company, a corporation, and its officers and directors, and A. Winn Brindle, and Harold A. Brindle, individually and as officers of said corporation, and respondents' agents, representatives or employees, directly or through any corporate, partnership, or other device in connection with the sale of seafood products in commerce, as "commerce" is defined in the aforesaid Clayton Act, do forthwith cease and desist from: Paying, granting or allowing, directly or indirectly, to any buyer, or to anyone acting for or in behalf of, or who is subject to the direct or indirect control of such buyer, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, upon or in connection with any sale of their seafood products to such buyer for his own account.

It is further ordered, That Frank B. Peterson Company, a partnership, and A. Winn Brindle and Harold A. Brindle, individually and as copartners in the said Frank B. Peterson Company and their agents, representatives, or employees, directly or through any corporate, partnership, or other device in connection with the sale of seafood products in commerce, as "commerce" is defined in the aforesaid Clayton Act do forthwith cease and desist from: Paying, granting or passing on, either directly or indirectly to any buyer, or to anyone acting for or in behalf of or who is subject to the direct or indirect control of such buyer, brokerage earned or received by respondents on sales made for their packer-principals, by allowing to buyers lower prices which reflect all or any part of such brokerage, or by granting them allowances or rebates which are in lieu of brokerage, or by any other method or means.

By "Decision of the Commission", etc., report of compliance was required as follows:

It is ordered, That the respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

Issued: July 3, 1958.

By the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary.*

PART 13—DIGEST OF CEASE AND DESIST ORDERS

WORLD WIDE BROKERAGE CORP. ET AL.

Subpart—*Advertising falsely or misleadingly:* § 13.15 *Business status, advantages, or connections:* Service; § 13.143 *Opportunities;* § 13.185 *Refunds, repairs, and replacements;* § 13.205 *Scientific or other relevant facts;* § 13.225 *Services.* Subpart—*Misrepresenting oneself and goods*—Goods: § 13.1697 *Opportunities in product or service;* § 13.1740 *Scientific or other relevant facts;* [*Misrepresenting oneself and goods*]—Services: § 13.1838 *Terms and conditions.*

(Sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, World Wide Brokerage Corporation (Chicago, Ill.) et al., Docket 6945, July 7, 1958]

In the Matter of World Wide Brokerage Corporation, a Corporation, and Thomas E. Joyce, Burton Sherre, Mrs. Thomas E. Joyce, Also Known as Nancy Lee Buell, and E. J. O'Malley, Individually and as Officers of Said Corporation, and Frank Don. Livingston, Individually

This proceeding was heard by a hearing examiner on the complaint of the Commission charging a Chicago real estate firm with representing falsely through post cards, circulars, etc., and statements made by its salesmen to persons who had property for sale, that they had available prospective buyers interested in the specific properties and that the property would be sold in a short time as a result of their efforts; that the property was underpriced and the asking price should be raised; that their sales representatives were bonded or insured; that they would finance the purchase of listed properties through their financial department; that the listing fee was an advance on the selling commission and would be refunded if the property was not sold in a short time; that the listed property would be nationally advertised through newspapers and associated real estate brokers; and that they would furnish experienced appraisers to evaluate it.

Following acceptance of an agreement for a consent order, the hearing examiner made his initial decision and order to cease and desist which became on July 7 the decision of the Commission.

The order to cease and desist is as follows:

It is ordered, That respondents, World Wide Brokerage Corporation, and its officers, and Thomas E. Joyce, Burton Sherre, Mrs. Thomas E. Joyce, also known as Nancy Lee Buell, and E. J. O'Malley, individually and as officers of said corporation, and Frank Don. Livingston, individually, and each of respondents' agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, or sale, of advertising in newspapers or in other advertising media, or of other services or facilities in connection with the offering or listing for sale, selling, buying or exchanging, of business or any other kind of property, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, directly or by implication:

(a) That respondents have available prospective buyers who are interested in the purchase of specific property;

(b) That property will be sold through the efforts of respondents;

(c) That property sought to be listed is under priced or that the asking price should be increased, or that respondents can or will sell the property at the increased price;

(d) That respondents' sales representatives are bonded or insured;

(e) That respondents maintain a financial department, or that they possess the finances and ability to finance the purchase of listed property;

(f) That the listing fee is an advance on the selling commission or will be refunded to the property owner;

(g) That respondents will advertise the property of a prospective seller by any means that is not in accordance with the facts;

(h) That respondents furnish qualified, experienced or expert appraisers to evaluate property sought to be listed with them.

2. Using the corporate name World Wide Brokerage Corporation, or such statements as "a world wide organization", or representing in any manner or by any means that respondents operate on an international basis.

By "Decision of the Commission", etc., report of compliance was required as follows:

It is further ordered, That the respondent World Wide Brokerage Corporation, a corporation, and respondents Thomas E. Joyce, Burton Sherre, Mrs. Thomas E. Joyce, also known as Nancy Lee Buell, E. J. O'Malley, and Frank Don. Livingston shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist contained in said initial decision.

Issued: July 7, 1958.

By the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary*.

[F. R. Doc. 58-6734; Filed, Aug. 20, 1958; 8:51 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter V—Department of the Army

Subchapter A—Aid of Civil Authorities and Public Relations

PART 505—SAFEGUARDING DEFENSE INFORMATION

MISCELLANEOUS AMENDMENTS

Sections 505.1 to 505.16 are revised to read as follows:

§ 505.1 *Objective.* The regulations of this part prescribe the policy and establish standard basic procedures within the Department of the Army for safeguarding of defense information in the interest of national defense.

§ 505.2 *Basis.* The regulations of this part implement, within the Department of the Army, Executive Order 10501, subject: Safeguarding Official Information in the Interests of the Defense of the United States, dated November 5, 1953 (18 F. R. 7049), and incorporates changes in security policy and emphasis prescribed by the Department of Defense.

§ 505.3 *Statutory requirements.* Nothing in the regulations of this part will be construed to authorize the dissemination, handling or transmission of defense information contrary to the provisions of any statute.

§ 505.4 *Application.* (a) The application of the regulations of this part shall be based upon the following fundamental principles:

(1) It is essential that certain official information receive a high degree of protection in order that the ability of the United States to protect itself against all hostile or destructive action be preserved.

(2) It is also essential that the citizens of the United States be informed to the greatest extent consistent with subparagraph (1) of this paragraph concerning the activities of their Government.

(3) Nothing in the regulations of this part shall be deemed to authorize the withholding of information, otherwise releasable, because its release might tend to reveal administrative error or inefficiency, or might be embarrassing.

(b) All personnel must be made aware of the foregoing principles as the basic factors governing military security and be so thoroughly indoctrinated that this awareness is inherent in the routine discharge of their duties. The attainment of the desired objective requires sound direction by those in responsible positions and alert performance of duty by all personnel.

(c) In situations not specifically anticipated by this part or other regulations, basic security principles, common sense, and a logical interpretation of existing regulations should be applied.

§ 505.5 *Scope.* The regulations of this part prescribe requirements concerning:

(a) Rules for determining the proper classification of defense information.

(b) Declassification and downgrading.

(c) Dissemination on a need-to-know basis.

(d) Safekeeping and control.

§ 505.6 *Classification categories.* Official information which requires protection in the interests of national defense shall be limited to three categories of classification, which in descending order of importance, shall carry one of the following designations: Top Secret, Secret or Confidential (including Confidential—Modified Handling Authorized). No other designation shall be used to classify defense information.

§ 505.7 *Definitions.* Certain significant terms in the regulations of this part are defined as follows:

(a) *Defense information.* Defense information is that official information which requires protection in the interests of national defense which is not common knowledge, and which would be of intelligence value to an enemy or potential enemy in planning or waging war against the United States or its Allies.

(b) *Classified material.* Official information which has been classified and marked with one of the categories indicated in § 505.6.

(c) *Combat or combat-related operations.* Activities, actual or simulated, which relate to military planning, operations, training, communications, intelligence, and logistics.

(d) *Compartmentalization.* Granting access to defense information only to properly cleared persons who require such information in the performance of their official duties and restricting defense information to specific physical confines when feasible.

(e) *Custodian.* An individual who has possession or is otherwise charged with the responsibility for safeguarding and accounting for classified material.

(f) *Inventory.* Procedure employed to verify accountability of Classified material by comparing entries on the register against the document or entry on the record of destruction or a signed receipt.

(g) *Document.* As used herein means any recorded information regardless of its physical form or characteristics, and includes but is not limited to the following:

(1) Written material whether handwritten, printed, or typed;

(2) All painted, drawn or engraved material;

(3) All sound or voice recordings;

(4) All printed photographs and exposed or printed film, still or moving; and

(5) All reproductions of the foregoing by whatever process.

(h) *Derivative classification authority.* For the purpose of this part, derivative classification authority is that authority

to classify material as result of, in connection with, or in response to other material dealing with the same subject which already bears a classification.

(i) *Restricted Data.* All data concerning:

(1) Design, manufacture, or utilization of atomic weapons;

(2) The production of special nuclear material; or

(3) The use of special nuclear material in production of energy, but not to include data declassified or removed from the Restricted Data category which the Atomic Energy Commission determines from time to time, may be published without undue risk to the common defense.

(j) *Formerly Restricted Data.* Atomic Energy information that has been removed from the Restricted Data category for military use but which cannot be released to any nation or regional defense organizations except as provided under section 142d, Atomic Energy Act of 1954 (68 Stat. 941) as amended (42 U. S. C. 2162(d)) as amended.

(k) *Material.* As used herein means any document, product, or substance on or in which information may be recorded or embodied.

(l) *Original classification authority.* That authority required to classify independently any type of material.

(m) *Properly cleared person.* A person who has been granted a security clearance under pertinent Army regulations.

§ 505.8 *Top Secret Information*—(a) *Definition.* The use of the classification Top Secret will be limited to defense information or material which requires the highest degree of protection. The Top Secret classification will be applied only to that information or material the defense aspect of which is paramount, and the unauthorized disclosure of which could result in exceptionally grave danger to the nation, such as:

(1) Leading to a definite break in diplomatic relations affecting the defense of the United States, an armed attack against the United States or its allies, a war, or

(2) The compromise of military or defense plans or intelligence operations, or scientific or technological developments vital to the national defense.

(b) *Reproduction.* Top Secret material may be copied, extracted from, or reproduced only when the classifying authority has authorized such actions. At the time of issuance of any document which qualifies for assignment to the Top Secret category, the classifying authority will insure that each copy of the document contains a notation substantially in one of the following forms:

(1) Reproduction of this document in whole or in part is prohibited except with permission of the issuing office or higher authority.

(2) Reproduction of paragraph(s) ------ of this document is prohibited except with the permission of the issuing office, or higher authority; other paragraphs may be reproduced.

§ 505.9 *Definition of Secret Information.* The use of the classification Secret will be limited to defense information or material the unauthorized disclosure of which Could Result in Serious Damage to the Nation, such as:

(a) Jeopardizing the international relations of the United States.

(b) Endangering the effectiveness of a program or a policy of vital importance to the National Defense.

(c) Compromising important military or defense plans, or scientific or technological developments important to National Defense.

(d) Revealing important intelligence operations.

§ 505.10 *Confidential Information Including Confidential-Modified Handling Authorized*—(a) *Definition of Confidential.* The use of the classification Confidential will be limited to defense information and material the unauthorized disclosure of which could be prejudicial to the defense interests of the Nation.

(b) *Definition of Confidential-Modified Handling Authorized.* Confidential-Modified Handling Authorized is Confidential information pertaining to combat or combat related operations, actual or simulated, wherein the originator considers that, for effective mission accomplishment, lesser security safeguards for storage and transmission are acceptable and afford adequate protection to such information. Examples are:

(1) Training, field, and technical manuals and related material.

(2) Photographs, negatives, photostats, diagrams, or models of material.

(3) Defense procurement plans, including procurement contracts and related matters.

(4) Communications material and messages.

(5) Certain documents regarding engineering plans and design details, computation, method of processing or assembling which are essential to the functioning or use of an article of material.

(6) Military maps and aerial photographs and related material which require wide dissemination for military purposes.

(7) Information received from international organizations, such as NATO, SEATO, and the Baghdad Pact, or from foreign nations under existing international exchange of information agreements and policies, and classified "Restricted" by them.

§ 505.11 *Responsibility.* (a) Commanders and supervisory officials are responsible, within their areas of jurisdiction, for insuring that the effective control of defense information is maintained at all times. This control includes the initiation of classified material, its dissemination and its safekeeping. Responsibility for safeguarding information classified in the interests of national defense rests both upon the commander and upon the individual who is in a physical position to exercise direct security control.

(b) Private records, diaries, or papers containing statements of fact or opinion, either official or personal, concerning matters which relate to or affect the national security, represent a constant threat to the security of defense information. Military personnel and civilian employees of the Army are prohibited from keeping private records, diaries, or papers which contain such statements. Also prohibited are the collecting of souvenirs, or the obtaining for any personal use whatsoever of any matter classified in the interest of national defense.

§ 505.12 *Dissemination*—(a) The dissemination of defense information will be limited strictly to those properly cleared persons whose official duties require knowledge or possession thereof. No person is entitled to knowledge or possession of defense information solely by virtue of his grade, office, or security clearance. Responsibility for the determination of "need-to-know" rests upon each individual who has possession, knowledge, or command control of the information involved and not upon the prospective recipient. However, this responsibility does not relieve a requester or recipient from the obligation to make an individual determination that he has a "need-to-know" before requesting or receiving classified information. These principles are equally applicable if the prospective recipient is an individual or an organizational entity, including commands, other federal agencies, or a foreign government.

(b) The application of "need-to-know" in disseminating defense information must be positive and realistic in order to further military operations rather than hamper them. In view of the increased probability of compromise, "need-to-know" must receive consideration prior to the transmission of sensitive information to addresses located in hazardous or unfriendly areas. However, every effort will be made to keep responsible officials informed. Security carried to such an extreme that vital information is withheld unnecessarily defeats the purpose for which the classified matter was originated.

§ 505.13 *Discussion involving defense information.* Discussions of defense information or any defense information which is generated during a classified operation are prohibited within the hearing of unauthorized persons. In imparting defense information orally, the recipient will be told the classification of the defense information. When a lecture, address, or informal talk to a group includes defense information, the speaker will announce the classification at the beginning and at the end of the period. Defense information will not be discussed in telephone conversations except as may be authorized over approved circuits.

§ 505.14 *Debriefing of personnel to be retired or separated from service.* (a) The debriefing of military personnel retiring and separating from the service, and of civilians leaving Department of the Army employment or leaving the employment of Department of Defense contractors having classified contracts, will incorporate positive instructions that no defense information will be released or made available for release to the public or any persons not properly entitled to receive such information.

(b) Such personnel will be specifically informed that they are prohibited under penalties as prescribed in the Uniform Code of Military Justice or appropriate Federal statutes from divulging defense information to unauthorized persons.

§ 505.15 *Release of defense information pertaining to industrial mobilization activities.* (a) Requests from outside the Department of Defense for access to defense information originated by or at the request of the Department of the Army, for its use in connection with industrial mobilization activities, will be referred to the Secretary of the Army for disposition.

(b) The serving of any process or subpoena requiring production of such defense information will be reported immediately by the recipient to the judge advocate of the appropriate major continental or oversea command. Pending instructions from the Secretary of the Army, no action will be taken toward furnishing the requested defense information.

§ 505.16 *Release of defense information outside the Department of Defense.* Defense information may be made available to persons or agencies outside the Department of Defense provided that such defense information is necessary for their performance of a function from which the Government will derive a direct benefit and a net advantage. The following are designated as responsible for release of defense information under this section: Commanding General, United States Continental Army Command; Commanding General, United States Army Air Defense Command; Commanding Generals of ZI armies and the Military District of Washington, U. S. Army; major overseas commanders and heads of technical services for information of primary interest to each; the Assistant Chief of Staff, Intelligence, Department of the Army, for information of primary interest to the General Staff and any other Department of the Army agency not listed in this section. Prior to release of defense information under provisions of this section, commanders concerned will assure themselves of the trustworthiness of the recipients.

[AR 380–5, July 17, 1958] (Sec. 3012, 70A Stat. 157; 10 U. S. C. 3012)

[SEAL] HERBERT M. JONES,
Major General, USA,
The Adjutant General.

TITLE 14—CIVIL AVIATION

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 84]

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

PROCEDURE ALTERATIONS

The standard instrument approach procedures appearing hereinafter are adopted to become effective when indicated in order to promote safety. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

NOTE: Where the general classification (L/MFR, ADF, VOR, TerVOR, VOR/DME, ILS, or RADAR), location, and procedure number (if any) of any procedure in the amendments which follow, are identical with an existing procedure, that procedure is to be substituted for the existing one, as of the effective date given, to the extent that it differs from the existing procedure; where a procedure is cancelled, the existing procedure is revoked; new procedures are to be placed in appropriate alphabetical sequence within the section amended.

1. The low or medium frequency range procedures prescribed in § 609.100 (a) are amended to read in part:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

Transition				Ceiling and visibility minimums			
From—	To—	Course and distance	Minimum altitude (feet)	Condition	2-engine or less		More than 2-engine, more than 65 knots
					65 knots or less	More than 65 knots	
Dillon VOR	DLN-LFR	Direct	7300	T-d T-n C-dn A-dn	1000-1 2000-3 2000-3 2000-3		

Procedure turn W side NE crs, 006 Outbnd, 186 Inbnd, 9700′ within 10 mi.
Minimum altitude over facility on final approach crs, 7200′.
Crs and distance, facility to airport, 175°—1.6 mi.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished within 1.6 miles, turn right, climb to 10,500′ in a standard pattern on the NE crs of the Dillon LFR before proceeding on course.
NOTE: ADF approach not authorized.

City, Dillon; State, Mont.; Airport Name, Dillon; Elev., 5239′; Fac. Class, BMRLZ; Ident., DLN; Procedure No. 1, Amdt. 4; Eff. Date, 13 Sept. 58; Sup. Amdt. No. 3; Dated 12 Mar. 55

6. The radar procedures prescribed in § 609.500 are amended to read in part:

RADAR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

Transition				Ceiling and visibility minimums			
From—	To—	Course and distance	Minimum altitude (feet)	Condition	2-engine or less		More than 2-engine, more than 65 knots
					65 knots or less	More than 65 knots

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 1716]

[Fairbanks 012949]

ALASKA

REVOKING PUBLIC LAND ORDER NO. 1321 OF AUGUST 17, 1956, WHICH WITHDREW PUBLIC LANDS FOR USE OF COAST AND GEODETIC SURVEY

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

1. Public Land Order No. 1321 of August 17, 1956, which withdrew the following-described public lands for use of the Coast and Geodetic Survey, Department of Commerce, in connection with the installation of a geomagnetic observatory, is hereby revoked.

FAIRBANKS MERIDIAN

T. 1 N., R. 2 W.,
Sec. 20, SW¼SW¼ (unsurveyed).

The area described contains 40 acres.

2. The land is located about 1½ miles northeast of Ester Dome and in the vicinity of Sheep Creek.

3. Subject to any existing valid rights and the requirements of applicable law, the restored lands are hereby opened to settlement and to filing of such applications, selections, and locations as are allowable on unsurveyed lands in accordance with the following:

a. Subject to the applications and claims described in paragraph b (1) below, the lands beginning at 10:00 a. m. on September 19, 1958, will be subject to settlement under the Homestead and Alaska Home Site Laws by qualified veterans of World War II or of the Korean Conflict, and by others entitled to preference rights under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended. Beginning at 10:00 a. m. on December 19, 1958, any remaining lands will be subject to settlement under these laws by other qualified persons.

b. Applications and selections under the nonmineral public land laws and applications and offers under the mineral leasing laws may be presented to the Manager mentioned below, beginning on the date of this order. Such applications, selections, and offers will be considered as filed on the hour and respective dates shown for the various classes enumerated in the following paragraphs:

(1) Applications by persons having preference rights conferred by existing laws or equitable claims subject to allowance and confirmation will be adjudicated on the facts presented in support of each claim or right. All applications presented by persons other than those referred to in this paragraph will be subject to the applications and claims mentioned in this paragraph.

(2) All valid applications under the Small Tract Laws by qualified veterans of World War II or of the Korean Conflict, and by others entitled to preference rights under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284 as amended), presented prior to 10:00 a. m. on September 19, 1958, will be considered as simultaneously filed at that hour. Rights under such preference right applications after that hour and before 10:00 a. m. on December 19, 1958, will be governed by the time of filing.

(3) All valid applications and selections under the nonmineral public land laws, other than those coming under paragraphs (1) and (2) above, and applications and offers under the mineral leasing laws, presented prior to 10:00 a. m. on December 19, 1958, will be considered as simultaneously filed at that hour. Rights under such applications and selections filed after that hour will be governed by the time of filing.

4. The lands will be open to applications and offers under the mineral leasing laws, and to location under the United States mining laws, at 10:00 a. m. on December 19, 1958.

5. Persons claiming veteran's preference rights under paragraph b (2) above must enclose with their applications proper evidence of military or naval service, preferably a complete photostatic copy of the certificate of honorable discharge. Persons claiming preference rights based upon statutory preference or equitable claims must enclose properly corroborated statements in support of their applications, setting forth all facts relevant to their claims. Detailed rules and regulations governing applications which may be filed pursuant to this no-

tice can be found in Title 43 of the Code of Federal Regulations.

6. The Territory of Alaska has elected not to exercise the preference right of selection granted it by section 202 (b) of the Alaska Mental Health Enabling Act of July 28, 1956 (70 Stat. 711; 48 U. S. C. 46.5 (b)).

7. Inquiries concerning the land shall be addressed to the Manager, Land Office, Bureau of Land Management, Fairbanks, Alaska.

ROGER ERNST,
Assistant Secretary of the Interior.

AUGUST 14, 1958.

[Public Land Order 1717]

[69640]

OREGON

PARTLY REVOKING PUBLIC LAND ORDER NO. 604 OF SEPTEMBER 3, 1949

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows.

Public Land Order No. 604 of September 3, 1949, so far as it reserved the following-described lands for use in the construction of the Detroit Dam and Reservoir on the North Santiam River, under supervision of the Department of the Army, is hereby revoked:

WILLAMETTE MERIDIAN

T. 10 S., R. 5 E.,
Sec. 2, NE¼SW¼, that part lying northerly of a line parallel to and distant 200 feet northwesterly from the center line of the North Santiam Highway;
Sec. 3, SE¼, that part lying northerly of a line parallel to and distant 200 feet northwesterly from the center line of the North Santiam Highway, and the E½SW¼;
Sec. 10, that part lying northerly of a line parallel to and distant 200 feet northwesterly from the center line of the North Santiam Highway;
Sec. 17, SW¼NW¼ and NW¼SW¼, those parts lying easterly of a line parallel to and distant 200 feet easterly from the center line of the North Santiam Highway.

T. 10 S., R. 6 E.,
Sec. 7, lots 2 and 3, those parts lying northerly and easterly of a line parallel to and distant 200 feet northeasterly from the center line of the North Santiam Highway.

The areas described aggregate 405.6 acres.

The lands are a part of the Willamette National Forest, and are for the most part within various withdrawals for power purposes. They will be open to such forms of appropriation under the public land laws, as may be made of national forest lands, at 10:00 a. m. on September 20, 1958, subject, where applicable, to the provisions of the act of August 11, 1955 (69 Stat. 683; 30 U. S. C. 621–625).

ROGER ERNST,
Assistant Secretary of the Interior.

AUGUST 15, 1958.

[Public Land Order 1718]

MONTANA AND NEVADA

RESERVING LANDS WITHIN NATIONAL FORESTS FOR USE OF FOREST SERVICE AS ADMINISTRATIVE SITES, RECREATION AREAS, FOREST CAMPS, AND ROADSIDE ZONES

By virtue of the authority vested in the President by the act of June 4, 1897 (30 Stat. 34, 36; 16 U. S. C. 473) and otherwise, and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public lands, within the national forests designated, are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining but not the mineral-leasing laws nor disposal of materials under the act of July 31, 1947 (61 Stat. 681; 30 U. S. C. 601–604) as amended, and reserved for use of the Forest Service, Department of Agriculture, as administrative sites, recreation areas, forest camps, and roadside zones, as indicated:

MONTANA

[Montana 020355]

MONTANA PRINCIPAL MERIDIAN

BEAVERHEAD NATIONAL FOREST

Foolhen Administrative Site

[Public Land Order 1719]

[79588]

ARIZONA AND NEW MEXICO

TRANSFER OF LANDS FROM GILA NATIONAL FOREST TO APACHE NATIONAL FOREST, ARIZONA, FROM APACHE NATIONAL FOREST TO GILA NATIONAL FOREST, AND FROM LINCOLN NATIONAL FOREST TO CIBOLA NATIONAL FOREST, NEW MEXICO, ELIMINATING CERTAIN LANDS FROM LINCOLN AND CIBOLA NATIONAL FORESTS

By virtue of the authority vested in the President by the act of June 4, 1897 (30 Stat. 34, 36; 16 U. S. C. 473), and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

1. The following-described lands within the exterior boundaries of the Gila National Forest are hereby transferred to the Apache National Forest, Arizona, effective July 1, 1958:

GILA AND SALT RIVER MERIDIAN

Tps. 1 and 2 N., R. 28 E., (partly unsurveyed).
T. 3 N., R. 28 E., (unsurveyed) that part lying south of the Mogollon Rim.
Tps. 1 and 2 N., R. 29 E., (unsurveyed).
T. 3 N., R. 29 E., (unsurveyed) that part lying south of the Mogollon Rim.
T. 1 N., R. 30 E., (partly unsurveyed).

The lands described in this paragraph, totalling approximately 312,640 acres, have been patented.

5. The exterior boundaries of the forests involved are hereby adjusted in accordance with the transfers and eliminations made by this order, and any transferred lands now having a national forest status shall become a part of the forest to which it is transferred.

6. This order shall not be construed as giving a national forest status to any lands which do not now have such status, or as changing the status of any lands which now have a national forest status.

ROGER ERNST,
Assistant Secretary of the Interior.

AUGUST 15, 1958.

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Rules Amdts. 16-32]

[Docket No. 12169]

PART 16—LAND TRANSPORTATION RADIO SERVICES

FREQUENCIES AVAILABLE FOR BASE AND MOBILE STATIONS

In the matter of amendment of Parts 2, 6, 7, 8, 9, 10, 11 and 16 of the Commission's rules to reduce separation between assignable frequencies in the 42–50 Mc band, to effect changes in the 25–50 Mc and 150.8–152 Mc bands, and to effect other changes relating to the use of frequencies in the 25–50 Mc band.

The Commission having under consideration the first report and order in the above-entitled matter (FCC 57-1393) adopted December 18, 1957; and

It appearing that under the terms of the subject report and order, Part 2 of the Commission's rules was amended as set forth therein, and that Parts 6, 7, 8, 9, 10, 11, and 16 of such rules were amended to conform to the frequency-availability changes indicated therein, the formal codification of such latter changes to be accomplished by subsequent orders of the Commission; and

It further appearing that the formal codification of the changes herein ordered in Part 16 of the Commission's rules is in addition to those contained in the Commission's Supplemental Order Number One—Part 16 (Mimeo No. 54489) released January 27, 1958, and Supplemental Order Number Five—Part 16 (Mimeo No. 59563) released June 13, 1958, and conforms without any substantive change to the frequency-availability changes already ordered in the text and tabulations of the first report and order above-described, and are, therefore, editorial in nature, requiring no further public notice of rule making thereon; and

It further appearing that the amendments to Part 16 ordered herein should be made effective immediately; and

It further appearing that authority for the amendment herein ordered is contained in sections 4 (i) and 303 of the Communications Act of 1934, as amended, and section 0.341 of the Commission's Statement of Delegation of Authority;

It is ordered, This 15th day of August, 1958, that effective August 15, 1958, Part 16 of the Commission's rules, Land Transportation Radio Services, is amended as set forth below.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Released: August 15, 1958.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

Amend § 16.252 by the addition of a new paragraph (h) to read as follows:

(h) A common or contract carrier of passengers operating between urban areas, authorized in the Motor Carrier Radio Service prior to April 1, 1958, to use any one of the frequencies 43.86, 43.90, 43.94, 43.98, 44.02, or 44.06 Mc, may be authorized to operate on such frequency until March 31, 1963. During this period such licensees may modify, renew, reinstate, or assign their licenses in those cases where such assignment accompanies a change of ownership of the licensee's business to the assignee; however, they will not be authorized to expand their facilities by the addition of new base or fixed stations.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Commodity Stabilization Service

[7 CFR Part 717]

HOLDING OF REFERENDA ON MARKETING QUOTAS

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Secretary of Agriculture, pursuant to the authority contained in the applicable provisions of the Agricultural Adjustment Act of 1938, as amended, 7 U. S. C., 1281 et seq., is considering amending the regulations governing the holding of the referenda on marketing quotas as published in the May 21, 1958 daily issue of the FEDERAL REGISTER (23 F. R. 3432) in the following respect:

By changing the hour for closing the polls on the date fixed for holding a referendum on marketing quotas from 7 o'clock p. m., local time to 6 o'clock p. m., local time. The last sentence of § 717.5 would be amended to read as follows: "The polls shall be closed at 6 o'clock p. m., local time, or such later hour as is fixed by the State committee in order to afford a full and fair opportunity to producers to vote, on the date for holding the referendum."

All persons who desire to submit written data, views, and recommendations in connection with this proposal should file the same with the Deputy Administrator, Production Adjustment, Commodity Stabilization Service, U. S. Department of Agriculture, Washington 25, D. C. within 10 days after the date of the publication of this notice in the FEDERAL REGISTER.

Done at Washington, D. C., this 15th day of August 1958.

[SEAL] CLARENCE L. MILLER,
Acting Administrator,
Commodity Stabilization Service.

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

APPOINTMENT OF TOWNSITE TRUSTEES

Pursuant to section 1.9 (a) of Bureau of Land Management Order No. 541, as amended by Amendment No. 15, dated May 16, 1958, I hereby appoint the Operations Supervisors of the Anchorage Land District, the Fairbanks Land District, and the Juneau Land District, as Townsite Trustees and Superintendents of Sales for the Alaska Railroad Townsites for their respective Land District. These appointments are to become effective September 1, 1958.

The Operations Supervisors are authorized to take all actions as provided under section 11 of the act of March 3, 1891 (26 Stat. 1095, 1099; 48 U. S. C. 355), the act of May 25, 1926 (44 Stat. 629; 48 U. S. C. 355a–355d), the act of

February 26, 1948 (62 Stat. 35; 48 U. S. C. 355e) and the act of March 12, 1914 (38 Stat. 305; 48 U. S. C. 301, 302, 303–308).

J. M. HONEYWELL,
Area Administrator,
Area 4, Alaska.

MICHIGAN

NOTICE OF FILING OF PLAT OF SURVEY AND ORDER PROVIDING FOR OPENING OF PUBLIC LANDS

AUGUST 15, 1958.

Plats of Survey of the lands (Islands) described below, accepted March 26, 1958, will be officially filed in the Eastern States Land Office, Bureau of Land Management, Department of the Interior, Washington 25, D. C., effective 10:00 a. m., on September 24, 1958.

MICHIGAN MERIDIAN, MICHIGAN

T. 8 N., R. 5 E.,
Sec. 3, Lot 7, 0.11 acre;
Sec. 10, Lot 6, 0.53 acre;
Sec. 15, Lot 15, 5.51 acres;
Lot 16, 1.57 acres;
Lot 17, 0.16 acre;
Lot 18, 0.04 acre;
Sec. 22, Lot 9, 0.54 acre;
Sec. 26, Lot 6, 1.63 acres;
Sec. 34, Lot 3, 1.36 acres;
Sec. 35, Lot 5, 1.36 acres.

These plats represent the survey of islands in the Flint River which was not included in the original survey as shown by plat approved in 1822.

The islands in T. 8 N., R. 5 E. are upland in character, reaching approximately 3 to 10 feet above normal water level but subject to overflow during extreme high water. Timber species consist principally of box elder, elm, maple, and willow. Further detail as to timber and characteristics of these islands is given in the field notes of this survey. The islands designated as lots 17 and 18, sec. 15, and lot 7, sec. 3, are not high enough to prevent frequent overflowing and are considered overflow in character. The others are high enough to be considered upland in character. Soil is sandy black loam.

No application may be allowed under the homestead or small tract or any other nonmineral public land laws unless the lands have already been classified as valuable or suitable for such type of application or shall be so classified upon consideration of an application. Any application that is filed will be considered on its merit. The lands will not be subject to occupancy or disposition until they have been classified.

Applications and selections under nonmineral public land laws and applications and offers under the mineral leasing laws may be presented to the Manager, mentioned below, beginning on the date of this order. Such applications, selections, and offers will be considered as filed on the hour and respective dates shown for the various classes enumerated in the following paragraphs:

1. Applications by persons having prior existing valid settlement rights, preference rights conferred by existing laws, or equitable claims subject to allowance and confirmation will be adjudicated on the facts presented in support of each claim or right. All applications presented by persons other than those referred to in this paragraph will be subject to the applications and claims mentioned in this paragraph.

2. All valid applications, under the Homestead and Small Tract Laws, by qualified veterans of World War II or of the Korean conflict, and by others entitled to preference rights under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 274–284 as amended), presented prior to 10:00 a. m., on September 24, 1958, will be considered as simultaneously filed at that hour. Rights under such preference right applications filed after that hour and before 10:00 a. m., on December 24, 1958, will be governed by the time of filing.

3. All valid applications and selections under the nonmineral public land laws, other than those coming under paragraph (1) and (2) above, and applications and offers under the mineral leasing laws, presented prior to 10:00 a. m., on December 24, 1958, will be considered filed simultaneously at that hour. Rights under such applications and selections filed after that hour will be governed by the time of filing.

All inquiries relating to the lands should be addressed to the Manager, Eastern States Land Office, Bureau of Land Management, Department of the Interior, Washington 25, D. C.

H. K. SCHOLL,
Manager.

[F. R. Doc. 58–6718; Filed, Aug. 20, 1958; 8:47 a. m.]

ALASKA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

The Department of the Air Force has filed an application, Serial Number A 044493 for the withdrawal of the lands described below, from all forms of appropriation under the public land laws, including the mining and mineral leasing laws. The applicant desires the land for classified military purposes, however, a public road from Knik Bridge to Lake George crossing the area will be permitted any time after three years.

For a period of 60 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, Anchorage Operations Office, Mailing Address: 131 5th Avenue; Location 744 4th Avenue, Anchorage, Alaska.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

PIONEER PEAK AREA

Commencing at a point which bears N. 16° W., 4,000 feet, more or less, from U. S. C. & G. S. "Ledge" near the south bank of the Knik River (Lat. 61°28'26.875" N., Long. 148°52'32.486" W.), said Point of Beginning being at the mean high water line on the south side of said Knik River; thence S. 45°00' W., 5,000 feet more or less; thence N. 45°00' W., 6,000 feet more or less; thence N. 45°00' E., 4,500 feet more or less; to a point on the mean high water line on south side of said river; thence following said m. h. w. line 6,926 feet, more or less, in a southeasterly direction to the point of beginning.

Containing 749 acres, more or less.

L. T. MAIN,
Operations Supervisor, Anchorage.

DEPARTMENT OF COMMERCE

Federal Maritime Board

LYKES BROS. STEAMSHIP CO., INC.

NOTICE OF APPLICATION AND HEARING

Notice is hereby given that Lykes Bros. Steamship Co., Inc. has filed application for increase in the maximum number of subsidized sailings under its Operating-Differential Subsidy Agreement from 52 subsidized sailings per year to 56 subsidized sailings, for the calendar year 1958 only, in its Line C Service on Trade Route No. 13 between U. S. Gulf and South Atlantic ports and ports in the Mediterranean and Black Seas; with the proviso that in no event shall total subsidized sailings exceed the aggregate contract maximum for all of its subsidized services.

A public hearing will be held under section 605 (c) of the Merchant Marine Act, 1936, as amended, upon the aforementioned application, should any person, firm, or corporation having a material interest in said application file with the Secretary, Federal Maritime Board, by close of business on September 5, 1958, any protest, in writing in triplicate with a full and complete statement of the reasons for his objections, and request for hearing under section 605 (c).

The purpose of the hearing, should one be held, will be to receive evidence relevant to the following: (1) Whether the application with respect to the operations hereinabove described is one with respect to a vessel or vessels to be operated on a service, route, or line, served by citizens of the United States which would be in addition to the existing service or services, and, if so, whether the service already provided by vessels of United States registry in such service, route, or line is inadequate, and in the accomplishment of the purposes and policy of the act, additional vessels should be operated thereon; (2) whether the application covering the aforesaid operation is one with respect to a vessel operated or to be operated in a service, route or line served by two or more citizens of the United States with vessels of United States registry, and if so, whether the effect of such an agreement would be to give undue advantage or be unduly

prejudicial as between citizens of the United States in the operation of vessels in competitive services, routes, or lines; and (3) whether it is necessary to enter into an agreement covering these operations in order to provide adequate service by vessels of United States registry.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Federal Maritime Board determines that petitions to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Federal Maritime Board will take such action as may be deemed appropriate.

Dated: August 18, 1958.

By order of the Federal Maritime Board.

[SEAL] JAMES L. PIMPER,
Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 12617]

FM BROADCAST STATIONS

ORDER EXTENDING TIME FOR FILING COMMENTS

In the matter of inquiry into amendment of Parts 2, 3, and 4 of the Commission's rules and regulations and the Standards of Good Engineering Practice concerning FM broadcast stations to permit FM broadcast stations to engage in specified non-broadcast activities on a multiplex basis.

1. The Commission has before it for consideration two requests, filed on August 7, 1958, by the Institute of High Fidelity Manufacturers, Inc., New York City, and on August 14, 1958, by General Electronic Laboratories, Inc., Cambridge, Massachusetts, for an extension of time to file comments in response to the Notice of Inquiry released by the Commission on July 8, 1958, in the above-entitled proceeding. The Institute of High Fidelity Manufacturers requests that the time for comments be extended from September 2, 1958, to January 5, 1959, and General Electronic Laboratories requests that it be extended to October 2, 1958.

2. The Institute of High Fidelity Manufacturers states that the additional time requested is needed to permit compilation and preparation of material which it wishes to submit. General Electronic Laboratories states that, because of vacation schedules, it is unable to complete its field measurement studies on multiplex operation and to file engineering data by September 2, 1958, when comments are due.

3. In view of the representations of the petitioners, the Commission believes that the public interest would be served by extending the time for filing comments on its Notice of Inquiry in the above-entitled proceeding. However, the Commission believes that a 30-day extension will afford all interested parties sufficient time for preparing and filing such comments.

4. In view of the foregoing: *It is ordered,* That the aforesaid request of the General Electronic Laboratories, Inc., is granted; that the aforesaid request of the Institute of High Fidelity Manufacturers, Inc., is granted, in part; and that

the time for filing comments on the Notice of Inquiry in the above-entitled proceeding is extended from September 2, 1958, to October 2, 1958.

Adopted: August 15, 1958.

Released: August 18, 1958.

[Docket No. 12552]

CHARLES A. BAILEY, JR.

ORDER DESIGNATING MATTER FOR HEARING ON STATED ISSUES

In the matter of Charles A. Bailey, Jr., Los Angeles, California, Docket No. 12552; suspension of amateur radio operator license (W6BXL).

The Commission having under consideration the request of Charles A. Bailey, Jr., Los Angeles, California, for a hearing in the above-entitled matter;

It appearing that the said Charles A. Bailey, Jr., acting in accordance with the provisions of section 303 (m) (2) of the Communications Act of 1934, as amended, filed with the Commission within the time specified therefor, an application requesting a hearing on the Commission's order of June 16, 1958, which suspended his Advanced Class Amateur Radio Operator License for a period of six months;

It appearing that under the provisions of section 303 (m) (2) of the Communications Act of 1934, as amended, the said licensee is entitled to a hearing in the matter and that, upon his filing a timely written application therefor, the Commission's Suspension Order is held in abeyance until the conclusion of proceedings in the hearing;

It is ordered, This 14th day of August 1958, under authority contained in section 303 (m) (2) of the Communications Act of 1934, as amended, and § 0.202 (f) of the Commission's rules, that the matter of the suspension of the Advanced Class Amateur Radio Operator License of Charles A. Bailey, Jr., be designated for hearing before a Commission Examiner, at a time and place later to be specified, upon the following issues:

1. To determine whether the licensee committed the violations of the Commission's rules as set forth in the Commission's Order of Suspension;

2. If the licensee committed such violations, to determine whether the facts or circumstances in connection therewith would warrant any change in the Commission's Order of Suspension.

It is further ordered, That a copy of this order be transmitted by Certified Mail, Return Receipt Requested, to Mr. Charles A. Bailey, Jr., 4566 Firebrand Street, Los Angeles 45, California.

Released: August 15, 1958.

FEDERAL POWER COMMISSION

[Docket No. G-15858]

REPUBLIC NATURAL GAS CO.

ORDER FOR HEARING, SUSPENDING PROPOSED CHANGES IN RATES, AND ALLOWING INCREASED RATES TO BECOME EFFECTIVE

AUGUST 15, 1958.

Republic Natural Gas Company (Respondent) on July 23, 1958, tendered for filing proposed changes in its presently effective rate schedules for sales of natural gas subject to the jurisdiction of the Commission. The proposed changes, which constitute increased rates and charges, are contained in the following designated filings:

Description: Notices of Change, undated.

Purchaser: Arkansas Louisiana Gas Company.

Rate schedule designation: (1) Supplement No. 2 to Respondent's FPC Gas Rate Schedule No. 20. (2) Supplement No. 5 to Respondent's FPC Gas Rate Schedule No. 22.

Effective date: August 1, 1958 (effective date is the date proposed by Respondent).

The increased rate(s) and charge(s) so proposed are intended to reflect (in whole or in part) the additional "excise, license, or privilege tax" of one cent per Mcf levied by the State of Louisiana pursuant to Act No. 8 of 1958 (House Bill No. 303), as approved on June 16, 1958, amending Title 47 of the Louisiana Revised Statutes of 1950. The Commission is advised that litigation is being instituted to challenge the constitutionality of the said Act No. 8 of 1958. In consideration of this fact, and in order to assure appropriate refund in the event said Act No. 8 of 1958 should be declared unconstitutional or otherwise held invalid by final judicial decision, it is deemed advisable to suspend the said proposed increased rates and charges until August 2, 1958, and thereafter to permit them to become effective as of that date: *Provided*, That within 20 days from the date of this order Respondent shall file with the Secretary of the Commission an appropriate undertaking to assure such refund as may be ordered.

The Commission finds:

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed changes, and that the above-designated supplements be suspended and the use thereof deferred as hereinafter ordered.

(2) It is necessary and proper in the public interest in carrying out the provisions of the Natural Gas Act that Respondent's proposed increased rates be made effective as hereinafter provided and that Respondent be required to file an undertaking as hereinafter ordered and conditioned.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rates and charges contained in the above-designated supplements to Respondent's FPC Gas Rate Schedules.

(B) Pending such hearing and decision thereon, said supplements are each hereby suspended and the use thereof deferred until August 2, 1958, and until such further time as each is made effective in the manner hereinafter prescribed.

(C) The rate(s), charge(s), and classification(s) set forth in the above-designated supplements to Respondent's FPC Gas Rate Schedules shall be effective as of August 2, 1958: *Provided, however*, That within 20 days from the date of this order, Respondent shall execute and file with the Secretary of the Commission the agreement and undertaking described in paragraph (E) below.

(D) Respondent shall refund at such times and in such amounts to the persons entitled thereto, and in such manner as may be required by final order of the Commission, the difference between the presently effective rates and charges and the proposed increased rates and charges hereby allowed to become effective in the event the additional tax of one cent per Mcf levied by the State of Louisiana is for any reason held to be invalid. Should such additional tax eventually be held invalid and the State of Louisiana makes refund, with interest, of the tax monies collected pursuant to the said Act No. 8 of 1958, then, and in that event, a proportionate part of the interest so received by the Respondent herein shall be passed on and paid to the persons entitled thereto at such times and in such amounts, and in such manner as may be required by final order of the Commission. Respondent shall bear all costs of any such refunding; shall keep accurate accounts in detail of all amounts received by reason of the increased rates or charges allowed by this order to become effective, for each billing period, specifying by whom and in whose behalf such amounts were paid; and shall report (original and four copies), in writing, and under oath, to the Commission quarterly, or monthly if Respondent so elects, for each billing period, and for each purchaser, the billing determinants of natural gas sales to such purchasers and the revenues resulting therefrom, as computed under the rates in effect immediately prior to the date upon which the increased rates allowed by this order become effective, and under the rates allowed by this order to become effective, together with the differences in the revenues so computed.

(E) As a condition of this order, within 20 days from the date of issuance thereof, Respondent shall execute and file in triplicate with the Secretary of this Commission its written agreement and undertaking to comply with the terms of paragraph (D) hereof, signed by a responsible officer of the corporation, evidenced by proper authority from the board of directors, and accompanied by a certificate showing service of copies thereof upon all purchasers under the rate schedule involved, as follows:

Agreement and Undertaking of _____ To Comply With the Terms and Conditions of Paragraph (D) of Federal Power Commission's Order Making Effective Proposed Rate Changes

In conformity with the requirements of the order issued _____, in Docket No. G-__, _____ hereby agrees and undertakes to comply with the terms and conditions of paragraph (D) of said order, and has caused this agreement and undertaking to be executed and sealed in its name by its officers, thereupon duly authorized in accordance with the terms of the resolution of its board of directors, a certified copy of which is appended hereto this _____ day of _____.

_____

By _____

Attest:

_____

(Secretary)

Unless Respondent is advised to the contrary within 15 days after the date of filing such agreement and undertaking, the agreement and undertaking shall be deemed to have been accepted.

(F) If Respondent shall, in conformity with the terms and conditions of paragraph (D) of this order, make the refunds as may be required by order of the Commission, the undertaking shall be discharged; otherwise, it shall remain in full force and effect.

(G) Neither the supplements hereby suspended nor the rate schedules sought to be altered thereby shall be changed until the period of suspension has expired, unless otherwise ordered by the Commission.

(H) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

By the Commission.

[Docket Nos. G-9554, G-11123, G-11906, G-13472, G-13529]

HASSIE HUNT TRUST

ORDER DENYING PETITION FOR ASSIGNMENT OF DOCKET NUMBERS TO CERTAIN SALES AND DENYING MOTION TO CONSOLIDATE

AUGUST 15, 1958.

These proceedings, involving the increased rates and charges proposed by Hassie Hunt Trust (Hassie Hunt) in various dockets, were consolidated for hearing by order issued April 28, 1958. Pursuant to that order the Commission entered upon a public hearing on June 30, 1958, which was recessed until September 30, 1958.

On June 19, 1958, Hassie Hunt filed a petition requesting that the Commission assign docket numbers to certain sales of natural gas produced from its leaseholds under sales contracts, to which it is not a signatory party.[1] Hassie Hunt's petition also moves that the Commission consolidate such suggested new dockets for hearing with these proceedings.

In support of its petition and motion Hassie Hunt states that it desires to consolidate all of its interests into one proceeding and to present its evidence in one record in order to save the time and expense of intervention in other dockets involving the operators of its non-signatory interests. It is unable to do so because Hassie Hunt has not filed rate schedules with the Commission to cover the aforementioned two so-called non-signatory sales. The filing of rate schedules relating to non-signatory interests are prohibited by the Commission's Order No. 190, set forth in § 154.91 of the Commission's regulations under the Natural Gas Act.

The granting of Hassie Hunt's petition and motion, although accomplishing a consolidation of all its interests into one record, would, on the other hand, result in a severance of interests and of the record relating to the respective sales of the operators of the various unitized tracts. The respective pipeline buyers, would, in each case, be subjected to appearance in multiple proceedings to suit the desires of the various non-signatory sellers. The petition, if granted, would tend to splinter into a heterogeneous mass of proceedings that which the various parties had negotiated into an economic and functional unit and which the Commission has classified as a single jurisdictional sale. Sun Oil Co. v. F. P. C., — F. 2d —, (CA5, No. 16062, et al., decided May 9, 1958; slip sheet pp. 11-12). Midstates Oil Corp., et al., Dockets Nos. G-4932, et al., Op. 314, issued July 23, 1958 (mimeo. pp. 3-5).

The Commission finds: The aforesaid petition and motion filed by Hassie Hunt should be denied as requesting a procedural order contrary to the purpose and intent expressed by § 154.91 of the Commission's regulations under the Natural Gas Act.

The Commission orders: The aforesaid petition and motion of Hassie Hunt Trust, filed herein on June 19, 1958, is hereby denied.

By the Commission (Commissioner Hussey not participating).

[SEAL] MICHAEL J. FARRELL, *Acting Secretary.*

[Docket No. G-13874]

SLICK OIL CORP. ET AL.

NOTICE OF APPLICATION AND DATE OF HEARING

AUGUST 14, 1958.

On December 6, 1957, Slick Oil Corporation (Slick), a Delaware corporation with a principal office in Houston, Texas, Operator, et al.,[1] and Slick-Moorman Oil Company (Slick-Moorman), et al.,[2] through the latter's agent, Leon V. Manry, Jr., filed a joint application in Docket No. G-13874, pursuant to section 7 of the Natural Gas Act, for authorization to abandon the sale of natural gas and to sell natural gas as hereinafter described, subject to the jurisdiction of the Commission, all as more fully described in the application which is on file with the Commission and open to public inspection.

The joint application applies for:

(1) Permission and approval of Slick-Moorman, et al., to abandon service to Tennessee Gas Transmission Company (Tennessee) from the Tomball Southeast Field, Harris County, Texas, covered by a sales contract dated March 6, 1954, between Slick-Moorman, et al., and Tennessee, previously accepted for filing as Geotek Oil Company, et al., FPC Gas Rate Schedule No. 1.

(2) A certificate of public convenience and necessity authorizing Slick, Operator, et al., to continue the service under the aforementioned contract proposed to be abandoned by Slick-Moorman, et al.

Applicants state that Slick-Moorman, et al., with the exception of Newman Brothers, conveyed their interests in the above-mentioned contract and the leases still in force thereunder to Slick.

Applicants recite further that Slick, through the assignment, now owns 75 percent of the working interest in said leases and Newman Brothers 25 percent, with the exception of one lease, the Edward Eisen Lease, in which Slick owns 37½ percent and Newman Brothers 12½ percent, with the remaining 50 percent owned by a third party and not subject to the contract involved herein.

By the Commission's order issued October 7, 1955, in the Matters of Slick-Moorman Oil Company et al., Docket Nos. 3188, et al., Slick-Moorman, et al., were granted a certificate of public convenience and necessity in Docket No. G-3188 authorizing the sale now proposed to be abandoned.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on September 25, 1958, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before September 10, 1958. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrent in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] MICHAEL J. FARRELL, *Acting Secretary.*

[F. R. Doc. 58-6721; Filed, Aug. 20, 1958; 8:48 a. m.]

[Docket No. G-14721]

CITIES SERVICE GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

AUGUST 14, 1958.

Take notice that Cities Service Gas Company (Applicant), a Delaware corporation having its principal place of business in Oklahoma City, Oklahoma, filed on March 21, 1958, an application, and supplements thereto on April 23, 1958, pursuant to section 7 of the Natural Gas Act, for (1) permission and approval to abondon the natural gas service it now provides to Eastern Kansas Gas Company for resale to the towns of Neodesha, Humboldt and Chanute, Kansas, and (2) for a certificate of public convenience and necessity authorizing the Applicant to acquire and operate certain facilities of Eastern Kansas used in connection with such service. Cities Service proposes to sell gas to the towns of Neodesha, Humboldt and Chanute (in lieu of Eastern Kansas) for resale in those towns and their environs, all as more fully represented in the application on file with the Commission and open for public inspection.

The application recites that the Kansas Corporation Commission on April 9, 1958, approved the proposal. Since its inception, Eastern Kansas has been gathering natural gas from local producing fields and transporting it through its pipeline system to the towns of Neodesha, Chanute and Humboldt. As the town border stations of the above communities, Eastern Kansas sold the gas to the respective municipalities, which then distributed and retailed it to the inhabitants therein. Eastern Kansas supplemented the local supply with gas purchased from Cities Service when local production became depleted to the extent that it could not fully meet the requirements of the three towns.

Facilities to be acquired and operated:

(1) To serve Neodesha: approximately 3.08 miles of 2 to 8-inch lateral pipeline, extending from a connection with Cities Service's 8-inch lateral at the northern edge of Neodesha in Wilson County, Kansas, west and south around the city limits of Neodesha, to town border stations for that community.

(2) To serve Chanute: approximately 20.16 miles of 2 to 8-inch lateral pipeline, extending from a connection with Cities Service's 8-inch Ft. Scott line in Allen County, Kansas, south to Chanute and thence southwest to Eastern's Sutcliffe Storage Field and a further connection with Cities Service's main 30-inch Grabhan-Welda line to Neosho County, Kansas. The Sutcliffe Storage Field will also be purchased by Applicant from Eastern Kansas as discussed herein.

(3) To serve Humboldt: approximately 2.75 miles of 4 to 6-inch pipeline, extending from a connection with Cities Service's 8-inch lateral at the south edge of Humboldt, in Allen County, Kansas, north and south to serve various customers within the city limits of Humboldt and nearby areas.

(4) Metering and regulating facilites at the town border stations for Chanute, Humboldt and Neodesha.

(5) The Sutcliffe Storage Field in Neosho County, Kansas, consisting of approximately 1,000 acres and 5 storage wells.

Applicant proposed to render direct interruptible industrial service to a number of customers now served directly by Eastern Kansas in the vicinity of the three towns. These customers, together with estimated sales by Cities Service and revenues to Cities Service therefrom, are as follows:

Customers	Sales in Mcf	Revenues
Archer-Daniels-Midland Co., alfalfa dehydrator, Neodesha	21,135	$5,917.50
Archer-Daniels-Midland Co., machine shop, Neodesha	5,172	2,007.50
Humboldt Brick & Tile Co.	121,099	30,404.00
Humboldt	73,598	20,500.00
Service Pipe Line Co	62,658	17,640.00
Neosho Fertilizer Co	1,591	748.25
Bellair Oil Corp	1,492	705.00
Keas Drilling Co	244	175.15
City of Chanute Power Plant	471,426	101,100.00
City of Neodesha Light Plant	69,620	15,200.00
Neosho County Hospital	6,902	2,780.00
Southeast Kansas Tuberculosis Hospital	5,769	2,388.50
	840,706	202,665.90

Applicant proposes to purchase Eastern Kansas' facilities for the sum of $102,000, which will be paid for out of treasury cash.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regualtions and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on September 24, 1958, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 411 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before September 5, 1958. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] MICHAEL J. FARRELL, *Acting Secretary.*

[F. R. Doc. 58-6722; Filed, Aug. 20, 1958; 8:48 a. m.]

[Docket No. G-14693, etc.]

PAN AMERICAN PETROLEUM CORP. ET AL.

NOTICE OF APPLICATIONS AND DATE OF HEARING

AUGUST 15, 1958.

In the matters of Pan American Petroleum Corporation,[1] Docket No. G-14693;

See footnotes at end of document.

[1] The cited contracts are Humble Oil and Refining Company's FPC Gas Rate Schedule No. 41 and Pan American Petroleum Corporation's FPC Gas Rate Schedule No. 32.

[1] Slick files for itself and as operator for Newman Brothers Drilling Company.

[2] "Et al." parties are Geotek Oil Company (a joint venture composed of Lewis J. Moorman, Trustee; Frank Gravis; Tom Slick; O. B. Mitchell; H. N. Mallon; William H. Danforth; Herbert Grindal; and Bernard E. Smith) and Newman Brothers. All are signatory parties to the contract involved.

Tidewater Oil Company,[1] Docket No. G–14778; United Carbon Company, Inc. (Maryland),[2] Docket No. G–14785; Unit Gas Company, Inc.,[3] Docket No. G–14786; The Carter Oil Company,[4] Docket No. G–14793; Continental Oil Company,[5] Docket No. G–14875; Sinclair Oil & Gas Company,[6] Docket No. G–14888; Sinclair Oil & Gas Company,[7] Docket No. G–14889.

Take notice that each of the above-designated parties, hereinafter referred to as Applicants, has filed an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the sale of natural gas as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the respective applications which are on file with the Commission and open to public inspection.

Applicants produce and propose to sell natural gas for transportation in interstate commerce for resale as indicated below:

Docket No.	Field	County or Parish	State	Purchaser
G–14693	Blanco (Mesa Verde)	San Juan County	New Mexico	El Paso Natural Gas Co.
G–14778	Erath-Shallow	Vermilion Parish	Louisiana	United Fuel Gas Co.
G–14785	Kismet	Seward County	Kansas	Panhandle Eastern Pipe Line Co.
G–14786	Palo Blanco Area	Brooks County	Texas	Texas Eastern Transmission Corp.
G–14793	Acreage in	Morton County	Kansas	Panhandle Eastern Pipe Line Co.
G–14875	Slick-Wilcox	Goliad and Dewitt Counties.	Texas	United Gas Pipe Line Co.
G–14888	Eumont	Lea County	New Mexico	Permian Basin Pipeline Co.
G–14889	Eunice	do	do	El Paso Natural Gas Co.

These related matters should be heard on a consolidated record and disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on September 25, 1958, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such applications: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before September 12, 1958. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

[1] Application covers a proposed sale of natural gas pursuant to an amendatory agreement dated January 22, 1958, which adds additional acreage to a basic contract dated April 7, 1950, as amended; Applicant received authorization in Docket No. G–7526 covering the sale of gas under said basic contract, to which contract Stanolind Oil and Gas Company (now Pan American Petroleum Corporation) is the only signatory seller party. Production is limited to horizons below base of the Pictured Cliffs Formation down to and including the Point Lookout Formation of the Mesa Verde Group.

[2] Tidewater Oil Company is filing for authorization to sell gas produced from its working interest in the following leases:

Lease name	Acreage	Applicant's working interest
		Percent
Duclas Landry	40.27	100
Mrs. Ella B. Landry, et al	80.08	100
E. P. Sandoz	34.39	5.6175
Jill Landry	6.7	(1)
Mamas Sellers	13.39	10.622
Clemille Tribodeaux	40.29	10.622
Alida H. Broussard	40.28	10.622
Alida H. Broussard, et al	3.0	10.622
N. Robichaux, et al	0.86	10.622

[1] Not stated.

Production from subject leases is proposed to be sold pursuant to an amendatory agreement dated February 20, 1958, which adds additional acreage to a basic gas sales contract dated September 11, 1952, as amended, to which contract Tidewater Associated Oil Company (now Tidewater Oil Company) is the only signatory seller party. Applicant received authorization in Docket No. G–2801 covering the sale of gas under said basic contract. Production is limited to horizons above depth of 8,000 feet below surface.

[3] Gulf Interstate will transport the subject gas for the account of United Fuel commingled with its other gas supplies for redelivery into United Fuel's facilities at points in Kentucky. Gulf Interstate has received authorization in Docket No. G–2058 to construct and operate the facilities necessary to enable it to take gas from the subject area.

[4] United Carbon Company, Inc. (Maryland) is filing for its 21.5 percent working interest in the Rinehart Unit, production from which is proposed to be sold pursuant to an amendatory agreement (undated division order) filed January 23, 1958, which adds additional acreage to a basic gas sales contract dated November 19, 1953, as amended. Applicant received authorization in Docket No. G–4316 covering the sale of gas under said basic contract.

[5] Unit Gas Company, Inc., is filing for authorization to sell natural gas purchased from N. B. Hunt to Texas Eastern pursuant to an amendatory agreement dated January 22, 1958, which adds additional acreage to a basic gas sales contract dated October 16, 1956, to which contract Applicant has attained signatory status by assignment. Applicant received authorization in Docket No. G–12555 covering the sale of gas under said basic contract. N. B. Hunt filed in pending Docket No. G–14295 for authorization to sell subject gas to Applicant.

[6] Application covers proposed sale of natural gas pursuant to an amendatory agreement dated February 1, 1958, which adds additional acreage to a basic contract dated January 7, 1957. Applicant received authorization in Docket No. G–11922 covering the sale of gas under said basic contract.

[7] Continental Oil Company, nonoperator, is filing for its 50 percent working interest in the W. H. Riedel "C" Lease, production from which is proposed to be sold pursuant to an amendatory agreement dated September 21, 1957, which adds said lease to a basic gas sales contract dated July 12, 1949, as amended. Applicant received authorization in Docket No. G–6349 covering the sale of gas under said basic contract.

[8] Sinclair Oil & Gas Company, nonoperator, is filing for its 25 percent working interest in the F. W. Kutter (NCT) "B" Unit, production from which is proposed to be sold pursuant to an amendatory agreement dated February 1, 1957, which adds additional acreage to a basic gas sales contract dated March 10, 1955, as amended. Applicant received authorization in Docket No. G–6733 covering the sale of gas under said basic contract. Application states that Gulf Oil Corporation, Operator, commenced delivery of Sinclair's share of gas on February 1, 1957 pursuant to an operating agreement; Gulf received authorization in Docket No. G–7160 covering the sale of its share of gas.

[9] Application covers a proposed sale of natural gas pursuant to an amendatory agreement dated December 10, 1957, which adds additional acreage to a basic gas sales contract dated March 31, 1953, as amended. Applicant received authorization in Docket No. G–2894 covering the sale of gas under said basic contract.

[Docket Nos. G–9554, G–11123, G–11906, G–13472, G–13529]

HASSIE HUNT TRUST

ORDER CANCELLING, REJECTING RATE FILINGS, ORDERING REFUND, DENYING MOTION FOR SEVERANCE AND TERMINATING PROCEEDINGS

AUGUST 15, 1958.

These proceedings, involving the increased rates and charges proposed by Hassie Hunt Trust (Hassie Hunt) in various dockets, were consolidated for hearing by order issued April 28, 1958. Pursuant to that order the Commission entered upon a public hearing on June 30, 1958, which was recessed until September 30, 1958.

On June 10, 1958, Louisiana Nevada Transit Company (Louisiana Nevada) filed a motion for severance of Docket No. G–13472 from these consolidated proceedings and for consolidation of that docket with the proceedings in the matter of *Midstates Oil Corporation, et al.*, Docket No. G–4932, et al. The latter consolidated proceedings involve the sales of gas to Louisiana Nevada from Cotton Valley Field, and include, among numerous other dockets, the proceedings in Docket No. G–8618 involving Hassie Hunt Trust's FPC Gas Rate Schedule No. 14. The proceeding in Docket No. G–13472, involves a proposed change in rate contained in the said Rate Schedule No. 14.

One of the issues in the "Cotton Valley" case was whether Hassie Hunt and others similarly situated, are authorized to file rate schedules, being non-operators co-owners who were not signatory parties to the basic sales contract entered into by the Cotton Valley Operators' Committee, as seller. By Opinion No. 314, and accompanying order issued on July 23, 1958, in Docket No. G–4932, et al., it was determined that the Committee should be required to file the said basic gas sales contract. In finding paragraph (8) of said opinion it was also determined that Hassie Hunt, among other non-signatory co-owners of lease interests in that unitized field, "may not file rate schedules or rate changes under the provisions of § 154.91 or any other section of the Commission's regulations under the Natural Gas Act, applicable to the sale of natural gas to Louisiana Nevada referred to in paragraph (1); and the rate schedules and rate changes filed by any and all of the above parties in these proceedings should be cancelled and rejected." (Paragraph (1) refers to the Committee's basic sales contract executed October 24, 1940, as later amended, covering sales to Louisiana Nevada from the Cotton Valley Field.)

In view of the pendency of the said issue in the Cotton Valley matter, the Commission's order issued on October 25, 1957, in Docket No. G–13472, directed that a hearing be held and suspended Supplement No. 4 to Hassie Hunt's FPC Gas Rate Schedule No. 14. Furthermore, the said rate filing was by paragraph (A) of that order "• • • accepted conditionally, pending final determination" of the aforementioned issue involved in the Cotton Valley matter, which includes the said Docket No. G–9086 and Hassie Hunt's Rate Schedule, No. 14 sought to be changed. Since the said proposed increased rate in Docket No. G–13472, which was permitted to take effect subject to refund as of March 27, 1958, by order issued May 23, 1958, is based upon the same basic sales contract to which Hassie Hunt has been determined to be a non-signatory party in Docket No. G–9086, it is, therefore, subject to the same invalidity under our regulations, as aforesaid.

The Commission finds:

(1) The conditional acceptance for filing of Supplement No. 4 to Hassie Hunt's FPC Gas Rate Schedule No. 14 should be vacated and said Supplement No. 4 should be canceled and rejected.

(2) The excess revenues collected in accordance with the said Supplement No. 4 should be refunded.

(3) Louisiana Nevada's aforementioned motion for severance of Docket No. G–13472 should be denied as moot.

(4) The proceeding in Docket No. G–13472 should be terminated.

The Commission orders:

(A) The conditional acceptance for filing of the aforementioned Supplement No. 4 to Hassie Hunt's FPC Gas Rate Schedule No. 14 is hereby vacated and said Supplement No. 4 is hereby canceled and rejected.

(B) Within 70 days of the date of issuance of this order, Hassie Hunt shall refund to Louisiana Nevada Transit Company, with interest at the rate of 6 percent per annum, the sums of money represented by the difference between the rate and charge permitted to become effective by the aforesaid order of May 23, 1958, and collected thereunder, and the rate and charge which was effective prior to March 27, 1958; and Hassie Hunt shall bear the costs of making such refunds.

(C) Within 80 days of the date of issuance of this order Hassie Hunt shall report to the Commission in writing and under oath, the details of the calculations resulting in the refunds ordered in paragraph (B) herein, together with proof of payment thereof under oath.

(D) The motion of Louisiana Nevada for severance is hereby denied.

(E) The proceeding in Docket No. G–13472 is hereby terminated.

By the Commission (Commissioner Hussey not participating).

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

[F. R. Doc. 58–6728; Filed, Aug. 20, 1958; 8:50 a. m.]

[Docket Nos. G–9554, G–11123, G–11906, G–13472, G–13529]

HASSIE HUNT TRUST

ORDER DENYING MOTION FOR CONSOLIDATION FOR HEARING OF CERTAIN ADDITIONAL PROCEEDINGS

AUGUST 15, 1958.

These proceedings, involving the increased rates and charges proposed by Hassie Hunt Trust (Hassie Hunt) in various dockets, were consolidated for hearing by order issued herein on April 28, 1958. Pursuant to that order the Commission entered upon a public hearing on June 30, 1958, which on July 1, 1958, was recessed until September 30, 1958.

On July 1, 1958, during the course of the hearing, Hassie Hunt's counsel orally moved that the Commission consolidate with these proceedings certain other proceedings in Dockets Nos. G–4421 and G–14303. The subject of the former docket is the application filed for a certificate of public convenience and necessity filed by Hassie Hunt, seeking authority to sell natural gas produced from Maxie Field, Acadia Parish, Louisiana, to Texas Gas Transmission Corporation (Texas Gas) (formerly Louisiana Natural Gas Corporation) under the provisions of a contract, dated December 17, 1950, designated as Hassie Hunt's FPC Gas Rate Schedule No. 8. Hassie Hunt's proposed changes to that rate schedule are the subject of one of these consolidated proceedings, in Docket No. G–11906.

The subject of the latter certificate docket, No. G–14303, is a certificate application covering the sale of gas produced from the same field, including some additional acreage, to the same buyer, Texas Gas, under the provisions of a contract, dated October 31, 1957. The 1957 contract was negotiated by the parties after a dispute arose over certain "favored-nation" provisions contained in the aforementioned 1950 contract, and contains a higher schedule of prices but contains no "favored-nation" or redetermination provisions.

By order issued in Docket No. G–11906 on February 27, 1958, the Commission permitted Hassie Hunt to substitute the 1957 contract, designated as its FPC Gas Rate Schedule No. 20 and Supplement No. 1 thereto, for Supplement No. 5 to the aforementioned FPC Gas Rate Schedule No. 8, effective as of January 21, 1958, subject to refund, as provided in prior orders issued in that docket. In permitting the 1957 contract and supplement to be substituted, as aforesaid, the Commission found that the superseding filings did not constitute filings for a new service, as claimed by Hassie Hunt, but were changes in rates subject to section 4 (e) of the Natural Gas Act. They were, therefore, treated as subject to hearing and refund of excess charges.

The certificate application, in Docket No. G–14303, accompanying the 1957 contract filings nevertheless, was not rejected, as in other analogous supersessions,[1] because there appear to be changes in the acreages dedicated to the new contract for which authorization is sought, requiring hearing in accordance with section 7 (e) of the act. The subject of such certificate hearings and the issues involved therein, other than the question of whether the 1957 contract constitutes an initial service, provide no basis for consolidation with these proceedings. As for the question of initial service, there is no apparent reason why the facts cannot be adduced in these proceedings without the requested consolidation of the certificate dockets with these proceedings. In subsequent certificate hearings, if the question remains undetermined, the presiding examiner may find it appropriate to permit an incorporation by reference of the evidence on the issue presented in these proceedings. On the other hand, if the question of initial service is determined herein, there will be no need for such procedure. In order to provide Hassie Hunt with ample opportunity to make such presentation herein, and to avoid any element of entrapment, we will permit it to reopen and resume its direct case upon resumption of hearings herein, for the sole and limited purpose of making a competent showing of any facts relevant to the initial service issue, as aforementioned.

The Commission finds: The aforementioned motion, made orally by Hassie Hunt on July 1, 1958, requesting the consolidation with these proceedings of the proceedings in Dockets Nos. G–4421 and G–14303, has not shown such consolidation to be necessary nor appropriate to the performance of the functions of the Commission pursuant to the provisions of the Natural Gas Act, and should be denied.

The Commission orders:

(1) The aforementioned motion made orally by Hassie Hunt on July 1, 1958, is hereby denied.

(2) Hassie Hunt is hereby permitted to re-open and to resume its direct case upon resumption of hearings herein, for the sole and limited purpose of making a competent showing of any facts relevant to the initial service issue.

[1] S. W. Richardson, Docket No. G–13272, order denying motion for reconsideration, issued November 27, 1957.

By the Commission (Commissioner Hussey not participating).

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

[F. R. Doc. 58-6729; Filed, Aug. 20, 1958; 8:50 a. m.]

[Docket No. G-15977]

DORCHESTER CORP.

ORDER FOR HEARING AND SUSPENDING PROPOSED CHANGES IN RATES

AUGUST 15, 1958.

Dorchester Corporation (Dorchester) on July 16, 1958, tendered for filing proposed changes in its presently effective rate schedules for sales of natural gas subject to the jurisdiction of the Commission. The proposed changes, which constitute increased rates and charges, are contained in the following designated filings:

Description: Notices of Change, dated July 15, 1958.

Purchaser: Panhandle Eastern Pipe Line Company.

Rate schedule designation: Supplement No. 2 to Dorchester's FPC Gas Rate Schedule No. 3. Supplement No. 2 to Dorchester's FPC Gas Rate Schedule No. 4.

Effective date: August 16, 1958 (effective date is the first day after expiration of the required thirty days' notice).

In support of the proposed redetermined rate increases, Dorchester makes reference to Panhandle Eastern Pipe Line Company's (Panhandle) rate redetermination letter of June 20, 1956, submits copies thereof, and states that Panhandle has questioned the validity of the 11.0 cent per Mcf rate established by Order of the Kansas Corporation Commission. Dorchester states further that it is evident that the proposed rates are not dependent upon the Kansas order but are contractually due pursuant to the basic contracts and Panhandle's letter.

By letter dated July 29, 1958, Panhandle states that it is in receipt of copies of Dorchester's subject increases and that it is apparent that the basis for such filings is Panhandle's letter dated June 20, 1956. Panhandle refers to the invalidation of the Kansas Minimum Price Order and states that conditions have changed considerably since the date of its rate redetermination letter of June 20, 1956. Panhandle requests that in view of such changed conditions the Commission not accept Dorchester's filings and reject same as not being in accordance with the contracts.

The increased rates and charges so proposed have not been shown to be justified, and may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the said proposed changes, and that Supplements No. 2 to Dorchester's FPC Gas Rate Schedules Nos. 3 and 4, respectively, be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders: (A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rates and charges contained in Supplements No. 2 to Dorchester's FPC Gas Rate Schedules Nos. 3 and 4, respectively.

(B) Pending such hearing and decision thereon, said supplements be and they are each hereby suspended and the use thereof deferred until August 17, 1958, and until such further time as they are made effective in the manner prescribed by the Natural Gas Act.

(C) Neither the supplements hereby suspended, nor the rate schedule sought to be altered thereby, shall be changed until this proceeding has been disposed of or until the periods of suspension have expired, unless otherwise ordered by the Commission.

(D) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.37 (f)).

By the Commission.

[SEAL] MICHAEL J. FARRELL,
Acting Secretary.

TARIFF COMMISSION

BICYCLES

REPORTS TO THE PRESIDENT

AUGUST 18, 1958.

The United States Tariff Commission today submitted to the President its second periodic report on the developments in the trade in bicycles since the "escape clause" action of August 19, 1955, modifying the concession granted in the General Agreement on Tariffs and Trade on such bicycles classifiable under paragraph 371 of the Tariff Act of 1930. This report was made pursuant to paragraph 1 of Executive Order 10401 of October 14, 1952 (3 CFR, 1952 Supp., p. 105), which order prescribes procedures for the periodic review of escape-clause actions. Such review is limited to the determination of whether a concession that has been modified or withdrawn can be restored in whole or in part without causing or threatening serious injury to the domestic industry concerned.

In submitting its second report to the President under Executive Order 10401 with respect to bicycles, the Commission advised the President that the conditions of competition between imported and domestic bicycles had not so changed as to warrant the institution of a formal investigation under the provisions of paragraph 2 of Executive Order 10401. This means that, in the Commission's view, the developments in the trade in bicycles do not warrant a formal inquiry into the question of whether a reduction in the duty on such bicycles could be made without resulting in serious injury to the domestic industry.

Copies of the Commission's report are available upon request as long as the limited supply lasts. Requests should be addressed to the U. S. Tariff Commission, Eighth and E Streets NW., Washington 25, D. C.

[SEAL] DONN N. BENT,
Secretary.

INTERSTATE COMMERCE COMMISSION

FOURTH SECTION APPLICATIONS FOR RELIEF

AUGUST 18, 1958.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 34891: *Fine coal to North Carolina and Virginia.* Filed by The Southern Railway Company (No. 136-A), for interested rail carriers. Rates on fine coal, carloads, as described in the application from Mines in east Tennessee, southeast Kentucky, and southwest Virginia to points in southern Virginia and Atlantic & Danville Railway stations in North Carolina.

Grounds for relief: Competition with natural gas and other fuels.

Tariff: Supplement 51 to Southern Railway Tariff I. C. C. A-11352.

FSA No. 34892: *Magnesium from Velasco, Tex., to official territory.* Filed by Southwestern Freight Bureau, Agent (No. B-7353), for interested rail carriers. Rates on magnesium metal or magnesium metal alloy, carloads from Velasco, Tex., to points in official and Illinois Freight Association territories.

Grounds for relief: Short line distance formula and market competition.

Tariff: Southwestern Lines tariff I. C. C. 4303.

FSA No. 34893: *Crude rubber from Louisiana and Texas.* Filed by Southwestern Freight Bureau, Agent (No. B-7356), for interested rail carriers. Rates on rubber, crude, artificial, synthetic or neoprene, carloads from points in Louisiana and Texas to points in western trunk line, Illinois, official and southern territories.

Grounds for relief: Short line distance formula and market competition.

Tariffs: Supplement 502 to Southwestern Lines tariff I. C. C. 4139. Supplement 327 to Southwestern Lines tariff I. C. C. 4087.

FSA No. 34894: *Coke from Ernest, Pa., to Millville, W. Va.* Filed by the Baltimore and Ohio Railroad Company (No. 116). Rates on coke, carloads from Ernest, Pa., to Millville, W. Va.

Grounds for relief: Grouping.

Tariff: Supplement 27 to Baltimore and Ohio Railroad tariff I. C. C. 3037.

By the Commission.

[SEAL] HAROLD D. McCOY,
Secretary.

PART II

FEDERAL REGISTER

THE NATIONAL ARCHIVES — LITTERA SCRIPTA MANET — 1934 — OF THE UNITED STATES

VOLUME 23 NUMBER 164

Washington, Thursday, August 21, 1958

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 990]

[Docket No. AO-302]

HANDLING OF MILK IN SOUTHEASTERN NEW ENGLAND MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to a proposed marketing agreement and order regulating the handling of milk in the Southeastern New England marketing area. Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., not later than the close of business the 15th day after publication of this decision in the FEDERAL REGISTER. The exceptions should be filed in quadruplicate.

Preliminary statement. The hearing on the record of which the proposed marketing agreement and order, as hereinafter set forth, were formulated, was conducted at Providence, Rhode Island, on February 11 through March 14, 1958, pursuant to notice thereof which was issued on January 22, 1958 (23 F. R. 499).

The material issues of record relate to:

1. Whether the handling of milk produced for sale in the proposed marketing area is in the current of interstate commerce, or directly burdens, obstructs, or affects interstate commerce in milk or its products;

2. Whether marketing conditions show the need for the issuance of a milk marketing agreement or order which will tend to effectuate the policy of the Act; and

3. If an order is issued, what its provisions should be with respect to:

(a) The scope of regulation;

(b) The classification and allocation of milk;

(c) The determination and level of class prices;

(d) Distribution of proceeds to producers; and

(e) Administrative provisions.

While the initial proposal which resulted in the call of this hearing would have resulted in a considerable extension of the Fall River order and revision of its terms and provisions, it is apparent for reasons later set forth that a much broader area of regulation, as set forth in supplemental proposals is necessary and it is concluded that consideration should be directed to an entirley new regulation rather than revision of the present order.

Findings and conclusions—1. *Character of commerce.* The handling of milk in the Southeastern New England marketing area is in the current of interstate commerce and directly burdens, obstructs, or affects the handling of milk and its products.

The Southeastern New England market is an interstate market encompassing all of the State of Rhode Island and a substantial area in Southeastern Massachusetts. Within this market there is a substantial and continuing interstate commerce, both in the procurement of milk and in the sale of fluid milk and its products.

Milk produced on dairy farms in the States of Connecticut and Massachusetts moves daily in interstate commerce to processing and bottling plants within the State of Rhode Island where it is commingled with milk received from local Rhode Island dairy farmers and from dairy farmers and/or plants located in the States of New York, New Hampshire, Maine and Vermont. Such milk is distributed daily on wholesale and retail routes in Rhode Island and Massachusetts in competition with milk from Boston pool plants which milk is produced in the States of New York, New Hampshire, Vermont, Maine and Massachusetts and in competition with milk from Fall River and New Bedford, Massachusetts, which originates from dairy farms in Rhode Island, Massachusetts, New York and Vermont.

During the marketing year ending June 30, 1957, Rhode Island dealers received only 31.4 percent of their total milk requirements from producers within the State; 14.2 percent was supplied by producers in the State of Massachusetts and 29.2 percent by producers in the State of Connecticut. The remaining 25.2 percent was supplied by dairy farmers and/or plants in other New England States and the State of New York.

Of the 202 Rhode Island licensed dealers, 66 distribute in both Rhode Island and Massachusetts. Approximately one-fourth of the total reported Class I sales of Rhode Island licensed dealers during the 1957 marketing year moved from Rhode Island across State lines for distribution in other States.

One substantial dealer who would be a regulated handler under the proposed order has processing and distributing plants which are located in Providence, Rhode Island, East Bridgewater and Fall River, Masssachusetts. This same dealer has a large number of upcountry receiving plants in the States of New York, Vermont, New Hampshire and Maine and a number of distributing plants dispersed throughout the New England area. Distribution from the three local plants is interchangeable on routes covering the entire area herein under consideration. These plants are supplied by local dairy farmers in Rhode Island, Connecticut and Massachusetts and by various receiving and/or distributing plants, many of which are regulated under the other New England Federal orders.

Another handler with distribution operations extending over a major part of the proposed area in Rhode Island and Massachusetts, also has a substantial business in the several federally regulated markets in Massachusetts as well as in other unregulated markets in New England. Milk processed in his Providence plant is received interchangeably from local dairy farmers, dairy farmers in upcountry areas and from his Boston plant regulated under Order No. 4.

Official statistics of the Fall River market administrator show that during representative months of 1957 approximately 40 percent of the total receipts

of regulated handlers originated within the State of Massachusetts, 30 percent within the State of Rhode Island and 30 percent within the States of Vermont, New Hampshire, and New York. Of the 25 handlers subject to the Fall River order in December 1957, 16 were licensed Rhode Island dealers, 8 of whom distributed in the Newport, Rhode Island area and in the local Massachusetts cities and towns. At least two of the larger Fall River handlers receive only limited quantities of local milk and secure the greater portion of their supply from Vermont.

In at least two instances Fall River handlers serve the Fall River market and the New Bedford market from their Fall River plants. Approximately one-third of the total Class I disposition in the New Bedford area is by Fall River handlers. A number of local New Bedford handlers supplement their local milk supply with out-of-State milk, and these New Bedford handlers distribute milk not only locally, but also in Rhode Island and in Plymouth and Barnstable Counties, Massachusetts.

The Cape Cod area (Barnstable County) and parts of Plymouth and Bristol Counties in Massachusetts are served by Boston and Fall River handlers and by local, New Bedford and Rhode Island dealers. A large part of the milk disposed of in this area originates in the States of New York, Vermont and New Hampshire.

More than one-third of the fluid requirements for the Southeastern New England area originates from sources outside the States of Massachusetts, Connecticut and Rhode Island. Much of the upcountry milk is assembled and received at country plants in Vermont and New Hampshire and is then transported to the Southeastern market for processing and distribution. Additional quantities are handled by bulk farm tank pick-up and moved directly from farms in northern New England to plants in the local market.

Milk in excess of fluid needs is separated into the cream and skim components and manufactured into products which compete directly with manufactured products on the national market. Since the market is an open cream market, cream from distant States moves into and out of the area freely in competition with cream from local sources.

From the foregoing it is concluded that all of the milk in the Southeastern New England market does move in the current of interstate commerce or directly burdens, obstructs, or affects interstate commerce in milk and its products.

2. *Need for an order.* Market conditions in the State of Rhode Island and the Southeastern Massachusetts Counties of Bristol, Plymouth and Barnstable justify the issuance of a marketing agreement and order.

In earlier years, the area herein under consideration was comprised of a number of relatively independent and segregated local milk markets. The handling of milk in the City of Fall River and the adjacent towns of Somerset, Massachusetts and Tiverton, Rhode Island has been regulated under Federal Order No. 47 since May 1, 1936.

The particular relationship which existed between the Fall River and New Bedford markets at the time of the original promulgation of this order required a provision which permitted handlers serving both markets from the same plant to carry their New Bedford supply outside of the scope of regulation. For many years the order operated successfully and effectively in maintaining orderly marketing. However, in recent years fundamental changes in methods of handling and distributing milk, together with substantial population growth and increased milk supplies have resulted in a substantial extension of the distribution area to the point that the present marketing area represents only a small segment of the actual market of regulated handlers. The provisions originally intended to accommodate a specialized situation between Fall River and New Bedford have impeded to a degree the regulation under the Fall River order.

The New Bedford market, which in earlier years operated as a highly preferential and self contained market under State regulation was disrupted in early 1957 when a Rhode Island handler opened several stores in the New Bedford market specializing in gallon jug operations at lower than prevailing prices. Following the introduction of the gallon jug operation the two Fall River-New Bedford handlers, who for many years had operated single plants with separate producer lists designated for the two markets, elected to subject their entire operations to regulation under the Fall River order to circumvent the higher pricing under the State regulation in New Bedford. All other New Bedford handlers immediately subjected themselves to regulation under the Fall River order. This situation prevailed through the month of June after which the price under the State order was aligned with the Fall River price.

The situation in both Fall River and New Bedford has continued to deteriorate as handlers, seeking to avail themselves of milk supplies at the most advantageous price, have tended to look to upcountry unregulated supplies which are generally available at a price comparable with the Boston blended price, which on a year-round basis reflects approximately 55 percent utilization in Class I. As a result local producers have had difficulties in maintaining regular outlets for their production. This condition is most serious in the Fall River market where the several associations of producers whose members are the predominant suppliers of the market have a substantial volume of milk which is not accepted by handlers. Much of this milk is sold at manufacturing milk prices even though the local milk supply is inadequate to meet market demands.

Producers who are members of New Bedford Milk Producers Association, the principal supplier of local handlers in the New Bedford area, are in the same situation as that of regular Fall River producers. The same pressures which have led to a loss of market for many local Fall River producers are applicable to the New Bedford area. Pending consideration of Federal regulation has no doubt forestalled substantial supply changes by local handlers than [illegible]. However, it is likely that if no action is taken handlers will seek lower priced unregulated milk supplies.

The situation in the Rhode Island part of the market is substantially similar to that in the Fall River-New Bedford area. Early in 1951 the association representing a large segment of the registered Rhode Island producers requested a hearing to consider a Federal order for that market because of the then existing market disorder. On the basis of the facts presented at that hearing it was recommended that an order be issued. However, following that decision the association negotiated a settlement with local handlers which minimized the effect of the disorder and accordingly the association asked that the order not be issued.

The increase in available milk supplies generally and the fact that milk is readily available from upcountry sources at prices approximating the Boston blend has provided a strong incentive for handlers to drop local producers in favor of cheaper sources of supply.

Less than one-third of the fluid requirements of Rhode Island dealers are supplied by Rhode Island dairy farmers. An additional forty-five percent is supplied by dairy farmers located in nearby Massachusetts and Connecticut and the remainder is secured from other sources, primarily from the States of Vermont and New York. Several of the larger handlers in the market customarily have secured a lesser proportion of their necessary supplies from local producers than have other handlers. The buying advantage that these handlers have had on their purchases of outside milk has prompted other handlers to drop local producers in favor of sources of supply at upcountry points also.

While the record does not reveal the specific prices at which all of such milk has been purchased it does show that one of the larger handlers in the market secured milk in the month of December 1957 from his unregulated plants at Boston and Whiting, Vermont at a cost of $5.384 which compares with the local city plant Class I price at Providence of $7.00. Even when handling and transportation are considered it is evident that the buying advantage in using unregulated milk deters the use of local milk.

Relatively large quantities of local producer milk were dropped during the latter months of 1957 and early 1958; in some cases entire pickup routes were dropped at one time. The burden of handling the homeless milk in the market has rested with the local producer cooperatives whose members are involved.

The Rhode Island Milk Control Board in the latter part of 1957 initiated an allocation program which was intended to assure a market for local producers and to equalize the percentage utilization of local and outside milk as among handlers. Because of the interstate character of the market handler participation was necessarily voluntary and, while the program has resulted in some redistribution of producers among participating handlers, it has not been effective in restoring market stability. Unregulated, lower-priced milk continues to move into the market in even greater quantities than before the allocation scheme was initiated.

Registered Rhode Island producers have enjoyed a preferential market over an extended period of years. The allocation program and the procedure employed by the responsible officials of the State in issuing permits for importation of nonregistered milk have tended to maintain such preferential market to the detriment of other dairy farmers whose production is an essential part of the market supply.

Proponents presented an analysis of the annual statistics of the Rhode Island Milk Control Board which purported to show that returns to registered producers reflected all the Class II utilization for the market. While the form of the annual statistics does not permit the precise analysis made by proponents, such statistics support this general position. Local producers, however, do not carry an unreasonable volume of the necessary market surplus. The overall Class II utilization for the market is only 5.8 percent of total market utilization and less than 10 percent of receipts from registered producers which, from experience in other federally regulated fluid markets, is substantially less than the necessary reserve which a market such as Rhode Island must carry to assure a continuing adequate supply to meet daily and seasonal fluctuations in supply and demand. Hence, the market relies primarily on upcountry unregulated supplies and surrounding Federal order markets to provide the necessary reserves. Since, as previously stated, nonregistered milk is purchased at prices closely related to the Boston blended price, which reflects an average Class I utilization of about 55 percent, the crediting of registered producers with the total Class II utilization tends to enhance the overall buying advantage of importing handlers.

A market structure which grants a preferential price to registered Rhode Island producers cannot provide a stable market for such producers over any extended period while handlers have the opportunity to gain a procurement advantage through the use of lower priced milk from upcountry sources. The State, as a practical matter, cannot effectively regulate milk which moves across State lines, and while local dealers may voluntarily reduce imports of outside milk temporarily to gain support from local producers, it is inevitable that the incentives for using unregulated milk will result in a loss of market for local producers.

The Southeastern New England market is a deficit market and must rely on sources of supply in northern New England and New York to supplement the local supply. Recent developments in bulk tank cooling and transportation facilities have contributed to efficiencies which permit greater flexibility of handler operations at greater distances from the consumption center in Southeastern New England. Handlers serving this market, because of the high demand for fluid milk locally and the existing opportunity to procure fluid milk at prices related to the Boston blend price in the country for fluid use in the marketing area, have a material competitive advantage over those handlers buying on a classified use plan in this and other Federal order markets in the region due to the difference in their product cost and the Class I price. Premiums over the blend price which may be offered by local handlers making "upcountry" purchases have a detrimental effect upon adjacent markets by inducing producers to leave cooperative associations and markets with which they have maintained association for a number of years to deliver to handlers for this market. This situation has resulted in uneconomic short-time shifts in producers between markets and has had an adverse effect upon not only the Southeastern New England market but also the adjacent markets in New England.

The marketing situation as it now exists constitutes a serious and continuing threat to the stable and orderly marketing of milk and to the maintenance of an adequate supply of pure and wholesome milk for the Southeastern New England marketing area.

The issuance of a marketing agreement and order for the Southeastern New England marketing area will contribute to greater stability of the fluid milk market and will tend to effectuate the declared policy of the act. The adoption of a classified pricing plan based on audited utilization of handlers will provide a uniform system of pricing throughout the area and assure a fair and equitable return to all producers.

Public hearing procedure as required by the Agricultural Marketing Agreement Act will assure full opportunity for representation of all interested parties in presenting evidence relating to marketing conditions and allow participation in the determination of prices for milk in the Southeastern New England marketing area.

3. *Order provisions*—(a) *Scope of regulation.* The purpose of Federal regulation is to assure an adequate supply of pure and wholesome milk for the fluid market by promoting and maintaining orderly marketing of milk. This purpose is achieved through regulation of those handlers who engage primarily in the handling of milk for sale as fluid milk in the local market. Such regulation requires handlers to account for their milk receipts on a classified use basis, establishes minimum class prices which handlers must pay for such milk and provides a mechanism for the equitable distribution of those proceeds among all producers. The scope of such regulation may be specified by providing appropriate definitions of various terms including "marketing area", "pool plant", "dairy farmer for other markets", "producer", "handler", "producer-handler", "buyer-handler", "other source milk" and "exempt milk".

Marketing area. The marketing area as herein proposed includes all of the State of Rhode Island, (excepting Block Island) and all of the Massachusetts Counties of Bristol, Barnstable and Plymouth (excepting the towns of Hingham and Hull) together with all piers, docks and wharves connected therewith and including all territory within such boundaries which is occupied by Government (municipal, State or Federal) installations, institutions or other establishments.

The area as herein proposed is slightly in excess of 2500 square miles in size and according to the 1950 census has a total population of nearly 1,400,000 persons of which nearly 800,000 are in the State of Rhode Island and 600,000 in Massachusetts. Population estimates introduced in the record of the hearing indicate an overall population growth in this area from 1950 until 1956 of approximately 7 percent. These figures do not include the summer tourist population in the Cape Cod and other shore areas in the marketing area which during the peak months of July and August is substantial.

The proposed marketing area includes four standard metropolitan areas as recognized by the Bureau of Census. Three of these areas, Providence, Fall River and New Bedford, constitute one contiguous area of relatively high density of population in which there is a very substantial overlapping of handlers' routes. The fourth area, the city of Brockton lies some 30 miles to the northeast in Bristol County.

The entire area as herein proposed is generally served by handlers who would be fully regulated under the terms and provisions of the proposed order. The largest handler involved operates in virtually every town in the area. While his distribution in Rhode Island is primarily from his Providence plant and his distribution in Fall River and New Bedford primarily from his Fall River plant, the remainder of the area is served interchangeably from his Providence, Fall River and East Bridgewater plants. Another substantial handler serves much of the area, including Barnstable County, from his Providence plant. Other handlers serve substantially the entire area on direct distribution routes, through stores, or as suppliers of other handlers.

The State of Rhode Island is an area of high population concentration generally served by handlers located in and around the City of Providence and by local handlers. While the western tier of towns in Providence, Kent and Washington Counties are more rural in character than the remainder of the State, this area, nevertheless, is extensively served either directly, or through subdealers, by handlers who would be fully regulated by virtue of their business in the Providence area. The town of Westerly, in Washington County is a specific exception in that it has a relatively high population concentration more typical of the eastern part of the State.

One handler whose business in the marketing area is largely confined to Westerly proposed that this town be excluded from the area, on the grounds that it is more closely associated with the State of Connecticut and should be included under any order promulgated for the State of Connecticut rather than under this proposed order. The record fails to provide a basis for appraising the relative proportions of the total busi-

ness done in Westerly by that handler and by other handlers who would be regulated by virtue of their business in other parts of the proposed area. Unless Westerly is included, handlers now serving this town, who would be fully regulated under the order, might well find themselves at a substantial disadvantage in competing with unregulated handlers operating in Westerly.

The handler in question contended that the volume of his business in Westerly was insufficient to bring him under regulation. Under such circumstances, he would be accorded the same treatment as other handlers operating under similar circumstances. If an order should be promulgated for Connecticut and this handler became a fully regulated handler under that order, the terms and provisions of this order are such that he would not be adversely affected by the inclusion of Westerly in this marketing area.

Much of Newport County, Rhode Island is presently served by both Rhode Island handlers and Massachusetts handlers primarily from the Fall River market. The town of Tiverton, Rhode Island, is now a part of the Fall River marketing area under Order No. 47 which area is included in this proposed marketing area.

Included in the Rhode Island portion of the marketing area are the Naval base in Newport County, the Naval Air Station at Quonset Point and the Seabee Station at Davisville, the latter two being in Kent County. Milk is supplied to these installations on a contract bid basis and in recent years the bid prices of successful bidders have been closely related to surplus milk values. The disposition of milk delivered under these contracts has tended to be a serious disruptive factor to orderly marketing in the surrounding area.

The Fall River-New Bedford area represents an extensive contiguous area in which there is general overlapping of route sales by handlers in the two markets. Two of the larger handlers serve both of these markets from their Fall River plants and until early 1957 they maintained separate producer lists under the Fall River order. At that time the New Bedford market was seriously disrupted and for a short time, in an effort to preserve their market, New Bedford handlers placed themselves under regulation by the Fall River order. Subsequently additional Fall River handlers entered the New Bedford market. Now the maintenance of separate producer lists is not observed and the two markets are indistinguishable.

The area of Bristol County, Massachusetts, to the north of Fall River is served by Rhode Island, Fall River, New Bedford, Brockton (Plymouth County) and local dealers. This portion of the proposed marketing area represents the greatest area of overlapping sales by all handlers who would be regulated under the proposed order.

Many of the handlers who serve this area and/or the Fall River-New Bedford area also have substantial sales in Plymouth and Barnstable Counties. Already mentioned are the two handlers who serve virtually throughout the proposed area. In addition one handler located in Seekonk (Bristol County) operates three retail stores in Brockton (Plymouth County), one in Wareham (Plymouth County) and one in Hyannis (Barnstable County). Another handler with a plant at Woonsocket, Rhode Island, operates a number of dairy stores in Fall River, New Bedford, Seekonk, Attleboro, Somerset, and Brockton and still another Fall River handler has wide distribution, either directly on routes or through plant stores or as a supplier of other handlers, over much of the proposed marketing area. At least two New Bedford handlers have extensive distribution into the southern portion of Plymouth County and in Barnstable County.

Much of the Plymouth-Barnstable County area and particularly Barnstable County is a resort area and is served not only by Rhode Island and Fall River-New Bedford handlers but also by local handlers and by Boston handlers regulated under Order No. 4. It is not possible on the basis of the record to ascertain whether, in fact, Rhode Island and Bristol County handlers or Boston handlers are the primary distributors in this area. However, unless this area is included as a part of the marketing area both handlers who would be regulated by virtue of their business in other parts of the area and regulated Boston handlers would be seriously disadvantaged by competition from unregulated milk in this area. Moreover, regular producers, who represent the most economical source of supply for the area, would lose their market in favor of unregulated supplies. The inclusion of the area in the marketing area was supported by the Boston handlers now distributing there.

Otis Air Force Base located in Barnstable County, represents a substantial outlet for fluid milk which is served on a bid contract basis. While handlers who would be regulated under the proposed order have generally held the contract for this installation the disposition of milk delivered under this contract has been a serious disruptive factor to orderly marketing in the surrounding area substantially in the same manner as the Naval base and other installations in the Rhode Island area.

The towns of Hingham and Hull in Plymouth County are specifically excluded from the proposed area. These two towns are adjacent to the Boston marketing area and are virtually exclusively served by Boston handlers and by local handlers who would be regulated by virtue of their business elsewhere. Their location is such that it is extremely unlikely that unregulated milk would become a serious competitive factor. However, if regulation later appears desirable these towns probably should more logically be considered for addition to the Boston marketing area.

The marketing area as herein proposed is one in which the health requirements as they apply to the production, processing and handling of milk for fluid consumption are generally similar and milk freely moves in distribution channels from all parts of the area. While there are technical differences in the application of health regulation, particularly as they apply to the State of Rhode Island, such regulation applies only to local dairy farmers who qualify as Rhode Island registered producers. Rhode Island dealers with insufficient milk from such producers freely import milk from surrounding areas to meet their total requirements and such milk is commingled with receipts from registered producers and disposed of both within and outside the State.

It is intended that the sales of fluid milk from piers, docks and wharves and to crafts moored thereat be included as sales in the marketing area. It is also intended that the area include all of the territory occupied by Government reservations, institutions or other such establishments whether municipal, State or Federal, if they lie within the limits of the area as defined. The quality requirements for milk for such outlets are similar to those for milk sold in other parts of the marketing area. These installations, by location, represent logical areas of distribution for handlers who would become regulated under the proposed order or for regulated handlers under adjacent Federal orders. Unless they are included, regulated handlers will be placed at a serious disadvantage in competing with unregulated handlers for such sales. The inclusion of these areas will assure as between handlers uniform minimum cost of milk received from producers.

The marketing area as herein defined comprises a contiguous, and for the most part a heavily populated territory served by the same handlers. Such area is in reality a single milk market which constitutes a practical unit for the proposed regulation.

A representative from an association of producers operating in Dukes County appeared at the hearing and suggested that this county be included in the marketing area, primarily because of his concern over the effect of regulation on the disposition of surplus milk in the county. The hearing notice was not sufficiently broad to permit consideration of the inclusion of this county. However, the association has no direct fluid disposition outside the county and in the past it has been able to realize no more than the surplus price for milk in excess of its fluid requirements. The application of the order provisions would not appear to alter this situation. If after experience with the operation of the order it becomes desirable to consider the addition of Dukes County to the marketing area this could be done through an amendment hearing.

One handler whose plant is located in Franklin, Massachusetts, (Norfolk County), and who has substantial distribution in Norfolk County, outside the limits of the Boston marketing area, but who would become a fully regulated handler under this order, argued that he would be forced to compete with unregulated handlers in his Norfolk County disposition. Handlers presently regulated under the Boston order have a substantial business in Norfolk County and most of the remaining competition presently comes from small local dealers who under the existing local market structure would likely have no cost advantage in the procurement of their milk. The inclusion of any part of Norfolk County was not noticed in the call of the hearing. If later developments indicate the need of Federal regulation in this area consideration of this can be given in an amendment hearing on this order or on the Boston order.

Milk to be priced. The plants from which milk is distributed into the Southeastern New England marketing area dispose of the major portion of their milk receipts in the form of fluid milk products for fluid consumption. Milk intended for fluid consumption in the area is required to be produced in compliance with inspection requirements of the duly constituted health authorities having jurisdiction in the area. The minimum class prices of the order should apply to that milk which is received regularly from dairy farmers at plants at which milk is pasteurized and packaged for fluid distribution on retail or wholesale routes (including routes of vendors) or through plant stores in the marketing area, or which is received at plants which are regular and substantial suppliers of milk to such pasteurizing, packaging or distributing plants.

Under the terms of the order as herein proposed, milk may be disposed of for fluid consumption in the marketing area from plants not meeting the criteria of regular and normal supply sources for the market. It is necessary therefore to establish definitive standards of performance for use in determining which plants and what milk constitute the regular and normal sources of supply and thereby become fully subject to regulation. Such standards appear in the order and apply uniformly to all plants wherever located. Any plant regardless of location may be brought under regulation by the order or it may remain outside the scope of regulation dependent on the mode of operation elected by the operator of each plant. The determination and decision as to how a plant shall be operated remains vested in the plant operator.

As indicated elsewhere in this decision, marketwide pooling of producer returns is considered essential to the orderly functioning of this market. Since a marketwide pool results in payments to producers which reflect the average utilization for the market, individual handlers whose proportion of Class I utilization is less than the average for the market receive payments from the producer-settlement fund while handlers who have higher than average utilization in Class I make payments into the fund. The rate of payment to producers will be uniform among all handlers.

Under certain circumstances, operators of plants engaged primarily in manufacture or in supplying other fluid markets on a spot basis have an incentive to come under regulation for the purpose of receiving equalization payments from the producer-settlement fund in order that prices paid to their farmers will be comparable with the prices received by regular producers. Such plant operators normally would elect to join the pool when they would draw equalization payments from the fund and would withdraw from the pool when their plant utilization was above the market average and they were required to make payment to the fund. The distribution of equalization payments to such a plant would reduce the blended price with subsequent adverse effect upon the regular milk supply of the market. The maintenance of an adequate supply of pure and wholesome milk for the market necessitates formation of specific rules on pooling qualification and the distribution of returns under the order to prevent circumvention of the purpose of the order.

The extra value or differential by which the Class I price exceeds the price of milk for manufacturing uses is intended to provide the necessary incentive to producers to attain an adequate supply of pure and wholesome milk for the market. Milk in excess of Class I needs cannot be expected to return more than a manufacturing milk value since this is the only outlet remaining after fluid needs are satisfied.

Performance standards should be drawn under a marketwide pool so that the Class I sales of the Southeastern New England market will be shared among those producers who are an essential and regular part of the supply for the area. To confine regulation, the performance standards should be sufficiently flexible to permit intermittent shipments of milk by plants whose primary business may be in other markets without requiring full regulation of such plants. Under the provisions of this order supplies which are a regular and essential part of the Southeastern New England market as well as intermittent supplies will be accommodated.

The several plant definitions included in the order provide the basis for determining those plants which will be accorded pooling status and the dairy farmers regularly delivering thereto will be entitled to receive the minimum blended price as determined in the distribution of proceeds resulting from the pool.

A "receiving plant" is defined as a plant at which milk is received directly from dairy farmers as distinguished from other kinds of specialized plants which do not receive milk directly from the farm and would not be participating in the pool. It is intended that the operator of the receiving plant shall be the responsible handler for accounting purposes and for making payments to dairy farmers. In order that the market administrator may have ready access to the necessary records and assurance that the milk of individual dairy farmers is positively identified and properly accounted for, a condition of qualification for receiving plant status is that such plant shall contain facilities for receiving, and handling the milk, washing and sterilizing cans, tanks, and equipment. The plant shall also have facilities for determining the weight and butterfat test of milk received and shall maintain the necessary records of the individual farmer's deliveries.

Only receiving plants which meet specified performance standards designed to establish a substantial association with the market, should be accorded pool plant status. Such association may be established either by direct distribution of Class I milk in the marketing area (i. e. a distributing plant) or by supplying such a distributing plant (i. e. a supply plant).

Any receiving plant which distributes at least 10 percent of its total receipts of milk from dairy farmers as Class I milk on routes within the marketing area and disposes of not less than 50 percent of such receipts as Class I milk may qualify as a pool distributing plant.

A plant with less than 50 percent of its producer receipts in Class I sales should not be considered as primarily in the business of fluid distribution. A plant with less than 10 percent of its business in the marketing area cannot be considered as essentially associated with the Southeastern New England fluid market since it does only a minor part of its business in this market. Full regulation would not be necessary in such situation and might place the plant at a competitive disadvantage in supplying the market with which it is normally associated.

While the Southeastern New England market is in a large measure supplied by local dairy farmers whose milk is regularly received at distributing plants serving the area such receipts are not sufficient to meet market demands. A substantial quantity of milk is regularly received by certain distributing handlers from upcountry supply plants. Because of the recreational opportunities existing in the area the greatest demand for fluid milk occurs during the period July through September. These months, together with the months of October and November—normally the months of shortest production in the area—should constitute the qualifying months for continuous pooling. A plant shipping at least 30 percent of its total receipts of milk delivered directly from dairy farmers during any of these months to a distribution plant which disposes of at least 10 percent of its total receipts of fluid milk products as Class I milk in the marketing area and not less than 50 percent of such receipts as Class I milk both inside and outside the marketing area should be a pool supply plant during such month.

It cannot be ascertained on the basis of the hearing record what supply plants and how many such plants might eventually associate with the Southeastern New England pool. It is concluded, however, that a 30 percent shipping requirement constitutes a reasonable requirement and is consistent with such requirements under the other New England orders.

Proponents proposed a 50 percent minimum shipping requirement for supply plants, contending that a lesser shipping requirement might attract more milk to the market than is needed and unduly dilute returns to local producers. While it is not intended that shipping requirements be so low as to attract milk primarily associated with manufacturing outlets, too high a shipping requirement will tend to deter an adequate market supply. It is intended that the market shall carry a sufficient reserve supply throughout the year rather than depend on the adjacent Federal order markets

for such reserve. Because of the substantial percentage of market needs which now comes from local producers it is likely that a 50 percent shipping requirement would result in uneconomic movements of milk, solely for the purpose of meeting such requirements. Milk not needed for fluid uses is disposed of in manufacturing outlets. Since most of the manufacturing facilities in the New England States are in the upcountry area, milk in excess of fluid requirements would normally not move to the marketing area.

During the months of December through June supplies of milk received at plants located in or near the marketing area may be sufficient to supply the greater part of the requirements for Class I milk, in which case it would be more economical to leave the more distant milk in the country for manufacturing and absorb the nearby supplies first in Class I use. Performance standards should not force milk to be transported to distributing plants in the months of high seasonal production merely for the purpose of maintaining eligibility for pooling. It is provided therefore that any supply plant which meets the pooling requirements during each of the months of July through November shall be a pool plant in each of the succeeding months of December through June unless the handlers' written request for nonpool status for the entire seven-month period is received by the market administrator prior to the first day of such period.

Because of the limited manufacturing facilities available in the marketing area it is likely that much of the burden of handling local milk in excess of fluid needs will fall upon the several cooperatives with membership among the local producers. The intent of regulation will not be accomplished unless such milk is permitted continuing pool status. To implement this requirement, pool plant status is accorded any plant located in the marketing area and operated by a cooperative association.

Any plant which was not a pool plant in each of the months of July through November should not be permitted pool status in the succeeding months of December through June regardless of its function during such latter period unless such failure to attain pool plant status in the months of July through November was due to the fact that the plant was operated as the plant of a producer-handler or was a pool plant under another order.

The months of July through November, as previously stated, are the months when milk is most needed in the market, and in large measure in surrounding Federal order markets. Unless some restrictions are provided it is likely that plants which have no association with specific markets, but market milk on an opportunity basis, may seek to join the Southeastern pool, either as distributing or supply plants, during those months when alternative outlets are at a minimum, for the purpose of sharing in the Class I utilization of this market. The plant of a producer-handler, however, would have established its association with the market, and if the operator thereof should elect to change its status and share its Class I utilization, the pool undoubtedly would not be disadvantaged from such a change of status.

It would be improper to deny pool status to any plant which met all of the requirements for pool status under this order during the qualifying months of July through November but was not a pool plant during such period solely because it was a pool plant under another order.

A "dairy farmer" is defined as any person who delivers bulk milk of his own production to a plant. Milk, however, may be received at a pool plant from dairy farmers who are not part of the regular supply of such plant. In order to distinguish such milk a "dairy farmer for other markets" definition is provided. Such milk may enter the market in any one of several ways. Milk of individual dairy farmers may be purchased directly by a broker, trucker, or similar individual who in turn disposes of it on a spot basis in the most attractive available outlet in this market or in other markets. Again, the milk may be purchased by a dealer, who operates both regulated and unregulated plants and received during the month at the pool plant only when a favorable outside market is not available. The same plant operator might dispose of milk through his nonpool plant during all or part of the months of July through November in favorable outside markets and seek to dispose of such milk through his pool plant during the flush production months when available outside markets are limited.

Any of the above mentioned circumstances would tend to place on the Southeastern pool the burden of carrying the surplus of outside Class I markets for which it would not share in the Class I sales. It would be improper to accord producer status to dairy farmers whose milk is handled under such arrangements. Recognition, however, must be given to the interlocking aspects of the several Federal order markets in the area. A dairy farmer should not be denied producer status during the flush production months if the plant to which he delivered his milk is then associated with this market and such plant had met all of the pooling requirements during each of the months of July through December but had nonpool status because it was a pool plant under another Federal order. Likewise a producer-handler who regularly had been associated with the market during the months of July through November, but who elected to change his status and become a regular handler buying from producers should not be denied status as a producer on his own farm production. Such a change in status would under normal circumstances be an asset to the pool since producer-handlers are usually high Class I utilization handlers.

The term "producer" defines those dairy farmers who constitute the regular supply for the market and to whom the minimum prices specified under the order must be paid. Under usual circumstances the respective health authorities having jurisdiction in the marketing area make regular inspections of individual farms and require the holding of valid farm permits or certificates of registration on milk permitted to be received at plants serving the market. However, under certain circumstances milk from dairy farmers not holding such permits or certificates is permitted to be received, commingled with other milk in the plant and distributed in the form of fluid milk products in the marketing area. It must be presumed, therefore, that if the milk is permitted to be received at a pool plant it meets the quality standards of the health authorities. Unless milk so received falls in the category of milk received from "dairy farmers for other markets", producer-handlers or producers under another Federal order issued pursuant to the Act it is intended that it be accorded status as producer milk. For reasons stated in the decision relating to "dairy farmers for other markets" it would be inappropriate to permit milk from such source to share in the equalization pool of this market. Similarly, a producer-handler does not share his Class I sales with the pool and accordingly should not be permitted to dispose of his excess milk through the pool.

The nearby Federal order markets have diversion provisions which permit a dairy farmer to retain producer status under those orders under specified conditions even though the milk was received at a nonpool plant. If the first receiver of the milk reports it as producer milk under another Federal order, such milk received as diverted milk from such other Federal order market will be excluded from the pricing and payment provisions of this order.

Since the day-to-day and month-to-month market requirements may vary, some accommodation must be provided to permit the efficient hauling of any necessary surplus. It is expedient therefore to permit certain diversions if the handler who normally receives such milk chooses to divert it and accepts the responsibility of accounting for it. It is not necessary to limit in any way the extent of diversion to the plant of a buyer-handler or to other pool handlers. Buyer-handlers have almost exclusively Class I utilization and depend on other handlers as a source of milk supply. The privilege of unlimited diversions to such operators will facilitate milk movements in the most efficient manner. Milk diverted between pool plants would be pooled under any circumstances. The order provisions assure full accounting and pricing of the milk regardless of which plant is designated the receiving plant. If the handler to whom the milk is normally delivered desires to retain control thereof and chooses to report the milk as diverted there is no reason why the situation should not be accommodated.

The order provisions should not be so drawn as to encourage an excess volume of milk to associate with the pool. During the months of July through September when demand is greatest and the months of October through March when supply is lowest it is unnecessary to accommodate diversions to nonpool plants except insofar as may be necessary to assure orderly handling of the weekend surplus which accrues as a result of the fact that a plant operates only

six days a week. Diversion privileges on 6 days (4 days in the case of every-other-day delivery) during the months of July through September and 12 days (6 days in the case of every-other-day) during the months of October through March will accommodate the situation.

The months of April through June are the months of highest production and it is desirable that handlers be permitted liberal diversion privileges to nonpool plants to expedite the orderly disposition of the necessary seasonal surplus. Accordingly, unlimited diversion to nonpool plants is permitted during this period.

The term "producer-handler" should be defined in somewhat more limited terms than is presently the case under the other New England Federal orders.

A producer-handler is intended to include only a person who is both a dairy farmer and a handler who processes milk from his own farm production and who distributes all or a portion of such milk as Class I milk on routes in the marketing area and, except under specified circumstances, receives no milk from any source other than his own farm production.

Typically, a producer-handler conducts a small family-type operation, processing, bottling, and distributing only own farm production. Full regulation of such individuals would provide considerable administrative difficulties.

The New England area, and more specifically the Rhode Island, Southeastern Massachusetts area herein under consideration, is unusual in that there is a large number of individuals who operate in varying capacities closely related to the ordinary conception of a producer-handler. There are some individuals who contract to have their own farm milk processed and bottled in the plant of another operator and returned for distribtuion. Others operate processing plants, at which their own farm production as well as receipts from other dairy farmers and/or plants are processed and distributed. If full exemption from regulation were provided for all of the various categories of individuals who distribute own farm production, the effectiveness of regulation in the Southeastern area would be impaired.

Producer-handler type operations in this market differ from other New England order markets in numbers of individuals so engaged and in proportionate volume of the total sales. Development of direct distribtuion operations is relatively easy for many dairy farmers located in close proximity to the population centers in this market.

The record shows that about 25 percent of the licensed Rhode Island dealers distribute fluid milk through producer-handler type operations and over one-third of the dealers in the three Massachusetts counties of the marketing area have similar operations. The local New Bedford market has as much as 15 percent of its total milk supply distributed by producer-handler type operators with an additional 4 percent attributable to own farm production of dealers. The volumes of milk distributed by such individuals in the marketing area are sufficient in their total effect to hamper effective regulation of milk marketing in the market unless adequate provision is made in the order to regulate such milk. Many local dairymen, not presently engaged in distributing their own milk, are giving consideration to this type of operation as a means of enhancing their overall returns and evading equalization pooling.

Normally, exemption from regulated status is made in a Federal order for producer-handlers on the grounds that such businesses are small, family-type operations which have little effect upon the pool as long as they do not rely on the pool to carry their supplemental supplies and necessary surplus. This principle is preserved in the definition as herein proposed. Except in the case of small operators who produce not more than 1075 pounds (500 quarts) per day on a daily average during the month, producer-handler status may be preserved only so long as the individual involved receives no milk except own farm production. Under existing marketing conditions it is unlikely that a small operator could provide facilities to handle the wide range of packages in which milk is normally distributed. Permitting the small operator to maintain his status as a producer-handler and still receive packaged milk from pool handlers will accommodate this situation and at the same time facilitate the administration of the order.

In order to maintain producer-handler status it is provided that the maintenance, care, and management of the dairy animals and other resources necessary to produce the milk and the processing, packaging and distribution of the milk shall be the personal enterprise of and the personal risk of the person involved. This is intended to distinguish the family type operation, normally involved, and to bring under full regulation operations which attempt to masquerade as producer-handlers in their normal conception through hidden leases, rental arrangements and other corporate devices designed solely to circumvent regulation by the order.

Large operations which receive no milk directly from dairy farms other than own farm production but which rely on other plants for supplemental supplies either in bulk or packaged form, are not significantly different from the operation of regular handlers. In addition, such individuals do not assume the risks nor cost of providing a full supply. If they are accorded producer-handler status the pool does not receive the benefit of their Class I sales but acts as a supply balance and carries their necessary surplus. Such operators who do not qualify under the producer-handler definition would, provided they sold a sufficient proportion of their milk in the marketing area, attain regular pool handler status and would participate in the equilization fund.

Producer-handlers are required to make reports as the market administrator deems necessary in order that he may determine and verify the continuing status of such individual and to facilitate accounting and verification of transactions involving other handlers.

The term "producer milk" is intended to include all skim milk and butterfat contained in milk produced by producers and received at pool plants directly from such producers. As previously stated limited diversions are permitted and such diverted milk is considered as a receipt at the plant from which it is diverted.

The term "other source milk" should be defined as all skim milk and butterfat utilized by a handler in his operations except fluid milk products received from pool plants, inventory of fluid milk products and current receipts of producer milk. The term should include all skim milk and butterfat in products other than fluid milk products from any source, including those produced at the handler's plant during the same or an earlier month, which are reprocessed or converted to other products during the month. Other source milk is intended to represent all skim milk and butterfat from sources not subject to the classification and pricing provisions of the attached order. If other source milk is disposed of in Class I products, partial pricing and regulation is provided under compensatory payment provisions. Defining other source milk in this manner will insure uniformity of treatment to all handlers under the allocation and pricing provisions of the order.

Two criteria of "exempt milk" are set up with grants exemption from classification and pricing provisions of the order to certain quantities of milk which moves into the market during the month. The first concerns movement of milk from an unregulated plant to a regulated plant for processing and packaging and return to the unregulated plant during an interval in which the facilities of the unregulated plant are temporarily not available for use because of extraordinarily disastrous circumstances beyond the dealer's control. This procedure will in no way affect returns to regular producers and will accommodate the handling of milk in surrounding markets during disaster conditions. In the second case, exempt milk moves from a regulated plant to an unregulated plant for processing and packaging and is returned to the regulated plant after being packaged. This procedure will permit regulated handlers to have producer milk bottled at unregulated plants while at the same time preserving for regular producer milk the full Class I use value of the milk moved to the unregulated plant.

Similar provisions are contained in the other New England Federal orders. They permit flexibility in handler operations and accommodate the handling of milk during emergency period without adverse effect on the pool.

Exempt milk status should not be given to milk which is produced by a dairy farmer-distributor who has no processing or packaging facilities but relies on other handlers to custom bottle his milk which he then peddles on routes in the marketing area.

A dairy farmer-distributor should not be permitted to maintain a preferential Class I market outside the scope of regulation. The production resources which he maintains are the same as those of any other producer and be has no ad-

ditional investment in processing facilities which entitles him to a preferential return over other producers. Exempt status should not be permitted for milk subject to handling in the foregoing described manner but it should be priced and pooled with other producer milk at the pool plant where first received.

The terms "milk", "cream", "half and half", "concentrated milk" and "fluid milk product" are defined to facilitate the classification scheme hereinafter set forth.

(b) *Classification of milk.* A classified use plan should be established to insure that all milk and milk products are fully accounted for by the handler who is responsible for accounting and reporting to the market administrator and for making payments to producers on receipt of producer milk. Accounting for milk and milk products on a skim milk and butterfat accounting basis and pricing in accordance with the form in which, or the purpose for which such skim milk and butterfat is used or disposed of as either Class I milk or Class II milk is the most appropriate means of securing complete accounting on all milk involved in market transactions.

Milk is disposed of in the market in a wide variety of forms, representing different proportions of butterfat and skim components of milk which may be greatly changed from the proportions of such butterfat and skim in milk as it is first received. Measured in terms of volume the products disposed of in the market may represent one quantity of milk and measured in terms of butterfat content only they may represent a different quantity.

There are obvious difficulties in reconciling the quantities of product to be priced, particularly when consideration is given to the increasing intermarket transfers of milk involved in the area, where accounting in one area is in terms of product weight and in another area is in terms of milk equivalent of butterfat. Uniformity of prices between markets depends upon a complete measure of the milk quantities involved and this must be accomplished in terms of both butterfat and the skim equivalent of solids.

Essentially, market administrators use a skim milk and butterfat accounting approach in their verification procedure regardless of whether or not such a system is spelled out in the order. The skim milk and butterfat accounting system provided for in the order recognizes the procedure generally used in Federal order markets for verification of the receipts and utilization of milk and milk products and will provide for uniformity in application of the accounting system to all handlers involved. The skim milk and butterfat accounting system should be adopted in the Southeastern New England market.

Only producer milk is intended to be priced under Federal orders; however, milk may be received at pool plants not only from producers but also from other handlers and other sources. Milk from all sources is commingled in the handler's plant(s). It is necessary to classify all receipts of milk and milk products in a plant to properly establish the classification of producer milk and to apply the provisions of a classified pricing plan to such milk.

The fluid milk products which are classified in Class I are required by the appropriate health authorities in the marketing area to be made from milk or milk products procured from approved sources. The extra cost incurred by producers in producing quality milk and in getting it delivered to the market in the condition and in the quantities needed by the market necessitates a price for milk used in Class I products somewhat above the price of milk used in manufactured products. This higher price must be at a level which will provide sufficient incentive to producers through the blended price returns to encourage the production of those quantities of milk needed for the Class I products plus the necessary reserve needed for fluctuations in the market demand.

Milk which is excess to Class I use at any time must be disposed of for use in manufactured products. These products are less perishable than fluid milk products and they compete with similar products made from unapproved milk on the national market. Milk so used must be classified as Class II milk and priced according to its value in such outlets.

Class I milk under the proposed classification scheme, shall be all skim milk (including that used to produce concentrated milk and reconstituted skim or fortified skim milk) and butterfat disposed of in fluid or frozen form as milk, flavored milk, skim milk, flavored or cultured skim milk, buttermilk, concentrated milk and 50 percent by weight of the product known as "half and half" which has a butterfat content of at least 10 percent but less than 16 percent. Skim milk and butterfat not specifically accounted for in Class II shall be classified in Class I.

All skim milk and butterfat used to produce products other than fluid milk products as set forth above shall be Class II. This classification would include all of those products which are generally considered as manufactured milk products not required by the health authorities to be made from milk from approved local sources.

Fluid cream would be classified in Class II although it is generally considered in its physical form to be a fluid milk product. The area herein under consideration is an open cream market. Substantial quantities of fluid cream from outside sources are available in the Southeastern New England market and compete with cream derived from local producer milk. The inclusion of fluid cream as a Class I product would price cream derived from local milk supplies at a level above that applicable to fluid cream imported from other sources.

"Half and half" is a mixture of milk and cream or skim milk and cream with a butterfat content adjusted to between 10 percent and 16 percent. Classification of this entire product as Class I might seriously deter the use of local producer butterfat in such product since hotels and restaurants could combine bulk skim milk priced in Class I with cream priced in Class II and sell a combined product at a price reflecting the lower cost resulting from such mixture. Accordingly, it is concluded that 50 percent by weight of the quantity of skim milk and butterfat in "half and half" should be classified in Class I and the remaining 50 percent should be classified as Class II.

Handlers have inventories of milk and milk products at the end of and beginning of each month which must enter into the accounting of receipts. The accounting procedure will be facilitated by providing that end-of-month inventories of all fluid milk products on hand be classified as Class II milk, regardless of whether such fluid milk products are held in bulk or packaged form. Inventories of such products will be subtracted from any available Class II disposition in the following month under the proposed allocation procedure. The higher tax values of any Class I product in inventory assigned to current producer receipts during the month and which is allocated to Class I milk in the following month should be reflected in returns to producers. Inventories of Class I products on hand at a pool plant at the beginning of the month in which a plant first becomes pooled should be allocated to Class II utilization at the plant during the month. Priority of assignment of current producer milk to current Class I use will be preserved by this procedure.

Small and unavoidable losses of both skim milk and butterfat are experienced under usual circumstances during plant operations. Since handlers are required to make a full accounting for all plant receipts on a classified use basis, it is necessary to provide for the classification of these losses commonly known to the trade as "shrinkage". A plant which is operated in a reasonably efficient manner and for which complete and accurate records of receipts and utilization are maintained should have total shrinkage of not more than two percent of total receipts. Accordingly, it is concluded that shrinkage of skim milk and butterfat, respectively, not in excess of two percent of total receipts shall be classified as Class II and any amount in excess of two percent shall be classified as Class I.

The skim milk and butterfat content of milk products received and disposed of by a handler can be determined through recognized testing procedures. Some of the products such as ice cream mixes and condensed milk present a more difficult problem in accounting in that some of the water present in the milk as received from producers is removed in processing. The respective volumes of skim milk and butterfat in such products can be ascertained through use of adequate plant records made available to the market administrator or by the use of standard conversion factors for skim milk and butterfat used to make such products. The basis of accounting for such products as condensed milk and nonfat dry milk should be the pounds of skim milk and butterfat required to produce the product.

Butterfat and skim milk in the form of Class I products may at times, because of deterioration of product or as a result of the handler's inability to dispose of route returns, be disposed of for

livestock feed. Such disposition shall be classified as Class II if verifiable evidence of such disposition is available to the market administrator. Skim milk which a handler may find necessary to dump at times should also be classified in Class II. Such disposition, however, can be verified only by actual witnessing of the action. It is provided therefore, that such classification in Class II shall be allowed only when the handler has given prior notice to the market administrator of his intention to dump so that the market administrator, if he so desires, may have the dumping witnessed.

Except for that shrinkage previously described herein which is assigned limited classification in Class II, all skim milk and butterfat which is received and for which a handler is unable to establish utilization shall be classified as Class I. This procedure will assure producers of full value in accordance with actual use made of their milk and is designed to remove any advantage a handler might gain from failure to maintain complete and accurate records of utilization.

Each handler must be held responsible for a complete accounting on all of his receipts of skim milk and butterfat in any form. The handler who first receives milk from producers should be held responsible for establishing the classification thereof, and for making payments to producers. This principle is fundamental to effective administration of the order and is consistent with the practice followed in federally-regulated markets.

Skim milk and butterfat in the form of any fluid milk products transferred from a pool plant to another plant, under usual circumstances, should be classified on the basis of their utilization in the transferee-plant.

In the case of transfers between pool plants the allocation provisions as hereinafter set forth provide for priority of assignment of pool milk in Class I. Classification in accordance with use in the transferee-plant will provide adequate assurance to producers of the proper classification of their milk.

All butterfat and skim milk in fluid milk products transferred to the plant of a producer-handler should be classified as Class I and should not be subject to reclassification. A producer-handler, to maintain status as previously described herein, is limited in his purchases of fluid milk products to packaged fluid milk products for disposition as Class I. Since such purchases from pool plants are distributed as Class I products they should have automatic Class I classification.

Transfers of skim milk and butterfat in the form of fluid milk products in either packaged or bulk form from a pool plant under this order to a fully regulated plant under another Federal order should be classified in the class in which assigned under the other Federal order. The surrounding Federal order markets to which such transfers would likely be made are specific relative to the classification of receipts from nonpool plants under such orders. Accordingly, it is necessary that classification be determined under the provisions of such other orders. The other New England orders presently give recognition to packaged fluid milk products moving between such markets and credit Class I utilization to the originating market. If it were feasible to do so similar recognition should be given to milk transferred from Southeastern New England order plants. However, such recognition would require amendments to the other orders which cannot be accomplished on the basis of this record. The transfer provisions as herein proposed will accommodate any amendment to the other orders in this regard.

Skim milk and butterfat in the form of fluid milk products transferred from a pool plant to a nonpool plant, except a producer-handler plant or a plant fully regulated under another Federal order, shall be classified in Class I unless Class II utilization is established. In any event, the skim milk and butterfat assigned to Class I shall not be less than the disposition of skim milk and butterfat from the transferee-plant in the form of fluid milk products (Class I) on routes in the marketing area. Further, the amount of skim milk and butterfat so transferred and assigned to Class II shall not be greater than the amount of skim milk and butterfat, respectively, received in the form of fluid milk products from plants fully regulated under the several Federal orders which is in excess of the Class I utilization at the transferee-plant. Facilities are available under this order or in the surrounding Federal order markets to process any milk not needed in Class I and virtually all the available manufacturing facilities are attached to this pool or to one of the other Federal order markets. Hence any milk disposed of to a nonpool plant other than a pool plant under another Federal order, or to the plant of a producer-handler, would normally be for Class I use. The other New England Federal order markets provide that such transfers shall be Class I. The provision as herein proposed will provide assurance of classification in Class I to the extent Class I utilization is available in the transferee-plant.

The volumes of skim milk and butterfat which move in the form of fluid milk products from a pool plant to a nonpool plant and thence to another plant should be classified in accordance with the use of such products at the final transferee-plant and by following the applicable procedure outlined previously herein for movements from a pool plant to the other various plants.

If transfer is made to a nonpool plant located outside New England or New York, classification of the skim milk and butterfat involved should be in Class I. Ample facilities exist within New England and New York State for manufacturing all milk not needed for Class I uses. Normally, all skim milk and butterfat shipped in the form of fluid milk products to outside areas would be for use as Class I. It would be uneconomical to make shipments of fluid milk products to distant locations for manufacturing uses, particularly since adequate facilities are available for processing surplus milk nearer the market. It is appropriate therefore, for administrative convenience and conservation of market administrator funds, and in view of adequate nearby manufacturing facilities, to provide for automatic classification in Class I of skim milk and butterfat in fluid milk products moved to plants outside New England and New York State.

The class prices established by the order apply only to producer milk. Since a plant may receive skim milk or butterfat from sources other than producer milk, a procedure must be established whereby it may be determined what quantities of milk in each class should be assigned to producer milk. The milk from producers who are regular suppliers of milk for the Southeastern New England market should be given priority in the assignment of Class I utilization at pool plants. Milk which is received from other sources should be assigned to the lowest available use classification. Unless this procedure is followed there can be no assurance that other source milk would not be used to displace producer milk in Class I when it is advantageous to the purchasing handler. If the order permitted handlers to obtain other source milk for Class I uses whenever it was advantageous to do so while producer milk in the plant was utilized in Class II the order would not be effective in carrying out the purpose of the act and the market would be deprived of a dependable supply of milk.

In making the assignments of skim milk and butterfat pursuant to the allocation provisions of the order, any milk received from sources not regulated by an order issued pursuant to the Act should be assigned first to Class II milk. The plant(s) supplying such milk may not have purchased it from dairy farmers on a classified use basis and it is not feasible to determine this or other conditions of sale. Following the assignment of such unregulated other source receipts, bulk other source milk in the form of fluid milk products from plants regulated by other orders issued under the Act should be assigned to the lowest available use classification.

During the months of July through September following the assignment of other source milk from non-Federal order sources, the lesser of 15 percent of producer receipts, or the remaining pounds of available use in Class II, should be deducted from Class II. These are the months of greatest demand for fluid milk in the market and hence the months in which supplemental supplies would most likely be needed. It is possible that a handler may have an overall supply of producer milk during any of such months and yet because of variation in day-to-day receipts or demand find it necessary to purchase supplemental supplies. While it is not intended that milk from other Federal order markets should replace local producer milk in Class I, handlers should not be penalized by having such necessary supplemental purchases classified as Class II. This procedure may result in some producer milk being classified in Class II while other Federal order milk is assigned to Class I. However, if producer milk is not available at the time when needed, local producers should not expect to receive a Class I credit for milk produced at other times

when only a Class II use is available. Under this procedure a handler has assurance that if his producer receipts are inadequate to meet his Class I needs and he purchases milk regulated under another Federal order such milk will be assigned to Class I.

Since it is not intended that there be any compensatory payment on other source milk which is fully regulated under another order and which is disposed of for Class I use in this market (except skim milk so disposed of from Order No. 27 plants) this sequence of assignment of other source milk will tend to minimize the application of the compensatory payment provisions.

The exempt milk provisions of the order as herinbefore set forth accommodate the processing and packaging of milk both for this market and for outside markets under specified circumstances. Such milk is always a Class I disposition but does not enter into the final accounting of pool handlers. It is necessary therefore, that exempt milk be deducted from Class I prior to the assignment of producer milk to remove any influence it might have in subsequent computations of the pricing and payment provisions.

The several New England orders now in effect provide that movements of packaged fluid milk products from one order plant to a different order plant shall be credited as a Class I disposition from the originating plant. It is intended that this order shall recognize this principle of free movement of packaged milk between markets. The pricing among the several orders is such that no pricing advantage can be gained by movements of packaged milk among markets. However, efficiencies in scale of operation derived from concentration of specialized packaging operations in a single plant may prove advantageous to multiple plant operators. This practice is being followed to a considerable extent in the case of several handlers under the other New England orders. This unrestricted competition for sales among all handlers whose milk is priced and regulated on a uniform basis will provide greater flexibility in daily operations of handlers and a better balance of milk supplies between markets will be gained by permitting the free movement of such packaged fluid milk products.

Inventory of fluid milk products on hand at the beginning of the month is subtracted from the lowest available use classification after the allocation of other source milk but prior to the allocation of producer milk.

Following the assignment of packaged fluid milk products from plants regulated under other Federal orders an amount equal to the producer receipts deducted from Class II prior to the allocation of bulk receipts from other Federal order markets is added to Class II during the months of July through September.

The only remaining receipts not yet allocated are producer receipts and receipts from other pool plants. These are deducted in a sequence which assigns receipts not subject to a location differential first to Class I and the remaining receipts are then deducted from the highest remaining class utilization in sequence according to the nearness of the plants to Providence in accordance with their zone location. This sequence of assignment will assure the assignment of producer receipts of each handler to the highest available use classification and will minimize the transportation allowance which producers are required to bear by assigning the milk nearest the market to Class I and the most distant milk to Class II. One exception to this principle is the assignment of out-of-area Class I sales directly from a plant subject to a zone location differential to producer receipts at such plant. The assignment of such sales to receipts at such plant maintains the relationship of milk price between plants as established by the order since the difference in price between plants with no location differential and those subject to a location differential reflects the cost of moving the milk to the marketing area.

If after making the assignments of skim milk and butterfat pursuant to the allocation provisions of the order, the total of all Class I and Class II milk assigned to producer milk exceeds the amount of producer milk reported to have been received by the handler for whose pool plants the computation is being made, such "overage" should be assigned to the available utilization in each class. When utilization records indicate a disposition greater than receipts it must be presumed that the handler underreported his receipts of producer milk. This "overage" is thus charged to him at the applicable class price in the lowest available class usage.

(c) *Determination and level of class prices.* The fundamental consideration in pricing milk in this market is to establish minimum Class I and Class II prices to producers which will result in adequate but not excessive milk supplies to meet the fluid milk requirements of the market plus a necessary reserve. Moreover, it is essential, to restore and maintain orderly marketing of milk in the area, that these minimum prices be in appropriate relationship with prices in other markets in the region.

It is not possible to predict the precise level of the uniform price which will result in this market from any prescribed level of class prices. However, it is desirable to strive for a close alignment of class prices between markets and depend upon differences in utilization and blend prices in the markets to distribute the milk supply among handlers and markets according to need at particular times. Normally, this balancing effect is accomplished by the operations of handlers who are established in the several markets who will either shift plants or producers between markets, or secure a balancing of blends and utilization by varying the shipments of packaged fluid milk products between markets.

Class I price. The New England basic Class I pricing formula should be incorporated in this order as the basis for determination of the Class I price. The Class I price is related by the formula to general economic conditions exerting influences upon milk prices in the area. The formula provides for adjustments in fluid milk prices to reflect changes in general economic conditions and in supply-demand relationships for milk in the New England markets on a prompt and timely basis as the need appears. Recognition of seasonal fluctuations in production is included in the formula and it has been and continues to be an important basic factor for pricing milk in other Federal order markets in New England.

Prices in this market cannot be significantly different from prices in the other major New England markets or uneconomical shifts of producers between markets will occur with detrimental effect upon the stability and adequacy of supplies. The use of the same basic pricing formula for Class I milk which is incorporated in the other Federal orders in New England will contribute toward a sound price relationship and an integrated system of pricing fluid milk between markets. The basic Class I pricing formula incorporated herein was first made a part of the Boston order on April 1, 1948 and with subsequent modifications has been successful in maintaining appropriate levels of price in Boston and other Federal order markets in New England up to the present time.

The Class I price should be established at a level 7 cents above the Boston city plant Class I price. Boston handlers dispose of substantial quantities of milk in the proposed marketing area both by direct route distribution and through bulk shipments to plants in the area. It is appropriate therefore that the level of price in the marketing area reflect transportation costs from Boston to Providence, a distance of 43 miles (5 zones). The 1.2-cent differential which is used in zoning plant locations within the 21st zone represents an averaging of rail and truck transportation rates. However, since milk movements from Boston city plants to plants in the Southeastern marketing area are exclusively by truck it is appropriate to use truck transportation rates, which approximate 1.4 cents per 10-mile zone, in establishing a price relationship between Boston and Providence. Five zones at 1.4 cents per zone would result in a 7-cent higher Class I price level.

Since the Southeastern New England market is a deficit market a Class I price level 7 cents over the Boston city plant price will tend to implement the purposes of regulation of encouraging the association of additional milk supplies with this market, and at the same time, will assure general alignment of prices as between markets.

The New England basic Class I pricing formula contains a supply-demand adjustment factor based upon combined receipts and utilization under the Greater Boston, Merrimack Valley, Springfield and Worcester orders. Since all of these markets and the Southeastern New England market draw generally from a common supply area, it is desirable that the supply-demand adjustment factor reflect the total experience in all of these markets. However, since this cannot be accomplished on the basis of this record, it is proposed that the present factor be adopted for this market at this time. The language included in the proposed order will permit revision of the supply-demand adjustment factor without further amendment of this order.

The New England basic Class I pricing formula presently contains a contra-seasonal provision which prevents any downward price movement during the months of November and December. Experience in operation of the formula in the other New England markets has indicated that this mechanism has at times provided a substantially higher price during these months than the formula would otherwise have provided and as a result the market has experienced very abrupt price declines on January 1. In the interest of maintaining pricing alignment as between markets, no change is being recommended at this time in the formula as it would apply to this market. However, it appears appropriate that a review of this provision be made when the supply-demand adjuster is reviewed.

The price resulting from the application of the various formula components to the base period price is adjusted through a bracketing system to provide for price changes at 22 cents per hundredweight intervals which normally reflect resale price changes of one-half cent per quart. This procedure is followed under the other New England orders and by local unregulated and State regulated markets in the area and provides an appropriate basis for price movements in this proposed marketing area.

Class II price. The Class II price under the Southeastern New England order should be established on the same basis as that presently used in the pricing of Class II milk in the adjacent New England Federal order markets and at the level presently provided under the Springfield, Worcester and Merrimack Valley orders.

Some reserve milk in excess of that needed to meet Class I requirements is necessary to maintain an adequate supply of fluid milk for the market on an annual basis. The price for such milk, excess to Class I needs, should be maintained at the highest level consistent with facilitating its movement to manufacturing outlets when it is not needed in the market for Class I purposes. The Class II price should not be established at a level low enough to encourage procurement of milk supplies by handlers for the sole purpose of converting such milk into Class II products.

Most handlers who would be regulated under the proposed order have very limited facilities for handling any milk above that needed for day to day operation of their fluid business. Some facilities for manufacturing soft cheeses and ice cream or ice cream mixes exist in the market.

The formula as herein proposed would base the butterfat value of Class II milk on the Boston market quotations per 40-quart can of 40 percent bottling quality cream as reported for the month by the United States Department of Agriculture. The value of the skim component of the Class II formula is derived from the price of roller process and spray process nonfat dry milk, f. o. b. the Chicago area as reported by the United States Department of Agriculture for the month.

The fat and nonfat prices resulting from the formula computations are combined and an amount which varies the price seasonally is subtracted from such price to arrive at the Class II price applicable at those plants not subject to a location differential. The resulting price is adjusted by location differentials reflecting transportation cost to the city from plants located in excess of 100 miles from Providence.

In recent years New England has experienced a trend toward adequate supplies of cream from local producer milk sources and imports of cream into the market have at times been so small or so sporadic that no cream price average could be established for use as a guide to cream value. During the period from January 1956 to the present time a Boston cream price has been reported for only three months. It is necessary because of the decline in open market cream transactions to establish an alternative formula to reflect the value of butterfat in Class II milk. It is provided that in the absence of a cream price an alternative Class II value which is related to the average price of milk for manufacturing purposes, f. o. b. plants in the United States as reported by the United States Department of Agriculture shall be used. If the value is higher in any month than the cream formula price such higher value shall be used. The Class II price formula herein proposed is similar to the price formula used in adjacent Federal order markets in New England and hence it will provide for compatibility between markets in the pricing of Class II milk.

The pricing provisions herein proposed utilize a number of reported prices and indices from specified sources. From time to time it is possible that an individual price or index may not be reported or published. Under such circumstances it is necessary to provide that the market administrator shall use a price or index determined by the Secretary to be equivalent to or comparable with the unreported or unpublished factor or price.

Location differentials. Location differentials should be established for milk received at plants located substantial distances from the market. Such differentials recognize the principle that milk similarly used and located should be similarly priced. Milk originating nearest the market should command a higher price than milk located at greater distances by at least an amount which reflects the difference in the cost of transporting it to the marketing area.

The ascertainment of the zone location of plants should be made on the same basis as presently provided in the other New England Federal order markets, i. e. the shortest mileage distance over paved, first-class, all-weather roads as determined by the market administrator by use of the State maps contained in Mileage Guide No. 6, issued by the Household Goods Carriers' Bureau. Some latitude, however, must be provided to facilitate the zoning of plants which are not located on such roads. The precise procedure for the determination of mileage distance is set forth in the proposed order language.

Ideally the zone differentials should reflect actual differences in transportation cost between zones. While precise information on transportation costs was not presented at this hearing, the present differentials contained in the other New England order and herein proposed for inclusion in this order were established on the basis of evidence presented at a hearing conducted at Boston, Massachusetts on February 28–29, 1956, after extensive study by a market committee organized for that purpose. The adoption of the same schedule of differential is concluded to be appropriate at this time and will provide generally similar class prices as between orders at competing points.

The city of Providence, Rhode Island, the largest population center in the area, by location, appears to be the most appropriate point from which to determine mileage distance for zoning purposes. Plants therefore should be zoned on the basis of their distance from the intersection of U. S. Highway Route 1 and 6 in downtown Providence.

Payments on other source milk. The minimum class prices established under the order apply only to producer milk received at plants subject to pooling under the order. However, milk may also be received as nonpool milk directly from dairy farmers and from nonpool plants. Moreover, nonpool plants may have direct Class I disposition in the marketing area.

The role of the minimum classified pricing system as an integral part of a Federal milk order is to insure that price competition from reserve or excess milk will not break the market price for Class I milk, thereby destroying the incentive necessary to encourage adequate production of quality milk for fluid use. Because the classified pricing structure of the order is applicable only to pool plants, it is necessary in order to provide continued stable and orderly marketing, to remove any advantage unregulated plants may attain with respect to sales in the regulated market.

Virtually all of the plants in New England, except those with a preferential Class I market in an unregulated area, are presently attached to the Boston, New York or secondary New England Federal order markets and with the promulgation of this order will continue to be so attached. Others will come under regulation of this order. Accordingly, any unregulated other source milk entering this market can be presumed to be milk which is surplus to its normal unregulated Class I market and which would otherwise have to be disposed of for manufacturing uses.

Operators of unregulated plants have a real financial incentive to sell their excess milk below the Class I price established by the order since any value in excess of the value of such milk for manufacturing purposes would represent a financial gain. The order, therefore, must contain a provision to neutralize any price advantage such unregulated plant operators might have on Class I sales made in the marketing area.

As previously stated, it is not intended that compensatory payments shall be applicable to other source milk which is fully regulated under another Federal order and which is disposed of as Class I milk in this market except in the case of skim milk disposed of from Order No. 27 pool plants.

The classified pricing structure under the order cannot be successful in the long run in assuring returns to producers at the rates contemplated by the Act if it is possible for some handlers to purchase other source milk for Class I use at less than the Class I price. One handler with a price advantage in procurement precipitates a breakdown of a classified pricing system by compelling other handlers to resort to sources of milk supply other than regular producer milk. Unstable marketing conditions are thus created. This is precisely the situation which led to the request for regulation in this proposed marketing area.

Since payment of minimum class prices does not apply to handlers not participating in the marketwide equalization, the integrity of the classified pricing system of the order must be maintained by levying a charge against other source milk to remove any cost advantage accruing to handlers using unregulated milk in Class I instead of regular producer milk.

The rate of compensatory payments applicable to other source milk disposed of in the marketing area from unregulated plants should be the same as those applicable to other source milk distributed from pool plants. Handlers who operate pool plants have the same opportunity as handlers who operate unregulated plants to buy other source milk at the opportunity cost level. The operator of an unregulated plant, however, probably has surplus milk in his own plant resulting from his individual operations which he is willing to dispose of on any basis which yields a higher return than the value in manufacturing use. Without a compensatory payment provision this could be accomplished by sales to regulated handlers or by direct route sales including sales to Government installations and institutions. The number of institutions, establishments and installations in the marketing area purchasing Class I on contractual arrangements makes it particularly easy for a handler to dispose of other source milk for fluid uses by bidding for such contracts. Since surplus or manufacturing outlets are the only alternative for this excess milk, considerable incentive exists to underbid the fully regulated handler by using unregulated and unpriced milk for such sales.

It is concluded that the rate of compensatory payment on other source milk utilized in Class I should be the difference between the Class I price and the value of milk for manufacturing uses at the zone location of the originating plant.

Class I milk under the order is priced at the plant where the milk is received from producers, hence, the compensatory payment on other source milk, should be computed at the same stage of the marketing process to be directly comparable. No allowances are made in the order for costs or profits of handlers in moving producer milk to subsequent stages of marketing, neither should they be made for other source milk.

The Class II price established by the order is considered a fair and economic measure of the value of milk in manufacturing uses in New England and hence represents an appropriate value for other source milk except under the special circumstance discussed below.

Because of the limited manufacturing facilities available in the State of Maine and its isolated position relative to terminal markets, manufacturing milk values are generally below values which would result from the application of the Class II location differential schedule to the marketing area Class II price. Since milk excess to local fluid needs has a very limited market in the State of Maine, such milk is generally available to Southeastern New England handlers at its local manufacturing milk value plus transportation to the marketing area. Under normal circumstances, the surplus price established by the Maine Milk Control Commission reflects the value of milk for manufacturing purposes in this area and it is therefore appropriate that such price be used as a basis for computing the amount of compensatory payment of any milk originating within the State. However, should such price be higher than the Class II price established under this order, it could not be presumed to represent the value of milk for manufacturing use. Under such circumstance it is appropriate that the amount of any compensatory payment be computed at the difference between the order Class I and Class II price at the zone location of the originating plant.

A unique situation exists in the opportunity available to handlers to move skim milk from the New York-New Jersey market (Order No. 27) into this market at considerable cost advantage over skim milk priced under this order. A butterfat-skim accounting system will be used in this market. The system under Order No. 27 is one of butterfat accounting and it is possible that skim milk received in producer milk under that order may not carry a Class I price. This situation provides an opportunity for handlers in this market to purchase skim milk from Order No. 27 plants at its value for manufacturing purposes for disposition in Class I uses in this market. A compensatory payment is necessary therefore in the case of skim milk, as such, entering this market for Class I use from Order No. 27 pool plants to remove any cost advantage in the use of such skim milk. Such payment should be the difference between the Class I price and the Class II price under this order for the zone location of the originating plant.

All funds collected from compensatory payments should be added to the producer-settlement fund. The handler regulated by the order should be obligated to make compensatory payments to the producer-settlement fund. There will be no difference in actual price paid for milk whether the payment is made by the regulated handler or by the operator of the unregulated plant from which the other source milk was obtained. Because the regulated handler makes the actual distribution of the milk in the marketing area and because he reports the utilization to the market administrator, he is, from an administrative view, the logical person to make the payment.

(d) *Distribution of proceeds to producers.* The order should provide for the distribution of returns to producers through a marketwide equalization pool. This type of pooling results in a uniform price to all producers which varies only to reflect differences in butterfat content of producer milk and the location of plants at which the milk is received from individual producers.

Dairy farmers in the New England states produce milk for fluid consumption. As previously indicated, virtually all of the plants in the milkshed are either presently regulated under one of the existing orders in the area or have a preferential Class I outlet in an unregulated market. Under the production conditions existing in the area it is not practical to produce milk for manufacturing uses. However, because of day to day fluctuation in receipts and sales and the normal seasonality in the production pattern, it is inevitable that some milk must be disposed of for other than fluid uses. Under normal circumstances a reserve supply approximating 20 percent of the volume of Class I sales is considered necessary during the months of lowest production in order to provide an adequate supply throughout the month. Under such circumstances the volume of milk excess to Class I needs during the peak months of production is substantially greater.

Unless provision is made for the equitable sharing of the necessary market reserve among all producers through marketwide pooling the burden of handling the reserve will fall upon the surrounding Federal order markets. Under an individual handler pooling arrangement there would be strong incentive for handlers in this market to maintain high producer returns and rely on other markets for supplemental supplies. Such arrangement would result in serious disparity between blended prices in the upcountry supply area and would encourage exorbitant transportation charges and lead to unstable marketing conditions in the supply area.

Very limited surplus handling facilities are available in the marketing area and the burden of carrying the market surplus has for the most part been left to the several associations of producers whose members are suppliers of the market. A marketwide pooling arrangement will facilitate the activities of these cooperatives in carrying the necessary surplus and promote orderly marketing throughout the New England area. It will provide for equitable sharing by all producers of the lower returns realized from milk excess to Class I needs and will permit the processing of this reserve supply at those plants where it can be handled most efficiently.

The marketwide pool method of paying producers will require a producer-settlement fund for making adjustment in payments required of handlers so that the total sums paid by each handler will equal the value of milk received by him at the prices established by the order.

Under this pooling arrangement handlers who are required to pay more for their milk on the basis of their utilization than they are required to pay to producers or cooperative associations will pay the difference to the producer-settlement fund. Handlers who are required to pay more to producers or cooperative associations than they are required to pay for their milk on the basis of its utilization will receive the difference from the producer-settlement fund. The market administrator in making payment to any handler from the fund should offset such payments by any amount of payments due to the market administrator from such handler. This is a recognized sound business practice and insures against the possibility of the market administrator being required to make payments to a handler who is already indebted to the market administrator and financially unable to discharge his obligations thereto, or to a handler who seeks to obtain or has obtained money from the fund through the filing of incorrect reports.

If at any time the balance remaining in the producer-settlement fund is insufficient to discharge all obligations due handlers from the fund, payments to handlers should be reduced uniformly per hundredweight of milk. Each handler may then reduce payment to producers by an equivalent amount per hundredweight. The remaining amounts due to handlers from the fund should be paid as soon as the balance is sufficient at which time the handlers shall complete payments to producers. To reduce the likelihood of insufficient balance in the producer-settlement fund, milk received by any handler who has not made the required payments to the fund for the preceding month should not be included in the current month uniform price computation.

The order should provide that a cooperative association of producers which is determined by the market administrator to be authorized to collect payments otherwise due its members, and which has requested such payments in writing from the responsible handler, shall be paid by the handler in the amount due to its producer-members. The proposed order recognizes a cooperative association of producers by definition "to be engaged in making collective sales or marketing of milk or its products for the producers thereof". As the authorized agent of its producer-members an association has the authority as recognized by the act to collect payments due its members from the sale of milk produced by its members and this procedure is presently being followed by cooperative associations in the market.

As hereinbefore stated, the area proposed is generally an open cream market and butterfat from local producer milk must compete with cream imported from outside areas. It is considered essential, therefore, that the price established for butterfat in producer milk be closely correlated with open market butterfat values.

It is concluded that handlers should be charged the same value for differential butterfat above or below the basic test at which milk is priced whether used in Class I or Class II. Under these circumstances, it is unnecessary to clear the differential butterfat through the equalization pool and no handler butterfat differential has been provided. In order that returns to each producer reflects the value of his milk at the butterfat test at which such milk is received it is provided that each handler in paying producers shall adjust the uniform price by the application of a producer-settlement differential.

The basic butterfat test of milk upon which uniform prices to producers should be computed is 3.7 percent. For that milk which a handler receives from producers which varies in butterfat content from this basic test of 3.7 percent it is provided that an addition or subtraction, as the case may be, of a butterfat differential shall be made for each one-tenth of one percent that such average butterfat content of the individual producer's milk varies from this basic test. The producer butterfat differential is directly related to the butterfat value computed in the Class II price formula which is based upon the market value of butterfat in fluid cream on the Boston market. An alternative value based on the New York butter price is provided for if no cream price is reported for the month. The butterfat differential adjustment assures producers of payment for their milk on the basis of its use value according to the competitive value of butterfat on the open market in fluid cream or manufactured products. Milk in this market has generally been priced at a basic test of 3.7 percent and this is also the basic test in surrounding New England Federal order markets.

In making payments to producers for milk received at plants located in excess of 100 miles from Providence the uniform price should be reduced 42 cents plus 1.2 cents for each additional ten miles distance or fraction thereof which such plant is located from Providence up to the 201–210 mile zone when the differential is reduced to 1.0 cent for each additional zone thereafter. These are the same location differentials applicable to handlers under the Class I pricing provisions. Since the milk is produced for a fluid market and it must be moved to the marketing area to have a Class I outlet it is appropriate that the returns to more distant producers reflect the cost of transportation to the market.

Provision should be made for the payment of farm location differentials to producers in the nearby supply area. The amount of these differentials will be obtained by an appropriate deduction from the total value of all milk before completing the computation of the marketwide uniform price.

Producers located in the States of Connecticut and Rhode Island and in the Massachusetts Counties of Barnstable, Bristol, Dukes, Nantucket, Plymouth, Norfolk and Suffolk and that part of Worcester and Middlesex south of the Massachusetts turnpike should receive a farm location differential over the basic blended price of 46 cents per hundredweight. Producers located in the Massachusetts counties of Essex and that part of Worcester and Middlesex north of the Massachusetts turnpike and in the New Hampshire towns of New Ipswich and Greenville should receive a farm location differential of 23 cents per hundredweight. However, in no event should the amount of such differential result in a price higher than the applicable Class I price at the plant where the milk is received.

Historically, dairy farmers in the States of Massachusetts, Rhode Island and Connecticut, because of their location with reference to the large population concentrations of New England have disposed of a substantially larger percentage of their production for fluid uses than have dairy farmers in the upcountry area. Hence nearby producers have been able to realize a price higher in relation to more distant producers than can be accounted for by the advantage in the cost of transportation to market. Under the marketwide pooling herein proposed and without some adjustment mechanism the nearby producer, notwithstanding, would be paid on the basis of the average utilization of all milk on the milkshed rather than according to the utilization of his milk. Under a regulated market, however, he obtains the benefit of an established Class I price which may be higher than in the absence of regulation, and has assurance that his milk will not be displaced by cheap, unregulated milk from more distant sources. The distant producer also benefits from an established Class I price, and by the fact that he gains a larger share of the fluid market than is likely without marketwide equalization.

The use of a nearby differential which will return to nearby producers a somewhat greater share of the Class I price than they would otherwise obtain through marketwide pooling. Moreover such a differential will tend to provide returns to both nearby and upcountry producers more nearly in line with their prospective returns without marketwide equalization.

The scheme of nearby farm location differentials and the amount thereof is identical with that employed in adjacent Federal order markets. The differential as herein proposed will provide for equitable distribution of pool proceeds among all producers and will promote orderly and stable marketing in the entire New England area. The adoption of nearby farm location differentials was proposed and generally supported by interested parties at the hearing.

Several proponents advocated that nearby differentials be related to the supply-demand balance of the market and varied inversely with this relationship. When the Class I utilization percentage for the market as a whole was 91 percent or more no differential would apply. As the Class I utilization percentage decreased the differential would increase with a maximum differential of

87 cents being applicable when the utilization percentage dropped to 71 percent or less. While various hypothetical pool computations were offered to show the application of this scheme of differential it is not possible on the basis of this record to appraise what the actual market situation will be.

The order should provide that each handler pay each producer not later than the 5th day after the end of the month for milk received from such producer during the first 15 days of the month an amount per hundredweight not less than the Class II price applicable for the month. Final payment should be made on or before the 20th day after the end of the month. These dates correspond closely to the dates on which payment is customarily made to producers in the area. All payments made to a cooperative association for distribution to producer-members should be made two days prior to the date payment to individual producers is required and should be accompanied by written statements sufficient to identify the individual producers entitled to receive such payment by name, address or number and should show the volume of milk delivered, the butterfat content of such milk and other necessary information (including amount of and reason for handler deductions), required for proper distribution of monies to the association producer-members for whom it makes collections.

The responsible handler shall make only proper deductions for goods and services furnished to and for payments made on behalf of the producer upon proper authorization in writing given him by the producer.

Several proponents of the order proposed that a base and excess quota plan be established in the market to encourage a balance in the seasonality of production. Such proposal was not supported by the majority of producer interests, however. The seasonality of pricing established in the proposed order is intended to encourage a pattern of production compatible with the fluid needs of the market and has worked successfully in adjacent Federal order markets. Under the circumstances, the proposal is not adopted.

(e) *Administrative provisions.* The marketing agreement and order should provide for other general administrative provisions which are common to all orders and which are necessary for proper and efficient administration of the order.

In addition to the definitions set forth earlier in this decision definition of certain other terms is necessary for brevity and to assure that each usage of such terms denotes the same meaning. These include the terms "Act", "Secretary", "Person".

Provision should be made for the appointment by the Secretary for a market administrator to administer the terms and provisions of the order, and the order should define his powers and duties, prescribe the information to be reported by handlers each month, set forth the rules to be followed by the market administrator in making computations required by the order, and provide for the liquidation of the order in the event of its suspension or termination.

The powers of the market administrator as set forth in the order are specifically provided in section 8c (7) (C) of the Agricultural Marketing Agreement Act of 1937, as amended, and the proposed language is essentially that of the statute.

The duties of the market administrator as set forth are those which are found in all Federal milk marketing orders and are necessary to define specifically the responsibilities of the market administrator.

Handlers should be required to maintain adequate records of their operations and to make the reports necessary to establish classification of producer milk and payments due for such milk. Time limits must be prescribed for filing such reports and for making payments to producers.

Handlers should maintain and make available to the market administrator all records and accounts of their operations and such facilities as are necessary to determine the accuracy of the information reported to the market administrator as he may deem necessary together with any other information upon which the classification of producer milk or payments to producers depends. The market administrator must be permitted to check the accuracy of weights and tests of milk and milk products received and handled and to verify all payments required under the order.

It is necessary that handlers maintain records to prove the utilization of producer milk and that proper payments were made. Books and records should be retained by handlers for a reasonable period of time to allow for complete auditing of all handlers associated with the market.

There are limitations on the period of time handlers shall retain those records which are required to be made available to the market administrator, and on the period of time in which obligations under the order should terminate. The provision made for such limitations is identical in principle with the general amendment made to all orders in operation on July 30, 1947, following the Secretary's decision of January 26, 1949 (14 F. R. 444) which covered retention of records and limitations of claims and is equally applicable herein and is adopted as a part of this decision.

A provision should be made in the order for performance of marketing services for producers, such as verifying the tests and weights of producer milk and furnishing market information. These services should be provided by the market administrator and the cost should be borne by producers receiving the service. If a cooperative association is performing such services for its member producers, the market administrator will accept this in lieu of his own service.

Orderly marketing will be promoted through a marketing service program by assuring individual producers that payments received by them for their milk are in accordance with the pricing provisions of the order and accurately reflect the weights and tests of milk delivered. Complete verification requires that butterfat tests and weights of individual producer deliveries as reported by the handler are proved to be accurate.

Dissemination of current market information to all producers will promote efficiency in production, utilization and marketing of milk and should be included in the order as an additional phase of the marketing service program.

A maximum deduction of 5 cents per hundredweight should be provided to enable the market administrator to perform the marketing services to producers. This deduction will apply to all receipts of milk from producers for whom he renders marketing services. If later experience indicates that marketing services can be performed at a lesser rate, provision is made for the Secretary to adjust the rate downward without the necessity of a hearing.

Any cooperative association of producers performing marketing services for its producer-members shall receive such deductions as the producer-members authorize for providing such services in lieu of the 5-cent maximum rate deducted from payments made to nonmember producers.

Each pool handler shall be required to pay the market administrator as his pro rata share of the cost of administering the order not more than 5 cents per hundredweight or such lesser amounts as the Secretary may prescribe on (1) producer milk (including such handler's own production), (2) exempt milk, and (3) other source milk which is classified as Class I except that the rate of assessment applicable to other source milk received in the form of fluid milk products from a fully regulated plant under another Federal order shall be the amount by which the rate of assessment under this order exceeds the rate of assessment under the other Federal order. Nonpool handlers will be assessed on the quantities of other source milk disposed of as Class I milk on routes in the marketing area and buyer handlers shall pay on the quantities of other source milk classified as Class I.

The market administrator must have sufficient funds to enable him to administer properly the terms of the order. The act provides that cost of administration shall be financed through assessment of handlers. One of the duties of the market administrator is to verify the receipts and disposition of milk from all sources. Equity in sharing the cost of administration of the order among handlers will be achieved by applying the administrative assessment to all producer milk (including handler's own production) and other source milk assigned to Class I. Class I milk sold in the marketing area by nonpool handlers should bear its proportionate share of the administrative expense.

In view of the number of small handlers who do business in the market, the large volumes of milk anticipated, the distances involved and the cost of administering orders in comparable markets, an assessment rate of 5 cents per hundredweight is concluded necessary to meet the expenses of administration. Provision should be made to enable the Secretary to reduce the rate of assessment below the 5-cent maximum rate without necessitating an amendment to the order. This should be done at such

time that experience might reveal that a lesser rate will provide adequate revenue to administer the order properly.

Rulings on proposed findings and conclusions. Briefs and proposed findings and conclusions were filed on behalf of several interested parties in the market. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions set forth in the briefs are inconsistent with the findings and conclusions herein, the requests to make such findings or to reach such conclusions are denied for the reasons previously stated in this decision.

General findings. (a) The proposed marketing agreement and order and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area and the minimum prices specified in the proposed marketing agreement and the order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed marketing agreement and order will regulate the handling of milk in the same manner as, and will be applicable to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Recommended marketing agreement and order. The following order regulating the handling of milk in the Southeastern New England marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the proposed order.

DEFINITIONS

§ 990.1 *General definitions.* (a) "Act" means Public Act No. 10, 73d Congress, as amended, and re-enacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended.

(b) "Southeastern New England marketing area", hereinafter referred to as the "marketing area" means all of the territory included within the boundary lines of the State of Rhode Island (excluding Block Island) and the Massachusetts counties of Bristol, Plymouth (excluding the towns of Hingham and Hull) and Barnstable, together with all piers, docks and wharves connected therewith and including all territory within such boundaries which is occupied by Government (municipal, State or Federal) installations, institutions or other establishments.

(c) "Route" means any delivery to retail or wholesale outlets (including any delivery by a vendor or at a plant store) of fluid milk products classified as Class I milk pursuant to § 990.21 (a) other than in bulk to a plant.

§ 990.2 *Definitions of persons.* (a) "Person" means any individual, partnership, corporation, association, or any other business unit.

(b) "Secretary" means the Secretary of Agriculture of the United States or any officer or employee of the United States authorized to exercise the powers and to perform the duties of the Secretary of Agriculture.

(c) "Dairy farmer" means any person who delivers bulk milk of his own production to a plant.

(d) "Dairy farmer for other markets" means any person described in subparagraphs (1), (2), and (3) of this paragraph:

(1) Any dairy farmer with respect to milk which is purchased from him by a dealer who does not operate a pool plant during the month and which milk is moved to another dealer's pool plant directly from the dairy farmer's farm;

(2) Any dairy farmer with respect to milk which is purchased from him by a dealer who during the month operated both pool and nonpool plant(s) and which milk is moved to a pool plant, if such dealer caused milk from the same farm to be moved as nonpool milk to his nonpool plant(s) during the same month;

(3) Any dairy farmer whose milk is received by a handler at a pool plant during the months of December through June from a farm from which the handler received nonpool milk during any of the preceding months of July through November: *Provided,* That the term shall not include any person who was a producer-handler during any of the preceding months of July through November or any dairy farmer from whom the handler received milk during such months of July through November at only a plant which was a pool plant under another order but which met all of the applicable requirements for pool plant status under this part during such months;

(4) As used in this paragraph, the terms "handler" and "dealer" include affiliates of and persons who control or are controlled by, the handler or dealer.

(e) "Producer" means any dairy farmer (except a dairy farmer for other markets, a producer-handler or a dairy farmer who is a producer under another Federal order with respect to milk diverted from a plant subject to such other order) whose milk is delivered from his farm to a pool plant or is diverted in accordance with subparagraphs 1 through 4 of this paragraph to the plant of another handler if the handler, in filing his monthly report pursuant to § 990.30 reports the milk as receipts from a producer at such plant and as moved to the other plant:

(1) To the pool plant of another handler or to the plant of a buyer-handler;

(2) To a nonpool plant (except the plant of a buyer-handler) during any month from July through September on not more than 8 days (four days in the case of every-other-day delivery) during such month;

(3) To a nonpool plant (except the plant of a buyer-handler) during any month from October through March on not more than 12 days (six days in the case of every-other-day delivery) during such month; or

(4) To a nonpool plant during the months of April through June.

(f) "Association of producers" means any cooperative marketing association which the Secretary determines to be qualified pursuant to the provisions of the act of Congress of February 18, 1922, known as the "Capper-Volstead Act," and to be engaged in making collective sales or marketing of milk or its products for the producers thereof.

(g) "Handler" means any person who during the month operates a pool plant, or any other plant from which fluid milk products are disposed of, directly or indirectly, in the marketing area.

(h) "Pool handler" means any handler in his capacity as the operator of a pool plant.

(i) "Producer-handler" means any person who is both a dairy farmer and a handler who processes milk from his own farm production, distributing all or a portion of such milk as Class I milk on routes in the marketing area and (1) whose own farm production does not exceed 1,075 pounds on a daily average during the month and whose only source of supply for fluid milk products, is milk of his own farm production and packaged fluid milk products from pool plants, or (2) whose sole source of supply for fluid milk products is milk of his own farm production: *Provided,* That the maintenance, care, and management of the dairy animals and other resources necessary to produce the milk and the processing, packaging and distribution of the milk are the personal enterprise and the personal risk of such person.

(j) "Buyer-handler" means any handler who operates a bottling or processing plant from which at least 10 percent of his total receipts of fluid milk products is disposed of by him as Class I milk on routes in the marketing area during the month and whose entire supply of fluid milk products is received from other handlers.

(k) "Dealer" means any person who operates a plant at which he engages in the business of receiving fluid milk products for resale or manufacture into milk products, whether or not he disposes of any fluid milk products in the marketing area.

§ 990.3 *Definitions of plants.* (a) "Plant" means the land, buildings, surroundings, facilities and equipment, whether owned or operated by one or more persons, constituting a single operating unit or establishment for the receiving, handling, or processing of milk or milk products.

(b) "Receiving plant" means any plant which is currently used for receiving, weighing or measuring, sampling, and cooling milk received there directly from dairy farmers' farms in cans, and for washing and sterilizing such cans; or which is currently used for receiving milk directly from dairy farmers' farms by tank truck; and at which are currently

maintained weight sheets or other records of the individual farmers' deliveries.

(c) "Pool plant": Subject to the conditions of subparagraphs (1), (2) and (3) of this paragraph "pool plant" means (i) any receiving plant from which at least 10 percent of its total receipts of milk directly from dairy farmers is disposed of in the marketing area on routes during the month as Class I milk and not less than 50 percent of such receipts are disposed of during the month as Class I milk either inside or outside the marketing area; (ii) any receiving plant other than a plant specified in (i) of this paragraph, from which not less than 30 percent of its receipts of milk from dairy farmers is shipped during the month as bulk milk to a plant from which at least 10 percent of its total receipts of fluid milk products, other than exempt milk, is disposed of in the marketing area as Class I milk on routes and not less than 50 percent of such receipts is disposed of as Class I milk either inside or outside the marketing area; or (iii) any receiving plant located in the marketing area and operated by an association of producers.

(1) The plant is operated neither as the plant of a producer-handler nor as a pool plant pursuant to the provisions of another Federal marketing agreement or order.

(2) Any plant which qualified as a pool plant pursuant to subdivision (ii) of this paragraph during each of the preceding months of July through November shall be a pool plant during the entire period of December through June unless the handler's written request for nonpool status for such seven-month period is received by the market administrator prior to the first day of December.

(3) Any plant which was a nonpool plant during any of the months of July through November shall not be a pool plant in any of the following months of December through June in which it was operated by the same handler, an affiliate of the handler or any person who controls or is controlled by the handler unless its operation during the July–November period was in the handler's capacity as a producer-handler: *Provided*, That this subparagraph shall not apply to any plant which met all of the applicable requirements for pool plant status under this order during each of such months of July through November, but had nonpool status because it was a pool plant under another Federal order.

§ 990.4 *Definitions of milk and milk products.* (a) "Milk" means the commodity received from a dairy farmer at a plant as cow's milk. The term also includes milk so received which later has its butterfat content adjusted to at least one-half of one percent but less than 10 percent; frozen milk; reconstituted milk; and 50 percent of the quantity, by weight of "half and half".

(b) "Cream" means that portion of milk, containing not less than 16 percent of butterfat, which rises to the surface of milk on standing, or is separated from it by centrifugal force. The term also includes sour cream; frozen cream; milk and cream mixtures containing 16 percent or more of butterfat; and 50 percent of the quantity, by weight, of "half and half".

(c) "Half and half" means any fluid milk product, except concentrated milk, the butterfat content of which has been adjusted to at least 10 percent but less than 16 percent.

(d) "Concentrated milk" means the concentrated, unsterilized milk product resembling plain condensed milk which is disposed of in fluid form for human consumption.

(e) "Fluid milk products" means milk, flavored milk, skim milk, flavored skim milk, cultured skim milk, buttermilk, and concentrated milk in fluid form or any mixture in fluid form of milk, skim milk and cream containing less than 10 percent of butterfat (except eggnog, yogurt, ice cream mix, evaporated or condensed milk and sterilized products in hermetically sealed containers).

(f) "Producer milk" means only that skim milk and butterfat contained in milk (1) received at a pool plant directly from producers, or (2) diverted from a pool plant in accordance with the conditions set forth in § 990.2 (e).

(g) "Exempt milk" means all skim milk and butterfat: (1) Received at a pool plant as milk, in bulk, from a nonpool plant to be processed and packaged and for which an equivalent quantity of skim milk and butterfat in the form of packaged fluid milk products is returned to the operator of the nonpool plant during the same month, if such receipt and return occurs during an interval in which the facilities of the nonpool plant at which the milk is usually processed and packaged are temporarily unusable because of fire, flood, storm, or similar extraordinary circumstances completely beyond the dealer's control; or (2) received at a pool plant in the form of packaged fluid milk products from a nonpool plant in return for which an equivalent quantity of skim milk and butterfat in the form of bulk milk is moved from a pool plant for processing and packaging during the same month.

(h) "Other source milk" means all skim milk and butterfat contained in (1) receipts in a form other than as fluid milk products from any source which are reprocessed or converted to another product during the month, and (2) receipts (other than exempt milk) in the form of fluid milk products from any source other than producers and pool plants.

MARKET ADMINISTRATOR

§ 990.10 *Designation of market administrator.* The agency for the administration of this order shall be a market administrator who shall be a person selected by the Secretary. Such person shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 990.11 *Powers of market administrator.* The market administrator shall have the following powers with respect to this order:

(a) To administer its terms and provisions;

(b) To make rules and regulations to effectuate its terms and provisions;

(c) To receive, investigate, and report to the Secretary complaints of violations of its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 990.12 *Duties of market administrator.* The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including, but not limited to the following:

(a) Within 45 days following the date upon which he enters upon his duties, execute and deliver to the Secretary a bond conditioned upon the faithful performance of his duties, in an amount and with sureties thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to exercise his powers and perform his duties;

(c) Obtain a bond in a reasonable amount, and with reasonable surety thereon, covering each employee who handles funds entrusted to the market administrator;

(d) Pay, out of the funds provided by § 990.70: (1) The cost of his bond and the bonds of his employees, (2) his own compensation and (3) all other expenses, except those incurred under § 990.69, necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this part and upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Publicly announce at his discretion, unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who, within 5 days after the date upon which he is required to perform such acts, has not made reports pursuant to §§ 990.30 and 990.31 (b) (3), or payments pursuant to §§ 990.60 through 990.70;

(g) Submit his books and records to examination by the Secretary, and furnish such information and reports as the Secretary may request;

(h) Verify all reports and payments of each handler, by audit, if necessary, of such handler's records and of the records of any other handler or person upon whose utilization the classification of skim milk and butterfat for such handler depends;

(i) Prepare and disseminate for the benefit of producers, consumers, and handlers, such general statistics and information concerning the operation of this order as do not reveal confidential information;

(j) On or before the date specified, publicly announce by posting in a conspicuous place in his office and by such other means as he deems appropriate, the following:

(1) The 26th day of each month, the Class I price computed pursuant to § 990.40 (a) for the following month;

(2) The 5th day of each month the Class II price computed pursuant to § 990.40 (b) and the butterfat differential computed pursuant to § 990.61 both for the preceding month;

(3) The 12th day of each month, the basic blended price computed pursuant to § 990.51 and the zone blended prices resulting from the adjustment of the basic blended price by the zone location differentials pursuant to § 990.42, both for the preceding month.

(k) Give each of the producers delivering to a plant, as reported by the handler, prompt written notice of his actual or potential loss of producer status for the first month in which the plant's status has changed or is changing to that of a nonpool plant.

CLASSIFICATION

§ 990.20 *Skim milk and butterfat to be classified.* All skim milk and butterfat received within the month at pool plants and which is required to be reported pursuant to § 990.30 shall be classified by the market administrator pursuant to the provisions of §§ 990.21 through 990.24.

§ 990.21 *Classes of utilization.* Subject to the conditions set forth in §§ 990.22, 990.23, and 990.24 the classes of utilization shall be as follows:

(a) *Class I milk.* Class I milk shall be all skim milk (including that used to produce concentrated milk and reconstituted or fortified skim milk) and butterfat: (1) Sold, distributed or disposed of in the form of fluid milk products (except as provided in paragraph (b) (2) of this section) and (2) not accounted for as Class II milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat (1) used to produce any product except a fluid milk product; (2) disposed of for livestock feed or to bakeries, soup factories and similar establishments; (3) contained in skim milk dumped if the market administrator has been notified in advance and afforded opportunity of verifying such dumping; (4) contained in inventory of fluid milk products on hand at the end of the month; and (5) in plant shrinkage not in excess of two percent of receipts of skim milk and butterfat, respectively.

§ 990.22 *Transfers of fluid milk products.* Skim milk and butterfat disposed of in the form of any fluid milk product from a pool plant to another plant shall be classified:

(a) In the class in which assigned at the transferee-plant pursuant to § 990.24 if moved to another pool plant.

(b) As Class I milk if moved to the plant of a producer-handler.

(c) In the class in which assigned under the other order if moved to a fully regulated plant under another Federal order.

(d) As Class I milk if moved to a nonpool plant, except the plant of a producer-handler or a fully regulated plant under another Federal order, unless Class II utilization is established: *Provided*, That (1) the amount of such skim milk and butterfat assigned to Class I shall not be less than the Class I disposition from the transferee-plant of skim milk and butterfat, respectively, in the form of fluid milk products on routes in the marketing area, and (2) the amount of such skim milk and butterfat assigned to Class II shall in no event be greater than that volume of skim milk and butterfat, respectively, received in the form of fluid milk products from fully regulated plants under any Federal order, which is in excess of the Class I utilization at such transferee-plant.

(e) By applying the provisions of paragraphs (a) through (d) of this section, whichever is applicable if moved to a nonpool plant, except the plant of a producer-handler or a fully regulated plant under another Federal order, and thence to another plant: *Provided*, That if the other plant to which such movement is made is located outside the New England States and New York State, classification shall be as Class I milk.

§ 990.23 *Responsibility of handlers and reclassification of milk.* (a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk or butterfat proves to the market administrator that such skim milk and butterfat should be classified as Class II milk.

(b) Any skim milk or butterfat shall be reclassified if verification by the market administrator discloses the original classification was incorrect.

§ 990.24 *Allocation of skim milk and butterfat classified.* (a) The pounds of skim milk remaining in each class after making the following computations each month with respect to the pool plant(s) of each handler, shall be the pounds of skim milk in such class allocated to the producer milk of such handler:

(1) Subtract from the total pounds of skim milk in each class, in series beginning with Class II milk, the pounds of skim milk in other source milk, received during the month in a form other than fluid milk products;

(2) Subtract from the remaining pounds of skim milk in each class in series beginning with Class II milk, the pounds of skim milk received during the month in other source milk in the form of fluid milk products from plants other than fully regulated plants under the provisions of another order issued pursuant to the act;

(3) During the months of July through September, subtract from the pounds of skim milk in Class II milk an amount equal to the remaining volume of skim milk in Class II milk or the product obtained by multiplying by 0.15 the pounds of skim milk in receipts of milk from producers, whichever is less;

(4) Subtract from the remaining pounds of skim milk in each class in series beginning with Class II milk the pounds of skim milk in bulk receipts of fluid milk products from fully regulated plants under the provisions of another order issued pursuant to the act;

(5) Subtract from the remaining pounds of skim milk in Class I milk the pounds of skim milk received during the month as exempt milk;

(6) Subtract from the remaining pounds of skim milk in Class I milk the pounds of skim milk in packaged fluid milk products received from fully regulated plants under the provisions of another order issued pursuant to the Act;

(7) Add to the remaining pounds of skim milk in Class II the pounds of skim milk subtracted pursuant to subparagraph (3) of this paragraph;

(8) Subtract from the remaining pounds of skim milk in Class II milk the pounds of skim milk contained in inventory of fluid milk products on hand at the beginning of the month: *Provided*, That if the pounds of skim milk in such inventory exceeds the remaining pounds of skim milk in Class II the balance shall be subtracted from the pounds of skim milk in Class I milk;

(9) Subtract from the remaining pounds of skim milk in each class in sequence beginning with Class I milk, the pounds of skim milk in: (i) Receipts of fluid milk products from the pool plants of other handlers not subject to a zone location differential, (ii) receipts of producer milk at the handler's pool plant(s) not subject to a zone location differential, (iii) receipts of producer milk at the handler's pool plant(s) to which a zone location is applicable, equal to the volume of skim milk in fluid milk products disposed of directly from such plant(s) as Class I milk outside the marketing area, (iv) receipts of fluid milk products from the pool plant of other handlers not previously assigned pursuant to subdivision (i) of this subparagraph, in the order of the nearness of the plants to Providence according to their zone locations, and (v) receipts of producer milk at the handler's pool plants not previously assigned pursuant to subdivision (iii) of this subparagraph in the order of the nearness of the plant to Providence according to their zone locations.

(10) Any remaining pounds of skim milk in each class not assigned shall be called "overage".

(b) Butterfat shall be allocated in accordance with the same procedure prescribed for skim milk in paragraph (a) of this section; and

(c) Add the pounds of skim milk and butterfat allocated to producer milk in each class, pursuant to paragraphs (a) and (b) of this section.

REPORTS, RECORDS AND FACILITIES

§ 990.30 *Reports of receipts and utilization.* On or before the 8th day after the end of each month each pool handler shall report for each of his pool plants for such month to the market administrator in the detail and on forms prescribed by the market administrator, as follows:

(a) The quantities of skim milk and butterfat contained in:

(1) The receipts of producer milk (including such handler's own farm production);

(2) The receipts of fluid milk products from other pool plants;

(3) The receipts of exempt milk;

(4) The receipts of other source milk;

(5) Inventories of fluid milk products on hand at the beginning and end of the month; and

(6) The utilization of all skim milk and butterfat required to be reported

pursuant to paragraph (a) of this section.

§ 990.31 *Other reports.* (a) Each nonpool handler shall make reports to the market administrator at such time and in such manner as the market administrator may prescribe.

(b) Each pool handler shall report to the market administrator in the detail and on forms prescribed by the market administrator as follows:

(1) Promptly after a producer moves from one farm to another, starts or resumes deliveries to any of a handler's pool plants, or starts delivering his milk to the handler's plant by tank truck, the handler shall file with the market administrator a report stating the producer's name and post office address, the date on which the change took place, and the farm and plant locations involved. The report shall also state, if known, the plant to which the producer had been delivering prior to starting or resuming deliveries;

(2) Promptly after the 5th consecutive day on which a producer has failed to deliver to any of a handler's pool plants, the handler shall file with the market administrator a report stating the producer's name and post office address, the date on which the last delivery was made, and the farm and plant locations involved. The report shall also state, if known, the reason for the producer's failure to continue deliveries;

(3) Subsequent to the 20th day after the end of the month, and within 5 days after the market administrator's request, his producer payroll for such month, which shall show for each producer:

(i) The daily and total pounds of milk delivered with the average butterfat test thereof; and

(ii) The net amount of such handler's payments to such producer with the prices, deductions, and charges involved.

(c) Each pool handler shall furnish each producer from whom he receives milk with information regarding the daily weight and composite butterfat test of the producer's milk as follows:

(1) Within 3 days after each day on which he receives milk from the producer, the handler shall give the producer written notice of the daily quantity so received;

(2) Within 7 days after the end of any sampling period for which the composite butterfat test of the producer's milk was determined, the handler shall give the producer written notice of such composite test.

§ 990.32 *Records and facilities.* Each handler shall maintain and make available to the market administrator during the usual hours of business such accounts and records of his operations together with such facilities as are necessary for the market administrator to verify or establish the correct data for each month with respect to:

(a) The information contained in reports submitted in accordance with this order, and

(b) The weights and tests for butterfat and other content of all milk and milk products handled.

§ 990.33 *Retention of records.* All books and records required under this order to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the calendar month to which such books and records pertain: *Provided*, That if within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, until further written notification from the market administrator. The market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

MINIMUM PRICES

§ 990.40 *Class prices.* Subject to the provisions of § 990.42 each pool handler shall pay, at the time and in the manner set forth in § 990.60 for each hundredweight of milk received at his pool plant(s) during the month from producers or an association of producers not less than the following price per hundredweight for the respective quantities of milk in each class computed pursuant to § 990.24:

(a) *Class I price.* The Class I price shall be the New England basic Class I price per hundredweight determined pursuant to § 990.41 plus 61 cents.

(b) *Class II price.* The Class II price per hundredweight shall be determined for each month as follows:

(1) Subtract 52.5 cents from the weighted average price per 40-quart can of 40 percent bottling quality cream f. o. b. Boston, as reported by the United States Department of Agriculture for the month, divide the remainder by 33, multiply by 0.98, and multiply the result by 3.7

(2) Multiply by 7.85 the simple average of the prices per pound of roller process and spray process nonfat dry milk solids for human consumption, in carlots, f. o. b. Chicago area manufacturing plants, as reported by the United States Department of Agriculture for the period from the 26th day of the preceding month through the 25th day of the month during which such milk is delivered;

(3) Add the results obtained in subparagraphs (1) and (2) of this paragraph, and from the sum subtract the amount shown below for the applicable month. Subject to subparagraph (4) of this paragraph, the result is the Class II price per hundredweight for producer milk received at plants located not more than 100 miles from Providence.

Month:	*Amount*
January and February	$0.612
March and April	0.732
May and June	0.792
July	0.732
August and September	0.672
October, November, and December	0.612

(4) For each month in which the cream price, as described in subparagraph (1) of this paragraph, is reported, and for each month in which the amount determined pursuant to this subparagraph is greater than the amount computed pursuant to subparagraph (3) of this paragraph the amount determined pursuant to this subparagraph shall be the Class II price per hundredweight of milk received from producers:

(i) Divide the average price for milk for manufacturing purposes, f. o. b. plants United States as reported on a preliminary basis by the United States Department of Agriculture for the month, by the average butterfat test of such milk and multiply by 3.7;

(ii) Adjust the result obtained in subdivision (i) of this subparagraph by the amount shown below for the applicable month:

Month:	*Amount*
January	+$0.168
February	+0.178
March	+0.008
April	−0.062
May	−0.062
June	−0.062
July	+0.138
August	+0.228

December	+0.228

§ 990.41 *Computation of New England basic Class I price.* The New England basic Class I price per hundredweight of milk containing 3.7 percent butterfat shall be determined for each month pursuant to this section. The latest reported figures available to the market administrator on the 25th day of the preceding month shall be used in making the following computations, except that if the 25th day of the preceding month falls on a Sunday or legal holiday the latest figures available on the next succeeding work day shall be used.

(a) Compute the economic index as follows:

(1) Divide by 1.143 the monthly wholesale price index for all commodities as reported by the Bureau of Labor Statistics, United States Department of Labor, with the years 1947–49 as the base period;

(2) Using the data on per capita personal income, by States and regions, as published by the United States Department of Commerce, establish a "New England adjustment percentage" by computing the current percentage relationship of New England per capita personal income to per capita personal income in continental United States. Multiply by the New England adjustment percentage the quarterly figure showing the current annual rate of per capita disposable personal income in the United States as released by the United States Department of Commerce or the Council of Economic Advisers to the President. Divide the result by 15.34 to determine an index of per capita disposable personal income in New England;

(3) Multiply by 20 the average price per 100 pounds paid by farmers in the New England region for all mixed dairy feed of less than 29 percent protein content as reported by the United States Department of Agriculture for the month and divide the result by 0.884 to determine the dairy ration index. Compute the average, weighted by the indicated factors, of the following farm wage rates reported for the New England region by the United States Department of Agriculture: Rate per month with board and room, 1; rate per month with house, 1; rate per week with board or room, 4.33; rate per week without board and room, 4.33; and the rate per day without board or room, 26. Divide the average wage rate so computed by 1.458 to determine the wage rate index. Multiply the dairy ration index by 0.6 and the wage rate index by 0.4 and combine the two results to determine the grain-labor cost index; and

(4) Divide by 3 the sum of the wholesale price index, the index of per capita disposable income in New England, and the grain-labor cost index determined pursuant to this paragraph. The result shall be known as the economic index.

(b) The seasonal adjustment factor shall be the factor listed below for the month for which price is being computed.

Month:	*Seasonal adjustment factor*
January and February	1.04
March	1.00
April	.92
May and June	.88
July	.96
August	1.00
September	1.04
October, November and December	1.08

(c) Compute a New England basic Class I price index by multiplying the economic index determined pursuant to paragraph (a) of this section by the applicable seasonal adjustment factor pursuant to paragraph (b) of this section and multiplying the result by the supply-demand adjustment factor determined by the market administrator of Order No. 4 regulating the handling of milk in the Greater Boston marketing area pursuant to § 904.48 (b) of that order.

(d) The New England basic Class I price shall be as shown in the following table:

New England basic Class I price index × $0.05592		New England basic Class I price
At least—	But less than—	
[1] $4.20	$4.42	$4.31
4.42	4.64	4.53
4.64	4.86	4.75
4.86	5.08	4.97
5.08	5.30	5.19
5.30	5.52	5.41
5.52	5.74	5.63
5.74	5.96	5.85
5.96	6.18	6.07
6.18	[1] 6.40	6.29

[1] If the New England basic Class I price index times $0.05592 is less than $4.20 or is $6.40 or more, the New England basic Class I price shall be determined by extending the table at the indicated rate of extension.

(e) Notwithstanding the provisions of paragraphs (a) through (d) of this section, the New England basic Class I price for November or December of each year shall not be lower than such price for the immediately preceding month.

§ 990.42 *Location differentials to handlers.* In the case of receipts at plants located in excess of 100 miles from the intersection of U. S. highway routes 1 and 6 in Providence, Rhode Island, the class prices determined pursuant to § 990.40 shall be subject to zone price differential based upon the zone location of the plant at which the milk is received from producers.

(a) The zone location of each plant shall be determined by the market administrator and shall be based upon highway mileage distance as determined by use of the appropriate State maps contained in Mileage Guide No. 6, and revisions thereof, issued by Household Goods Carriers' Bureau, Agent, Washington, D. C. The distance shall be the lowest highway mileage between Providence and the named point on the map which is nearest to the plant, over roads designated thereon as paved, first-class, all-weather roads. In the event that the named point is not located on a through first-class road, such other roads shall be used to reach a through first-class road as will result in the lowest highway mileage to Providence, except that such other roads shall not be used for a distance of more than 15 miles if it is otherwise possible to connect with a through first-class road. In any instance in which the map does not clearly show the mileage between points on a road, the mileage used shall be the mileage as determined by the highway authority for the State in which the road is located.

(b) The zone price differentials for each plant shall be those applicable to its zone location as shown in the following table.

PLANT ZONE PRICE DIFFERENTIALS

A Distance to Providence (miles)	B Zone	C Class I and blended price differentials (cents per hundredweight)	D Class II price differentials (cents per hundredweight)
101 to 110	11	−42.0	−4.5
111 to 120	12	−43.2	−4.5
121 to 130	13	−44.4	−4.5
131 to 140	14	−45.6	−4.5
141 to 150	15	−46.8	−4.5
151 to 160	16	−48.0	−6.0
161 to 170	17	−49.2	−6.0
171 to 180	18	−50.4	−6.0
181 to 190	19	−51.6	−6.0
191 to 200	20	−52.8	−6.0
201 to 210	21	−54.0	−7.0
211 to 220	22	−55.0	−7.0
221 to 230	23	−56.0	−7.0
231 to 240	24	−57.0	−7.0
241 to 250	25	−58.0	−7.0
251 to 260	26	−59.0	−8.0
261 to 270	27	−60.0	−8.0
271 to 280	28	−61.0	−8.0
281 to 290	29	−62.0	−8.0
291 to 300	30	−63.0	−8.0
301 and over	31 and over [1]		−8.0

[1] Class I and blended price differentials applicable to plants located more than 300 miles from Providence shall be obtained by extending the table at the rate of 1 cent for each additional 10 miles, except that in no event shall the Class I or blended price at any zone be less than the Class II price for the month for plants in such zone.

§ 990.43 *Use of equivalent factors in formulas.* If for any reason a price, index, or wage rate specified by this order for use in computing class prices and for other purposes is not reported or published in the manner described in this order, the market administrator shall use a price, index, or wage rate determined by the Secretary to be equivalent to or comparable with the factor which is specified.

APPLICATION OF PROVISIONS

§ 990.45 *Producer-handlers.* Sections 990.20 through 990.24, 990.40 through 990.43, 990.50 and 990.51, and 990.60 through 990.70 shall not apply to a producer-handler.

§ 990.46 *Payments on other source milk.* Within 16 days after the end of each month handlers shall make payments to producers through the producer-settlement fund as follows:

(a) Each pool handler who received other source milk which is allocated to Class I pursuant to § 990.24 (a) (1) shall make payment on the quantity so allocated at the difference between the Class I price and the Class II price applicable at Providence as computed pursuant to § 990.40.

(b) Each pool handler who received other source milk which is allocated to Class I pursuant to § 990.24 (a) (2) shall make payment on the quantity so allocated as follows:

(1) On other source milk received at a pool plant from a nonpool plant located in Maine, the payment shall be at the difference between the Class I price pursuant to § 990.40 (a) applicable at the zone of the nonpool plant and the lesser of either the simple average for the month of the lowest minimum semimonthly prices for Class II milk containing 3.7 percent butterfat which are established by the Main Milk Commission for the market in which such nonpool plant is located or the Class II price determined pursuant to § 990.40 (b) applicable at the zone of such plant;

(2) Except as provided in subparagraph (1) of this paragraph, the payment on other source milk received at a pool plant from a nonpool plant shall be at the difference between the Class I and Class II price computed pursuant to § 990.40 applicable at the zone of the nonpool plant;

(3) For the purposes of this paragraph, other source milk received from dairy farmers for other markets shall be considered as received from the nonpool plant to which they ordinarily delivered.

(c) Each pool handler who receives other source milk in the form of bulk skim milk from a New York order pool plant which milk was classified and priced as other than Class I pursuant to such order and is allocated to Class I pursuant to § 990.24 (a) (4) shall make payment at the difference between the Class I price pursuant to § 990.40 (a) and the Class II price pursuant to § 990.40 (b) applicable at the zone location of the plant from which such skim milk was received on the volume of such milk so allocated.

(d) Each nonpool handler (except a buyer-handler) who disposes of fluid milk products on routes in the market-

ing area shall make payment at the difference between the Class I price and the Class II price applicable at the zone location of his plant on the amount of such disposition which is in excess of his receipts of pool milk and receipts of other source milk subject to the Class I pricing provisions of another order issued pursuant to the Act.

(e) Each buyer-handler shall make payment at the difference between the Class I price and the Class II price applicable at the zone location of his plant on the amount of his Class I utilization which is in excess of his receipts of pool milk and receipts of other source milk subject to the Class I pricing provisions of another order issued pursuant to the Act.

DETERMINATION OF BLENDED PRICE TO PRODUCERS

§ 990.50 *Computation of the obligation of each pool handler.* For each month, the market administrator shall compute the value of producer milk for each pool handler as follows:

(a) Multiply the quantity of producer milk in each class computed pursuant to § 990.24 by the applicable class price, and total the resulting amounts.

(b) Add the amount of any payments due from such handler pursuant to § 990.46 (a), (b), or (c).

(c) Add an amount computed by multiplying the amount of overage in each class computed pursuant to § 990.24 (a) (10) and (b) by the applicable class price adjusted by the butterfat differential computed pursuant to § 990.61 to reflect the butterfat content of the overage in such class.

(d) Add the amount computed by multiplying the difference between the applicable Class II price for the preceding month and the appropriate Class I price for the current month by the hundredweight of producer milk classified in Class II during the preceding month or the hundredweight of skim milk and butterfat subtracted from Class I milk pursuant to § 990.24 (a) (8) and (b) for the current month, whichever is less.

(e) Add or subtract, as the case may be, an amount necessary to correct errors discovered by the market administrator in the verification of reports of such handler of his receipts and utilization of skim and butterfat for previous months.

§ 990.51 *Computation of the basic blended price.* For each month the market administrator shall compute the basic blended price per hundredweight applicable at plants subject to no zone location differential as follows:

(a) Combine into one total the net obligation computed pursuant to § 990.50 for all handlers who made reports prescribed in § 990.30 for the month and who were not in default of payments pursuant to §§ 990.60 and 990.65 for the preceding month.

(b) Deduct the amount of the plus differentials applicable pursuant to § 990.63 and add the amount of the minus differentials which are applicable pursuant to § 990.62.

(c) Add an amount equal to one-half of the unobligated balance on hand in the producer-settlement fund.

(d) Add the total amount of payments due pursuant to § 990.46 (d) and (e).

(e) Divide the resulting amount by the total hundredweight of producer milk included under paragraph (a) of this section.

(f) Subtract not less than 4 cents nor more than 5 cents. The result is the minimum blended price applicable for producer milk containing 3.7 percent butterfat received at plants to which no location differentials are applicable and such price shall be known as the basic blended price.

PAYMENTS

§ 990.60 *Time and method of payment for producer milk.* (a) Except as provided in paragraph (b) of this section, each handler shall make payment to each producer from whom milk is received during the month as follows:

(1) On or before the 5th day after the end of each month, an amount equal to not less than the Class II price for the previous month multiplied by the hundredweight of milk received from such producer during the first 15 days of such month: *Provided*, That for the first month of operation of this part, the price applicable under this subparagraph shall be the Boston Class II price for the previous month;

(2) On or before the 20th day after the end of each month, for the quantity of milk received during the month at not less than the basic blended price per hundredweight computed pursuant to § 990.51 subject to the differentials provided in §§ 990.61, 990.62, and 990.63 less payments made to such producer pursuant to subparagraph (1) of this paragraph and deductions authorized in writing by the producer: *Provided*, That if by such date such handler has not received full payment from the market administrator pursuant to § 990.66 for such milk, he may reduce pro rata his payment to producers by not more than the amount of such underpayment. Payment to producers shall be completed thereafter not later than the date for making payment pursuant to this paragraph next following after receipt of the balance due from the market administrator.

(b) In the case of an association of producers which the market administrator determines is authorized by its producer members to collect payment for their milk and which has so requested any handler in writing, such handler shall on or before the 2nd day prior to the date on which payments are due individual producers, pay the association for milk received during the month from the producer-members of such association so determined by the market administrator, an amount equal to not less than the total due such producer-members as determined pursuant to paragraph (a) of this section.

(c) In the case of a handler who purchases fluid milk products from an association of producers in its capacity as a handler, such handler shall on or before the 2nd day prior to the date on which payments are due individual producers pay such association for such milk products so received during the month from such association, not less than the value of skim milk and butterfat in such milk and milk products as classified pursuant to § 990.24 at the applicable class prices pursuant to § 990.40 and the butterfat differential pursuant to § 990.71.

§ 990.61 *Butterfat differential.* Each handler shall, in making payments to each producer or association of producers for milk received during the month, add for each one-tenth of 1 percent of average butterfat content above 3.7 percent, or deduct for each one-tenth of 1 percent of average butterfat content below 3.7 percent, an amount per hundredweight which shall be calculated by the market administrator as follows: Subtract 52.5 cents from the weighted average price per 40-quart can of 40 percent bottling quality cream, f. o. b. Boston, as reported by the United States Department of Agriculture for the period between the 16th day of the preceding month and the 15th day inclusive of the month during which such milk is delivered, and divide the remainder by 330. If the cream price described above is not reported as indicated the butterfat differential shall be determined by multiplying by 1.25 the average of the daily prices, using the midpoint of any range as one price, for Grade A (92-score) butter at wholesale in the New York market as reported for the period between the 16th day of the preceding month and the 15th day, inclusive, of the current month by the United States Department of Agriculture and dividing the result by 10.

§ 990.62 *Location differentials.* In making payments to producers pursuant to § 990.60 the blended price to be paid for producer milk received at the handler's pool plant(s) shall be subject to the differential set forth in column C of the table in § 990.42 (b).

§ 990.63 *Farm location differentials.* (a) In making payments for milk delivered by a producer whose farm is located in Connecticut or Rhode Island, or in any of the Massachusetts counties of Barnstable, Bristol, Dukes Nantucket, Plymouth, Norfolk, Suffolk or that part of Worcester or Middlesex south of the Massachusetts turnpike, there shall be added 46 cents per hundredweight unless such addition gives a result greater than the Class I price pursuant to §§ 990.40 (a) and 990.42 which is effective at the plant to which such milk is delivered, in which event there shall be added an amount which will give as a result such price.

(b) In making payments for milk delivered by a producer whose farm is located in the Massachusetts counties of Essex or in that part of Worcester or Middlesex north of the Massachusetts turnpike or in the New Hampshire towns of New Ipswich or Greenville, there shall be added 23 cents per hundredweight unless such addition gives a result greater than the Class I price pursuant to §§ 990.40 (a) and 990.42 which is effective at the plant to which such milk is delivered, in which event there shall be added an amount which will give as a result such price.

§ 990.64 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 990.46 (d) and (e), 990.65, 990.67, and 990.68 and out of which he shall make all payments pursuant to §§ 990.66, 990.67, and 990.68: *Provided*, That the market administrator shall offset any such payment due to any handler against payment due from such handler.

§ 990.65 *Payments to the producer-settlement fund.* On or before the 16th day after the end of each month, each handler, including an association of producers which is a handler, shall pay to the market administrator for payment to producers through the producer-settlement fund the amount by which the net pool obligation of such handler computed pursuant to § 990.50 is greater than the sum required to be paid his producers as determined by the application of the basic blended price computed pursuant to § 990.51 adjusted by the differentials applicable pursuant to §§ 990.62 and 990.63.

§ 990.66 *Payments out of the producer-settlement fund.* On or before the 18th day after the end of the month, the market administrator shall pay to each handler for payment to producers the amount by which the sum required to be paid his producers as determined by the application of the basic blended price computed pursuant to § 990.51 adjusted by the differentials applicable pursuant to §§ 990.62 and 990.63 is greater than the net pool obligation of such handler computed pursuant to § 990.50: *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds are available.

§ 990.67 *Errors in payment.* Whenever audit by the market administrator of a handler's reports, books, records or accounts discloses adjustments to be made, for any reason which result in moneys due:

(a) The market administrator from such handler.

(b) Such handler from the market administrator, or

(c) Any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount due and explain the basis of such adjustment and payment thereof shall be made on or before the next date for making payment set forth in the provision under which such error occurred.

§ 990.68 *Overdue accounts.* Any unpaid obligation of a handler or of the market administrator pursuant to §§ 990.46 and 990.64 through 990.70 shall be increased one-half of one percent on the first day of the month next following the due date of such obligation and on the first day of each month thereafter until such obligation is paid.

§ 990.69 *Marketing service*—(a) *Marketing service deduction—nonmembers of an association of producers.* In making payments to producers pursuant to § 990.60 (b), each handler shall, with respect to all milk delivered by each producer other than himself during each month, except as set forth in paragraph (b) of this section, deduct 5 cents per hundredweight, or such lesser amount as the market administrator shall determine to be sufficient, and shall, on or before the 20th day after the end of each month, pay such deductions to the market administrator. Such moneys shall be expended by the market administrator only in providing for market information, and for verification of weights, samples, and tests of milk delivered by, such producers. The market administrator may contract with an association or associations of producers for the furnishing of the whole or any part of such services to, or with respect to the milk delivered by, such producers.

(b) *Marketing service deduction—members of an association of producers.* In the case of producers who are members of an association of producers which is actually performing the services set forth in paragraph (a) of this section, each handler shall, in lieu of the deductions specified in paragraph (a), make such deductions from payments made pursuant to § 990.60 (b) as may be authorized by such producers and pay, on or before the 20th day after the end of each month, such deductions to such associations, accompanied by a statement showing the pounds of milk delivered by each producer from whom the deduction was made.

§ 990.70 *Payment of administrative expense.* As his pro rata share of the expense of administration of this part, each handler shall pay to the market administrator, on or before the 20th day after the end of the month, 5 cents per hundredweight, or such lesser amount as the Secretary may prescribe, as follows:

(a) Each pool handler shall make such payment with respect to all: (1) Receipts of producer milk, including such handler's own production; (2) receipts of exempt milk; and (3) except as provided in paragraph (c) of this section, other source milk in his plant which is classified as Class I.

(b) Except as provided in paragraph (c) of this section each buyer-handler shall make such payment with respect to other source milk in his plant which is classified as Class I and each nonpool handler, except a buyer-handler, shall make such payment with respect to other source milk which is disposed of as Class I milk on routes in the marketing area.

(c) In the case of other source milk received in the form of fluid milk products from a fully regulated plant under another Federal order the rate of payment applicable pursuant to paragraphs (a) and (b) of this section shall be the amount by which the rate of assessment under this order exceeds the rate of assessment applicable under the other Federal order.

§ 990.71 *Termination of obligations.* The provisions of this section shall apply to any obligation under this order for the payment of money irrespective of when such obligation arose.

(a) The obligation of any handler to pay money required to be paid under the terms of this order shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service on such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this order, to make available to the market administrator or his representatives all books and records required by this order to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this order to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this order shall terminate two years after the end of the month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the month during which the payment (including deduction or setoff by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files pursuant to section 8c (15) (A) of the act, a petition claiming such money.

MISCELLANEOUS PROVISIONS

§ 990.80 *Effective time.* The provisions of this part, or any amendments to its provisions, shall become effective at

such time as the Secretary may declare and shall continue in force until suspended or terminated pursuant to § 990.71.

§ 990.81 *Suspension or termination.* The Secretary may suspend or terminate this part or any provision thereof whenever he finds that it obstructs or does not tend to effectuate the declared policy of the act. This part shall, in any event, terminate whenever the provisions of the act authorizing it cease to be in effect.

§ 990.82 *Continuing obligations.* If, upon the suspension or termination of any or all provisions of this part, there are any obligations arising under it, the final accrual or ascertainment of which requires further acts by any person, such further acts shall be performed notwithstanding such suspension or termination.

§ 990.83 *Liquidation.* Upon the suspension or termination of any or all provisions of this part the market administrator, or such person as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office and dispose of all funds and property then in his possession or under his control together with claims for any funds which are unpaid or owing at the time of such suspension or termination. Any funds collected over and above the amount necessary to meet outstanding obligations and the expenses necessarily incurred by the market administrator or such person in liquidating and distributing such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

§ 990.84 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

§ 990.85 *Separability of provisions.* If any provision of this part, or its application to any person or circumstances is held invalid, the application of such provision and of the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

Issued at Washington, D. C., the 15th day of August 1958.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10778

AUTHORIZING THE APPOINTMENT OF WILLIAM K. HARRIS TO A COMPETITIVE POSITION WITHOUT COMPLIANCE WITH THE CIVIL SERVICE ACT AND RULES

By virtue of the authority vested in me by section 2 of the Civil Service Act of January 16, 1883 (22 Stat. 403, 404), I hereby authorize the career-conditional appointment of William K. Harris to a competitive position in the Department of the Navy without compliance with the competitive provisions of the Civil Service Act and Rules.

This order is recommended by the Secretary of the Navy.

EXECUTIVE ORDER 10779

DIRECTING FEDERAL AGENCIES TO COOPERATE WITH STATE AND LOCAL AUTHORITIES IN PREVENTING POLLUTION OF THE ATMOSPHERE

By virtue of the authority vested in me as President of the United States, and in furtherance of the policy expressed in section 1 of the act of July 14, 1955, 69 Stat. 322, of preserving and protecting the primary responsibilities and rights of the States and local governments in controlling air pollution, it is ordered as follows:

The heads of the departments, agencies, and independent establishments of the executive branch of the Government shall take such action as may be practicable and consistent with law, in cooperation with State and local authorities concerned with the control of air pollution, to insure the prevention or abatement of atmospheric pollution caused by or resulting from Federal activities, including industrial and manufacturing processes operated or controlled by the Federal Government and the destruction of foodstuffs or other materials by order, or under the supervision, of Federal regulatory authorities, in a manner consistent, so far as feasible, with programs authorized under State or local law pertaining to the preservation of the cleanliness of the atmosphere and applicable to the agencies of governmental bodies creating such law and to the public generally.

Chapter VIII—Commodity Stabilization Service (Sugar), Department of Agriculture

Subchapter G—Determination of Proportionate Shares

[Sugar Determination 850.76, as Amended, Supp. 10]

PART 850—DOMESTIC BEET SUGAR PRODUCING AREA

KANSAS FARM PROPORTIONATE SHARES FOR 1958 CROP

Pursuant to the provisions of the Determination of Proportionate Shares for Farms in the Domestic Beet Sugar Area, 1958 Crop (22 F. R. 8107, 8175, 9877; 23 F. R. 4325), the Agricultural Stabilization and Conservation Kansas State Committee has issued the bases and procedures for establishing individual farm proportionate shares from the allocation of 7,934 acres established for Kansas by the Determination. Copies of these bases and procedures are available for public inspection at the office of such Committee at the Wareham Building, 417 Humboldt Street, Manhattan, Kansas, and at the offices of the Agricultural Stabilization and Conservation Committees in the sugar beet producing counties of Kansas.

These bases and procedures incorporate the following:

§ 850.86 *Kansas*—(a) *Set-asides of acreage.* From the State allocation there are set aside 159 acres for use in establishing farm proportionate shares for new producers, 79 acres for adjusting individual farm proportionate shares under appeals, and 87 acres for adjusting initial farm proportionate shares.

(b) *Requests for proportionate shares.* A request for each farm proportionate share shall be filed at the local ASC County Office on Form SU–100, Request for Sugar Beet Proportionate Share, under the conditions, and on or before the closing date for such filing, provided in § 850.76. If a preliminary request for a tentative farm proportionate share is filed, a fully-completed Form SU–100 shall be filed by April 1, 1958. However, requests for proportionate shares may be accepted after such dates and shares may be established if the county committee determines that in any such case the farm operator was prevented from filing a completed Form SU–100 by such dates because of absence, illness or other reasons beyond his control.

(c) *Establishment of individual proportionate shares for old-producer farms*—(1) *Farm bases.* For each farm whose operator is a tenant with a personal accredited acreage record during at least one of the crop years 1955–57, the 1958 base shall be determined by applying to his personal accredited acreage record, or to the accredited acreage record of the land he will operate in 1958, whichever is more favorable, a weighting of 25 percent to the average accredited acreage for the crop years 1953–57, as a measure of past production, and a weighting of 75 percent to the average accredited acreage for the crop years 1955–57 as a measure of ability to produce: *Provided*, That the base for a farm operated by a tenant having a personal accredited acreage record for any of the 1955, 1956 or 1957 crop years, under a new-producer share shall equal the most recent accredited acreage for the farm most recently operated by him during such years, but not in excess of the most-recently established share for such farm. If the operator is the owner of the farm, or is a tenant without a personal accredited acreage record in at least one of the years 1955–57, and the farm has an accredited acreage record during at least one of such years, the 1958 base for such farm shall be determined by applying the above-specified weightings to the accredited acreage record of the farm, except that, in cases where the accredited acreage record for the farm is used as the personal history for a tenant in determining the base for another farm in 1958, the weightings will be applied only to that part of the accredited acreage record corresponding to the farm owner's share of the sugar beet crops produced on such farm in the base period.

(2) *Initial proportionate shares.* The total of individual farm bases for old-producer farms, as established pursuant to paragraph (d) of this section, is less than the area allotment minus the set-asides of acreage established under paragraph (b) of this section. Accordingly, initial proportionate shares shall be established as follows: For farms for which the respective requested acreages are equal to or less than their farm bases, the initial shares shall coincide with the requested acreages; and for all other farms, initial shares shall be computed by prorating to such farms in accordance with their respective bases, the are allotment less the prescribed set-asides and the total of the initial shares established in accordance with the preceding part of this subparagraph.

(3) *Adjustments in initial shares.* Within the acreage available from the set-aside for adjustments, and from acreage of initial shares in excess of requested acreages, adjustments shall be made in initial farm proportionate shares for old producers so as to establish a proportionate share for each farm which is fair and equitable as compared with proportionate shares for all other farms in the area by taking into consideration the availability and suitability of land, area of available fields, availability of irrigation water, adequacy of drainage, availability of production and marketing facilities, and the production experience of the operator.

(d) *Establishment of individual proportionate shares for new-producer farms.* Within the acreage set aside for new producers, proportionate shares shall be established in an equitable manner for farms to be operated during the 1958-crop year by new producers (as defined in § 850.76) at the minimum level determined by the State Committee under usual circumstances to be economically feasible to plant to sugar beets (30 acres) by taking into consideration the availability and suitability of land, area of available fields, availability of irrigation water, adequacy of drainage, availability of production and marketing facilities and the production experience of the operator.

(e) *Adjustments under appeals.* Within the acreage set aside for making adjustments under appeals and any other acreage remaining unused, adjustments shall be made in proportionate shares under appeals to establish fair and equitable farm shares in accordance with the provisions of § 850.76 applicable to appeals.

(f) *Adjustments because of unused acreage.* To the extent of the acreage available within the allotment from underplanting and failure to plant, and unused acreage from set-asides and other sources, adjustments shall be made in farm proportionate shares during the 1958-crop season. In addition any acreage released prior to March 15, 1958, shall be used to increase the shares of small producers (less-than-average for the area) to the extent determined by the State Committee to be necessary to provide for the more efficient operation of such farms. In increasing such small-producer shares, the County Committee shall take into consideration the size of beet operations for small farms in the area, the type of operation in the area, and other pertinent factors relating to efficient sugar beet production.

(g) *Notification of farm operators.* The farm operator shall be notified concerning the proportionate share established for his farm on Form SU–103, Notice of Farm Proportionate Share—1958 Sugar Beet Crop, even if the acreage established is "none." In each case of approved adjustment, whether resulting from the release of acreage, the redistribution of unused acreage, appeals,

or the reconstitution of the farm, the farm operator shall be notified regarding the adjusted proportionate share on a Form SU–103–A or other similar written notice. For each tentative proportionate share which is established, the person filing the request for such share shall be notified on a Form SU–103–B specifying that such tentative share does not constitute a farm proportionate share for the purpose of payment under the Sugar Act of 1948, as amended.

(h) *Determination provisions prevail.* The bases and procedures set forth in this section are issued in accordance with and subject to the provisions of § 850.76.

STATEMENT OF BASES AND CONSIDERATIONS

This supplement sets forth the bases and procedures established by the Agricultural Stabilization and Conservation Kansas State Committee for determining farm proportionate shares in Kansas in accordance with the determination of proportionate shares for the 1958 crop of sugar beets, as issued by the Secretary of Agriculture.

Kansas constitutes one proportionate share area. An advisory committee, including grower and processor representatives, is utilized. In establishing proportionate shares for old producers, the factors of "past production" and "ability to produce" sugar beets are recognized. The procedure for establishing farm shares for new producers meets the related requirements of § 850.76.

The bases and procedures for making adjustments in initial proportionate shares and for adjusting shares subsequently because of unused acreage and appeals are designed to provide a fair and equitable proportionate share for each farm of the total acreage of sugar beets required to enable the domestic beet sugar area to meet its quota and provide a normal carryover inventory.

(Sec. 403, 61 Stat. 921; 7 U. S. C. 1153. Interprets or applies secs. 301, 302, 61 Stat. 929, 930, as amended; 7 U. S. C. 1131, 1132)

Dated: July 17, 1958.

[SEAL] RODNEY K. MCCAMMON,
Chairman, Agricultural Stabilization and Conservation Kansas State Committee.

Approved: August 14, 1958.

LAWRENCE MYERS,
Director, Sugar Division, Commodity Stabilization Service.
